THE LONDON AND CHINA EXPRESS.

PUBLISHED on the departure of the Mails *via* Marseilles on the 10th, 17th, and 26th, contains a Summary of European, American, and General News; Commercial and Shipping Reports, and Special notices of Trade with the FAR EAST.

Subscription 54s. per annum, including Postage. Export Supplement 12s. extra.

The London & China Telegraph.

LONDON, SATURDAY, APRIL 13, 1867.

TELEGRAPHIC COMMUNICATION WITH THE EAST.

"STALE news!" was doubtless the disgusted cry of many a reader of the day before yesterday's *Times* on coming to the telegram headed "CHINA AND JAPAN: Shanghai, Feb. 23." And a very natural expression too, albeit a little illogical, inasmuch as that which is stale cannot by any possibility be "news" in the proper sense of the term. Our letters and papers of the above date were delivered just a week previously; and yet this useless telegram is gravely inserted among other gems of "Latest Intelligence" in *The Times*, with a degree of stupidity that would be laughable were it not so annoying. Does the Editor consider that his China telegrams, like port, improve with age? Or does he regard them (by reason of their extreme rarity) as pearls of great price, that must not be lost to the world for any vulgar considerations of mere utility? Even when published in advance of the mail they are sometimes so vague and unintelligible as to be almost valueless, but when, as in many recent instances they are hopelessly behind-hand, it is surely a work of supererogation to print them at all. The skilful "summarising" of news is almost worthy of being classed among the fine arts. Some favoured individuals have the gift of being able to convey a lucid exposition of any given series of facts in a few terse, well-constructed sentences; but the large majority of telegram-mongers only puzzle us with strings of bald, disjointed phrases that are far more confusing than instructive. Their brevity is not the soul of wit, nor of common sense either. For instance, the daily *précis* of intelligence from New York has from the first been so meagre and unsatisfying that the general public—who do not use the Atlantic cable for private messages—have long since voted it a nuisance, and we fear the China telegrams *via* Galle will soon be included in the same category.

A few months ago we observed with much satisfaction a considerable improvement in the working of the Indian lines. This unfortunately was only of temporary duration, and the system appears of late to have fallen into a more hopeless state of disorganisation than ever. As far as communication with China is concerned, this would not so much matter if the Trans-Mongolian line were available throughout the year; but unluckily a long interruption occurred on the Indian lines before the other route was opened for the summer, and "curses not loud but deep" were heard among the China firms in consequence. The matter appears now however to have engaged the serious attention of Government, and a Treasury Minute just laid before Parliament holds out such substantial encouragement to companies as will doubtless hasten the construction of new and more efficient lines. One link in the long chain here recommended by the Treasury—that from Rangoon to Singapore—is already being taken in hand by the Eastern Asia Telegraph Company, and will we trust soon be actively commenced. With the warm support that will surely be accorded to this and kindred undertakings by those who of late have felt so keenly the inefficiency of the present system, there is surely no reason why this first project should not be speedily carried to a successful completion; and other portions will follow in due course. The Treasury Minute above referred to is to this effect.—

"While the Board would not consider itself justified in offering a subsidy or guarantee to any company for establishing lines of telegraphic communication, they would be disposed to encourage companies willing to lay down lines of which the Government approve, by causing surveys to be made of the proposed route, and rendering assistance by Her Majesty's vessels in laying the cables, and also by using the good offices of the Government with foreign Governments upon whose territories it may be requisite to land cables. The Government would stipulate for priority in the despatch of messages, and for the power in certain contingencies of assuming possession of the line upon payment of proper compensation. The lines which the Government consider most called for are these:—Falmouth to Gibraltar, Gibraltar to Malta, Egypt to Aden and Kurrachee, Rangoon to Singapore, Singapore or Malacca, *via* Java, to Australia, Singapore to Shanghai, *via* Hong Kong, Shanghai to Yokohama."

THE CHINA BRANCH OF THE ASIATIC SOCIETY.

THE general ignorance which prevails with regard to the most important questions of Chinese history, philosophy, and archeology is a standing reproof to the literary and scientific men of the present day. With the exception of one or two French Orientalists and an equally limited number of English scholars, no one actually knows anything reliable which bears on the history of the oldest civilisation in the world. Apart from the attraction which a hitherto unexplored subject usually has for literary investigators, the study of Chinese philosophy and history might have an important influence upon the measures adopted by European politicians in the Celestial Empire; for among all the nations of the globe it can be said of China alone, that her beliefs and her system of government are as hereditary as her throne. Such as the fathers were, such also are the children—neither better nor wiser, neither more refined nor more degraded. The theories which underlie the Chinese statecraft of to-day are set forth at length by CONFUCIUS and the other ancient sages; their successors have neither added to the result of their investigations nor subtracted from them. Hence we assume the practical importance to diplomatists of an acquaintance with Chinese character, as influenced by the scholastic philosophy of the empire. But the investigations we have indicated would be valuable for other reasons did they only increase our stock of facts, and enable us to place side by side the written, carved, or stamped records of China's former history, and those of the ancient Asiatic and European monarchies. English, French, and American scholars might, it would at first sight seem, depend upon residents in China for information upon all the subjects of use or interest presented to the inquirer by the boundless field at the disposal of every merchant, man of science, or missionary. But such expectations if ever formed have been doomed to disappointment. The cares of the world, the hurry of business, the "deceitfulness of riches," have each had their share in keeping men's eyes averted from the less immediately engrossing objects of inquiry. So long as money was readily obtainable, the merchants only care was to increase his store, the man of science (represented by a few physicians) had also a large stake in the material prosperity of the foreign communities, and had little time to devote to higher pursuits, and the missionary of a certain class was unable or unwilling to divert his attention from the solution of the difficult problem of the conversion of the Chinese. Some two or three however have made valuable contributions to our stores of Chinese knowledge, but these scattered labourers give us in fact no more than gleanings when we desire a full harvest. Dispersed here and there in fugitive essays we occasionally find hints at the antiquities of the Empire, at its history, its numismatology, or its science, but we look in vain for any definite information upon these and other points of equal interest.

When, many years ago, the China Branch of the Royal Asiatic Society was formed we hoped for some new lights, and were disappointed. We got, it is true, many translations interesting in themselves; we occasionally found interesting illustrations of life and manners, but no substantial increase to our knowledge. In process of time the "China Branch" established at Hong Kong perished of inanition, and the "North China Branch," established at Shanghai, reigned in its stead. The same thing happened. A few numbers of transactions were published, but no one of them could for a moment compare with any reasonably well-digested article taken at random from the magazine contributions of writers on Indian, Persian, or Hebrew subjects. It was no wonder, therefore, that the circulation of the North China Branch's transactions was limited to Shanghai, and soon it in turn expired. Again, in 1864, an attempt was made to re-organise the society which then had almost sunk into oblivion; and that attempt was and has continued to be successful, so far at least as the periodical production of papers upon various subjects goes. Unfortunately, we have to consider quality as well as quantity when we attempt to estimate the success of a society by considering its publications. Tried

Digitized by Google

by this test we fear the contributions to the existent North China Branch are no better than those which in former days led to the successive suspensions of vitality from which the China representative of the Royal Asiatic Society has suffered. Looking upon them as magazine articles, they are unexceptionable; the style adopted is dignified, and occasionally elegant, and the facts related are, so far as they go, worth recording. But we want more than mere superficial criticism; we want to get at the reason of things without dilating for an unnecessary length of time upon facts which an unbroken series of popular writers have in turn recorded and enlarged upon. We therefore would suggest to the members of the North China Branch of the Asiatic Society that they, as representing the Sinologues of the Western World, should do something original and add a contribution however small to the common stock of our information. As we run over the list of members we recognise several names already favourably known in various spheres of life, and amongst the remainder there are perhaps many men of ability whose reputation is as yet merely local. Each candidate for election to a learned body trusts to obtain some advantage from his projected connection; he should also recollect that if he be successful in obtaining admission as a member he incurs the responsibility of a debt due to those who look for information to the corporation which he has joined. The history of China demands early elucidation. We trust that it will gain the attention of some of those members of the Shanghai Society whose acquaintance with the language qualifies them to undertake the necessary investigation.

MERCHANTS and others engaged in correspondence with China will be glad to learn that the hitherto stringent regulations regarding insufficiently-stamped letters are now relaxed. Owing to strong representations recently made by ourselves and other interested parties, the Postmaster-General has issued an official notification to the effect that "Letters for China and Japan insufficiently stamped, or wholly unstamped, will in future be sent to their destination, charged with the deficiency and one rate of postage extra as a fine."

Memorial of James Henderson, M.D., F.R.S.E., Medical Missionary to China. London: Nisbet and Co.—This is the title of a neat and unpretending little volume just published, which contains brief notices of the life of the late Doctor Henderson of Shanghai, whose name must be familiar to many of our readers. To those who have watched the progress of European relations with the Chinese, the influence of the missionaries and more especially of the medical missionaries, has always appeared to be one of the most powerful means at our disposal for introducing the light of Western civilisation among the semi-barbarians of the Celestial Empire. But more than this, the medical missionary possesses opportunities of conciliating national prejudices and of removing from the national mind those preconceived notions which diplomatists, merchants and missionaries have daily to encounter. In the work which a medical man does there is nothing to cavil at, inasmuch as there is no possibility of attributing ulterior motives to one who goes about doing good without fee or reward. The simplest operations of surgery seem little short of miraculous to those who are left beyond the reach of cure by their own physicians; and the foreign surgeon appears therefore gifted with almost supernatural power when he restores light to the blind, power to the paralytic, and snatches from the jaws of death those who are ready to perish. Thus a vast influence for good, albeit a silent and unobtrusive influence, is exercised by those who devote themselves to the cure of disease among the natives of China. The *Memorials* which have suggested these remarks tell the tale of what one energetic surgeon was able to accomplish within a few brief years. We have therein the story of his difficulties and discouragements, followed by the equally instructive recital of his subsequent triumphs. This little book is therefore a *bona fide* accession to the history of foreign progress in China, and, as such, is well entitled to the attention of that section of the public which is interested in Chinese matters. The narrative of Dr. Henderson's life is, however, instructive and valuable on more general grounds. We are told by what extraordinary exertions the subject of the memoir raised himself from the very humblest position among the Highland peasantry to one of the highest ranks in the medical profession. At the age of eighteen Mr. Henderson was ignorant of the ordinary rudiments of an English education; but before he had arrived at his twenty-fifth year, when he began the study of medicine, he had mastered all the literary and scientific courses necessary as a preliminary to entering the College of Surgeons. This he did in spite of the daily distractions of his humble situation, and of course it was necessary for him to practise the most rigid economy in order to accumulate a little fund for the prosecution of his future studies. For four years he devoted himself to medicine and surgery under the superintendence of the Edinburgh professors, although for the greater part of that period, if not for the whole of it, he was compelled to limit his personal expenditure to half-a-crown per week. We need not enter into further particulars. The *Memorials* enumerate the trials and troubles of these early years; but beside them is placed the rich reward gained after almost incalculable toil and devotion. We have no doubt that the volume before us will be eagerly read by many young men who are now discouraged by difficulties apparently insurmountable, but who in order to reach the goal of their ambition must follow the road trod by Henderson, while at the same time they are sustained by his example. The motto *Fortiter, Fideliter, Feliciter*, might be adopted for the *Memorials* as it was undoubtedly exemplified in the life of their subject. We have already alluded to the neatness of the book so far as externals go; we need only add that the person who has been entrusted with the arrangement and preparation of the various materials employed has performed the task with taste and judgment.

M. Girette, one of the directors of the Messageries Imperiales Company, and Commissioner for China in the Universal Exhibition, has published a work entitled *La Civilisation et le Cholera.* He describes cholera in a medical point of view, and shows how it is spread. He then examines the means for combating it, and his conclusion is that sanitary improvements must be adopted in towns, and that when a visitation of it comes the people must not give way to foolish panic; but that it is perfectly useless to maintain lazarettos, and to adopt measures against ships or persons arriving from cholera-visited countries. Not only are these measures, in his opinion, of no practical value, but they cause a serious perturbation in commerce. He adds that as it is not in Marseilles or Trieste, or any other seaport that the fell malady can be opposed, it must be attacked in the jungles of Asia, in which it arises. "Some persons," he says in his preface, and these lines sum up his book, "are of opinion that we can be guaranteed against cholera by restrictions on commerce. But I firmly believe that the development of communications, the progress of industry and of trade; in a word, civilisation carrying salubrity into healthy regions, are the surest means of combating cholera. It was in Egypt that European labour vanquished the plague!" The book of M. Girette displays considerable ability, and is well worth the attention not only of medical men and sanitary reformers, but of all who are interested in the trade between Europe and the East.

Another very instructive work is *Railways, Steamers, and Telegraphs;* by George Todd. (W. and R. Chambers.) This book present in a succinct form the history of steam and electricity during the past fifty years. Although it is a bare record of facts, it is by no means dry, but on the contrary is entertaining. Railways, steamers, and electric telegraphs are now daily indispensables, yet half a century ago they were scarcely in embryo. The record of their remarkable development is an interesting and instructive story, and is well told by Mr. Todd. A lively book of travel and adventure is entitled. *Half Round the Old World; being some Account of a Tour in Russia, the Caucasus, Persia, and Turkey,* 1865-66'; by Viscount Pollington, M.A. (Moxon and Co.) Lord Pollington has put a girdle half round the world, as light and fleeting as that of Ariel. We do not know to what to liken his travel-pictures except to a series of soap-bubbles, light and bright, which burst with the handling and leave no trace behind. A difficult journey has been made by Lord Pollington and a friend, a journey with some hard, uncomfortable bits in it, but all manfully, goodhumouredly and successfully accomplished. Our author left London "on the 14th of July in the year of grace 1865." He went to Petersburg, to Moscow, to Nijni, and down the Volga to Astrakhan, then by steamer to Petrovskoi, and so by Telega to Piatigorsk, Tiflis and Julfa, then by horse to Tehran, Shiraz, Bushire, by steamer to Baghdad, and by horse again to Samsum, and so to Constantinople, where, on the 12th of April, 1866, farewell is said to the reader. Lord Pollington's pages are, he tells us, "an almost exact transcription" of his diary, and no doubt faithfully represent his impressions.

Digitized by Google

The following is a summary of other important books that have appeared during the month :—

In Literature, Science, and Art we have Mr. Collingwood Bruce's splendid quarto volume on the subject of the Roman Wall, which is illustrated with no less than six hundred woodcuts, maps, and tinted lithographic drawings; Mr. James Fergusson publishes (as a sequel to his well-known "Handbook of Architecture") a *History of the Modern Styles of Architecture; A Home Reserve Army, The More Economic Tenure of India, and Cavalry as Affected by Breech-loading Arms*, by Henry M. Havelock; and the first volume of a *Handbook to the Popular Poetical and Dramatic Literature of Great Britain*, extending from the Invention of Printing to the Restoration, by W. C. Hazlitt. We have also a volume entitled *A Few Stray Thoughts on Shakspeare*, by Thomas Howell, and another on *The Theory of Business*, by Mr. John Laing, which treats of City matters in an instructive as well as amusing way. f

In History and Biography we have an historical review and criticism o Sir Charles Wood's administration of Indian affairs, from 1859 to 1866. by Algernon West—in geography and travel, a volume entitled *Australia as It Is*, by a Clergyman thirteen years resident in New South Wales; *Life's Work as It Is, or the Emigrant's Home in Australia*, by a Colonist; *The North-West Peninsula of Iceland*, being the journal of a tour in Iceland in the spring and summer of 1862, by C. W. Shepherd; and we must, we suppose, include under this head Mrs. Emmeline Lott's work on Egyptian life, entitled *Nights in the Harem*, which, however, is, in reality, but a mere catchpenny title to a very poor book. A year ago Mrs. (or Madame) Lott produced a singularly indiscreet book, which she called "Harem Life in Egypt and Constantinople." She described herself as former governess to the Grand Pasha Ibrahim, son of Ismail Pasha, and her volumes were designed to "show up" the squalor, finery, and immorality of the viceroy's family. Show that family up they did, in a way which excited a certain curiosity on the part of our light-reading public, and hence the work had what is called a trade success. A moral success, indeed even a literary success, it could not claim, and we are therefore not surprised to find that, although the writer openly cites her previous favour as a reason for her present appearance in print, the new venture is issued from the counter of a different house. Besides these, Mr. Vizetelly relates again the famous story of Marie Antoinette and the Diamond Necklace, but with some new particulars from hitherto unpublished documents; and Mr. Hamilton Hume follows up his enthusiastic magazine sketches of Governor Eyre by a one-volume biography of the late Governor of Jamaica, with a portrait.

In Geography and Travel the Marquis of Lorne publishes a narrative of a recent Trip to the Tropics, and Home through America: the author was present in Jamaica during the riot at Morant Bay and the subsequent military operations, and gives his experiences and impressions of those events; and Mrs. H. N. Ferrybridge publishes a series of sketches of Naples and Sicily under the Bourbons.

In Fiction we have *Seventy-five Brooke-street*, a story, by Percy Fitzgerald, reprinted from the *Dublin University Magazine*, 3 vols.; also *Melchior Gorles*, a tale of modern mesmerism, by Henry Aitchenbie (an evident play upon the author's initials), 3 vols.; *On the Heights*, by the celebrated German story-writer, Berthold Auerbach, translated by F. E. Bunnett, 3 vols.; *Off the Line*, by Lady Charles Thynne, 2 vols.; and *Sir Cyrus of Stoneycleft*, by Mrs. Wood. The author of this last novel must not be confounded with Mrs. Henry Wood, the author of "East Lynne," and many other novels. Mrs. Wood has, however, quite enough talent to make her own name welcome if she would only be at the pains to take time and trouble over her books, but there is a lack of finish, a vacillation of purpose, and a feebleness of execution in the present novel which spoil what might have been made with a little more care into a good story. Under this head we have also Mr. Edmund Yates's *Black Sheep*, reprinted from *All the Year Round*, in 3 vols., a novel of a more romantic kind than his previous stories; Mr. Anthony Trollope publishes a 1st vol. of his *Last Chronicle of Barset*, which is continued in weekly numbers; we find also *The Sea Gull* (*La Gaviota*). from the Spanish, by the Hon. Augusta Bethell, 2 vols.; *Cometh up as a Flower*, an autobiography, 2 vols.; the *Dawn and the Object*, by Emma Davenport, 2 vols.; *Philo*, a Romance of Life in the first century, by J. Hamilton, 3 vols.; *Sir Hubert Marston*, by Sir Francis Vincent, 3 vols.; *My Son's Wife*, by the author of "Caste," 3 vols.; and *The Heir of Maberley*, by H. G. Starkey, 2 vols.

The first monthly part of *Cassell's Magazine* is now ready. It consists of 80 pages, double columns, cr. 4to, printed on fine toned paper, with 16 original illustrations. Among its contents are, the leading serial tale, entitled Anne Judge, Spinster, by the author of Grandmother's Money, &c.; Mrs. Malachite's Maxims, by Hain Friswell; The House in which the Plague Broke Out, by Walter Thornbury; The South-Sea Bubble, by Moy Thomas; The Lighthouse Keeper, a Story, by H. Savile Clarke; Waste of Coal, How to Prevent It, by W. B. Tegetmeier; A Child Love, an Episode of Last Valentine's Day; The Story of an Engraver, Sherwin and his Creditors, by Dutton Cook; Wilful Scrawlers, a Remonstrance, by John Hollingshead; Wigs and Human Hair, with a Word on Chignons, by Moy Thomas; Sir Leopold M'Clintock, by Godfrey Turner (with a portrait); Loan Societies, and People who Borrow, by Henry Timson; Fire and Life, a Story in Two Parts, by John Hollingshead; Engine-Drivers and their Ways; The Poor Man's Doctor, a Morning's Round, by Edward Copping; Living too Fast, by Hain Friswell; The Case of Sir Robert Tichborne, by Walter Thornbury; Ethel, a Poem, by H. Savile Clarke; Milly Lance, A Story. by Dutton Cook; the Sleeping Beauty; Mrs. Brown's Budget, a Story of a Teapot, by Arthur Sketchley; &c. The number contains a frontispiece, by J. D. Watson, printed on thick paper.

The new daily paper, *The Day*, has assumed its place as the exponent of "Constitutional Liberalism," or in other words, it is the organ of the so-called Adullamite party. A new Weekly Review called *The Chronicle* has also appeared, somewhat on the plan of the *Spectator*.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, APRIL 7.

After a very tiresome and extended debate the Budget of the War Department was carried by the Second Chamber of the States-General by 54 against 14 votes, and no alterations of much importance were made.

The discussions upon the financial Budget, short as they were, had no interest at all. There were no want of criticisms and observations, to which the Minister answered only by promises and declarations of his inability to fulfil the demands. His Budget was carried by 44 against 16 votes. Then the Budget for the Colonial Department was moved, and, as is always the case, a smart debate at once ensued, chiefly caused by the endeavours of the Minister to fence the principal question. He urged, on the first day of the debate, that the Ground-rent Bill for India was not yet ripe for discussion, and that it was necessary for the measurement of the grounds in India to be settled officially in consequence of that Bill. Strong objections were made against this plan, and, notwithstanding his thick and thin supporters, did all they could to favour this plan of the Minister, Mr. Trubranen was compelled to promise that the Bill should be discussed after the Budget, when the majority of the Chamber should second such a proposal. From the debates I gather the following particulars:—A Bill regulating the sugar cultivation will be brought before the members within a short time on the basis of the regulation of Mr. Fransen van de Putte, of 1863, viz., that a portion must be delivered to the State, and that the manufacturers may dispose *ad libitum* of the rest. The telegraph communication in Java is to be extended; a credit being asked for that purpose. With regard to the steam packet line between Java and Queensland, it is stated that the Government of Queensland is not able to grant a sufficient subsidy, and consequently the concession was not granted, notwithstanding that a credit of 100,000f. has already been approved of. As to the steam packet line between the Netherlands and Java, *via* the Cape of Good Hope, the Minister stated that he should enter in *pourpariers* with his colleague of the Marine Department.

About the Scheldt question there is no further news. We are still waiting for the official reports of the foreign engineers, the contents of which it is said will be favourable to our Government. In the meantime the works for damming up that river will be finished with the shortest possible delay; 1,600 men are busy now at work to effect this. It need not be added that public opinion in Belgium is more and more excited against us. A few days since a pamphlet was published in Brussels under the title—"*Guerre a la Hollande, Revision des Traites of* 1839, *par H. Pigneron.*" In the most animated words the writer advocates declaring war against the Netherlands, with the view of seizing Limburg and Luxemburg, as well as a part of Holland lying between the left shore of the Scheldt and the Belgian frontiers. What a pity that the police in Brussels have confiscated this little book.

The Prince of Orange started on the 28th of March for Paris, in order to be present at the opening of the Exhibition.

The First Chamber of the States-General will meet on the 9th inst. for the despatch of business.

A good deal of sensation has been created here by the report of the meeting of some Samarang traders, published by the Batavian papers. It was urged that all should be done that could be on behalf of the improvement of the Samarang harbour by the Government which was promised a great number of years since. It was said in the meeting that if this object could not be effected by ordinary means the trade ought to "claim" it. This word excited the anger of the *Dagblad* and the *fleur* of the Conservatives, and even Mr. Wintgens disapproved of the behaviour of the meeting in very strong words. The *Dagblad* insisted that these "Mynezleeren" should be expelled at once from the East Indies, as an example to those who should dare to promulgate such revolutionary plans. The Liberal papers defend these claims; they allege that the improvement of this harbour is a vital question for that town, and they say that the trade, after having waited so long in vain, after having paid extraordinary taxes for this improvement, must be forgiven for a hastily uttered ill-word.

The stormy weather that has prevailed here during the last few weeks caused many shipwrecks on our coast, and amongst them appear some East Indiamen. So many of the last-named ships have not been lost for several years, and in consequence the insurance companies have made so bad a business last year that the principal amongst them can only give a dividend of 1½ per cent. It is strongly urged in the papers that the premiums should be raised.

The *S. Gravenhage*, the first clipper packet for the transport of passengers for Java, will sail within a fortnight. She made her trial trip a few days ago, but was not very lucky, as the screw of her auxiliary engine was broken. Strong objections are made against her construction, and that 300 soldiers who will be transported by this ship is greatly disapproved. This is called an unlawful proceeding, because the prescriptions say that no new ship may be used as a troopship, and that no more soldiers may be embarked than 125 upon one ship. Such a corps will be transported by the *Noach*, which will leave our town on the 17th inst.

COMMERCIAL.

COFFEE.—The Trading Company announces its April auction, which will be held on the 24th, when 102,700 b. Java and Padang will be offered for sale. The market is inactive, notwithstanding the demand for home consumption has improved. The first-hand transactions include only 1,366 b. Padang, ex Brouwershaven, from 42½ to 46c.; 800 b. Macassar, ex Maria Adolina, Paré paré at secret prices; 560 b. Padang, ex Brouwershaven, from 42½ to 46½c.; and 1,284 b. African, ex Lodewyn, at 36c. Private stock, 79,855 b. Trading Company's stock, 410,395 b. Floating for the Company, 335,300 b., and 102,700 b. for private.

SUGAR (RAW).—The market is dull; since the last auction there has been no inquiry. The holders decline, however, to operate at the actual prices, so that the transactions are of little importance; they only include 1,500 Java at 1¼f. under the last auction value. The stock of raw sugar is 87,806,245 kilo.; the unsold stock of Java (Trading Company) comprises 48,529 kranjangs; private stock, 21,182 kranjangs.

Digitized by Google

RICE.—The market is very firm. 8,600 b. prime Java table, ex Passaroeang were sold at secret prices.

SPICES.—The market is unaltered. Nutmegs, No. 1, 88c.; No. 2, 79c., with much demand. There is some inquiry for mace, at 109c. for D, and 106c. for E.

	Nutmegs.	Mace.	Cloves.	Cinnamon.
Stock on warrants ...	4,810 casks	752 casks	3,075 casks	779 faro.
Unsold stock	301 „	155 „	168 „	983 „

TEA.—254 ¼-chests Java Souchong, trademark Nangoeng, ex Ramsay (bought in the last auction), were sold at 100 cents. On the 3rd of May will be offered for sale—7,168 ¼-ch., 1,106 ½-ch., 1,673 1-12 and 413 1-16 ch. Java, 139 ¼-ch. Souchong, 111 ¼-ch. Pecco. By the Netherlands India Trading Bank: 1,159 ¼-ch., 302 1-12 ch., 132 1-16 ch. Java, ex Oscar I., from Tjilatjap, besides 205 ¼-ch. Boey, 165 ¼-ch. Congou, 789 ¼-ch. Souchong, 132 1-16 ch. Pecco Souchong, 302 1-12 ch. Pecco. On the 21st June will be sold in auction 8,268 ch. China tea, per Yeavering Bell, from Foochow-Foo.

TOBACCO (JAVA).—Ordinary quality low in price, and without inquiry; good quality is not on the market, and for the little lots in stock extraordinary prices are claimed. This is also the case with Manila tobacco. The stock includes 1,330 b. Java, 195 b. Manila.

MANILLA CIGARS.—Of the 380 mille 2a Cortados 1865 were only sold in auction on the 28th—9 lots at 26¾f. to 33f., the rest was bought in at 28f. to 34f.

DRUGS.—Camphor nominal; China, 83c.; Japan, 86c. There is but an inconsiderable stock and a good inquiry, so that soon better prices will be paid. Cubebs may be bought at 29c.; Cassia Lignea (nominal), 78c.; Japan WAX, without stock; preserved ginger, shippers will make a good account, because there is no stock and a good demand; East India Gummi Elastic, nominal value, 115f. to 120f.

RATTANS.—The 86,000 bundles offered in auction were sold as follows:

Banjermassing...	f.8.20 to f.12.40	
Padang...	11.60	—
Koetie	6.90 to	8.50
Banjermassing...	7.10 to	14.20
Padang...	9.10	—
Koetie	8.10 to	8.60

The above were sold 171 piculs ex Brouwershaven; 200 piculs ex Garibaldi; 167 piculs per Kömgin Augusta; 600 piculs ex D. C. Metcalf; 800 piculs per Johannes Lodewyk; and 400 piculs ex Kortenaar.

PEARL O'MOTHER SHELLS.—10,000 kilo., imported by the Trading Company from Macassar by the Petronella Catharina were sold at secret prices.

ARRACK.—The market is very inactive, and only 140 whole, 8 ¾, and 6 ½-casks Sourabaya, ex Robert Dickson, were sold.

JAVA INDIGO.—The Trading Company announced its auction on the 27th inst., when 846 piculs will be sold. Perhaps this quantity will be increased with 300 piculs. The quality is in average from middling good to good; fine qualities however are scarce, so that it is thought that high prices will therefore be paid The private transactions only include 36 chests, there is no private stock.

JAVA COCHINEAL.—The Trading Company will offer on the 27th, 166 chests valued, No. 1, at 240 to 260c.; No. 2, 140 to 190c. Some lots are of a very fine quality; it is believed that much above the valuation will be paid, because there is a good demand for England.

TIN.—As I said in my former report, our market closed very strong at 58½fl. for Banca upon the announcement that the sale to be held by the Trading Company only amounted to 70,000 slabs, instead of about 85,000, which had generally been expected, and a rapid and uninterrupted rise took place in the price till it touched 56fl. Some days before the sale however a quieter feeling set in, and prices gave way a little, declining to 54½fl., which was however again followed by a small upward movement to 55¾fl. For delivery "ex Sale" large parcels changed hands from 54fl. to 56½fl., and the demand then again falling off, 55½fl. was accepted. In the Public Sale of the Trading Company on the 28th inst. the whole quantity of 69,477 slabs Banca was sold at 54fl. with a curtailment of 17 per cent. on all orders effected, and the 567 slabs Billiton fetched 58½, to 58¾fl. There is a good demand at sale's price, without finding sellers thereat. The sale price was generally looked upon as moderate, but it has not given satisfaction, and never was so little business done in the market either at or after the sale. The fact is that England is becoming quite independent of Banca, and every year Straits Tin is growing more and more into favour as its quality becomes known, and this is sure to go on increasing so long as Banca is kept comparatively too dear in price. Stock on warrants in March, 107,447 slabs; Unsold Stock, 23,932 slabs.

COCOA-NUT OIL with demand at 33½f.

HIDES.—The transactions only include 222 p. Macassar Rinder, and 272 p. Buffalo ex Maria Adolphina.

MONEY.—The Bank did not alter its rate of discount of 3½ to 4 per cent., and in the open market plenty of money may be had at 4 per cent.

STOCKS.—The Luxembourg question and in general foreign politics exercised a depressing influence upon the market, so that it closes very flat; very little business is doing, so that prices are rather nominal. Dutch Two and a-Half per Cents., 53¾ per cent.; Three per Cents., 63½; Four per Cents., 84¾; Trading Company, 142⅛; Netherlands India Railway, 52¾; Rotterdam Bank, 76; First Serie, 94½.

'CHANGE.—London: 3 mo., f.11.76½; 2 mo., f.11.79½; short, f.11.83; Paris, 3 mo., f.46.65; 2 mo., f.46.75; short, f.47.; Antwerp, 3 mo., f.46.60; 2 mo., —; short, f.46.90; Hambro' 3 mo., f.34.90; 2 mo., f.34.95; short, f.35.10; Bremen, 3 mo., f.188.50.

SHIPPING INTELLIGENCE.

ARRIVALS.—March 24, at Texel, from Batavia, Fagel; from Passaroeang, Camperdown; from Batavia, Oscar; at Flushing, from Batavia, Luctor and Emergo; 25, at Brouwershaven, from Batavia, Catharina Wilhelmina; at Texel, from Tjilatjap, Caroline; 26, from Batavia, Constantia; from Passaroeang, Ferdinand and Louis and Joachim; from Sourabaya, Ridderkirk; 27, at Brouwershaven, from Batavia, Hendrik-Ida-Ambacht; at Hellevoet, from Foo-chow-Foo, Yeavering Belle; at Texel, from Batavia, Goede Verwachting, Wilberforce; from Passaroeang, Gesina Maria; at Brouwershaven, from Batavia, Neptunus; 28, at Texel, from Batavia, Majestic; 29, at Brouwershaven, from Batavia, Vriendschap; from Sourabaya, County of Argyle; at Texel, from Batavia, Hollandia, Norah Greame; 30, at Brouwershaven, from Banjoewangie, Rotterdam; at Texel, from Macassar, Candati; from Batavia, Cleughs, Fop Smit; April 1, at Texel, from Batavia, Celebes, Stad Assen, Baltimore, Petronella; from Samarang, Felicia; 3, from Batavia, Hollandia.

Ready to sail for the Far East: Jason, Otto, Huydecoper, Catharina Maria, Jan van Galen, and Susanne.

LOADING.—S. Gravenhage, Noach, Anna Digna, Hollands Trouw, Mary Goddard, Hendrika, Kortenaer, Singapore, Julia, and Madura.

PASSENGERS INWARD.—From Java, per Ridderkerk, Messrs. Adrians and family, Mentz, De Groot, Willekens, two lads Van Dyx; per Hendrik-Ido-Ambacht: Messrs. De Graaf and family, J. De la Haye, E. Schneider, G. W. E. Van Yzeren, J. H. Mosling, Bekker, Mrs. D. Michel and family; per Rotterdam: Mr. Kniphorst and family; per Hollandra: Mr. Vermaes; per Baltimore: Messrs. Van Ree and Holdenhoft.

PASSENGERS OUTWARD.—For Java, per Jason: Lieut. Col. de Roy van Zuidewyn and family, Lieut. J. H. Romswinkel, Lieut. J. A. Vink, Dr. Wolf and family, and 125 soldiers.

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, APRIL 7.

The Prussian Minister for Foreign Affairs, Count von Bismark, has given permission to Baron von Carlowitz, the Prussian Consul at Canton, to extend the circle of his consular jurisdiction to 100 *Li* from that city, by virtue of paragraph four of the law of June 29, 1865, concerning the jurisdiction of consulates.

A remittance of 450 dollars has been received at Berlin from Herr Gaertner, Prussian Vice-consul at Hakodadi, being the amount of subscriptions raised among the German residents at that port in aid of the funds for the Victoria National Institution.

Mr. Consul J. A. Schon, Chairman of the Hamburg Local Branch Committee for the above institution, has received a letter from his Royal Highness the Crown Prince of Prussia, requesting him to thank Hamburg in his name for their voluntary contributions, amounting to the handsome sum of 45,000 dollars (nearly a fifth part of the whole collection, which is 252,000 dollars), and appointing him honorary member of the Central Board of Management.

Although we have had delightful spring weather here for more than a month and vegetation is in a very advanced state, the ice in the Gulf of Finland still exists in one uninterrupted mass from St. Petersburg to the meridian of the Islands of Eckholm, a distance of 286 wersts, or 160 English miles.

Advices from Nicolayefsk state that during the navigation season of 1866 the number of vessels that arrived at that port from foreign countries was twenty-five, of which fourteen contained Government stores and telegraph apparatus from Hamburg, and eleven brought general cargoes of the value of 820,000 roubles, of which 250,000 roubles were wines and spirituous liquors. During the same period the goods that arrived overland from Russia were valued at 100,000, and from Blagovessensk corn, cattle, and horses for 59,000 roubles. The exports amounted to 63,000 roubles to southern ports, and 118,000 roubles up the Amoor. Goods sent by the post are increasing in value very largely every year; thus in 1859 they only amounted to 171,855 roubles, whilst in 1866 they had risen to 1,435,775 roubles.

The *Eastern Coast*, a journal hitherto published at Nicolayefsk, and containing a good deal of reliable information on that country, has come to an untimely end, having closed its short career in December last. The reason given for its being discontinued is not so much from want of support or absence of news to communicate, as the technical difficulties to be overcome; for it was impossible to find a sufficiency of compositors and printers duly versed in the practical knowledge of their calling.

The Russian official *Gazette of the Senate* announces that the Minister for the Post-office and Telegraph Department has greatly improved the postal service in the Trans-Baikal provinces, by establishing two new intermediate stations and removing others, so as more to equalise their length, by which arrangement no stage is now longer than thirty wersts. Similar alterations are made on the post-road between Irkutzk and Jakutzk.

Austria has just established Consulates in the British possessions in the Far East, and by Imperial decree the following appointments have been made:—Mr. J. H. Bandow to be Austrian Consul at Bassein, Mr. Ernst Pandorf to the Consulate at Akyab, and Mr. Franz Gerlach to that at Rangoon.

COMMERCIAL.

COFFEE.—In spite of the fresh supplies that are now arriving pretty freely the demand keeps pace, and indeed has much increased, as there is now a better assortment. Prices of all descriptions are well maintained, but inferior qualities being at this moment most inquired for, are the firmest, and, in some instances, higher. Sales of the fortnight 28,500 bags.

SUGAR.—The raw article is 8 sch. Bco. per centner cheaper, but this does not induce buyers to come forward, and the market is in a depressed condition. Refined is also much neglected, though not lower.

RICE.—Clean descriptions continue in good request, and prices are decidedly higher. There has been no transactions in rough grain.

SPICES.—Cassia Lignea continues in favour, and full prices are easily obtained. Ginger more inquired for. Pepper finds an easy sale for consumption.

OIL OF CASSIA.—10 chests lately imported, per Bernhard Carl, were sold by importers at 5 marks Bco.

OIL OF STAR ANNISEED continues to rise, and is not to be had under 9 marks Bco.

SPELTER.—Till within the last few days the market has been generally firm, but it is now dull. The following sales have been effected during the fortnight:—

SHIPPING INTELLIGENCE.

ARRIVED.—March 28, Freya, for Canton.

SAILED.—April 1, Merida, for Nicolayefsk.

LOADING.—For Singapore, Bernhard Carl; for Manila, Orizona; for Hong Kong, Fetisch, Ceres; for Shanghai, Hugo and Otto; for Yokohama, Mikado.

Monetary and Commercial.

Mr. P. F. Robertson, M.P., has resigned his seat at the board of the Oriental Bank, and Mr. John Binny Key has been nominated.

Ten shillings per cent. has been paid on English ships bound to Havana and Manila, but there appears to be no great idea of war with Spain, and few transactions took place.

The report of the Chartered Bank of India, to be presented on the 17th, although not so favourable as perhaps the shareholders desired, is still a more satisfactory account than could have been expected considering the very bad nature of the business both in India and China. The heavy losses, which have been provided for, were incurred chiefly in 1865 and the early part of 1866. The following is an extract from the report :—

The directors have to lay before the shareholders the general balance-sheet of the bank, made up to the 31st December last, which shows a net profit on the operations of the year amounting to £97,028 17s. 10d. This result the directors deem satisfactory, considering the long continuance of the late crisis, with its depressing influence on every branch of Eastern business. That crisis not only led to more failures, but seriously prejudiced the realisation of the bank's claims on the estates of firms which had previously suspended payment, especially those connected with Bombay. Under these circumstances the directors, after instituting a fresh careful revision of all bad and doubtful debts, calculated up to the present time, have considered it their duty to write off the sum of £68,332 14s. 8d. from profit and loss account, to be met in great part by the earnings of the year, but necessitating the further transfer of £10,000 from the reserve fund, which now only stands at as much more. The directors believe that the crisis in the East is now at an end, and knowing the excellent position of the bank, and that its capital is quite intact, have no hesitation in recommending the shareholders to declare a dividend for the half-year ended on the 31st December last at the rate of 5 per cent. per annum, free of income-tax which will leave the sum of £1,134 18s. 9d. to be carried forward.

The report of the directors of the Agra Bank is to be presented at a meeting at the London Tavern on the 16th, and the substance of it cannot fail to be highly gratifying to the shareholders. It will be remembered that the resuscitated bank only opened its doors on the 7th January last; yet considerable progress has already been made towards restoring the establishment to its former high position. The following is an extract from the report :—

"It will be satisfactory to the shareholders to learn that the resuscitation of the bank has throughout India met with the most friendly assurances of kind feeling and good will on the part of the general community, both European and native; the following extract from a letter from the Calcutta manager, of date the 1st March, affords the most encouraging and substantial evidence that the bank will meet with that support from its old constituents which above all will tend to renew confidence and to ensure it a future of success and prosperity: 'I have much pleasure in advising that the branch of the bank was opened for business to-day, and that a large proportion of the dividend payable was transferred to account with the Agra Bank, Limited.' At all the Indian branches, with the exception of Bombay, the old managers have been reappointed, so that the bank will have the benefit of the local knowledge and experience which a residence and business intercourse of some years have enabled them to acquire. With regard to the China branches the liabilities have been so reduced by sets-off—many of the largest claimants being debtors as well as creditors of the bank—as greatly to facilitate an early and satisfactory settlement of affairs at these establishments, and the necessary instructions have been given for the promotion of that object; but the directors have not yet decided upon the advisability of reopening them for future business. The Australian branches they have determined upon closing permanently. The amount of liabilities outstanding at all of these branches is comparatively small, and there are abundant assets in hand at each to discharge them in full. In the future working of the bank the object of the directors will be to limit advances to short periods and on securities readily negotiable, and to confine their operations to transactions of a perfectly *sound and legitimate character*. They will at the same time make it their endeavour to afford every reasonable and judicious accommodation to the constituents of the bank. By acting on these principles, and entering into no business of a hazardous or speculative nature, they are assured that they will adopt the best means of restoring the bank to its former credit, and placing it upon a foundation which will render it no less useful to commercial interests than a safe and profitable investment to its shareholders."

The following circular has been issued by the Comptoir d'Escompte. The various branches in India and China will continue to draw on the Union Bank of London :—

SIR,—I beg to inform you that the Comptoir d'Escompte de Paris has established an agency in London, No. 13 Leadenhall-street, under the management of Mr. G. Pietsch, and that Mr. Theodore Dromel has been appointed sub-manager.—I am, Sir, your obedient servant,

A. PINARD, Manager.

Comptoir d'Escompte de Paris, Paris, 23rd March, 1867.

The Bar Silver ex *La Plata* has been sold at 61d. per oz. standard, but the market has since become weaker, the demand for the East having for the moment quite ceased, and a few transactions have been done at 60¾d. for the Continent. The Dollars ex *La Plata* were sold at 59½d. per oz., but the price yesterday declined to 59d. to 59⅛d. per oz., their relative value as compared to Bar Silver.

The amount of bullion by the P. and O. Company's steamer *Pera*, from Southampton, on the 4th inst., was, in gold, to Aden, £2,000; to Galle, £816; to Bombay, £15,000; to Madras, £813; in silver, to Bombay, £199,400; to Hong Kong, £6,000; to Shanghai, £15,800; total in gold, £18,629; in silver, £221,200.

MANCHESTER MARKETS.

The position of this market has become still more depressed during the past week, and further weakness is shown both in Yarns and Goods. Sales are increasingly difficult, and at such concessions as spinners and manufacturers are inclined to make buyers refuse to purchase freely. Grey Shirtings, 7 lbs., 9s. 9d. to 10s. 3d.; 8¼ lb., 12s. 3d. Cotton Yarn, Nos. 16-24, 1s. 5d. to 1s. 5½d.; 28-32, 1s. 6½d. to 1s. 7d.; Maddapollams, 4s. 4½d.; Long Cloths, 11s. 9d.; T-Cloths, 7s. 3d.; White Spot Shirtings, 13s. 9d.

ARTICLES OF IMPORT.

TEA.—There has as yet been no revival of activity in our market, although out of the large quantity on offer some little business has been done at generally steady prices, the chief exception being in fair to good medium Congous, of which the supplies have been large, and which have again sold ¼d. to 1d. per lb. lower. In Moning siftings there has been no change. Kaisow kinds have been sold at a decline of ½d. per lb., 6d. per lb. having been accepted for some parcels. Fair to good common remain steady at the last quotations. Fair to good flavory kinds, of recent import, have sold rather lower. Good to fine Kaisows have sold at full prices; a few parcels really fine have been taken for export at rather better rates. Common to fair black-leaf kinds remain dull of sale, and some in public sale have sold rather easier. Fair to good medium kinds sell only slowly at reduced quotations. Fine to finest Monings and Wopaks have been steady, and a few parcels taken for export at former prices. There has been more inquiry for new-make Canton kinds, especially in boxes, and they may be quoted 1d. per lb. higher. Good to fine Oolongs continue in demand, and prices have ruled rather higher. Souchongs remain steady. Scented Capers remain firm at the late prices. Orange Pekoes have sold again to some extent at public sale without reserve, but prices have been rather lower. At the public sales on the 2nd 15,024 packages were offered, and 14,275 packages sold, all without reserve. The sale passed off heavily. Common blackish leaf Congou at 11½d. to 11⅞d. showed no material alteration in value, but fair qualities of recent import went heavily at a further decline; 1,600 packages red-leaf Congous ex Banian fetched moderate prices. Canton scented Orange Pekoes brought 1s. 1½d. to 1s. 5¼d. Green Teas have been comparatively steady, though the extreme

Digitized by Google

prices current lately cannot in all cases be realised. Some Moyune Hysons have been sold at full prices, also Young Hysons and Gunpowders, but the Ping Suey kinds have been more difficult to move. Some Fychow kinds have realised fair prices. Canton made kinds show no change. The cargo of the John Bunyan, from Nagasaki, consisting of 420,000lbs. coloured leaf, is considered as a whole better than any that has reached this country since Japan was opened. Large sales have been made at satisfactory prices, say for Twankays 8d. to 9½d. per lb. Young Hyson good common to fair, or No. 4, 1s. 1d. to 1s. 3d. per lb., strong burnt kinds, or No. 3, 1s. 4d. to 1s. 7d. per lb., medium to fine, or No. 2, 1s. 8d. to 1s. 11d. per lb., fine, or No. 1, 2s. to 2s. 8d. per lb. Hyson fair to good, 1s. 2d. to 1s. 3d. per lb., medium to fine 1s. 4d. to 1s. 7d. per lb. Imperial, even leaf, 1s. 7d. to 1s. 9d. per lb., finest 1s. 10d. to 2s. per lb. Gunpowder good common to fair, or No. 4, 1s. 2d. to 1s. 5d. per lb., good useful kinds, free from dust, 1s. 6d. to 1s. 8d. per lb., medium, or No. 2, 1s. 9d. to 2s. per lb., fine to finest, or No. 3, 2s. 1d. to 2s. 4d. per lb., and one or two extra fine parcels, equal to Moyune, up to 3s. per lb. In uncoloured, no transactions have transpired, as the market is almost bare of stock. The stock in the United Kingdom on the 30th ult. was estimated at 91,500,000 lbs. against 103,000,000 lbs. last year, and the quantity afloat up to last mails advices is as follows:—

				lbs
Oct. 5	Agamemnon*	Japan		1,003,045
Nov. 3	Samuel	Canton		528,300

* Put into Singapore for repairs.

SILK.—There has been a slack business since the last mail but quotations have been maintained. The question of European politics, it is expected, will again interfere with the French and Italian crops and demand. A small parcel of Pongee Silks and Handkerchiefs of excellent quality, newly arrived, has found immediate sale at full prices, but the light and common goods remaining over from last public sale do not go off; the demand is limited to best goods only. Damasks, &c., are still out of stock and wanted, and if not soon seen again, their place will be wholly supplied by European fabrics.

COTTON.—The market for East India Cotton is still unchanged, and prices have again declined ¼d. per lb. for the small quantity taken, amounting to only 9,320 bales on the spot and 10,700 to arrive. China, Rangoon, and Dhollerah, have been entirely absent from the sales; quotations for the former description are as follows:—Middling fair 9½d., fair to good fair 10⅛d. to 10⅜d., good to fine 11d. per lb. The stock of China and Japan on the 4th inst. was 706 bales, and the total import from 1st Jan. to 4th April, 922 bales.

COFFEE.—Owing to the heavy arrivals of Ceylon since our last, the market for colonial descriptions has exhibited some dulness; and although only a moderate quantity of the recent arrivals of Plantation Ceylon has been brought forward, prices of this description have given way 6d. to 1s. per cwt., in anticipation of further large supplies. The offers at auction included 1,865 casks, 175 barrels, 488 bags Plantation, which realised as follows:—Triage, 31s. 6d. to 63s.; good ordinary, 68s.; small fine ordinary to fine fine ordinary, 71s. 6d. to 76s.; low middling small to middling bold, 77s. to 81s. 6d.; good middling, 82s. to 84s.; fine middling, 85s. to 86s.; peaberry, 85s. to 91s. per cwt. The market for Native has exhibited some improvement since our last, and this description now sells readily at steady prices. By private contract about 1,000 bags good ordinary were taken at 63s. to 64s., and at auction the following parcels have found buyers:—1,602 bags common to real good ordinary at 62s. 6d. to 65s.; 33 casks at 64s. to 64s. 6d. for good ordinary; and 62s. 6d. to 63s. 6d. for small; and at a later sale 1,838 bags good ordinary brownish at 66s.; mixed, 62s. 6d. to 63s.; very small, 60s.; triage, 46s.; brown garblings, 29s. to 30s. The remaining portion of East India at auction comprised 915 bags sea-damaged and re-packed Java at 63s. 6d. to 65s. 6d., one lot 52s.; 89 bags Penang, sound at 53s. 6d., damaged at 43s. 6d. to 45s.; and 756 bags Singapore, of which 150 bags first-class damaged sold at 70s., and the remainder was withdrawn at 72s. per cwt. Stock of Ceylon on 30th March, 4,970 tons; of Java, &c., 1,390 tons.

COIR YARN.—A good demand has been experienced and large parcels have been taken at advanced rates. At auction 68 tons (20 bales) Ceylon realised, one lot very fine, £60; fine, £39 15s. to £47 10s.; good, £36 10s.; good medium, £32 10s. to £33 10s.; good common, £27 15s. to £28 15s. common, £26 to £26 10s. An offer of 84 bales Singapore Fibre found buyers at £55 5s. to £63 10s. for fine bristle, and £23 to £23 10s. for common rough.

DRUGS.—Anniseeds: At auction 58 cases China Star were bought in, sound at £6 5s. to £6 10s., mouldy at £6 per cwt. Camphor: Very quiet; no business at auction, and very few private transactions at £6 per cwt. for China, and £6 2s. 6d. for Japan. Stock, 1,863 packages. Cubebs: Out of 185 bags good fair Batavian offered the only sale was of 10 bags at 50s. per cwt. Stock, 1,200 bags. Cardamoms: Slightly declined in value, and 94 bags medium Ceylon realised 2s. 9d. to 2s. 10d.; mouldy, 2s. 8d. to 2s. 9d. per lb. Galls: No China has been brought forward at the auctions, but there are buyers at 67s. 6d. Of Japan 165 boxes were offered; 30 sold at 62s. for fair, and the remainder was bought in at 60s. to 65s. per cwt. Musk: One caddy inferior Tonquin was bought in at 15s., and 4 tins fair grain sold at 48s. to 50s. per oz. Privately there is a fair inquiry and several small parcels have been taken at the above rates. Rhubarb: Good qualities of China are scarce and in demand. Inferior descriptions meet with little inquiry and sell only at a reduction in value, 30 boxes medium at auction having realised for good 4s. 3d. to 4s. 11d. and 100 boxes were bought in at 2s. 3d. to 8s. 6d. per lb. Stock 738 chests.

GUMS.—Benjamin: In consequence of the abundance of Sumatra descriptions at the sales the previous advance has been lost, and rates are 20s. to 30s. lower than those current at our last report. At auction 125 cases Sumatra realised fair seconds, £9 17s. 6d. to £10; rather dark, £8 15s. to £8 17s. 6d.; good medium to fair brown thirds, £5 5s. to £5 15s. per cwt. Copal: Fair business doing privately at steady rates, and at auction 140 cases medium Manila hard and soft mixed sold at 32s. 6d. to 33s. per cwt. Damar: Very scarce and firm; 10 cases Batavian offered at auction and withdrawn. Stock 941 packages.

HORNS.—The sales since our last report have comprised 8,734 (2 tons) Ceylon Deer at 64s. 6d. to 65s. 6d., and the half of 1,110 (30 cwts.) Penang Buffalo at 46s. per cwt.

HIDES AND SKINS.—The sales of East India Hides during the past month have been 232,626 hides. The export demand has continued good, and though the home trade have bought sparingly, and the best qualities have occasionally sold at ¼d. per lb. decline, the middling and low descriptions, which form the bulk of the sales, have realised fully last month's rates to ⅛d. per lb. advance. No Batavia have been sold, but Singapore Buffalo Hides have met a fair inquiry at fully late prices. 1,328 Hides have been cleared—Best 5⅝d. to 6½d. per lb.; Seconds, 4⅝d. to 5½d. per lb.

INDIA-RUBBER.—A decline of 2d. per lb. is reported, and at auction 348 baskets Singapore sold at 1s. 8½d. for good fair, and 1s. 6d. for common dark balls; 80 baskets Borneo sold at 1s. 6d.; and 11 baskets Penang were bought in at 1s. 8d. per lb.

JAPAN WAX.—All offers at the sales continue to be bought in. The withdrawals since the 26th ult. amount to 767 boxes good medium saucers at 90s., and 100 boxes ordinary mixed at 65s. per cwt.

MANILA HEMP.—A great scarcity in this market has occasioned a further advance in prices, and limited business has been done in fair and good roping at £51 10s. to £52 per ton.

PEPPER.—Black: There is a good disposition to buy manifested, and the public sales have been extensive, amounting to 1,651 bags fair Singapore at 3 3-16d., and 7,500 bags Penang at 2⅞d. per lb. Privately 1,500 bags have been placed on the following terms:—Penang 2⅝d. cash, Acheen 2⅝d. prompt six weeks, Singapore 3⅛d. fullprompt, 3 3-16d. cash. White: The previous value is fully maintained, and in addition to a fair private business, 447 bags Singapore realised 5⅜d., two lots 5⅝d. per lb.

RICE.—The active demand reported in our last continued for a few days, and a good business was done at a further improvement in value. With little offering there has been less doing, but the market remains firm at the close. The transactions on the spot include 20,000 bags, the bulk Rangoon at 12s. 1½d. to 12s. 3d. For arrival, several cargoes soft grain for the United Kingdom, viz., 3,300 tons Rangoon at 11s. 1½d. to 11s. 3d., 700 tons Nakrenzie at 10s. 9d., and 1,500 tons Bassein at 11s. At the close of the market a floating cargo of 500 tons Bassein realised 10s. 7½d., continental terms. Stock on the 30th ult., Arracan, Rangoon, &c., 17,830 tons; Java, 372 tons.

SUGAR.—The landings being larger now than for some time past, with abundant arrivals on the coast, cause buyers to exercise even greater caution, and in the moderate business done a further decline on some descriptions of 6d. per cwt. must be quoted. Importers evince a desire to realise afloat, and although numerous cargoes offer, and lower prices are accepted, the transactions effected are only to a moderate extent. Landed parcels, though sparingly offered, have attracted little attention, and only small sales have been made at prices again in favour of the buyer. Penang: The sales at auction have been 4,100 bags, middling brown (duty 8s. 2d.) at 28s. 6d.; good brown to low yellow and grey (duty 9s. 4d.) at 29s. 6d. to 32s. 6d.; medium yellow (duty 10s. 6d.) at 33s. per cwt. Manila: Private sales to good extent have been effected, comprising about 12,500 bags good clayed (duty 8s. 2d. and 9s. 4d.) at 28s. to 29s., and at auction 5,500 bags clayed sold at same price, and 6,100 bags unclayed realised 25s. to 25s. 6d. per cwt. Stocks on 30th ultimo, Penang, 570 tons; Manila, 29,270 tons.

SPICES.—Cloves: The only sale reported is of 8 cases good medium Penang, import 1863, at 11d. to 11¼d. per lb. Mace: One case Penang realised 1s. 9d. per lb. Nutmegs: The following have been the sales: 6 cases Penang, 111 to the lb., at 1s. 2d.; 1 case superior Penang at 2s. 2d.; and 13 casks Java, 100 to the lb., at 1s. 3d. per lb.

TAPIOCA.—At auction 145 bags Penang sold at 5d., and 108 bags good Singapore at 4½d. to 4¾d. per lb.

TERRA JAPONICA.—Cutch: The market continues steady with limited business. At auction 355 bags low mixed Pegue of indirect import realised 25s., and of 389 boxes good but sea-damaged Pegue a few lots third-class sold at 43s. 6d., the remainder being bought in at 41s. to 44s.

Digitized by Google

per cwt. Gambier: Quiet, of 2,665 packages at auction about half sold at 25s. 6d. per cwt. for blocky cubes, and 18s. 6d. middling block. Privately very little business, but Gambier in good condition is inquired for.

TIN.—In the concluding week of the past month 600 slabs Banca on the spot realised the previous rate of £93 per ton. Since the market has become depressed and prices consequently lower. The sales are extremely trifling.

MISCELLANEOUS.—Aloe Fibre: Of 61 bales Manila about half sold at £25 5s. to £29 5s. per ton, the remainder being bought in at £31. Blacklead: Declined 1s. per cwt, and 239 barrels Ceylon realised at auction as follows: Dull soft lump, 23s. 6d.; second and third-class damaged, 21s. to 22s. 6d.; small chips, 12s.; dust, 8s. 6d. to 8s. 9d. per cwt. Beans: Of 25 cases Tonquin offered at auction 13 sold at 1s. to 1s. 2d. Mother-o'-Pearl Shells: At auction, 46 cases good bold Manila, from Singapore, per City of Delhi, partly sold at £11 5s. Preserves: The sales comprised 190 cases China Ginger at 1s. 1d. to 1s. 1½d., and 90 cases Chow-chow at 11d. Roots: Of Colombo, 11 bags fair, part bright, realised 39s. Sapanwood: Dull; and 8 tons Ceylon sold at £9 10s. per ton Tortoise-shell: Of 17 cases (3,766 lbs.) Singapore, one lot sold at 14s. 6d., and the remainder was bought in at 10s. to 12s.; of Penang, 1 case (18 lbs.) realised 11s. 6d.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £5 15s. to £6; nail rod, £7 10s. to £8; hoops, £8 15s. to £9; sheets, single, £9 15s. to £10; Staffordshire bars, £7 15s. to £8 10s.; rails, £6 to £6 5s.

STEEL.—Swedish keg, £16.

COPPER.—Sheet and Sheathing, £86 to £89 per ton; yellow metal, 7¼d. to 7½d. per lb.

TIN.—£92 for block; £93 for common bars. Tin plates, best charcoal I.C., 31s. to 32s.

LEAD, &c.—English pig, W.B., £22; shot, patent, £23; sheet, £20 15s.; spelter, £21 15s.; zinc, English sheet, £26 10s. to £27; quicksilver £6 17s.

The following is from the Circular of Messrs. French and Smith:—"The metal market the past month has continued dull, nearly all transactions entered into being for immediate delivery either for shipment or consumption. If an enterprising spirit ever again takes possession of the commercial world, we shall no doubt see a great reaction; but at present there seems to be little faith in the value of any article of commerce but gold. Iron: There is nothing of importance to notice. Prices have varied but slightly. For rails there is moderate inquiry for abroad, but for home railways there is little demand. There are more orders for Staffordshire, for India and China, but no change in prices. Copper: The letters from Chili last month brought advices of charters for large quantities of copper, which produced increased dulness in this article in Europe, and prices receded in consequence. The accounts received to-day are less unfavourable, as the charters are for 800 tons only, and at higher rates of freight. To-day's prices are:—English tough, 78s. to 80s.; Kapunda, £88; Burra and Wallaroo, £84; ores of high produce, 14s. 6d.; Chili bars, £71 10s. Tin: The demand for Tin the past month was considerable, and the delivery out of stock here of Straits and Banca was much beyond the average, reducing the quantity in warehouse to as low a point as it has touched for some years. The Dutch Trading Company's half yearly sale of Banca and Billiton took place at Amsterdam on the 28th ult., when the whole of the Banca was sold at 54 guilders, equal to £95 per ton laid down here. This price being much higher than our own price for Straits, would indicate that the Amsterdam houses who were the principal buyers have a good opinion of the future of this article. The quantity of Banca Tin now floating for the Dutch Trading Company is 33,000 slabs. On the 19th ult. the smelters declared an advance of £2 per ton on English Tin, and have since declined orders at less than their full prices. Tin Plates are in good demand, but prices are a little easier. At the meeting of the trade at Gloucester it was arranged to maintain last quarter's quotations. The shipments for March were 92,000 boxes, against 140,000 boxes same month last year. By the Board of Trade returns the exports January and February were 10,283 tons, in 1867, against 10,993 tons in 1866. Lead: Until within a fortnight there was a complete stagnation in the demand for Lead, but there is now rather more inquiry, and we consider the price 5s. per ton better. Spelter has improved during the month about 5s. per ton, and is now £21 15s., firm. The stock in London, 1st inst., was 3,421 tons, against 5,516 tons 1st April, 1866. Quicksilver without change."

EXPORT OF BULLION TO CHINA, &c.

FREIGHTS AND CHARTERS.

But few vessels from amongst the numerous recent arrivals having been taken up to load on the berth for the Eastern ports, freights continue to be well maintained at previous quotations. Coal freights remain without alteration.

Current rates of freight for vessels on the berth:—To Yokohama 40s. weight, 50s. meast. To Nagasaki: 50s. weight or meast. To Shanghai: 45s. weight, 45s. to 47s. 6d. meast. To Amoy: 45s. weight or meast. To Foo-chow-Foo: 45s. weight or meast. To Hong Kong: 35s. weight or meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Manila: 40s. weight, 85s. meast. To Ceylon: 25s. to 30s. weight, 35s. meast.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Hong Kong: £46. For Singapore: £40. For Shanghai: £57. For Saigon: £50. For Yokohama: £50. For Batavia: £35. From Newport, Cardiff, or Swansea, per ton.—For Hong Kong, £2 2s. For Singapore: £1 16s. For Shanghai: £2 15s. For Saigon: £2 8s. For Yokohama: £2 10s. Batavia: £1 15s. Coke.

CASUALTIES.

The Exonian, which arrived at Liverpool, April 3, from Manila, had thrown part of her cargo overboard.

The William Naisby (barq.), from Sunderland to Colombo, got on shore, April 3, at Dungeness, but was assisted off by the coastguard without damage.

The Jessie Jamieson, from Java, reported March 31, ashore at Goeree, mouth of the Maas, has been towed off, and has arrived at Helvoet after landing half the cargo.

MISCELLANEOUS.

At TABLE BAY.—Feb. 9, Rover (s.), sailed for Japan.

AT CALLAO.—Feb. 17, Asia, Calderon, sailed for Macao; 21, Amalia Bollo, sailed for Macao; Teresa, Bollo, sailed for Macao.

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the block is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer and a Blacksmith. Dry Godowns for the reception of vessels, stores, &c., who requiring to discharge them.

PERRY and CO.'s PATENT ESSENCE OF INK

The CHEAPEST INK.
The BEST INK.
The PERMANENT INK.
The 1d. Packet equal to a 6d. Bottle.
The 1s. Bottle makes Two Quarts.

PERRY and CO.'s PATENT ESSENCE OF INK.

This preparation produces Extemporaneous Ink of the finest quality in one minute with cold water, and instantly with hot water, by simple solution as salt or sugar. Sold in packets 1d. each, and in glass bottles 1s. each. Sample free, per post, for two stamps. Sold by all Stationers Wholesale, 37, Red Lion-square, and 3, Cheapside, London.

PERRY and CO.'s PATENT BOSTONITE GOODS.

PERRY and Co. have much pleasure in introducing their new patent BOSTONITE to the Public, and they do so with the full conviction that it will supply a want long felt, viz.: perfect Lead or Coloured Pencil Tablets, Slates, &c.

P. and Co. call special attention to their Bostonite being much better adapted to all the uses that Ivory Tablets and Porcelain Slates are now applied. The smooth and pleasant nature of the writing upon Bostonite will not fail to secure it the preference over all other articles of a similar nature now in use. The Bostonite Slates possess the great advantage of being very light, and at the same time are not liable to be broken.

HOLLOWAY'S OINTMENT AND PILLS.

—Sores which are daily extending, ulcers which are hourly deepening, may be arrested in their torturing progress, and induced to take a healthy action by applying this healing Ointment, and taking these purifying Pills. It soothes all distempers, and extracts all morbid humour from the skin. Old ulcers of the leg, inflammations caused by varicose veins, cramps in the lower limbs can easily be eased and shortly cured by Holloway's never-failing Ointment, which represses excessive, and stimulates sluggish, evascular and nervous action. In constitutions breaking down under piles, fistulas, and other similarly painful maladies, a few applications of this cooling Ointment will give comfort, and a persistence in its use will effect a cure.

JAPAN AND CHINA NEW MAIL ROUTE VIA PANAMA AND SAN FRANCISCO.

THE PACIFIC MAIL STEAM SHIP COMPANY despatch their splendid side-wheel steamers from NEW YORK on the 1st, 11th, and 21st, and from PANAMA on the 9th, 19th, and 29th of every month for SAN FRANCISCO, calling at ACAPULCO, MANZANILLO, MAZATLAN, *en route* thence to YOKOHAMA and HONG KONG. Passengers from England may connect with this line at New York by any of the various steamers from Liverpool, Southampton, or Falmouth, to that port, or at Panama by the steamers of the Royal Mail Steam Packet Company leaving Southampton on the 2nd and 17th of every month.

The COLORADO, 4,000 tons, leaves SAN FRANCISCO with mails and passengers July 3rd, 1867; to be followed monthly by the other steamers of the line.

For particulars of Freight, through passage rates, &c &c., apply to H. STARR and Co., General European Agents, 145, Cheapside, London.

OPENING OF THE NEW CHINA STEAM ROUTE FROM LIVERPOOL.

VIA THE ISTHMUS OF PANAMA AND SAN FRANCISCO.

THE WEST INDIA and PACIFIC STEAMSHIP COMPANY (Limited) have made special arrangements with the PANAMA RAILWAY COMPANY and the PACIFIC MAIL STEAMSHIP COMPANY for the conveyance of Passengers, Specie, and Cargo between EUROPE, YOKOHAMA, NAGASAKI, SHANGHAI, and HONG KONG.

THE NEXT DEPARTURE WILL BE:—

From Liverpool	5th and 20th May.
Leaving San Francisco ...	3rd July.
Due at Yokohama	22nd July.
Due at Shanghai	27th July.
Due at Hong Kong ...	29th July.

The branch steamer to Shanghai calls at Nagasaki on both trips. It is expected that the communication will be monthly after these dates.

The Pacific Mail Company's steamers on the China station are large paddle-wheel vessels, of upwards of 3,000 tons register. The greatest attention has been given to insure the comfort and convenience of passengers by the vessels of all the connecting companies on this route.

Shippers will find this route cheaper and as expeditious as any mail service to the East.

RATES OF PASSAGE FROM LIVERPOOL.

To Yokohama	First Cabin,	£110 10s.
To Hong Kong	,,	£120 10s.
To Shanghai	,,	£120 10s.

FREIGHT, FREE OF PRIMAGE.

Liverpool to Yokohama, Hong Kong, and Shanghai, £18 5s. per ton of 40 cubic feet.

The homeward rates of freight will be fixed by the Agent of the Pacific Mail Steamship Company at the above Ports.

ARTHUR B. FORWOOD, Managing Director.

INDIA, CHINA, AND AUSTRALIA.

SHAW, LOWTHER, & MAXTON will despatch the following first-class SHIPS as under:—

Destination.	Ships.	Class.	Date of Sailing.
Shanghai	Douglas Cstl	A1 14 yrs.	25th April.
Shanghai	Tamerlane..	A1 12 yrs.	10th May.
Hong Kong & Whampoa	Banian ...	A1 14 yrs.	25th April.
Ditto	Ospray ...	A1 10 yrs.	10th May.
Melbourne	Lanarkshire	A1	25th April.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, E.C.

SINGAPORE, with immediate despatch, the regular trader, SREE SINGAPURA, A 1 15 years (built at Dundee in 1866), 586 tons register; loading W. I. Docks. Has excellent accommodation for passengers.

Apply to Messrs. MACTAGGART, TIDMAN, and Co., 34, Great St. Helen's; or to TIDMAN, LANGMORE, and Co., 2, Great St. Helen's.

AT GLASGOW.—For Singapore, Hong Kong and Japan, (Yokohama and Nagasaki), proceeds under steam, and will sail from Glasgow on 20th April, the splendid new Clyde-built screw steamship COURIER, A51 at Lloyd's, 326 tons register; horse power, 29 nominal, 380 indicated; — CHRISTENSEN, Commander. Has been built under special survey, and is expected to make a very rapid passage.

For freight or passage apply to ALLAN C. GOW and Co., 87, Union-street, Glasgow. Goods to be consigned to ALLAN C. Gow and Co., Glasgow, and the port of destination to be distinctly marked on each package.

COLOMBO Direct (first ship) the magnificent new clipper ARABELLA, A 1 9 years, 350 tons register, built under special survey; JOHN RAPER, Commander; now loading in the West India Docks. This beautiful vessel has only room for light measurement goods.

For freight or passage apply to F. TALLACK, No. 23, Birchin-lane, E.C.

To follow the "Bolden Lawn."—Will meet with the usual quick despatch.

DIRECT for COLOMBO, the well-known fast-sailing ship SALADIN, A 1 13 years (owned by Messrs. Robert Henderson and Sons), 782 tons register; JAMES RANKIN, Commander; West India Docks. This magnificent vessel has the greater portion of her cargo engaged, and offers the best opportunity to shippers of fine goods.

For Freight or Passage apply to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

MALABAR COAST.—FIRST SEASON SHIP.

Has a large portion of her Cargo engaged, and will meet with quick despatch.

DIRECT FOR MANGALORE, CANNANORE, CALICUT, COCHIN and ALEPPE, the fine, fast-sailing British Ship LIFE BRIGADE, A 1, 245 tons register, WM. SHEARER, Commander; West India Docks. This beautiful nearly new ship offers a first-rate opportunity to shippers of Season Goods.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

To follow the "Janet Mitchell." Under engagement to the Council of India for the Conveyance of Stores, and will be loaded according to their regulations, at an easy draft of water.

FOR BOMBAY DIRECT, the well-known fine fast-sailing British-built Ship, KOORIA MOORIA, 5·6ths L. I. I., 1,112 tons register, W. ADAM, Commander; East India Docks. This splendid vessel is newly coppered, and now in her loading berth, quite ready to receive cargo.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, E.C.; or to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

To follow the "Kooria Mooria."—Has the greater portion of her cargo engaged, and will meet with despatch.

FOR BOMBAY DIRECT, the splendid clipper ship HADDINGTON, A a1 (belonging to the Peninsular and Oriental Steam Navigation Company), 1,459 tons register, G. BROWNE, Commander; East India Docks. This vessel is well-known in the Bombay trade for her very rapid passages.

For Freight or Passage apply to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

From Marseilles, May 12.—To Shanghai: Mr. C. Hudson. To Penang: Lieutenant-Colonel, Mrs., and Miss Anson. To Ceylon: Mr. W. Morris.

From Suez.—To Ceylon: Mr. A. O. Cowan.

P P. and O. steamer, from Marseilles, May 28.—To Singapore: Mr. T. E. Henny.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Dates are now down to the 1st March. The outward mail of 26th December arrived out on the 21st February. The *Colorado* had returned from Hong Kong and left for San Francisco on the 27th February with the following passengers:—Messrs. Parker, Seward (Consul-General), Forbes, Webster, Kaiser, Middleton, Post, Gill, Rothmund, Favre Brandt, Smith, Scott, Fullarton, Warren, Dana, Whittel, Hetherington, Chevrillion, Kemptner, Da Silva, Burns, Espantoza, Bourjau, Hitzeroth, Price, Vernede, Rice, Col. Fisher, Metler, Laberon, Gutschow, Tabler, Viana, Littledale, Col. Currie, Captain Rochfort, H.M. 20th, Parkes, Capt. Eldridge, Messrs. Otis and family, Macdonald and family, Hargons and family, Miss Wood, Mrs. Chapman, Miss Gray, Mr. Stillman and family, Dr. and Mrs. Jenkins, Mrs. Rice, Miss Rice, Miss Ogilvy, Captain Johnson and family, Mr. and Mrs. Kiernan, a number of Japanese officers and suite, nine second class passengers and 14 steerage.

The *Japan Times* has the following items:—

The opening of the country will be inaugurated by the opening of Osaka. This very important move is, we have every reason to believe, positively certain to take place, in spite of any opposition, at the time appointed—January 1, 1868. Many foreign merchants are of opinion that until the polity of Japan has had more time to recover from the shock it has already sustained from the admission of foreigners to trade, even at Yokohama; until habit and intercourse have made our presence in the country less obnoxious to the princes and people in the interior, who regard the footprint of the foreigner as a desecration to their sacred soil—and, especially until, by means of the ports now open, the resources of the country are better developed than at present and its products more freely offered for sale—the opening of a new port will be merely an opening for more expenditure, without any chance of return. They maintain that the import trade of Yokohama will suffer by the loss of whatever goods are sold direct in Osaka, such having been previously supplied from this market, and they believe, too, that no increase in the total amount of the trade will take place, arguing that whatever Osaka wanted could always be got from Yokohama as heretofore, and that any increase in the Osaka demand could be just as well supplied from hence as at a branch market established on the spot itself. It is allowed on all hands that capital lies chiefly in Osaka, that there live the great merchants of Japan, who supply the means to their agents in the open ports to trade with foreigners, in both imports and exports, and therefore the opponents to the measure of opening the new port argue that its only effect will be either to divide the trade or to transfer it—each a consequence equally pernicious. We do not share these opinions, which appear to us to be opposed to the general laws of trade. We believe that though doubtless the imports into Yokohama will for a time fall off to much the same amount as is at the moment represented by the re-export to Osaka, still, at that great commercial city we shall find new customers far more rapidly when on the spot than at present, when separated from them by more barriers than those of distance—official squeezes here and taxes *in transitu*.

Digitized by Google

The import trade of Yokohama has always had an importance really fictitious to just the extent of these re-exports. When these are withdrawn, and we are by no means of opinion that they form the bulk of our imports, the result will be to show us the real extent of the Yedo trade proper—a trade which is certainly susceptible of great expansion. And, when we consider that Yedo is the capital of the *Kuanto*, probably the richest, or if not so, certainly among the richest provinces of the empire, it will be seen that, though shorn of the branch import trade of Osaka, which does not legitimately belong to it, the trade of this port will very soon recover from its temporary check and increase as fast as surrounding circumstances will allow. The trade with Osaka and its environs will be quite a new trade, and, to judge from the reports we have received, not only of the population and importance of Osaka itself, but also of many neighbouring places, there seems every reason to believe that we should be even more successful in introducing European goods there than we have been here. As for the argument in favour of delay, that we should wait for extended intercourse with the natives to be granted us here before we go farther afield, we consider it simply futile. With the experience of the Dutch in Decima and our own in Yokohama since 1858 of the unremitting and vexatious attempts of the Shiogoon's Government to keep other Daimios and their peoples from intercourse with us, we are not willing to wait the pleasure of our present ally for the development of a trade which nothing, we are convinced, will develop so well as the presence of foreigners and the exhibition of their goods by themselves in as many ports as we can find customers willing to do business with us. The question is a broad, imperial one, and must be argued irrespective of the wishes of even a majority, did such exist, of the foreign merchants of Yokohama. As such the British Minister at all events, we are assured, regards it, and it will be well for our readers out of Japan to make up their minds to the opening of Osaka in 1868 as a foregone conclusion.

It is necessary for us to dwell at some length on this point, and to exhibit the differences of opinion on the subject which exist, because otherwise we should have found it difficult to allege a reason for the apparent apathy of merchants here at present, and the apparent falsification of our confident prediction after the great fire of November, 1866, that trade would immediately recover itself. The signs of that vigorous resuscitation which we then anticipated were very marked, but it must be remembered that shortly afterwards the Ministers announced their intention of going down to the new port, with the admitted view of making preparations for opening it on the date agreed upon; and though many minor causes have operated in the same direction—such as the occurrence of numerous and most disastrous fires in Yedo and the consequent impoverishment of many merchants there, the interposition of the New Year holidays, and the depression of trade generally in other parts of the world—still we believe the hesitation shown by many firms here to invest their capital in rebuilding their premises and resuming their operations on the old scale, to be the natural anxiety to see first whether Osaka will really be opened, and secondly, what will be the consequences of the measure. It is very desirable that some distinct assurance should be given to us on the first point as early as possible, which surely might be done. Despatches from the English Minister were sent down on the 7th inst. in H.M.S. *Argus*, as we mentioned in our last, and for all we know these and their replies may have been the record of the most important political event of the fortnight. The purport of the mission of Messrs. Mitford and Satow, Sir Harry Parkes's representatives, has not transpired, but it is supposed to have had reference to the visit of the Ministers above alluded to. The *Argus* left them at Osaka, where they remained for about a fortnight, returning in the *Basilisk* on the morning of the 24th. They report that the treatment they received from all classes was polite and cordial in the extreme.

The latter days of January and the early part of February have witnessed another step in the right direction by Admiral King, who, in H.B.M.S. *Princess Royal*, has been paying visits of some duration to some Princes in the Inland Sea. In another column will be found an interesting account of his visits to the Prince of Chikuzen, a Daimio whose territory lies between Nagasaki and Simonoseki. It would be well if the representatives of other nationalities besides the British would imitate the example set them by Sir Harry Parkes and Admiral King. But the policy of one of them, and not the least important, M. Roches, Minister of France, is entirely opposed to opening the country. He has succeeded in making Yedo almost a close borough of his own, and hopes soon to establish a monopoly for French trade in Yokohama; and to open Osaka, or to encourage the other Daimios in their legitimate wish to share in the benefits of foreign trade which the Shiogoon now keeps to himself, would be suicidal on his part.

The weather has been unusually severe, a good deal of snow having fallen and lain in our streets for some days. An idea of the variations of the climate of this country may be had from the fact that on the 21st of February, 1866, the thermometer stood at 64 degrees in the shade, while on the 21st inst. it was down to 31. We regret to have to announce another suicide. William G. Land, one of the stewards of the Yokohama United Club, deliberately shot himself through the head, on the 22nd inst., in one of the water-closets. A long and searching inquest was made the following afternoon, when it was shown by the evidence of the unhappy man's fellow-servants, that the idea of suicide had long been familiar to him. Always a man of low physical power and very sensitive nervous organisation, the ordinary little difficulties and annoyances of his situation appear to have at times completely unnerved and upset him. There is little doubt, too, that the suicide of Mr. Vidal had that strange effect upon his mind, impelling him to follow the example which physiologists have frequently had occasion to remark on the occurrence of crimes which have possessed any particularly distinctive feature. The verdict arrived at by the jury recorded him as having been in an unsound state of mind when the act was committed.

Just as the *Colorado* was getting under weigh on the morning of the 27th inst., the beautiful tea clipper *Ariel*, second in last year's ocean race, dropped anchor in our harbour. She had on board thirty-three Japanese, poor creatures who, after being wrecked in a native craft and reaching Hong Kong after great privations, were again wrecked in the unfortunate *Corea* off Foochow on their way up here. They seemed particularly glad, as well they might be, to get back to their native land after such vicissitudes of fortune.

Dr. Macgowan has succeeded in inducing the Shiogoon's Government to construct a short telegraph as an experiment between Yokohama and Yedo. He returns to China in the *Nepaul* on business connected with the company he represents in that part of the world, and when he comes back to Yokohama, the material for the first telegraph in Japan will probably be ready for him and its construction will be at once proceeded with. Another step in advance we have to record—the establishment of a Japanese newspaper, but the first copy of this is only placed in our hands as we write, and we must defer our review of it until next mail.

The following exports are reported :—

Per P.M.S.S. Co.'s. str. *Colorado*, for San Francisco, and New York, despatched 27th February by Walsh, Hall, and Co. :—

FOR SAN FRANCISCO.—Tea (3,135 packages), 90,800 lbs.; Cuttle Fish, 141 packages; Merchandise, 160 packages; Seaweed, 25 packages; Effects, 34 packages; Screens, 2 packages; Silkworm Eggs, 6 packages.

FOR NEW YORK.—Tea (10 packages), 300 lbs.; Raw Silk, 53 bales; Waste Silk, 7 bales; Merchandise, 14 packages, Plants, 4 packages.

Per *Carioca*, for London, despatched by Petrocochino and Co. :—

Tea, 202,980 lbs.; Gall Nuts. 571 lbs.; Waste Silk, 45 bales; Cocoons, 12 bales; Floss Silk, 10 bales; Merchandise, 3 packages; Re-exports, 6 packages; Samples, 1 package; Hats, 1 package; Cigars, 1 package.

The following is a report on the markets :—

IMPORTS.—Business having been fully resumed, we report a better inquiry for most staple articles of import, although the continued increase in the value of Mexican dollars doubtless prevents purchases from being made beyond the extent of immediate wants. Prices have not yet advanced, holders being willing to meet the market at previous rates, owing to the considerable supplies of most descriptions of goods, and the depressed state of trade in the south of China. In Cotton Yarn, Grey Shirtings, and Turkey Red Cloth, a fair business has been done at our quotations. The native dealers show some disposition to speculate at lower rates, but holders remain firm. Woollens continue depressed, and Camlets have been sold at a reduction upon previous rates to some small extent. There is little doubt that these goods are going out of fashion and being superseded by a cheaper class—Cotton and Woollen mixtures. The stock of Raw Cotton has been reduced by considerable deliveries of former purchases, and the price of good staple has again advanced. Sugar is in active demand, large contracts to arrive having been entered into at increased rates.

Digitized by Google

EXPORTS.—Silk: At the departure of last mail, many of the silk men had not resumed business after the recess of the New Year's holidays, and though one or two buyers were in the market, particularly for the purchase of Oshus, not much business was done. The news received by the *Nepaul*, however, being favourable and exchange keeping low, a marked activity was immediately manifested, which has continued up to the time of writing. Stocks being limited, the natives soon began to show signs of firmness, the result of which has been a gradual hardening of prices, and quotations to-day are from $30 to $50 higher than at last mail for the sorts which have been mostly in demand. A very few parcels of really fine silk have been offered, and for these high prices have been obtained: as much as $925 having been paid for a small lot of best Mybash. This exceptional purchase, however, it will be seen, we do not consider sufficient to establish the quotation at that figure. The demand has been chiefly for Oshus: one fine parcel of this is held for $850, but has not found a buyer. Total settlements we estimate at 550 piculs. Stocks are about 825 piculs, but little more than a third of this is on the market, the rest being in foreign hands as security against loans. The P.M.S.S. Co.'s steamer *Colorado* took 53 bales to New York. Tea: Just before the holidays this market was weak; but on the resumption of business the few transactions which took places were at prices about 2 dols. higher on an average than those asked before the turn of the year and at present, about 1,600 piculs having been settled during the fortnight, teamen having become gradually firmer until their demands exceed our limits and business has been stopped again in consequence. A few parcels of fine have been bought, but the bulk of the business has been done in medium and good medium sorts. Stocks are about 5,000 piculs. We have to advise the departure of the *Carioca* for London with 202,980 lbs. and of the *Colerado* with 90,800 lbs. for San Francisco, and 300 lbs. to New York.

HAKODADI.

No news of importance, save a destructive fire which commenced near Porgasameas, just by the water's side, and burned right up the hill; luckily there was no wind at the time, and the conflagration was subdued just below the residence of Messrs. Wilkie and Gaertner. On the 24th a Russian officer belonging to the *Morge* shot himself. Weather not very cold; a considerable fall of snow, and good roads for sleighs.

The undersigned have established themselves at Hakodate as general and commission merchants, under the firm of James Marr and Co.—THOS. W. BLAKISTON, JAMES MARR.

CHINA.

TIENTSIN.

A letter from Tientsin by the Russian post, dated 25th January, states, in regard to the trade of 1866, that the foreign goods imported here in 1866, after deducting re-exports, amounted to taels 12,009,222; and Chinese goods, at tls. 4,574,235—tls. 16,583,457; or at exchange of 6s. 4d. per tael, £5,251,428. Exports from Tientsin, tls. 2,687,962, or £851,188. Treasure exported, tls. 6,175,788, or £1,965,666 4s.

SHANGHAI.

The mail of January 10, arrived out on the 28th February, and the French mail of the 17th on the 6th March, with telegrams to the 8th February. The dates are now down to the 9th March.

A meeting of the renters of land in the English and American settlements at Shanghai was held on the 25th February, C. A. Winchester, Esq., H.B.M. Consul, in the chair.

The Chairman, after a few preliminary remarks, went on to say:—"With reference to the appointment of a committee for a general reassessment of house and land property, the Municipal Council had circulated a memorandum which, he trusted, had received the due attention of the land renters. There was no question that for land renters on the north of the Yang-king-pang to attempt to levy taxes on goods landed at Pootung or in the French settlement, was beyond their powers, as those goods derived no benefit from our Municipal institutions and could not therefore be liable. The Hong-que settlement was in a very different position. Residents on that side had voluntarily joined with this, and taken on themselves the regulations in force on this side. There was this slight difference between the two settlements, that the goods were here passed over public wharves and there over private wharves. But it was undeniable that residents on that side shared the advantages arising from Municipal expenditure on roads and police. Therefore, he thought, and he had the full support of his colleagues in saying so, that wharfage dues could be levied in the American settlement if, in cases where the private wharves were kept in order by the owners, an allowance were made. He merely threw out these remarks as suggestions on the subject before the meeting, and would now leave it in their hands.

Mr. F. B. Johnson said the chairman's remarks had sufficiently explained the motive for calling this meeting so shortly before the regular annual meeting of the land renters. The fact simply was that, in face of the general dissatisfaction with the existing assessment, the Council were not in a position to prepare a budget for the ensuing year. In fact it had already been necessary to resort to law in several cases for the collection of taxes. This proceeding was a very objectionable one at any time, but especially so in the case of the Council, whose powers rested on a spirit of mutual forbearance among the community. The last assessment of land was made in 1862, and modified in 1865. The Council thought under ordinary circumstances an assessment would not require alteration more than once in three years. But in face of the great changes which had taken place recently in the value of land, they thought it now just to appoint a committee for the purpose of reassessing the value of land and houses. A careful memorandum had been prepared by the secretary and placed in the hands of the land renters, containing all details that were necessary for the guidance of the committee. He would only add that the Council proposed that the committee for the assessment of land should consist of twelve land renters, and that for the assessment of buildings of not less six householders.

The following resolutions were passed at the meeting:—1st. "That the memorandum with regard to a general reassessment of land owned and rented by foreigners, and of houses occupied by foreigners and Chinese, within the limits of the English and American sett'ements, be approved by the land renters, and be handed to the Shanghai General Assessment Committee of 1867, as the code of instructions by which to guide their proceedings." 2nd. "That the following gentlemen be requested, and are hereby nominated, to serve on the Shanghai General Assessment Committee of 1867, for the investigation and supervision of valuations to be placed on house and land properties in accordance with the power granted the land renters by article 10 of the Shanghai Land Regulations of 1854":—

For Land: B. Dallas, J. W. Broadbent, H. Hancock, R. B. Baker, E. M. Smith, G. J. W. Cowie, F. H. Bell, S. D. Sassoon, J. A. Maitland, C. D. Nye, A. H. Maertens, W. J. Bryans, Alex. Johnston.

For Houses: A. Robinson, W. H. Mitchell, A. Levy, W. Kidner, T. A. Cowderoy, R. W. Little, F. E. Wright, Dr. Thin, H. Evans.

3rd. "That the Municipal Council be empowered to collect the outstanding wharfage dues on goods landed or shipped within the limits of the two settlements north of the Yang-king-pang, making such deduction to the owners of private wharves as may be deemed equitable." 4th. "That the thanks of this meeting be given to the chairman (Mr. Winchester), H.B.M. Consul, and to Mr. Mangum, the U.S. Vice-Consul General for their assistance."

The following resolutions were passed at the meeting of the Shanghai Gas Company on the 28th Feb.:—Proposed by Mr. R. Mody, and seconded by Mr. Fearon:—That Mr. Cameron be requested to act as chairman of this meeting. Proposed by Mr. Baker, seconded by Mr. R. A. Fearon:—That as the accounts are incomplete and defective in many respects they be not passed at this meeting, but that a correct statement be prepared and submitted to an adjourned meeting. Proposed by Mr. Fearon, seconded by Mr. Hancock:—That as it is imperatively necessary that means be at once adopted to liquidate the liabilities of the company, the directors be and are hereby empowered to issue an amount of shares bearing a preferential interest of 12 per cent. per annum, not exceeding tls. 50,000. Proposed by Mr. Lawrence, seconded by Mr. G. H. Fitzroy:—That the following gentlemen be appointed directors for the present year, viz.:—Mr. W. Cameron, Mr. W. Probst, Mr. R. A. Fearon, Mr. J. T. Brand, Mr. C. W. Overweg, Mr. R. B. Baker. Proposed by Mr. A. Brand, seconded by Mr. Probst:—That this meeting be adjourned to the 28th of March to receive amended accounts and directors' report of progress in issue of preference shares.

The principal items of the report are as follows:—

"The consumption of gas in foreign houses has steadily increased, and new consumers' names are continually being added to the company's list. There are some persons anxious to use gas, but who, naturally enough, object to go to the expense of placing permanent or immovable fittings in houses which do not belong to them, and of which they are merely tenants. Up to the present time, out of the houses already fitted up we are not aware of one single instance where a tenant has paid for the permanent fittings, yet there are a few landlords who object to outlays of this kind, and the consequence is that their tenants do not at present use gas. It would be well for persons when settling leases of houses to stipulate that the landlord

Digitized by Google

should place permanent gas fittings into the premises at his own expense.

"An increase also has taken place in the number of native consumers, but not to the extent desired. No great increase either can be expected amongst them till the company is in a position to lower the price, and so make it apparent to the Chinamen that it is more economical to burn gas than oil. In using oil the foreigner pays not only for the quantity actually burnt, but for what is appropriated by his native servants as their perquisite, and to him, therefore, gas is undoubtedly cheaper to use than oil, that is, if he be satisfied with burning only a quantity of gas sufficient to produce the same degree of light as he obtained previously from his oil lamps, leaving out of the comparison altogether the cleanliness and convenience of using gas.

"It will be remembered that regular supplies of coal were some time since ordered on from Australia. One cargo only has arrived; it was brought here by the *Marie Laure*, French barque, and the company not having sufficient funds to spare at the time to pay for the whole quantity (about 500 tons), the greater portion was sold on the market at a small profit. The company has since been dependent for its supply on the coals offered for sale at this place. This is not very satisfactory, as coal possessing similar gas producing qualities cannot always be obtained here, hence a difference sometimes in the illuminating power of the gas manufactured. The illuminating power of the gas has been much improved during the past year, and the small quantity of shale received from Australia has been found of great use in this respect. Considerable labour is daily bestowed in keeping the mains free from water,—their being under water for several hours every day rendering them peculiarly liable in some places to get choked up, and the supply of gas to the settlement interfered with. All the lamps required by the Municipal Council have been supplied and fixed in position, and the contract is being carried out fairly by both parties; but owing to the low price paid by the Council there will be only a small profit made in this direction. The additional mains required to supply the lamps under the Municipal contract have all been laid down and completed, and not any further outlay in this respect will be occasioned at present.

"Shareholders have thought it desirable that the company should be re-formed on the limited principle. It is understood that a change of this kind could be effected with little trouble or expense if all the shareholders would consent thereto. The principal creditor of the company is the Chartered Mercantile Bank, and its manager is anxious that the loan obtained from him should be paid off. Messrs. P. A. Myburgh and E. Lawrance have advised that in their opinion no further call can be legally made. Attempts to procure the necessary amount on mortgage and by the issue of debentures have not been successful. The amount might be obtained by preference shares, but it is feared any scheme proposed of raising money in this way would not be any more acceptable than the debentures. The other creditors of the company appear inclined to allow further time for payment of their claims. There is still a large field open for the development of the objects of the company, and if the undertaking continue to progress as it is now doing, there are good grounds for believing within a reasonable time it would be able to extricate itself from its present financial difficulties; however, the early liquidation of the existing liabilities of the company requires the serious consideration of the shareholders."

A very large quantity of damaged American Drills have recently been sold at auction by Messrs. Wainright and Co. at prices varying from taels 3.50 to taels 4 per piece, at which they were taken pretty freely by the native and other buyers. The circumstances under which these goods, 370 bales, *ex Endeavour*, became damaged are somewhat peculiar, and we hear involve literally a *knotty* question; as it seems that the damage was caused by chafing, resulting from the ropes which bound one bale galling that stowed next to it. The agents of the ship consider that this is damage from accidents of the sea, as only peculiar weather would cause the ship to roll so as to bring it about; on the other hand, it is held that the chafing should properly be considered as ship damage. The point we understand has been submitted to arbitration.

The following somewhat important notification has been published at Shanghai through the Consuls:—"The Taot'ai has received a representation from the native silk merchants, Tun-fai and others, in which they state that, in view of the great losses suffered of late years in foreign trade, some change of system should be made, by which the like may be avoided in future. They have therefore come to the determination to deal only for cash in all silk transactions. They pray, therefore, that foreign Consuls may be moved to notify merchants that, from and after first month of sixth year of Tung-Chih, all payments for silk will be demanded in ready cash only, and in full, that thus complications may be avoided and confidence restored. In forwarding the above, the Taot'ai begs that H.B.M.'s Consul will be so good as to issue the necessary notification for the information and guidance of merchants. Shanghai, 22nd February, 1867."

As an instance of the coercion which the Chinese guilds are enabled to exercise over any individual who will not act in accordance with their regulations, we may mention the following incident of which we have been informed. It appears that some weeks ago the silk guilds held a meeting, and unanimously agreed upon refraining from dealings with two foreign firms and a foreign broker, who were singled out by name, and that on the 23rd a Chinaman named Ta-Ching-Tsz Kee, one of those who had signed the agreement, sent musters to one of the houses in question, which musters happened to be inspected by the foreign broker against whom the agreement was directed. This coming to the knowledge of the silk guilds, the partners of the Chinese firm were taken up and brought before them, Ta-Ching-Tsz Kee being grossly insulted and threatened being taken before the Taoutai for breach of the agreement, but he was finally let off upon his consenting to undergo a fine of 70 piculs of white rice to be distributed among the poor refugees of the districts of Hoochow.

A meeting of the Shanghai Race Club took place on the 26th February, in which more than usual interest was manifested. Various resolutions have been decided upon as desirable to bring forward, among which to propose the following gentlemen as a committee, namely, Sir Edmund Hornby, Messrs. J. McDouall, R. Little, W. Probst, P. A. Myburgh, D. King jnr., and R. A. Houston. It was also arranged to propose that in future the accounts of the Race Club be printed and circulated amongst the members ten days previous to each meeting; and also that in the event of the accounts presented at the meeting not being audited, they should not be passed, but that Messrs. Manson and Lindsay be appointed to audit them; that a paid secretary be appointed, and that the funds of the club be kept at one of the banks subject to the signatures of the secretary and one of the committee. It was to be suggested that professional riders be not allowed to ride at the races, or on the race course for thirty days previous to the first day of any race meeting, and it was in contemplation to propose that no horse or pony entered for any race can change ownership within two weeks previous to the meeting at which he is so entered. On the proposal to have the accounts audited, a lengthened discussion ensued upon the question of the regularity of this proceeding; but it was ultimately arranged that the audit should be made, and the chairman adjourned the meeting until the 12th March.

The bazaar in aid of the church building fund took place at the Shanghai Club. The interest which the former bazaar possessed, viz., that of absolute novelty, could not be claimed by this one, but we are happy to say that it was a decided success. The drawing-room of the club was tastefully decorated, and the stalls heavily laden with fancy work, bijouterie, &c.; indeed, in the grotesque language of the advertisement, with everything required by "man, possible and impossible." Many additional attractions were furnished, including a "Chamber of Horrors" and a "Museum." These two apartments were filled with various objects of local interest. These were of course, however, attractions that were added for superfluity. The ladies and their stalls were special objects of interest. We were much struck with the taste displayed in setting out these stalls. Mrs. Wright, Mrs. Coghill, Mrs. Bayne, and Mrs. Butcher, presided over tables very plentifully laden and very tastefully arranged; while Mrs. Johnston, Mrs. Muirhead, Mrs. Marshall, and Miss Mead, soon cleared the various pretty ornaments and various fancy articles under which their tables laughed, for we cannot use the old metaphor and say the tables were unmannerly enough to "groan" under such a light and charming load as the gay assortment of goods which surmounted them. The long-announced "Bund" was freely sold, and realised more than $350. The weird wizard of Wochang, an experienced Chinese juggler, delighted the little ones of the party, and the refreshment table presided over by Mrs. Earl was frequented towards the close of the afternoon by numerous customers. The lotteries under the charge of the Hon. Trer-

Digitized by Google

surer, Mr. J. Gilfillan, were managed with great spirit; and the whole affair passed off to the satisfaction of the visitors. In the evening an auction was held, at which the articles that remained were sold at highly remunerative prices.

FOOCHOW.

The *Advertiser* has the following on the proposed new Chinese docks :—

The subject of the naval force on this station is far too important to be left in the very unsatisfactory state which prevails at present, and which was referred to in our last number. There are very important interests involved in the due protection of foreign residents and their property at this port; and in Formosa the growing interests of a trade which may hereafter turn out of great extent, and the very precarious state of the relations between the few Europeans and the natives, call for some supervision. In both places English interests predominate, and Englishmen are also more concerned in the suppression of piracy on the coast than any other Europeans. It is then only right and advantageous that the British Government should take such steps as to ensure the protection of these interests, and as far as possible, the suppression of piracy on the coast. It is true that the latter duty should properly devolve upon the Chinese authorities, and will probably hereafter, whether the Foochow dock scheme succeed or not, be undertaken by them. But the non-fulfilment of such obligations by a nation at present so entirely out of the pale of European ideas, forms no justification for the neglect of those who recognise them, and have the power to carry them out. It is very true that but little necessity has arisen from the exercise of protective force either at Foochow or at Formosan ports, but an unhappy exception to the prevailing quiet may at any moment arise, and find us unprepared. One of the occasional mild attacks on foreigners here may at any time assume a serious aspect, and the state of insecurity at Tamsui is notorious. Far better than sending a useless vessel to this station would be a return to the old rule of our gunboats. We think, however, that the peculiarities of the case call for the permanent maintenance of two gunboats on the station, the one to look after the large shipping interest at Pagoda anchorage, and to pay occasional visits to Formosa, and give a good account of any stray pirates, and the other to remain at Foochow. This is somewhat essential, if the desirability of maintaining any force here at all is admitted, as we have known a gunboat detained at Formosa by bad weather for six weeks. There is nothing to direct attention to this matter in the present peaceful condition of affairs, save the utter folly of the present naval arrangements of the station, and we have drawn attention to it from the principle that it is better in times of quiet to take those precautions against contingencies which are useless, however ably they be carried, when the contingencies have arrived.

HONG KONG.

The mail of the 26th January arrived out on the 10th March. The dates are now down to the 15th.

With reference to the proposed "China Committee" of the East India Association, the *Mail* says :—"That it would be desirable to found a society or association for the furtherance of our interests in the remote East, we most fully concur, and have before this pointed out in our columns the many advantages which such an institution would present. But we can hardly endorse the proposition that the committee elected to represent our interests in England should be but the subordinate branch of an association devoted to Indian affairs. The difference of the status enjoyed by British subjects in the two countries is so essentially different, that the Indian members of the society would actually fail in many cases to comprehend, without much study—we might almost say actual residence in this country—the numerous vexed questions which constantly occur under our system of diplomatic and consular representation. But surely China—that is, the open ports and Hong Kong—with its princely merchants and its many officials, its vast trade and numerous shipping, is worthy of a representative association 'all to itself' in the great metropolis. Seven of the ports of China in 1865 exported and imported goods to the value of over forty-nine millions of pounds sterling, and these figures, though approximate, are under the mark. Is not a trade such as this (leaving the remaining six ports out of the question) worth the organisation of some special association for the furtherance of its interests with our own and the native Government? In a short time the revision of the Treaty of Tientsin will be under consideration, and an opportunity afforded of settling the many vexed questions which now arise as to the difficult interpretation put upon its present clauses by official and non-official residents. Instead, therefore, of urging, as does our contemporary, the establishment of a Chinese sub-committee to the Indian Association, we would urge the immediate formation of an independent society devoted exclusively to the interests of residents in China and Japan. Such a society might even be formed in China or Hong Kong, having in connection with it an influential home committee pledged to, as far as possible, forward the views of the members in China and Japan. Here in Hong Kong, where live the principals of the many influential, houses whose names are synonymous with wealth and liberality, it would be easy to establish such a society on a solid basis We commend the consideration of this subject to the British merchant princes of the two countries, and in so doing would remind them that there is no time to be lost."

We regret to learn that the Rev. Father Ambrosi, of the Roman Catholic Mission, expired on the 10th of March. The reverend gentleman was born at Verona, in Italy, and was first educated in that city, where he studied physiology and theology. He then entered the College of the Propaganda at Rome. He arrived in Hong Kong in 1855, being appointed vice-procurator of the mission of the Propaganda. In October, 1866, he was appointed prefect apostolic of the Roman Catholic Mission, and general procurator of the mission of the Propaganda in China. The deceased gentleman had not been in good health for some years, but in his zeal to perform his duties bore up as long as he could. For the previous twenty days he was confined to his bed, and expired at 5.30 P.M., at the age of forty-eight years. His funeral, numerously attended, took place at 5 P.M. next day.

The transport *Golden Fleece* arrived from England at Hong Kong, March 3. She brings 728 officers, men, &c., of the 73rd Regiment—a name familiar to all who have read the story of Waterloo. During the voyage of which the time at sea occupied only 87¼ days (the remainder being passed in port) she experienced on the whole fine weather. She crossed the line when 19 days out and the Meridian of the Cape 41 days after leaving England. In the Indian ocean she did not experience the usual N.W. monsoon. Off the coast of Borneo, as far as 10 degrees North, a strong N.E. monsoon was encountered, and after that time she had only light airs and calm weather. The voyage seems, from all we can learn, to have passed most pleasantly, nothing occurring to disturb the general harmony which prevailed on board; 5 deaths unfortunately took place, but whether from accident or disease we are unable to state; while six births increased the number of human beings on the roll at her arrival to one more than she had on board when she left England.

By a statement published in the *Gazette* we perceive that the fund in aid of gentlewomen engaged in the work of Protestant Christian Missions or Education in Hong Kong, had a balance to its credit on March 1, of $1,165, and as that amount bore interest at 7 per cent. from March 1866, sufficient money has been thus provided for meeting current expenditure—the interest being $8,155, and the expenditure precisely the same amount.

H.M. gunboat *Opposum* left with a mandarin on board, in company with the *Haughty*, for Deep Bay on the information of four Chinese having been captured by pirates ten days before and held to ransom for $50 each at the village of Suntin in the Sun-on district. The *Oppossum* arrived there on the 1st March and proceeded about twelve miles beyond the anchorage for gunboats, and after considerable trouble succeeded in rescuing the captives with whom she returned on the 2nd. All well. The Chinese were handed to the Kowloon Mandarins.

Another steamer has been launched from the yard of Messrs. Riach and Co.; she sits very gracefully in the water, and from the fineness of her lines and the power of her engines, she will be able to steam at least ten knots an hour. Her dimensions are as follow :—Length, 130 feet; breadth, over all, 18 feet, 6 inches, depth of hold, 9 feet. Her engines, which are the workmanship of Messrs. Penn and Sons of London, are of 60-horsepower nominal, but may be safely worked to over 100-horsepower.

On the arrival of troops per *Golden Fleece*, the *China Mail* says :—

The 73rd Regiment has arrived at Hong Kong during an exceptionally fine winter. Since the *Golden Fleece* anchored here officers and men have seen nothing in the climate, nothing in the sanatory condition of the city, in its houses, or its society to justify the dismal apprehensions that afflicted them on their voyage. The weather has been as bracing as the "hard grey" in which Professor Kingsley finds the secret of physical strength, and occasionally as gloomy as the murkiest November morning that ever stipulated the poetic fancies of Tom Hood. And thus it may happen that our friends of the 73rd may fall into the errors that frequently follow on violent reaction, may fancy they have a fair sample before them of the Victorian climate, and therefore pay less attention to dietetic considerations than they would if their experience of the place had embraced some of its summer months. There are probably some military stations on the face of the globe that are much less endurable than this island of Hong Kong, if people will only approximately obey the conditions which nature prescribes for life here. The place inherits a bad reputation gained in past times, and which was somewhat due to the ignorance and mismanagement on the part of individuals responsible for its civil and military government, but no doubt owing in some measure to the defective sanatory condition from which it has been gradually but not perfectly rescued.

It is a common fault with people who travel but little, and whose experience of the world is limited to what they learn on board the steamers in the passage from Southampton to Hong Kong, to carry with them a

Digitized by Google

home standard by which to judge everything strange that comes under their notice. It finds constant expression in what is traditionally said to be the Englishman's peculiar habit of "grumbling;" and thus the really good roadways of Victoria, its underground drainage, its gas and water, its romantic scenery, and its other good qualities, easily discoverable by any one who has the healthy mind in the sound body, are unnoticed or despised because we happen to have rather more sun than snow, typhoons for hurricanes, coolie chairs for cabs and omnibuses—because in fact, we cannot introduce into social and domestic life in this outlying post of the British empire, all that we may have been accustomed to in the metropolitan or larger provincial cities of our native land. Hence numerous "letters from residents," who, unable to discriminate properly, or too egotistical to attribute fault to themselves, having charged upon the climate the consequences either of their own indiscretion, or of inefficient general government. That class of grumblers is not yet extinct. With all the improvements that has been made in Hong Kong during the last half-dozen years, there are still some who can see nothing in the conversion of a once barren, steep rock, into the site of a fine city, better supplied with sanatory resources than is any other British possession in the East. How much reason there exists for the evil name that Hong Kong bears at home, the soldiers of the 73rd Regiment, perhaps, have already guessed, and we sincerely trust that their sojourn here will not be marked by any circumstances to weaken the pleasurable surprise they have experienced at finding that they are come, not to such an Inferno as Dante imagined, but to a pleasant island, where life is not necessarily burdened by the calamities which have been so graphically depicted by home writers, who either speak of what occurred years ago, or who draw their inspiration from sources that are utterly undeserving of credit.

STRAITS SETTLEMENTS.

SINGAPORE.

The London mail of the 11th February reached this by the steamer *Emeu* on the morning of the 16th March. The French steamer with the Marseilles mail of the 19th February still keeps out.

The last fortnight has witnessed the departure of one Governor and the arrival of another. General Cavenagh, who has administered the Government since August, 1859, left Singapore on the 15th March in the Government steamer *Pluto* for Penang, where he will embark in the present mail steamer for Europe. The transfer of the Settlements from the India to the Colonial-office, and which will be formally inaugurated on the 1st April, is of course the cause of General Cavenagh's departure. During his Governorship he succeeded in obtaining the confidence of the authorities in Calcutta and the good wishes of the residents here, who have not been backward in testifying the same. A numerously attended banquet was given to him in the Town-hall on the 12th March, and a public subscription has been raised to obtain his portrait from England to be hung up in the Town-hall.

General Cavenagh, as we have observed, left on the 15th, and he had not been twenty-four hours gone when the mail steamer arrived having on board his Excellency Colonel Ord, the first Colonial Governor of the Settlements. No demonstration attended his landing beyond the firing of a salute, and he was thereby saved a good deal of discomfort, for it is no joke going through open air ceremonials under the blistering sun we have here. His Excellency, who was accompanied by his lady, private secretary, and some other officers of the new Government, proceeded at once to Government House where he has taken up his residence. It is impossible to offer at present any opinion as to what will be the nature of Colonel Ord's administration; but a favourable impression regarding him has already got abroad, due most probably to the vigorous manner in which it is known he has set to work upon the preparations necessary for the inauguration of the new order of things.

The weather had continued excessively hot throughout the fortnight, and should the drought continue much longer there will be a great scarcity of water in town.

The Second Civil Sessions was opened by his Honour the Recorder. Mr. R. C. Woods moved, first, for a petition to the Privy Council for the pardon of the prisoners condemned in the *Erin* case on the ground of a mis-trial; secondly, that the prisoners be recommended to mercy by the Court, and thirdly, for a new trial of the case for the reasons mentioned below:—First, that one of the jurors had during the time they were locked up to consider their verdict, at the same time being under the charge of C. Wilson, who had been especially appointed a bailiff in this case, separated himself from his fellow jurors, in other words, managed to make his escape from the room in which they were confined; and that further the said juror did hold conversation, having reference to the case, with some persons other than the jurors. And secondly, that one of the jurors was not a British subject. Mr. F. E. Pereira, also addressed the Court, and the case was argued at considerable length on these points. His Honour eventually overruled the petition on the grounds that there were not sufficient reasons shown to interfere with the judgment already decreed.

H.M.'s steamer *Satellite*, Captain Edye, from England, via the Cape of Good Hope, with dates from the latter port to the 1st February, has arrived.

PENANG.

The *Gazette* has the following:—

We understand that the Government has sanctioned the grant of the waste land situated at the back of the Mess-house, to trustees, for the public, in order that a racecourse may be made there. The trustees will probably be, the Lieut. Governor, Officer commanding troops, the Secretary of the Race Committee, and one or two other private individuals. We are glad of this, as it will, we hope, make our races a permanent institution in the settlement. From what we have already gleaned of the opinions of the Chinese inhabitants, we are confident they will take a lively interest in keeping up these races, and if well seconded we have no doubt but that ere long, we shall see a permanent racecourse in Penang, and a friendly and honest contest for the victory. We understand that there is already a fund of about $1,000 for the permanent racecourse, a little fact which augurs well for the undertaking. With a little extra support we must consider the fact of our having a permanent racecourse as a thing settled. We learn that a dispute has arisen in Kallang, a district of Salangore, about some tin duties; as yet we have no very reliable information as to the matter, except that his Honour the Governor met with what we should consider most discourteous treatment from the Sultan and Chiefs of Salangore in his endeavours to arrange the affairs in dispute. This is, we hope, a step gained towards bringing the entire peninsula under our control.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

CAINE—On the 20th April, at the Ferns, Crickleigh Hill, near Gloucester, the wife of G. W. Caine, Esq., H.B.M.'s Consul, Swatow, China, of a daughter.

VACHER—On the 22nd April, at Alleyn House, Palace-road, Lower Norwood, the wife of W. H. Vacher, Esq., of a son.

VINCENT—On the 21st April, at Seaford, Sussex, the wife of Thomas Vincent, Esq., of a son.

WATSON—On the 24th April, at 15, Essex-terrace, Lee, Kent, the wife of J. P. Watson, Esq., of a daughter.

MARRIAGES.

HARCOURT—PLUMRIDGE.—On the 23rd Feb., at St. John's Cathedral, Hong Kong, by the Rev. J. Wilson, John S. Chandos Harcourt, Capt. 2nd, 20th Foot, eldest son of George S. Harcourt, Esq., of Ankerwycke House, Bucks, to Harriet Emma Elizabeth, third daughter of the late Admiral Sir J. H. Plumridge, K.C.B.

DEATHS.

BOWMAN—On the 19th April, at Walton-on-Thames, James Bowman, Esq., aged 41 (late of China).

FRASER—On the 18th April, at Marseilles, aged 39, John Fraser, Esq., of the Supreme Consular Court, Shanghai, youngest son of the late S. Fraser, Esq., Commissioner of the Delhi Division, India.

WORMS—On the 23rd April, at the residence of his brother, 27, Park-crescent, Portland-place, Maurice B. Worms, Esq., late of Ceylon, aged 62.

At Shanghai, bills on India, Rs. 300 per 100 taels. At Hong Kong, Rs. 219 per $100. Bar Silver at Shanghai, tls. 111·3·0; at Hong Kong, 11 per cent. prem. Mexican dollars at Shanghai, tls. 73 per 100; and exchange on Hong Kong, 27 discount. Hong Kong and Shanghai Bank shares (ex div.) new, 4 per cent.; old, 11 per cent. dis.; Gas Company, par; Hong Kong and Whampoa Dock, 25 to 30 per cent. prem.; Steam Shares, 10 per cent. dis.; Union Dock Company, 35 per cent. dis.; China Traders' Insurance, 1½ per cent. premium.

The following is from Sharp and Co.'s Circular:—

GOLD.—The scarcity of gold both here and at Shanghai has caused an advance of 1 per cent. in the value. The receipts of the fortnight amount to $120,000 worth; and the exports to $330,000, inclusive of the shipments per *Behar* on the 1st March, and excluding the present mail's remittance of leaf, which is smaller than for many months past.

SILVER.—The arrivals have been large, amounting to $1,360,000; and the totals shipped are in aggregate $910,000. In addition to this, a considerable quantity has been purchased in preparation for the direct Calcutta opportunities.

DOLLAR CURRENCY. — Inwards $300,000, outwards $520,000, the greater portion of which has again gone forward to India. A few unimportant transactions have taken place in clean coin.

EXCHANGE.—There has been but a limited demand, and of the bills sold the larger part has gone into the hands of private buyers, who are thus, under the new regime, reaping the profits of a little private banking business on their own account.

DISCOUNT AND MORTGAGES.—Discounts have been done upon upon undoubted paper at 7 per cent. and Mortgage at 10. Twelve per cent. is still obtainable on Chinese securities.

SHARES.—These have improved a shade by a few purchases for investment; but the trade may be said to be very slow.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—CANTON.—During the fortnight a little more activity is noticeable in the market, some inquiry has existed for country greens, and a moderate business has been done in scented kinds. There is no demand whatever for country Congous, and apparently this class of tea is quite neglected. Country Congous: The stock is 32 chops or 20,582 packages as last advised, and teamen are still asking some 6 taels above the ideas of foreigners. Country Greens: Although some attention has been given during the fortnight to these kinds, no actual transactions have as yet transpired; arrivals have taken place to the extent of 960 packages, and present stock is therefore increased to 5,400 packages. Canton made Teas: Settlements of both scented kinds have been effected on a moderate scale throughout the fortnight at irregular prices. Some 6,000 boxes Scented Orange Pekoe, common to good, and fine, have been taken at from 17 to 29 taels, and 2,000 boxes common to medium Capers have found buyers at from 15 to 25 taels; a few Gunpowders and Young Hysons have been settled for the American market; other kinds have been quite neglected. A muster of the new season's district Congou has been put on the market, but regarding the approaching season it would be premature to offer any remarks at present. Sales are reported as follows:—Country Congous, none; Country Greens, none; Canton Gunpowder, 1,000 boxes and 200 half-chests, at taels 15 to 24; Canton Young Hyson, 200 half-chests, at taels 23; Canton Scented Orange Pekoe, 600 boxes, at taels 17 to 19; Scented Caper, 2,000 boxes, at taels 15 to 25. Stock 32 chops or 23,552 packages Country Congous, 5,400 packages Country Greens.

SHANGHAI.—Black Tea: A fair business for the time of year has been in progress, and at full rates, the majority of settlements showing one tael and a-half advance over last mail's quotations, making a rise of nearly three taels from the lowest point in January last. Teamen, though most anxious to return for the new season's operations, succeed in holding out for the extreme market value, and it is difficult to purchase at even the subjoined quotations. Green Tea: The demand for America has been more general, and a large business has ensued at gradually rising prices, some of the latest settlements showing an advance of nearly two taels. At these rates English buyers are compelled to hold aloof, notwithstanding that the export to Great Britain compares favourably with last year's, while that to America shows more than a proportionate increase. The only vessel on the berth is engaged full, but there is some prospect of another being put on. The stock is maintained at 25,000 packages of all kinds, arrivals at Kiukiang being at once transferred to this port, whereas at this time last year Kiukiang held a separate stock of 9,000 half-chests. The settlements comprise:—11,300 half-chests Moyune, common to finest at tls. 35 to 44.5; 3,500 half-chests Fychow, common to fair at tls. 28 to 33.5; 700 half-chests Pingsuey, common at tls. 34.

FOOCHOW.—The only settlements since last report are 238 chests and 320 half-chests at taels 13.7.5 to 15.7.5, say 233 chests and 320 half-chests common to good common at taels 13.7.5 to 15.7.5.

HANKOW.—There had been no settlements of Black tea, but the arrival of some 600 chests had increased the stock to 3,600 chests.

KIUKIANG.—There had been again no settlements either of Black or Green teas, and the stocks comprised as before 500 chests Black and 300 half-chests Green teas.

YOKOHAMA. — The Tea market remains quiet, and without any material change to notice since the departure of the last mail. During the earlier part of the fortnight several buyers entered the market at the low prices, and a fair amount of business was done; this caused the teamen to become slightly firmer in their ideas, thereby checking business, as in the face of such discouraging accounts from America buyers are not inclined to give any advance on their former purchases; and although offering the same prices as before, they are not very eager, and would rather wait to see whether a little holding off will not induce holders to submit to their terms. Settlements are estimated at 1,560 piculs, of which some quantity will be shipped to England. Quotations and Stocks stand as follows:—Good common, $15 to 20, Stock, 500 piculs; Medium, $21 to 25, Stock, 2,000 piculs; Good Medium, $26 to 30, Stock, 1,700 piculs; Fine, $31 to 34, Stock 800 piculs; Finest, $35 to 90, Stock, 400 piculs.

RAW SILK.—The quantity of Raw Silk going home by the present mail is 1,604 bales and 100 cases, 1,220 bales and 100 cases for Southampton and 384 bales for Marseilles.

Digitized by Google

CANTON.—Settlements for the fortnight are very limited indeed, yet prices for the finer classes have been fully maintained but in the commoner sorts, rates are getting far easier. The new crop is expected in about two months.

SHANGHAI.—The general anxiety to purchase mentioned in the last report has continued, and any class of China silk has found eager buyers in some cases at a considerable advance on last mail's quotations. Included in the settlements below there are about 150 bales of Chinas which were shipped by the last mail steamer after the statistics were made up. Arrivals from the country are but scanty and the quality and size anything but desirable, which is additional proof that the supplies for the season ar nearly exhausted. Settlements for the past fortnight, 550 bales; total settlements since 1st January, 2,450. The quotations are:—Tsatlees, market No. 3, 540 to 545 taels per picul; do. No. 4, 525 to 535 taels per picul; do. No. 5, and Common, 440 to 500 taels per picul.

YOKOHAMA.—Although the last holidays of the Japanese new year and the bad weather interfered with the arrival of fresh supplies, and prevented the return of the native dealers from the interior, settlements amount to nearly 450 piculs, among which are noticed some large parcels. The stock is estimated at 450 piculs, including the unredeemed deposits, which being still large leave very little available Silk in the market, Since the despatch of the Colorado on the 26th February 150 piculs have been settled, and prices are very firm. One of the best parcels of Mybash which came to hand lately fetched $925.

DRUGS.—CANTON.—Cassia Lignea nominally quoted at $19.50, the season's supplies being perfectly exhausted. Cassia Buds of good clean quality procurable at $38, stock 100 piculs Cassia Oil: 5 piculs continue to be offered at $185. China Root: $3.50 to$3.75. China Galls: $13.50, 200 piculs are reported as sold, stocks being thereby reduced to 70 piculs. Vermilion: $39 per box of 50 catties for choice quality. Rhubarb without any fresh supplies, Galangalls: $1.70, stock 300 piculs. Star Anniseed and Star Anniseed Oil, none.

COALS.—HONG KONG.—The only arrivals during the fortnight have been the Spirit of the Sea with 750 tons for consumers, and the Europe with 653 tons patent fuel for the Messageries Imperiales. Market price: English $13.50, Welsh $14, and Australian $8.75 to $9.

SHANGHAI.—The Coal market has remained very inactive. There have been no arrivals of Cardiff, North Wales, and English coals, and quotations for these kinds are therefore quite nominal. American Anthracites have been sold at taels 12 to 11.5 per ton for cargo and part cargo from godown, and the small stock remaining godown is held for better rates. Australian coals are worth taels 8.7.5 per ton, at which price the arrivals had been sold to arrive. Japan coals sell slowly at taels 6 per ton. The arrivals since the 21st have been 2.216 tons Japan, 120 tons Anthracite, and 735 tons Australian; in all 3.071 tons. The quotations are:—English, taels 11 to 12 per ton; Cardiff, 12 to 13; Welsh, 11 to 12; American Anthracite, 11.5; Sydney, 8.7.5; Japan, 6; Formosa, 5.

CHINA AND JAPAN IMPORTS.

HONG KONG REPORT.

The only arrival from London during the fortnight has been the Black Prince, and as we go to press the Belted Will is reported outside. The steamer Agamemnon, about which some apprehension had begun to be felt, was heard from at Singapore by the arrival of the last mail steamer. Having met with an accident to her machinery at Mauritius, which was repaired, she was leaving Singapore when she came into collision with the Mona, and was so seriously damaged that she was obliged to return to Singapore for repairs. Grey Shirtings: A considerable quantity of 8.4 were forced upon the market by a weak holder in the early part of the fortnight, and for which only $3.47½ was obtained, but holders have shown little disposition to part with their goods upon such unfavourable terms. The transactions embrace 19,950 pieces, say 15,500 pieces 8.4 at $3.47½ to $3.55, and 4,450 pieces 7lb. at $3.05 to $3.12½. White Shirtings: Sales have been of a very limited nature, there being scarcely any demand. They include 4,300 pieces, 54 to 68 reed at $2.95 to $3.80, and higher reeds at $4.30 to to $5.60. Tea-Cloths have been in moderate demand and prices are a shade better, some 7 lbs. having found buyers as high as $3.10. Transactions embrace 7,390 pieces, 7 lbs. at $2.75 to $3.10, 8 lbs. at $3.55 to $4.10. Fancy Cottons of all descriptions have been quite neglected and in only small demand. Turkey Reds have met with most attention, but prices are without material change. Sales embrace 2,050 pieces Turkey Reds at $4., 800 pieces White Spots at $4.10, 430 pieces White Brocades at $4.15, and 4,200 doz. Handkerchiefs at 95c. to $1.25. Woollens: A very moderate business has been in progress, the sales reported being meagre and in most instances at last quotations. Transactions embrace 366 pieces Spanish Stripes at 80c., 820 pieces S.S. Camlets at $19.50, 400 pieces Lastings at $17 to $18.50. American Goods: Drills have met with some notice during the fortnight, and 850 pieces were placed at $5.5 to $6.5. Cotton Yarn: The market has been very active. This has been induced to some extent by the small quantity on hand, and the probable delay in the arrival of the large quantity coming forward by the Agamemnon. The demand has chiefly been confined to 16.24, but latterly the higher counts would seem to be coming more in favour, and as high as $210 has been paid for 38.42; sales include 950 bales in all, say 388 bales 16.24 at $170 to $180, 245 bales 28.32 at $180 to $185, and 319 bales 38.42 at $195 to $210. Metals: Iron shows a slight advance, especially for nail rod, sales embrace 4,200 piculs at $3.30 to $3.40, 420 piculs hoop iron at $3.75, 100 pigs lead at $6.30, and 600 boxes tin plates at $7 to $7.35 per box, the latter are inquired for at high prices.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—None.

At SHANGHAI.—From London, Feb. 25, Sir Harry Parkes.

At HONG KONG.—From London, March 13, Black Prince; 3, Golden Fleece (st.) via Batavia; from Swansea, 12, Europe; from Hamburg, 13, Martha; from London, previous to March 27, Belted Will (reported by telegram.)

At MANILA.—From Liverpool, March 3, Maria y Vincenta.

At SINGAPORE.—From London, Spirit of the Deep (Reported by telegram); from Rotterdam, March 13, Maria Elizabeth.

At PENANG.—From Shields, March 11, Frohlih, for Bordeaux; 6, Yvoune; from Boston, 3, Rocket.

DEPARTURES.

From YOKOHAMA.—For London, Feb. 24, Carioca.

From SHANGHAI.—For London, March 1, Burmah; for New York, Feb. 26, Endeavour; March 2, Aurora Australis.

From FOOCHOW.—For New York, Feb. 26, General Havelock.

From HONG KONG and CANTON.—For Hamburg, March 13, Picciola.

From MANILA.—For London, Feb. 20, Canaan; March 3, Coromandel, for Falmouth; Feb. 28, Glendover, for Barcelona; 23, Nuevo Lautaro, for Boston; March 4, Mindora, for New York; 7, Earl of Dalhousie.

From SINGAPORE.—For London, March 16, Der Sud, for Liverpool and Glasgow; 20, Roslin Castle, for London via Rangoon; 22, Octavia, for New York; 17, John Norman.

From PENANG.—For London, March 16, Mathilde, for Boston via Pedang; 11, Rocket.

VESSELS LOADING.

At YOKOHAMA.—For London, Lord Collingwood.

At SHANGHAI.—For London, John Bellamey, Dilkhoosh; for New York, Borealis, Magellan.

At FOOCHOW.—For London, Shakespeare.

At HONG KONG and CANTON.—For London, Acacia; for New York, Windward.

At MANILA.—For Liverpool, Silesia; for Cork, for orders, Cinco Hermanos; for Havana, Espana, Eulalia, Jose y Maria; for New York, Helena, Hotspur, W. G. Russell; for Boston, Cyclone.

At SINGAPORE.—For London, Ellen Radford, John Cobbold, John Stanton, junr., Summer Cloud, Willy; for Boston, Dresden.

At PENANG.—For London, James Paton.

FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London, Cotton and Tea, £3 to £3 10s.; Silk, £4 to £4 10s. per ton of 50 cubic feet. To New York, £2 10s. to £3 per ton of 40 cubic feet.

At SHANGHAI.—For London the rate remains at £2 to £2 5s. per ton. To New York, £2 7s. 6d. per ton of 40 cubic feet. Suitable tonnage for the northern ports is much wanted.

At FOOCHOW.—To London, £2 5s. per ton.

At HONG KONG and CANTON.—There is but little activity in the freight market, though tonnage in the harbour is not large for London; the Acacia takes the berth at Whampoa at £2 10s. per ton. According to the circular of George Holmes there are 12 vessels disengaged (exclusive of Siamese), representing 5,499 tons.

At MANILA.—The Silvia loads for Liverpool at £2 10s. for unclayed Sugar, and £3 5s. for Hemp. The Helena has been laid on for New York, with 200 tons Current Sugar at £1 15s., and 1,000 bales Hemp at £3 15s. The Jose y Maria gets 600 tons Rice at £3 10s. for Havana, and the Cinco Hermanos a full cargo of current Sugar at £2 2s. 6d. for Cork, and a port in the United Kingdom. The Jesus is loading in Cebu for Liverpool at £2 for Sugar and £2 5s. for Hemp.

At SINGAPORE.—Tonnage remains scarce, and freights continue firm. Rates to London are unaltered, at £2 for dead weight, and £2 5s. for light cargo. The Mataura, a large vessel, has attempted to take the Liverpool berth at £1 15s. to £2 5s., but without success.

At PENANG.—The James Paton, is loading for London, at £3 for tin, and £2 15s. to £3 light freight, and £3 5s. for measurement.

American ship Pocahontas, Singapore to Hong Kong.

LATEST TELEGRAMS.

The following telegrams have been received since our last :—

SAN FRANCISCO, April 4.

The steamer *Colorado* sailed this day for Hong Kong carrying a full cargo, 23 cabin and 250 steerage passengers. She also took out $150,000 in specie for China. The brig *Jennie* sailed for Hong Hong one hour before the steamer, intending to race with her. The *Jennie* took $390,000 in specie.

HONG KONG, April 1.

Grey Shirtings, 6½ catty, $3.50.
Water Twist, 16-24, $1.80.
Tea unchanged. Total export, 114,000,000 lb.
Exchange on London: Bank's bills, 4s. 4½d.

SHANGHAI, March 26.

Tea: Congou, nothing doing.
Silk improving. Export to date, 40,000 bales. Exchange on London: Bank bills, 5s. 10d.

THE LABUAN COAL COMPANY.

The following appeared in *The Times* of this morning. Mr. Price, the managing director, is now on his way out to complete arrangements for the full development of the works:—

"The following extracts of a report from the acting Governor of Labuan to the Colonial-office, with regard to the operations of the China Steamship and Labuan Coal Company, would seem to indicate that notwithstanding the many years hitherto experienced of waste and failure, nothing but continued mismanagement can stand in the way of ultimate success. If coal equal to English, and which, according to statements lately put forth, can be raised at Labuan at 6s. per ton, is to be offered in vain in the midst of all the existing steam traffic of the China seas, where. in the face of heavy freights the inferior Australian supplies have for years found a market, it would be desirable that a searching investigation should be instituted for an explanation of the anomaly, particularly as the creation and maintenance of the colony was recommended almost solely on the plea of its mineral resources.

"Extracts from report, dated the 2nd of February, 1857, of the Acting Governor of Labuan to the Colonial Office:—

"'I visited the mines on the 31st ult., and not having been there previously for several months, I was much impressed by the state in which I found them, and the great improvement in the condition of all the works. The 40 fathom pit is in excellent order, and coals are constantly raised from it. The new pit, which has an internal diameter of 11 feet 6 inches, has been sunk to the depth of 38 fathoms, without meeting with any unforeseen difficulties, and is well secured. A stationary engine has been erected, a new tramway made, and the jungle cleared into the next valley to the westward beyond the present pits. In this valley four veins of coal are exposed on the surface, and will be cut through at right angles by the tramway, so that they can be worked from it by self-draining levels. The land to the westward, in the direction taken by these veins, rises to an elevation of about 200 feet, and the manager believes that the veins of coal rise with it, so that a large quantity of the mineral is expected to be procured above the sea leael. Coal found under these circumstances can be worked by the ordinary coolies in the company's employment, who fear to go into the pits. Though the tramway at present extends only between 400 and 500 yards beyond the old line of rails to the face of the first vein, I am told that it could be carried through the remaining 120 to the fourth vein in three months, at an outlay of less than $2,000. From these veins and the other places now open I was informed by the manager that he could produce with the labour at present at his command 2000 tons of coal per month, if he had the funds necessary to restore confidence. I was assured that the total amount of expenditure in Labuan for the last six months of 1866 was $27,796, including the salaries of the manager and all the Europeans except that of the surgeon, and some small expenses for stores from Singapore. Of this amount more than one half was represented to me as having been laid out on new works, such as the tramway above referred to, the new pit, the erection of a steam sawmill, and other items which ought to be put down to the debit of capital, and not to the working expenditure of the mines. The quantity of coal raised during the same period, after deducting 1,233 tons of waste (from which oil is expected to be manufactured), was 5,267 tons, of the value at $5 per ton of $28,13. 5 It would therefore appear that the mines are now self-supporting, or very nearly so, and the manager declares that if the value of the coal sold were sent to him he would not require to draw on the company at all. Though the directors of the company were aware of the stoppage of their agents in Singapore, no intimation of remittances accompanied these instructions, and, from what has been stated above, it would seem that the expenditure for some time past has been within the assigned limits. The two steamers which the company have been lately running from Singapore to Amoy in China, in correspondence with the French mail, and calling at Labuan and Manila, are said to be paying well. A large portion of the coals raised from the mines has been consumed by them. The mines are now supplied with abundance of all kinds of plant necessary for working them, including the apparatus for distilling oil from the waste coal. The Europeans are almost all of them well conducted and efficient men, and the coolies are acclimatized."

BANKS AND COMPANIES CONNECTED WITH THE FAR EAST.

Peninsular and Oriental Steam Navigation Company, 122, Leadenhall-street.

Messageries Imperiales, Head office in Paris, R. W. and H. Horne, agents, 4, Moorgate-street.

China Steamship and Labuan Coal Company, Ethelburga House, 70 Bishopsgate-street.

Netherlands India Steam Navigation Company, Gresham House.

Hong Kong and China Gas Company, 11, Old Jewry Chambers, J. H. Walduck, secretary.

Singapore Coir Company (Limited), J. M. Little, Esq., agent, 22, Cannon-street.

Singapore Gas Company, 25, Poultry, Robert King, secretary.

Pacific Saw Mills, Hakodadi, Armitstead and Co., agents, 21, Old Broad-street.

Amoy Dock Company, Zulueta and Co., agents, 22, Moorgate-street.

Shanghai Wharf Company, D. and G. Latimer and Co., agents, St. Swithin's-lane.

Hong Kong and Whampoa Dock, Morrison and Co., agents, Crown, court, Philpot-lane.

North China Insurance Company, Ashton and Co., agents, Hatton-court, Threadneedle-street.

Canton Insurance Company, Matheson and Co., agents, 3, Lombard-st.

Union Insurance Company of Canton, Dent, Palmer and Co., agents. King's Arms Yard, Moorgate-street.

Hong Kong Insurance Company, Gledstanes and Co., agents, 26, Austin Friars.

China Traders' Insurance Company, Hong Kong, Fearon and Co., agents, 36, Great St. Helens.

Hong Kong Marine Insurance Company, Farbridge, Holliday and Co., agents, Manchester.

Ceylon Company, 7, East India Avenue, J. Anderson, secretary.

Borneo Company, 7, Mincing-lane, R. Harvey, manager.

Tanjong Pagar Dock Company (Limited) of Singapore, Mactaggart Tidman, and Co., agents, 34, Great St. Helens.

BANKS.

Agra Bank, 28, Nicholas-lane, Lombard-street, Mackintosh Balfour, manager.

Chartered Bank of India, Australia, and China, Hatton-Court, Threadneedle-street, G. N. Adam, manager.

Chartered Mercantile Bank of India, London, and China, 52, Threadneedle-street, D. T. Robertson, general manager.

Comptoir d'Escompte de Paris, Union Bank of London, agents, Princes-street.

Bank of Rotterdam, Union Bank of London, agents, Princes-street.

Hong Kong and Shanghai Banking Company, W. H. Vacher, agent, Gresham House, Old Broad-street.

Oriental Bank Corporation, Threadneedle-street, C. J. F. Stuart, chief manager.

*** *Companies omitted in the above list will be included if the particulars are forwarded.*

COMMERCIAL POSTSCRIPT.

A useful and well compiled table has just been issued by Mr. F. M. Page. It contains a record of the prices of bullion, &c., in London, with corresponding rates in Shanghai and Hong Kong by the return mails, during the year 1866. The total of the bullion shipped to China and the Straits of Malacca during the past year was £1,104,478.

The report of the Land Mortgage Bank of India recommends a dividend of 1½ per cent., making, with the 2½ per cent. paid in April. 1866, 4 per cent. for the year. This will absorb £5,833, and leave £7,008 to be carried forward. Although the company have suffered less severely than many others from the disasters of the period, the ruinous reaction in the value of property at Bombay may possibly entail a loss of £59,400, and in view of that contingency £6,000 of the present balance is to be carried to a special reserve.

Circulars were issued to their customers by the banking firm of Messrs. Bosanquet and Co., of Lombard-street, announcing their intended amalgamation with Messrs. Stevenson, Salt, and Co., of Lombard-street, on the 1st of June.

The Lords of the Admiralty have informed the Chamber of Commerce that they have selected Plymouth as the port at which it will be expedient to land the mails from the West Indies. The arrangement for despatching the mails from Southampton will not be disturbed.

The second annual report of the Bankers' Guarantee and Trust Fund states that 585 new policies have been issued, representing subscriptions to the amount of £5,587, while the claims, two in number, have amounted to £666. The sum invested is £8,722, and the reserve fund amounts to £6,851.

Owing to the prospect of war on the Continent some business has taken place at Lloyd's in war risks, chiefly upon French and Prussian vessels, but there were also a few transactions as regards neutral ships. The rates charged to cover the risk of capture and seizure ranged from 5s. to 20s. per cent., according to the date of sailing and the length of voyage.

ARRIVALS NOT IN THE TABLES.—April 23, at Cuxhaven, from Singapore, Voltigeur; 22, at Texel, from Samarang, Cœur de Lion; 14, at Havana, from Macao, Manila; at New York, from Manila, America; at Boston, from Sourabaya, Kurrachee; 12, off Boston, from Manila, Belvidere; 27, at London, from Foochow, John Lidgett; 26, at Deal, from Batavia, Schelde; 28, at London, from Colombo, Helenslee; from Foochow, Esperanzo; 27, off St. Alban's Head, from China, Florence Nightingale.

DEPARTURES.—April 22, from Cardiff, for Hong Kong, Corypheus; from Hong Kong, and Japan, Courier (s.s.); 23, from Shields, for Shanghai, Ousuri; 22, for Galle, J. C. Schotel; 25, from Cairn Ryan, for Batavia,

Digitized by Google

Jamaica, after repairing; 27, from London, for Hong Kong and Canton, Banian; 23, from Shields, for Colombo, Ormelia.

LAID-ON.—At Liverpool, for Galle and Batavia, Peter Joral, for Shanghai, Dagman; at London, for Yokohama and Nagasaki, Early Dawn.

SPOKEN.—Maria (Dutch barque), Sourabaya to Rotterdam, March 7, 35 S., 19 E., with a jury maintopmast; Antoinita, Batavia to Amsterdam, 85 days out, Feb. 25, 14 S., 8 W. Annie Storey (ship), Clyde to Batavia, March 31, 5 N., 24 W.; Jehangeer (ship), Foochow to London, 89 days out, April 8, 22 N., 39 W.; Midnight, New York to Hong Kong, April 7, 20 miles off Hatteras; Cortgene (barque), Rotterdam to Batavia, March 4, 25 S., 26 W.; Helen Nicholson, London to Shanghai, March 29, 3 N., 23 W.

CASUALTIES.—Advices from Amsterdam, dated April 25, state that about 300 bales and a large quantity of loose coffee, also 25 to 30 small boat loads of tin have been saved ex the Baron van Pallandt van Rozendaal, Kramers, from Banjoewangie, which was stranded on the east coast of Texel, April 22, and hopes were entertained of saving the remainder of the cargo. The ship was under water to her deck.

ARRIVED AT NEW YORK.—April 13, Banda, Morris, Yokohama; Portland, Peters, Hong Kong; Lorton, Fell, Yokohama; Christian Rankin, Hygens, Nagasaki; 15, Albert Victor, Thompson, Whampoa; Galatea, Gerritz, Whampoa; Gemini, Pallot, Singapore; Blair Athol, Lowes, Padang; 16, Albatross, Krager, Foochow.

SAILED FROM NEW YORK.—April 9, Queen of the Seas, Reed, for Hong Kong; 16, Ashburton, M'Diarmid, Hong Kong.

OUR RELATIONS WITH JAPAN FROM THE EXETER-HALL POINT OF VIEW.—A recent article in *Blackwood* has the following amusing paragraph:—The direct results to Japan of contact with Western civilisation up to this point, in addition to those of a more indirect nature upon their national character which we have enumerated, have been rice-riots, in consequence of the distress among the poorer classes caused by financial disturbance; the partial ruin of a large portion of the population of Yedo, consequent upon the withdrawal of the Daimios; the bombardment of two cities; *the utter demoralisation, commercial and social, in many ways not necessary to particularise, of the native populations of Nagasaki and Yokohama;* the creation of a civil war which has lasted nearly two years, and caused infinite misery throughout the country; the disappearance by death of three Shiogoons, either prematurely or by violence; the assassination of a regent, and the self-immolation of several of the most eminent and highly esteemed princes in the country. And seeing that our own political and social system can only be regarded as a gigantic failure, as compared with the Japanese, if, in the words of the American constitution, "the pursuit of happiness" be the test of success, it would be as well for our national vanity if we estimated our civilisation at its true value, and admitted that it is ten thousand times more powerful for evil than it is for good, and that perhaps the most fatal defect in it is, that it seeks to varnish over its inherent rottenness with a religious gloss which it calls Christianity, but which as practised by those who profess it bears no resemblance to that religion, so that Japanese who are instructed for the first time in the actual moral code laid down by Christ are penetrated with amazement. "Why," they exclaim, "His teaching is actually superior to that of Confucius. We had no conception Christianity was such a religion as this, but believed it to be a superstition only fit for the common people and shopkeepers, like Buddhism. Why do the people who come here not live like Christians? Is it because they are ignorant merchants who only understand superstition?" "No," we are compelled to reply; "they are all the same at home." "Then," they say astonished, "why do not your learned men follow purely the teaching of Christ as our learned men follow purely the teaching of Confucius?" It is doubtless owing to the purely ethical character of his own religion that the educated Japanese has no religious bigotry as applied to dogma. He hates bad practice, but he listens with respect and toleration to any new theological opinions, and imbibes with delight the elevated principles of pure Christianity. All good Japanese are in the constant habit of prayer, and only the lower class practise ceremonial. Men are great there according to their lives, not their intellect. Thus the most eminent scholar is discredited because he gave one doubtful opinion on a point of morality. It is melancholy to reflect that the quarrels of the rival missionaries and the "lives" of those who are Christians only in name, will render it impossible for a people who only judge of a religious system by its results, to accept Christianity.

SAN FRANCISCO AND CHINA.—The British ship *Reindeer*, 964 tons, from China, was promptly chartered upon arrival, to load wheat for Liverpool at £3 10s. The *Alice Ball*, 898 tons, has been taken to load wheat for Liverpool at £3 5s. The ship *Winged Arrow* has been chartered for Liverpool, to load wheat upon terms withheld. The British ship *Cordillera* had a return charter secured prior to her arrival from Liverpool, but the contract time having expired, she has been re-chartered to carry wheat for England, upon terms reserved. The ship *Rival*, 983 tons, has a home charter for guano at Baker's Island, thence to Cork for orders, at £4 if to the Continent, and £3 17s. 6d. if to the United Kingdom. The barque *Buena Vista*, 864 tons, succeeds the *Emma Augusta* for Hong Kong, she having been chartered for the round sum of $10,000, and is now taking in wheat and flour for China at the rate of $10 per ton; this is $2 per ton more than was charged by the steamship *Colorado*, and is said to be the highest yet paid for Hong Kong. This is the result of the late market news received from China per *Reindeer*. The American barque *Vidette*, recently from New South Wales, is reported chartered for Hong Kong upon terms reserved. It is said that freight contracts for Hong Kong, per the *Colorado* (s), on her April trip, have been already made at the unparalleled rate of $12 per ton. On her first trip but $8 was charged. It is said that she will carry considerable flour and wheat.

CHINESE COOLIE LABOUR FOR BRAZIL.—A correspondent who has had lengthened experience of Brazil, and has recently visited China, Manila, Batavia, Java, Singapore, and Rangoon, has addressed an interesting communication to us recommending the introduction of coolie labour in the place of slave labour in the sugar-producing provinces of the empire. He points out the incontestable fact that, owing to the annual decrease in the number of slaves, the sugar crop in Bahia is decidedly on the decline, proprietors finding it more profitable to devote themselves to the lighter and easier task of growing tobacco, cotton, and coffee. Now, nothing could give us greater pleasure than to note progress in the cultivation of the three staple articles of produce we have just mentioned, but we agree with our correspondent in thinking that this need not necessarily involve a falling off in the yield of sugar, were it not that suitable labour is every day becoming scarcer and dearer. However, under existing circumstances, since the entire emancipation of the servile population is only a question of time, this result is inevitable, and it becomes a matter of serious import to inquire whether service of a voluntary character cannot be secured as a substitute for that hitherto obtained by the compelled exertions of the blacks. Work on a sugar plantation is quite unfitted for Europeans; and if the produce of this commodity is to remain one of the specialities of Brazilian industry, Chinese or other coolies must be introduced, as has been the case, and with great advantage, in Mauritius, Havannah, and other places. The subject is one worthy at least of the early consideration of the Imperial Government, or of those of the provinces more particularly affected. Many objections have been urged against coolie immigration, and it has even been described as virtually an Asiatic slave trade; but we presume it would be possible to protect the interests of the coolies by the enforcement and operation of just and humane laws, in harmony with the spirit and effect of the liberal and enlightened constitution of the country. Our correspondent assures us that whilst in China he had ample opportunity of becoming acquainted with all particulars connected with the coolie trade, and having conversed with the Brazilian Consul in Singapore on this topic, the latter concurred with him in believing that Asiatic labour would be successful and profitable in the Brazils. The suggestion, we repeat, deserves some attention from those more immediately interested, and we leave it with them, if they see fit, to take practical action in this direction.

THE BISHOP OF VICTORIA ON RITUALISM.—In the course of the farewell sermon preached to his congregation at Trinity Church, Islington, Dr. Alford, the new Bishop of Victoria, Hong Kong, spoke in these terms:—I call to mind yet another important parochial meeting which the circumstances of our day both justified and made a bounden duty. I refer to our Protestant meeting of last spring, when, as a congregation you met and adopted memorials, both to our bishop and to the legislature, against the use of vestments and Popish practices which have been introduced into too many of our churches. I rejoice that we made our protest—respectfully, I believe, but firmly. And I am sure you are prepared on any future occasion, when an expression of opinion may be deemed desirable, to testify your adhesion to, and value of, and love for the principles of the blessed Reformation; and to make your protests charitably, but unmistakeably against the abominations of Popery, however and wherever manifested. Alas! that we should live to see the day when, not only in the Roman Catholic chapels, but in the churches of our Protestant land some of the worst heresies of Rome—such as the elevation and worship of the Host—should be practised, as I myself have witnessed it; and that the arm of authority should seem weak to correct the offender, and effectually remove so great an offence in the sight both of God and man! The liberalism of the day is appealed to tolerate such practices in the Reformed Church of England and Ireland. What! tolerate in our Protestant Church the very practices which, at such cost of agony and blood, necessitated the Reformation? Besides, what, either in or out of the Church of England, has Popery to do with toleration? Let the fires of Smithfield testify (and let their testimony never be forgotten) what Rome means by toleration. It is but the wolf in sheep's clothing simulating the bleating of the lamb; and, if we be deceived by so wretched a counterfeit, and with the history of the past before our eyes, indeed a satanic delusion must have bewitched us, which may God in his mercy soon dispel. Has it, indeed, come to this, that our Church has lost her doctrinal creed, that Holy Scripture has lost its authority? Have we now no standard of right and wrong—no test of truth and error? Have the law and their testimony lost their power; and is it no longer the case that if men speak not according to their teaching, it is because there is no light in them? But look at the matter in another point of view. Is it to be supposed that Englishmen will long suffer in their National Church, which ought to be the "pillar and ground of the truth," two systems of Ritual worship and doctrinal teaching antagonistic the one to the other? If the one be right, the other must be wrong; and it is to libel the good sense of our countrymen to suppose that the spectacle of a Church divided upon the very essentials of our common Christianity can long retain her hold upon the affections and respect of the people. Shall we, then, renounce the Reformation? Shall we, as some unfaithful pseudo-Churchmen have affirmed, pronounce the Reformation a "grand mistake?" Shall we give up our Bibles for the Breviary? Shall we go back to "the Romish doctrine concerning purgatory, pardons, worshipping and adoration as well of images as of reliques, and also invocation of saints?" Shall public prayer in the Church and the Sacraments be ministered in a tongue not understood by the people? Instead of the two sacraments ordained of Christ our Lord, shall we speak of some two or three more, or of Rome's seven? Instead of "duly" using the Sacrament of the Lord's Supper, shall it be carried about to be gazed upon? Shall the substance of the bread and wine be said to be "changed," and then reverenced, lifted up, and worshipped? My dear brethren—and I speak now to the faithful laity of our Church—there is need that we utter no uncertain sound upon these points; it is needful "that we exhort you to contend earnestly for the faith once delivered to the saints." The future of our beloved Church—and I address those who use her services loyally, and believe her Thirty-nine Articles heartily—is in your hands. If fatal error spread among us within these next ten years—or five, or three—as during the preceding period, the very existence of our National Church is more than jeopardised. O think of your sons and daughters now worshipping by your sides—will you not hand down to them the open Bible and the Protestant worship your forefathers entrusted to your safe keeping? Will you suffer a captious scepticism on one hand, and barefaced Popery on the other, so to undermine the foundations of our Zion, that when destroyed the enemy shall taunt you, and your own conscience shall too late reproach you, "What hath the righteous done?" Done to save her? for their supineness hath been her ruin. O that the Lord Himself would interfere in our behalf, and rouse us from the fatal lethargy that has entranced us. Let Churchmen study well the history and the fate of the apocalyptic churches.

Christ's truth shall never perish. Christ's Church is built upon the rock and never can be moved. But "stars" can be quenched, and "candlesticks can be removed :—"He that hath an ear, let him hear what the Spirit saith to the Churches."

GUNBOATS FOR CHINA.—Composite-built hulls for gunboats is the latest adopted phase in naval architecture. Our own admiralty have seriously taken the subject in hand by laying down the keels of some half-dozen boats of small tonnage and engine power in the public dockyards, and in calling for tenders from private builders for ten boats of larger tonnage and engine power for service in the suppression of piracy on the coasts and rivers of China. But the steps thus taken by our naval authorities have been, even at this early period, apparently forestalled by foreign Powers, inasmuch as while we have only just laid down the keels of a few of these vessels, and are considering the tenders for others, a composite twin-screw gun vessel of very moderate tonnage, of great speed, light draught of water, and formidable offensive powers, was on Thursday launched for a foreign Government from the banks of the Thames, and was put through the ordeal of a trial of her machinery in a run of several hours down the Thames and over the course of the measured mile in Long Reach. This vessel, the *Eugenie*, as she has been named, was designed and constructed in both hull and engines by Messrs. J. and W. Dudgeon, of the Sun Iron and Engineering Works and Cubitt Town Shipbuilding Yard, Millwall, a firm to whose unaided exertions and enterprise the country owes the introduction of the twin-screw principle of propulsion into the Royal Navy. The *Eugenie* has a tonnage of 315, builders' measurement, with an extreme breadth of 22 feet and a moulded depth of 10 feet. Her draught of water, with crew stores, armament, and everything on board, will be 7 ft. 6 in. On Thursday she was launched at high water, with steam up, yards crossed, and all sails bent, guns on board, and, in fact, complete for sea in all respects, with the exception of ordinary sea stores and ammunition. Her guns on board consisted of one 70-pounder rifle muzzle-loader, one 40-pounder breech-loaders and two 20-pounder breech-loaders. As the *Eugenie* is a vessel of exceptional form of construction, possessing many features of special interest, it may be as well to say a few words on her hull and machinery. She has a frame of angle, the latter extending from the bilge to the upper stringer, and forming squares of about eight feet apart. The upper deck has also tie plates of similar strength. The iron frame is completed with the usual centre and floor plates and iron of 3½ in. by 3 in., with diagonal tie straps 6 in. by 6-8ths, wrought iron deck beams, and has five water-tight bulk-heads. The stem and sternpost are built up of wood, and the entire hull is sheathed with two thicknesses of teak of 2¾ in. and 2 in. thickness. Her machinery consists of two pairs of direct-acting inclined cylinder engines of 30-horse power, nominal, each. The cylinders stand at an inclination of 35 deg., almost touching each other at the top, and the space between them below is occupied by the condenser and hot well, which also forms part of the framing of the engines. The cylinders have a diameter of 25½ in., and a length of stroke of 14 in. The screw shafting is carried out under each quarter in two brass tubes, each of these brass tubes being enclosed in other tubes which are built out as parts of the iron frame of the ship. Both are finally enclosed in an outer wooden tube on the plan patented by the Messrs. Dudgeon. The shafting carries two three-bladed screws, each having a diameter of 5 ft. 10 in., and a pitch of 9 ft. 6 in. The hull of the vessel has been constructed with every care, and all the work is of a very superior character. The machinery lies in a very small space, and is a beautiful specimen of engineering work. Downton's pumps and fire engines, by Messrs. Blundell, the successors of Mr. J. Downton, are fitted on board, and were tested with very satisfactory results during the run down the river. The *Eugenie* was launched at high water, steam being up in her boilers at the time. On the stocks she looked very handsome, with a large flat midship section and fine bow and stern lines, but afloat she looked still better. In half an hour after she had been launched she was steaming down the river for her trial, passing Blackwall at 2.30 P.M., the engines making 130 revolutions and working almost noiselessly. There was no sign of heated bearings nor trouble of any kind whatever with the machinery throughout the day, the engines going through their work, from the start to the finish, with the most perfect smoothness and freedom. In Long Reach the *Eugenie* was given two runs over the Admiralty measured mile to ascertain her exact speed, the time being most carefully taken, and against rather than for the ship. These gave the following very satisfactory results :—First run, with the tide.—Time, 4 min. 30 sec.; ship's speed, 13.330 knots; engine's revolutions, 146; steam pressure, 25 lb.; vacuum, 25 inches. Second run, against the tide.—Time, 7 min. 10 sec.; ship's speed, 8·372 knots; engine's revolutions, 145; steam pressure, 25 lb.; vacuum, 25 inches; mean speed of the ship, 10·851 knots. This rate of speed, by a vessel of 315 tons, having a propelling power of only 60-horse, has never yet been equalled by any gun vessel of similar tonnage and power afloat. After the runs over the measured mile had been concluded the *Eugenie* steamed up the river again for moorings off Millwall.

THE BLUECOAT-BOYS AND THE JAPANESE.—On the 22nd inst., in continuance of a long-established custom, the scholars of Christ's Hospital, 740 in number, walked in procession to the Mansion-house, and were presented each with a new coin of the realm by the Lord Mayor, the Grecians receiving one guinea, the probationary Grecians half-a-guinea, monitors 5s., and scholars 1s. each. Each scholar was also regaled with wine and buns. As usual there was a large company assembled at the Egyptian Hall and in the vestibule to witness the ceremony. Perhaps the most interested, as well as interesting, spectators were the Japanese who are at present in London. The Lord Mayor had invited them to lunch, and some amusement was caused by their un-English preference of rice, jellies, and salads, which they mixed together, to the more substantial food supplied. When the Bluecoat-boys commenced passing along the Italian corridor in procession the Japanese expressed astonishment at seeing so many boys all similarly attired; at the same time it was amusing to watch the countenances of the Bluecoat-boys, on the one hand attracted by the Lord Mayor and the Lady Mayoress, on the other by the strange-looking foreigners. At the termination of the procession Mr. Price, the gentleman who brought the Japanese to England, addressed the Lord Mayor on their behalf, and thanked him for his kind hospitality, and for affording the Japanese the opportunity of seeing so interesting a ceremony; at the same time he begged to invite his Lordship and the Lady Mayoress to a special performance at the Floral Hall, on Friday next. Five hundred boys from the Bluecoat-school were also invited. The Japanese left apparently much pleased with their visit to the Mansion-house.

BANK OF HINDUSTAN V. SMITH.—This was an action upon a guarantee which was given in the course of the amalgamation of the Bank of Hindustan and the Imperial Bank of China, and the document was in these terms :—"We hereby severally acknowledge ourselves responsible to the Bank of Hindustan for £2,676, advanced as compensation to the non-elected directors of the Bank of China, India, and Japan (Limited)." This was signed by the defendant and a number of other gentlemen. The parties were under the impression that each gentleman signing was to be liable for his proportionate share only, instead of each one being liable for the whole amount, and when two of the gentlemen paid their proportion their names were struck out. At the trial before the Lord Chief Justice the verdict was for the defendant, upon a plea that the document had been improperly altered by striking out their names whilst it was in the plaintiff's custody. Mr. J. Browne now moved for a rule to enter a verdict for the plaintiff, and contended that, under the circumstances, the defence was not a valid one. Rule granted.

COCHIN CHINA.—Some time ago the shipowners and merchants of Bordeaux petitioned the French Government to allow all sorts of goods, except sugar, coffee, and cocoa, to be imported into France from Cochin China without paying duty, as is done for the products of other French colonies. It was represented that such a measure would be most useful to commerce and shipping, and would promote the prosperity of the colony. The Minister of Finance has just refused the prayer of the petition, for the reason that, if it were accorded, goods would be carried from British India and Dutch India to Saigon, and would be despatched thence as products of Cochin China, whereby the revenue would suffer. This decision is regarded at Bordeaux as unwise and illiberal, and hopes are entertained that the Minister of Finance, M. Rouher, will reconsider it.

The Annual China Breakfast given by the Wesleyans was celebrated on the 27th inst., about 700 persons being present. Mr. Preston, from China, addressed the meeting, and gave a pleasing account of his progress at Canton, &c. Mr. Roberts, the American missionary, who dates back some thirty years of China experience, including a residence at Nanking with the rebels, also addressed the meeting. Letters were received from Mr. Piercy, Mr. Hill, and Dr. Porter Smith.

APPOINTMENTS, &c.—The Queen has been graciously pleased to make and ordain a special statute of the Most Honourable Order of the Bath, for appointing General William Thomas Knollys, Comptroller and Treasurer of the Household of his Royal Highness the Prince of Wales, to be an Extra Member of the Civil Division of the Second Class, or Knights Commanders, of the said most honourable order. The Queen has been graciously pleased to appoint George Strachey, Esq., late Secretary to Her Majesty's Legation at Buenos Ayres, to be Secretary to Her Majesty's Legation at Copenhagen. The Queen has been pleased to approve of M. Victor Place as Consul-General at Calcutta for his Majesty the Emperor of the French. The Queen has also been pleased to approve of Mr. John L. Armitage as Consul at Colombo for his Majesty the King of the Belgians. The Queen has also been pleased to approve of Don Alfredo Pascual Colomer as Vice-Consul at Quebec for her Majesty the Queen of Spain. The Queen has been pleased to approve of Mr. Ferdinand Schott as Consul at Gibraltar for his Majesty the King of Bavaria. The Queen has also been pleased to approve of Don Manuel Contreras y Crooke as Vice-Consul at Halifax, Nova Scotia, for her Majesty the Queen of Spain. The Queen has been pleased to direct letters patent to be passed under the Great Seal, granting unto Admiral Sir Fairfax Moresby, G.C.B., the office or place of Rear-Admiral of the United Kingdom of Great Britain and Ireland and of the Admiralty thereof, in the room of Admiral Sir Phipps Hornby, deceased. The Queen has been pleased to appoint James Richard Holligan, Esq., to be Government Secretary and Secretary to the Court of Policy and Combined Court, and Edward Noel Walker, Esq., to be Assistant Government Secretary for the colony of British Guiana. Her Majesty has also been pleased to appoint Augustus Frederick Gore, Esq., to be Colonial Secretary and Clerk of the Council for the island of Barbadoes. The Queen has been pleased to appoint Lorenzo Xuereb, Esq., LL.D., to be one of Her Majesty's Judges for the island of Malta.

THE SPANISH DIFFICULTY.—*The Times* has the following on this article :—Now that a first instalment of redress has been obtained, we may feel sanguine as to the final adjustment of our differences with the Spanish Government. Nothing but the continued imprisonment of Macpherson stands in the way of our accepting a reference to arbitration if it should be proposed by General Calonge. It would not surprise us to learn in the course of a few days that, by an act of pure grace and favour on the part of the Queen, Macpherson has been set at liberty, and the dispute would then resolve itself into a claim of pecuniary indemnity. In estimating the wrongs which our countrymen have sustained we must not forget one consideration, which, though not flattering to Spanish pride, may fairly be pleadad in mitigation of damagea. Of all Spanish institutions, those which concern the administration of justice are, perhaps, the most defective. A recent traveller, whose tastimony is in other respects very favourable to the alleged revival of Spain, comments emphatically on the gross abuses of Spanish law. "Prisoncrs are often ordained a most unreasonable time before they are tried, while caprice, bribes, and the protection of the powerful have still far too much influence upon the lot of the criminal." While our right to insist upon common justice for British subjects is beyond question, we are not bound to interpret practices of which native Spaniards are often the victims as deliberate insults to this country.

THE Chinese silkworm is perfectly acclimatised in Austria, and is now in its fourth generation there, as in France. Last year, M. de Bretton got 4,000 cocoons of this species, which yielded nearly 300,000 eggs. This year he is organising, with the assistance of the Austrian Government, three large silk-producing establishments in Moravia and in Slavonia. The silk hitherto obtained has proved to be of excellent quality, and is exhibited at the Paris Exhibition.

LONDON, MONDAY, APRIL 29, 1867.

THE MAIL COMMUNICATION TO THE FAR EAST.

WE have received from Messrs. MATHESON and Co. a copy of the reply from the Treasury to the memorial signed by the bankers and merchants engaged in the trade with China, Japan, the Straits Settlements, Ceylon, &c., which will be found below. The reply is decidedly unsatisfactory, and the stereotyped argument about "guardians of the public purse" is produced as conclusive proof why the English mail service should continue to be beaten by the French line. We consider this a most improper conclusion for Government to arrive at so long as the postal service shows a large profit. Admitting that the China postal contract requires an outlay for its support, we are decidedly of opinion that it should be maintained at least as efficiently as the French service, and if the Government do not see this and are disposed to allow "strictly economical principles" to override one of our greatest sources of commercial success, we hope their reign will be speedily brought to an end. The CHANCELLOR of the EXCHEQUER, at least, should know how much the commercial prosperity of this country is owing to our well-appointed lines of postal steamers, and his word should go forth that no cheese-paring policy can be permitted in this quarter. We do not, however, consider the matter as settled, on the contrary, we believe that before the time of finally closing the new contract in September, further evidence will be forthcoming to prove that the best means of working the postal service to Ceylon, and all parts beyond, is by a service from Suez to Hong Kong, as pointed out in the memorial. The concluding portion of the Treasury letter that "it is satisfactory to remember that, owing to the "establishment of telegraphic communication over a large part "of the road to China and Japan, great speed in packet com- "munication has become less important," is a perfect specimen of official pleasantry. The following is the letter alluded to:—

Treasury Chambers, April 20, 1867.

GENTLEMEN,—I am directed by the Lords Commissioners of Her Majesty's Treasury to acquaint you, in reply to the memorial dated 8th ultimo, signed by you and other merchants trading with China, Japan, &c., in which you pray for improved mail communication with China, that in two respects your wishes have been anticipated, inasmuch as the forms of tender lately issued for the service, to which your memorial refers, admit of the service being contracted for in separate parts, and omit to call at Malta in the route between Marseilles and Alexandria.

With regard to the comparison which is drawn between the French and the English packet services to China, &c., my Lords have to remark that the delays to which you object will be in future somewhat reduced, probably by the withdrawal of the branch packet between Point de Galle and Calcutta, but that the ramified system to which you rightly attribute much of the delay is at present essential to any plan for conveying the mails at a moderate cost. Even before the alteration by which almost all the Indian mails are sent to Bombay took place, the cost of the China service was far from self-supporting, and now it is yet further from that point; and as it has been decided to release the Indian Government from much of the share of the loss which they have hitherto borne, the burden on the Imperial Exchequer may probably be increased.

Under these circumstances my Lords do not consider they would be justified as guardians of the public purse in doing more than has already been determined on, but it is satisfactory to remember that owing to the establishment of telegraphic communication over a large part of the road to China and Japan, great speed in packet communication has become less important.—I am, Gentlemen, your obedient servant,

(Signed) CHARLES W. STRANGE, Pro-Secretary.

To Messrs. Matheson and Co., and other Memorialists.

THE CEYLON EXPORT DUTY ON COFFEE.

THE impolicy of an export on the produce of any country which has been urged by all leading political economists, and been generally accepted as a principle in European legislation, has by no means been fully acted on in India and certain of our colonies. Such imposts constitute nothing less than premiums on the produce of competing countries. The high rates commanded by Ceylon coffee—rates affected to a very slight extent by the general depression that has prevailed in the money and produce markets, with the large and continuous demand for the varieties of the article by home and continental dealers, renders an export tax on its coffee less prejudicial to the interests of the colony than could be asserted of any other production of any country not possessing an absolute monopoly. It is not therefore from a competitive point of view that the impost can be best resisted, but by reference to the special grounds out of which it has arisen. The agitation of the Planters' Association of Ceylon for the abolition of the export duty on the staple produce of the island, though not supported, we regret to say, by our colonial contemporaries, merits the amplest support, if only for the reason that the occasion out of which the tax arose, the apprehended inability of the Colonial Treasury to fulfil without inconvenient pressure on its resources the obligation to guarantee the interest of the debt incurred in the construction of the Ceylon Railway, has not arisen. We find that the returns from the railway for 1867 will be double the amount that had been calculated, and although the cost of construction and supply of rolling stock has considerably exceeded the estimated amount, the excess of revenue over expenditure, the sums raised on debentures and the profits on the railway—profits estimated for the present year at £65,000—fully relieve the planters from the condition of their offer to be taxed, which was to meet so much of the required guarantee as the Government was unable to provide. As the accumulations of the export duty reach no less than £455,000, the planters have already contributed far more than they were bound to do; and it is only fair that on the railway being opened to Kandy they should be entirely relieved from the export duty on their staple produce. Were the impost swept away to-morrow, there would be yet sufficient means on hand to provide the sinking debt. It is only with the view of further extending railway accommodation that the Government which required that its own guarantee should be guaranteed can urge the retention of the tax, but seeing that the impost was voluntarily assumed, that its object has been completely answered, that expectations of traffic, and of the increase of the colonial revenue from accustomed sources has been far exceeded, and that the whole cost of the railway were the export tax on coffee abolished could be defrayed in fifteen years, constitute unanswerable arguments for compliance with the requirements of the Planters' Association. It is not as though they alone received the benefit of the railway. All interests in the islands have been promoted, and its industrial fortunes placed on a more stable basis than ever. The accumulating surplus balances of the Treasury, recuperated by an import trade amounting in value to three and a half millions of pounds sterling per annum, not to speak of the extraordinary resources afforded by the Crown lands, afford sufficient means for contemplated extensions. A point that should weigh with the Colonial Government in granting the memorial that has been forwarded, is the singularly unjust incidence of the tax for a large number of coffee growers who escape the effect of the impost altogether, merely selling the berry to the exporters. The local influences operating against coffee cultivation in Ceylon have been sufficiently depressing without the additional effect of a sum levied for a purpose for which it is not required, and pressing on the fortunes of those whose with prosperity the well being of the whole colony is identified. We allow that it was essential that the railway should have been constructed, and this boon would have compensated for far greater sacrifices, but this is no reason in view of actual results that an unnecessary burden should be continued. It is not as though the Ceylon planters and estate agents were making fortunes of fabulous amounts. There exists the necessity for the greatest economy in the cultivation of estates to render them remunerative; and the aid which the abolition of the existing impost on coffee would afford may be considered as essential in giving an impetus to further enterprise. Some indescribable charm appears to hang over the surplus balances, in respect to which Ceylon holds so exceptional a position; but if practical considerations are allowed to rule the interests of the planters it will not be sacrificed to any abstract considerations connected with large

Digitized by Google

available means. Past experience, indeed, has shown that these accumulations merely whet the appetite of the Colonial Office for their appropriation to colonial purposes. Our own belief is that nothing can arrest the rapid development of Ceylon resources but unwise restrictions on her industry and neglect to carry out those works of internal improvement essential to give full value to those means of advancement which nature and providence have placed in her hands. Had the Executive of Ceylon at the time the guarantee was solicited and offered exercised more prescience as to the future of the colony and possessed that more enlarged though modified control over the surplus balances which has since been accorded, that supplemental guarantee would never have been demanded. Seeing that nearly half a million of pounds sterling has been realised from this source, not a vestige of excuse remains for the perpetuation of the impost.

THE GROWTH OF TEA IN ASSAM.

A deputation of gentlemen interested in the Assam tea districts waited on the Governor-General of India to get some relaxation of the rules for coolies. The seven causes assigned for the ruin in Assam are these :—

"1. The abuse of limited liability principle, which established gardens in great numbers and on a much larger scale than could possibly be properly supplied with adequate labour. This led to the partial or total neglect of gardens that had previously been fully established and in good working order, but which deteriorated quickly into jungle from want of care. The rapidity and certainty with which this occurs in a tropical country where the rainfall is great can only be fully realised by being seen.

"2. The greatly enhanced expense in procuring labourers from Bengal.

"3. The inferior quality and consequent mortality of the labourers supplied.

"4. The loss in many cases of having to supply rice at a rupee a maund, when it was at famine prices in the district.

"5. The depreciation of the quality of the tea shipped from Assam, and the consequent fall in the price in England. This is attributed, by those best acquainted with the subject, to the inexperience of the local managers, which the too rapid extension of tea concerns in Assam unavoidably induced.

"6. Deficient capital among the promotors and owners of many of the tea concerns.

"7. The money panic in England in 1866 created a difficulty in procuring money, and produced a crisis in the affairs of some companies that otherwise might have been tided over."

DECLINE OF AMERICAN SHIPPING.

On the subject of American Shipping, a celebrated shipbuilder states that, in comparing the present bad state of the trade with that previous to the war, first-class ships could be built and equipped ready for sea for from $65 to $70 per ton, whereas the cost for the same would now be $110 per ton, the difference arising from the increased prices of material and enhanced taxation. The following statistics show the state of the shipbuilding and carrying trade since 1854 :—

The year 1854-55 was the best year of active shipbuilding in the United States—say the fourteen months following the beginning of 1854. From 1856, it declined somewhat during 1857, 1858, and 1859. Then it went up again, until 1861 it touched almost as high a point as it had in 1854-55. During 1862, it declined again, but not so much as it had during 1857, 1858, and 1859. In 1863 it recovered its former level once more, but soon afterwards sunk down much lower than it sunk in 1857 and 1859, and now in 1866 it was almost at an end. And as a consequence, it appears that the trade of America is beginning to be carried on in non-American vessels. Thus, there cleared in the following years—

	American.	Non-American.
1860	6,165,924	2,624,005
1864	3,090,948	3,741,131
1866	3,383,176	4,438,384

—which shows that the native tonnage has fallen off by a half, while the foreign has augmented by almost two-thirds. The immense decline was, first, owing to the war, and shows, by way of warning to our shipowners, what an effect the mere fact of a war, even with a country which never had six cruisers afloat, produces on the employment of shipping. Much American shipping was sold to foreigners, and the rest died out, and was not replaced.

CHARTERED BANK OF INDIA, AUSTRALIA, AND CHINA.

The thirteenth ordinary meeting of this company was held on the 17th inst., at the London Tavern ; Mr. T. A. MITCHELL, M.P., in the chair.

The CHAIRMAN, in moving the adoption of the report, which will be found together with the balance-sheet in our advertising columns, congratulated the meeting on what, taking all things into consideration, was a better result than last year at this time. The net profits of their operations, as compared with those of 1865, were 26 per cent. in excess, and that notwithstanding the severity of the crisis which all had felt in this country, as affecting almost every branch of trade and the credit of many firms engaged in such trade. This crisis reached its highest point in this country during the past year. It began unfortunately in the East nearly three years ago, and the origin of it was the spirit of insane speculation at Bombay, which was encouraged and stimulated by some financial establishments. To give them some idea of the severity of that crisis in thee East he might state that during 1866 no less than twenty-one banks connected with India and the East had either suspended payment or were in the course of liquidation, and the paid-up capital of these banks amounted to no less than £13,000,000. Looking upon the severity of the crisis, he thought that the directors had a right to congratulate them on being able to assure them that their capital was positively intact. They had had no doubt heavy losses by bad debts, and he might remark on this point that their report did not give the net profit after deducting the allowance for bad debts, but showed on the face of it the amount of the estimated bad debts, a plan, he believed, adopted by no other Eastern bank. In the past three years their loss by bad debts had been £203,000, all of which were included in the present estimate, which was made as recently as three weeks ago, when the bad-debts account was last revised. The result of the suspension of 21 banks connected with the East had been to reduce competition so that the remaining banks could make a better thing of it. He considered that the financial crisis in the East was really at an end ; all the new transactions were proper legitimate business, and the manager of the bank was of opinion that their prospects were never more favourable than now. In conjunction with their neighbours, the leading banks connected with the East, they had taken the opportunity to reduce the usance on bills of exchange in the East from six months after sight to four months, and that reduction of credit had been generally adopted in India, but not to the same extent in China. As to the low quotations of their shares, the directors had no power to help it, but they found by the register that the number of shares which had changed hands was very small in proportion to the whole number. He moved that the report be adopted.

Mr. MACNAUGHTON seconded the motion.

In reply to Mr. C. B. SKINNER, the CHAIRMAN assured him that the directors believed they had come to an accurate estimate of the bad debts, otherwise no dividend would have been proposed by them.

The report was then adopted, and a dividend for the half-year ending the 31st December last, at the rate of 5 per cent. per annum, free of income-tax, payable on and after the 24th instant, was declared.

Mr. T. A. MITCHELL, M.P., and Mr. JONES, the retiring directors, were then re-elected. The auditors, Messrs. Alderman DAKIN and JONATHAN THORP, were also re-elected, and a vote of thanks to the chairman and directors closed the proceedings.

ORIENTAL BANK CORPORATION.

The half-yearly meeting of the shareholders was held at the offices of the bank, Threadneedle-street, on the 18th inst. ; Mr. H. G. GORDON in the chair.

The report, which was given in our last issue, was accompanied by a statement of accounts, from which it appeared that the paid-up capital of the bank is £1,500,000, the liabilities being £16,616,500, the reserve surplus fund £444,000, and the insurance fund £50,000.

The CHAIRMAN, in moving the adoption of the report, said he believed it must prove satisfactory to the shareholders. It was true that their returns had not been so great as upon some former occasions ; but that was not to be wondered at after the great monetary crisis through which the commercial world had just passed. In considering that subject it should also be remembered that they had during the past year found it advisable to diminish their business, with a view to place themselves in a position to meet any exigency that might arise. They had, however, even under these circumstances, realised a large profit, and they were enabled to declare a good dividend, and to carry forward the handsome sum of about £14,000. Their prospects for the future were, he thought, most encouraging. Trade and confidence were reviving, and they were threatened with much less competition than they had for many years had to encounter. He believed that under all the circumstances of the case the present statement was the most satisfactory one which the board of directors had ever had to submit to the shareholders. He would briefly refer to the principal items in the accounts, comparing them with those of the year 1865, for the purpose of showing the nature of the position which they occupied. There was a slight diminution upon the present occasion in the amount of their promissory notes in circulation ; but that was a matter of little importance. Their bills of exchange in circulation had amounted in 1865 to a little over £5,000,000, and stood at present in round numbers at £6,843,000 ; showing an increase to the extent of £1,561,000. The cash deposits not bearing interest had been in 1865 £1,777,000, and were at present £2,473,000 ; while their cash deposits bearing interest showed a deficiency of £218,000. Their assets, in bullion, in balances due from other banks, and in Government securities, amounted in round numbers to £6,600,000, against £4,000,000 at which they had stood during the preceding year. These figures afforded the most satisfactory evidence that the stability of the establishment had been in no way impaired by the late commercial and monetary crisis, and showed also the care and caution with which their operations had been conducted. They had twelve months ago been deprived by death or by other circumstances of the services of three of their directors, and that was naturally a subject of much regret to the remaining members of the board. But he believed that those gentlemen had been replaced by successors as earnest in the discharge of their duties as any men who had ever filled the same office. Before he concluded his observations he wished to express the high sense which he entertained of the services of their manager and sub-manager. Those gentlemen had acquitted themselves of the trust reposed in them with admirable industry and judgment. One of the most successful portions of their business was that which they were conducting in London, and it was also one of a very extensive character, and yet they had not lost through it a single sixpence throughout the whole of the year. That fact alone furnished, in his opinion, the most decisive proof of the ability and discretion with which the duties of those gentlemen had been performed.

Mr. THOMPSON asked what was the sum which had been set aside for probable contingencies.

The CHAIRMAN said that in the statement of accounts ample allowance had been made for every loss.

Dr. ADAM THOM, after having stated that no distinct answer had been given to the question of Mr. Thompson, proceeded to comment on what he characterised as the imperfect and unsatisfactory manner in which the accounts were presented to the shareholders. He should be glad to see

Digitized by Google

the different items given more in detail, and to find that a more independent system of auditing was established.

The CHAIRMAN, in replying to the observations of Dr. Thom, said that the accounts had been prepared in strict compliance with the terms of the company's charter, and that charter could not be altered without some expense and trouble. But the officers of the bank would at all times be prepared to give the most detailed information to any shareholder who might apply to them for that purpose. With regard to the appointment of the auditors, that was the act of the proprietors themselves, and those gentlemen were not in any way the nominees of the directors.

The motion for the adoption of the report was then unanimously agreed to.

The three directors who had to retire by rotation were re-elected without any opposition; Mr. M'QUEEN and Mr. W. H. HUGHES were appointed auditors of the company for the present year. Votes of thanks were passed to the managers, as well as to the chairman and the directors, and the proceedings then terminated.

THE AGRA BANK.

A meeting of the shareholders in the Agra and Masterman's Bank (Limited) took place on the 16th inst., at the London Tavern, Mr. THOMSON in the chair.

The CHAIRMAN congratulated the shareholders on the present meeting. Last year had been an eventful one in the history of the bank. They had passed, so to speak, through the valley of the shadow of death. The struggle for life had been arduous and difficult, but it had been successful, and the greater the victory the more valuable and enduring would, he trusted, be the result. He might with confidence assure them that while the bank continued under its present management it would be conducted on the strictest principles of sound and prudent banking. The business of the bank was carried on principally in India, but it had its head office in London; they had a deposit branch in Edinburgh, and they had branches in Calcutta, Bombay, Madras, Kurrachee, and Lahore, and there were branches in China—at Hong Kong and Shanghai, and a branch at Paris still open in connection with the old business. But these latter the directors had not determined upon continuing, because, so far as they had ascertained, the profits resulting from them were not adequate to the cost of maintaining them. At the other establishments business would be carried on, not as heretofore, but in accordance with recognised and prudent banking principles. Advances would not be made upon indigo factories, tea gardens, growing crops, and various joint-stock enterprises, but would be confined to securities of the most unquestionable character, such as short loans and discounts on short bills, so that they might have their capital at all times available. Their chief source of profit, however, was the exchange business, which was based on legitimate trading, was attended with but very little risk, and involved but a small amount of capital as compared with the extent of the operations and the profit resulting.

The CHAIRMAN then went on to say that Mr. Cannan had made a claim for his past services, irrespective of solicitors' charges and fees, and salaries paid to the clerks and officers of the bank by whom he was assisted, of £25,000. (Cries of "Shame.") Liquidators were a creation of modern times, and they had framed for themselves a scale of charges which, to say the least of it, was unique and peculiar. There was no wish on the part of the committee that Mr. Cannan should not be fairly, justly, and even liberally dealt with; but £25,000 was a large sum for laying out and interring the Agra Bank, which had, to the astonishment of some and the disappointment of others—the liquidator perhaps included—opened its eyes and come to life again. He then proceeded to refer to and controvert the statements in Mr. Cannan's letters, published in the newspapers, and in the affidavit filed by that gentleman in the Court of Chancery; but as he stated that those in the affidavit would be answered in detail by the committee in their reply, and as that reply, so far as it was given by the chairman, involved certain charges against Mr. Cannan, we abstain from further referring to it than to state that one of the charges was that Mr. Cannan had kept in hand £113,000 in Consols and hard cash to meet his claims for past and future services—the solicitors' claims for past and future services, claims of creditors' representatives, first, and dividends to creditors; and that the Court of Chancery had ordered him to return £35,000 of that sum, and had placed a distringas upon the remainder of the Consols, prohibiting his selling or parting with them without the consent of the Court. After remarking that the resuscitation of the bank had restored half a million of money to the hands of the shareholders, he concluded by moving that the report of the committee appointed on the 18th October, 1866, be approved and adopted, and that the general expenses, charges, and salaries, and establishment charges stated therein, be apportioned, three-fifths to the liquidation account, and two-fifths to the Agra Bank, and that all the expenses of the branches that remained closed be charged to the liquidation. He explained that the liquidation would probably occupy another twelve months, and heavy expenses would necessarily be incurred; it was necessary therefore that the charge should be apportioned as proposed, which was in proportion to the respective capitals, viz., £400,000 and £600,000.

This motion was carried unanimously, after some slight discussion, as was also a resolution expressing grateful appreciation of Mr. Thomson's services, and awarding him £2,500 for his successful exertions in resuscitating the bank.

Mr. MORLAND then stated that he wished to know if the shareholders were prepared to pay £5,000 upon a document which he believed to be invalid. In 1862 an annuity of £500 was voted to Major M'Gregor, the then retiring chairman, on the motion of Mr. M'Pherson, who succeeded him, and it now appeared that a bond was given bearing the initials of Mr. M'Pherson, stipulating that should there be any default in the payment of the annuity, Major M'Gregor was to receive £5,000 by way of penalty. On inquiry, however, it appeared that there was no entry of this bond in the books of the company, and all the other members of the late board except Mr. M'Pherson disclaimed all knowledge of it. Mr. Cannan, however, though warned against doing so by him (Mr. Morland), had paid a dividend of 5s. in the pound on this bond, and he was happy to believe that an action against Mr. Cannan would lie for recovering it back, counsel having been consulted, and given it as their opinion that the bond was altogether illegal and invalid. For five years Major M'Gregor received the annuity, but now that the bank was no more he had no right to come upon the unfortunate shareholders for the £5,000, and he moved that the directors be required to call on Major M'Gregor to refund the £5,000 paid upon an illegal document. General MAULE RAMSAY seconded the motion.

Mr. M'PHERSON explained the part he had taken in the transaction, adding that the deed was given with the concurrence of the other directors in the usual manner, but it was not surprising that they had forgotten it, for he himself had forgotten it when first spoken to about it. They were advised that to make the annuity legal it must be secured by a bond, and that bond was carried through by the solicitor, and with the advice of counsel.

The resolution was then put, and carried by an overwhelming majority.

The meeting was then resolved into one of the Agra Bank (Limited), and the report of the directors, which has been already published, was put and adopted without comment. A resolution carrying out the financial arrangement as to the expenses, previously explained by the chairman, was also proposed and carried.

Sir G. ST. PATRICK LAWRENCE moved that the remuneration of the directors be £1,000 for the chairman, and £300 to each of the other directors.

Some objection was made to this, on the ground that as the directors might increase their number to seven, it being now six, it would be better to fix a maximum sum for the whole, and ultimately a maximum of £2,800, which would provide for the division as proposed in the original resolution, was adopted.

A long discussion took place as to whether Mr. Tate or Mr. Galsworthy should be appointed auditor, and in the end the latter was elected, on a show of hands, by 44 against 34.

A vote of thanks to the chairman concluded the proceedings, which had extended over three hours, and at times was very excited.

THE CESSION OF RUSSIAN AMERICA TO THE UNITED STATES.

The New York papers of the 10th inst. publish the subjoined as a copy in full of the important treaty on the above subject (except so far as the amount of money to be paid by the United States and the exact time within which the last touch of ratification is to be given), which was adopted by the Senate at Washington on the 9th, by a vote of thirty-one yeas to two nays, Senators Fessenden and Ferry being the minority:—

"The United States of America and his Majesty the Emperor of All the Russias, being desirous of strengthening, if possible, the good understanding which exists between them, have for that purpose appointed as their plenipotentiaries the President of the United States, William H. Seward, Secretary of State, and his Majesty the Emperor of all the Russias, Mr. Edward de Stoeckl, his Envoy Extraordinary and Minister Plenipotentiary to the United States, and the said plenipotentiaries, having exchanged their full powers, which were found to be in due form, have agreed upon and signed the following articles:—

"Art. 1. His Majesty the Emperor of All the Russias agrees to cede to the United States, by this convention, immediately upon the exchange of the ratifications thereof, all the territory and dominion now possessed by his said Majesty on the continent of America and in the adjacent islands, the same being contained within the geographical limits herein set forth, to wit:—The eastern limit is the line of demarcation between the Russian and the British possessions in North America, as established by the convention between Russia and Great Britain of February 28 (16), 1825, and described in articles 3rd and 4th of said convention in the following terms:—Commencing from the southern-most point of the island called Prince of Wales Island, which point lies in the parallel of 54 deg. 40 min. north latitude, and between the 131st and the 133rd degree of west longitude, meridian of Greenwich, the said line shall ascend to the north along the channel called Portland Channel as far as the point of the continent where it strikes the 56th degree of north latitude. From this last-mentioned point the line of demarcation shall follow the summit of the mountains situated parallel to the coast as far as the point of intersection of the 141st degree of west longitude of the same meridan, and finally from the said point of intersection the said meridian line of the 141st degree in its prolongation as far as the Frozen Ocean. With reference to the line of demarcation laid down in the preceding article, it is understood—first, that the island called Prince of Wales Island shall belong wholly to Russia, and now, by this cession, wholly to the United States; second, that whenever the summit of the mountains which extend in a direction parallel to the coast from the 56th degree of north latitude to the point of intersection of the 141st degree of west longitude shall prove to be at the distance of more than ten marine leagues from the ocean, the limit between the British possessions and the line of coast which is to belong to Russia, as abovementioned—that is to say, the limit to the possessions ceded by this convention—shall be formed by a line parallel to the winding of the coast, and which shall never exceed the distance of ten marine leagues therefrom. The western limit, within which the territories and dominion conveyed are contained, passes through a point in Behring's Straits on the parallel of 65 deg. 30 min. north latitude, at its intersection by the meridian, which passes midway between the islands of Krusenstern, or Ignaalook, and the island of Ratmanoff, or Noonarbook, and proceeds due north without limitation into the same Frozen Ocean. The same western limit, beginning at the same initial point, proceeds thence in a course nearly south-west through Behring's Straits and Behring's Sea, so as to pass midway between the north-west point of the island of St. Lawrence and the south-east point of Cape Choukottki to the meridian of 172 west longitude. Thence, from the intersection of that meridian in a south-westerly direction, so as to pass midway between the island of Attou and the copper island of the Kormanddorski couplet or group in the North Pacific Ocean, to the meridian of 193 deg. west longitude, so as to include in the territory conveyed the whole of the Aleutian Islands east of that meridian.

"Art. 2. In the cession of the territory and dominion made by the preceding article are included the right of property in all public lots and squares, vacant lands, and all public buildings, barracks and other edifices, which are not private individual property. It is, however, understood

Digitized by Google

and agreed that the churches which have been built in the ceded territory by the Russian Government shall remain the property of such members of the Greek Oriental Church resident in the territory as may choose to worship therein. Any Government archives, papers, and documents relative to the territory and dominion aforesaid which may be now existing there will be left in the possession of the agent of the United States; but an authenticated copy of such of them as may be required will be at all times given by the United States to the Russian Government, or to such Russian officers or subjects as they may apply for.

"Art. 3. The inhabitants of the ceded territory, according to their choice reserving their national allegiance, may return to Russia within three years; but if they should prefer to remain in the ceded territory, they, with the exception of uncivilized tribes, shall be admitted to the enjoyment of all the rights, advantages, and immunities of citizens of the United States, and shall be maintained and protected in the free enjoyment of their liberty, property, and religion. The uncivilized tribes will be subject to such laws and regulations as the United States may from time to time adopt in regard to aboriginal tribes of that country.

"Art. 4. His Majesty the Emperor of All the Russias shall appoint, with convenient despatch, an agent or agents for the purpose of formally delivering to a similar agent or agents, appointed on behalf of the United States, the territory, dominion, property, dependencies, and appurtenances which are ceded as above, and for doing any other act which may be necessary in regard thereto; but the cession, with the right of immediate possession, is nevertheless to be deemed complete and absolute on the exchange of ratifications, without waiting for such formal delivery.

"Art. 5. Immediately after the exchange of the ratifications of this convention, any fortifications or military posts which may be in the ceded territory shall be delivered to the agent of the United States, and any Russian troops which may be in the territory shall be withdrawn as soon as may be reasonably and conveniently practicable.

"Art. 6. In consideration of the cession aforesaid, the United States agree to pay, at the Treasury at Washington, within —— months after the exchange of the ratifications of this convention, to the diplomatic representative or other agent of his Majesty the Emperor of All the Russias, duly authorised to receive the same, ——— million dollars in gold. The cession of territory and dominion herein made is hereby declared to be free and unencumbered by any reservations, privileges, franchises, grants, or possessions, by any associated companies, whether corporate or incorporate, Russian or any other, or by any parties except merely private individual property-holders; and the cession hereby made conveys all the rights, franchises, and privileges now belonging to Russia in the said territory or dominion, and appurtances thereto.

"Art. 7. When this convention shall have been duly ratified by the President of the United States, by and with the advice and consent of the Senate, on the one part, and on the other by his Majesty the Emperor of All the Russias, the ratifications shall be exchanged at Washington within ——— from the date hereof, or sooner, if possible. In faith whereof the respective plenipotentiaries have signed this convention, and thereto affixed the seals of their arms.

"Done at Washington, the ——— day of ———, in the year of our Lord, One Thousand Eight Hundred and Sixty-seven."

OUR SQUADRON IN CHINA.

The *Times*, in noticing the sale of Her Majesty's wooden ships, as reported in our last, has the following article:—

While we are busy in getting rid of the last vestiges of the old state of things, we may as well consider how far we are consistent in our proceedings, and whether we are quite off with the old love before we are on with the new. The only possible justification of this wholesale sacrifice and destruction of our wooden fleet is the firm conviction that wooden vessels are worthless when opposed to iron, and that to rely on them for the duty of protecting our commerce, keeping open the highway to India and the colonies, or repressing any sudden outbreak of hostilities, is to lean on a broken reed which will assuredly pierce the credulous hand that trusts it. How comes it, then, that at the moment when we are selling our wooden fleet at firewood price we are still employing and actually putting new wooden ships into commission? Our China trade is as lucrative as any we possess, and, being carried on at so great a distance from home, is peculiarly liable to attack, and peculiarly, therefore, in want of efficient defence. We might, indeed, adopt a policy recommended by many high authorities, which would consist in giving up the idea of protecting our foreign trade by fleets and squadrons so large as to guarantee it, not only against casual insult, but against serious and efficient attacks. We might keep our ships at home, and only send them out when there is some specific object to be served. Such a policy would have much to recommend it. It would, in the first instance, be cheap, and it might, perhaps, be efficient. If, like Sir John Falstaff, we could make our name do the work of our sword, we should gain much, and nobody would have any cause to complain. But we do not adopt this line of policy. We profess our intention to protect our trade by adequate force on the spot, and, that being our intention, we are bound to give it full effect. Now, it is quite plain—at least, the Admiralty, who are thus rapidly demolishing our wooden fleet will hardly venture to deny it—that protection by wooden ships is no protection at all, except against enemies who will undertake to confine their operations to wood, and not on any account to meddle with cold iron. We are evidently under the persuasion that any possible antagonist with whom we may have to deal will be sure to show us this courteous consideration. We are just now fitting out the *Rodney*, an old wooden man-of-war, not one whit better than any one of those just sold at firewood price, for the China station, and, as far as we are aware, almost all the duty cast upon ships on stations far removed from England is discharged by wooden vessels. We have at once so little confidence in wooden vessels that we are selling them for less than the value of their materials, and so much that we trust them with the task of protecting our commerce and asserting our power and authority all over the world. The results of such a system are obvious. We pay about half a million a week for our national defences, and yet there is no nation so insignificant that it cannot, if it will, inflict a fatal injury on our trade. It does not require very formidable resources to become the proprietor of a single ironclad steamer, or, if this be beyond the power of a State, to commission a few ironclad privateers. This once done, for a certain number of months—that is, till the intelligence has reached England, and till ironclad ships can be sent to the scene of action—we are at the mercy of our opponents. We are paying for a security we do not get, and squandering our resources in providing a semblance of resistance and a facility of insult. We were not among those who thought it was the duty of the English Admiral on a recent occasion to interfere in order to prevent the bombardment of Valparaiso; but, duty or no duty, the result would have been all the same—the Admiral had not the means of giving effect to his opinion. The Spanish ironclad ships were entirely masters of the situation, and, had the city bombarded been English instead of Chilian, the English Admiral would have had no other choice than to submit. We will not speak of our own force, but we beg to call the attention of our readers to the present state of the French navy, leaving every reader to draw a parallel between their state and ours, according to the knowledge he may possess. The French have at this moment in commission seven ironclad frigates, three carrying 34 guns, one 28, and three 14 guns. These are first-rate vessels of between 800 and 900-horse power. France has, besides, in commission, two armour-plated vessels of 900-horse power, carrying 52 guns each. She is fitting out four iron-plated frigates of from 800 to 900-horse power. She has two similar vessels dismantled. She is building four iron-plated frigates, each of 950-horse power, carrying 12 guns, and with a complement of 750 men. She is building seven armour-plated corvettes of 450-horse power, carrying eight guns and 300 men each. France is, besides, building four armour-plated coastguard vessels of 530-horse power and two guns each, and she has afloat 16 floating batteries, with horse power varying from 150 to 120, and a number of guns between sixteen and nine. We do not believe that these vessels are as good as those which we possess, but the worst of them is quite good enough to deal with the best of our wooden ships.

There are circumstances which render this question peculiarly urgent at this moment. America, as well as France, has a large steam navy, and almost every nation in the world has a small one. Can anything, then, be conceived more absurd than this affectation of keeping up a semblance of naval power and predominance all over the world by means of ships confessedly quite incompetent to the business? We laugh at the Chinese for their paper ramparts and their painted guns, but in what respect better are our wooden frigates and men-of-war, despatched to enormous distances and at a great expense, in order, as it would seem, to afford an easy triumph to an enemy, and to break the spirit of a noble service by exposing it to the most painful and gratuitous humiliation? If we have no ships on the spot, no honour is lost; but what can be imagined more painful and more degrading than the position of a gallant officer who finds himself, perhaps, with a large ship, heavily armed, and a choice crew of eight hundred men under his command, compelled to fly before a feeble enemy who has no other advantage over him except that protection which we, with all our lavish expenditure, have failed to supply?

Naval and Military.

The Racoon, 22, for the Cape of Good Hope, the Rodney, 78, for China, and the Vestal, 4, for the West Coast of Africa, left Plymouth Sound on the 23rd inst.

The Dutch screw steam corvette Zoutman, 20, Capt. Kroef, from Batavia for Holland, arrived in the Sound on the 23rd inst.

A report has been circulated that the iron clad Ocean has been ordered from the Mediterranean station to China, but we cannot vouch for its correctness. The Ocean is about 4,000 tons, Captain Chandos Stanhope.

The screw steamer Achilles, which arrived at Gravesend, from China, on the 20th inst., landed her detachments at Government-quay on Monday, when the time-expired men were forwarded to join their respective depots at the various stations.

The armoured screw frigate Royal Albert, 18 guns, 4,069 tons, 800-horse power, Capt. Frederick A. Herbert, flagship of Vice-Admiral Sir George Rodney Mundy, K.C.B., left Spithead under steam for Halifax, to relieve the unarmoured screw line of battle ship Duncan, Captain Robert Dixon, flagship of Vice-Admiral Sir James Hope, K.C.B.

About 200 tons of chain cables and anchors were despatched in dockyard lighters from Woolwich, for embarkation on board the steamship Memphis, in the Victoria Docks, for conveyance to Alexandria for the service of the new steam transports recently built for carrying troops to and from India, viz., the Crocodile, built by Messrs. Wigram, at Blackwall; the Euphrates, built by Messrs. Laird, at Birkenhead; the Jumna, built by Messrs. Palmer, at Yarrow; the Malabar, built by Messrs. Napier, at Glasgow; and the Serapis, built by the Thames Iron Works Company, at Blackwall. The whole of the ships will be very shortly stored and ready for sea in case of being required.

The composite double-screw gunvessel Beacon, one of the squadron of iron and wood steamers of light draught building at Chatham dockyard, from the designs of Mr. E. J. Reed, Chief Constructor of the Navy, has been put in frame, and the first of her water-tight bulkheads completed. A portion of her main deck wrought-iron beams have been laid, while her bottom wood planking has been bolted to the iron frames. Since she was laid down the Beacon has been inspected by a number of the leading iron shipbuilders connected with London, Liverpool, and Bristol, who have been invited by the Admiralty to tender for the construction of the other vessels of this class. The Beacon is being built on perfectly flat sections, which will give her a comparatively light draught of water, enabling her to operate in harbours and creeks, while her double propeller will give her superior manœuvring powers, rendering her, in short, a most useful vessel for the particular service for which she is building.

From the *Navy List* we extract the following list of officers of H.M.S. Rodney and Zebra, commissioned for the China station:—

RODNEY.—Flag Lieutenant, H. F. Stephenson; Secretary, W. B. Risk; Clerks to Secretary, B. Urwick and J. Bowles; Captain, A. C. F. Heneage; Commander, E. White; additional (for instruction of Japanese), R. E. Tracey; Lieuts., W. Ed. C. Cookson, H. M'Hardy, A. H. Turnor, T. P. Gurdon, C. A. Woodrofe, W. E. Bamber; additional (for in-

Digitized by Google

struction of Japanese), A. K. Wilson; Master W. H. Harris; additiona (for instruction of Japanese), R. J. C. Grant; Captain of Marines, W. G. Hale; First Lieutenant Marines, F. A. Ogle; Second Lieutenants Marines, F. Baldwin and A. B. Crosbie; Chaplain, Rev. W. A. Rutherford, M.A.; Staff Surgeon, Charles Forbes, M.D.; Surgeon, H. Fegan, M.D.; Paymaster, G. Grant; Chief Engineer, J. Coade; additional (for instruction of Japanese), J. Robson; Sub-Lieutenants, H. M. Tyler, J. W. Sanders, A. MacLeod, and R. B. Clements; Supernumerary, S. G. Smith; Assistant-Surgeon, B. Gregory; Second Masters, C. H. S. Douglas and C. G. J. Cater; Assistant Paymasters, J. T. Hugo and T. A. Irwin; additional (for disposal), C. J. Curgerwen.

ZEBRA.—Commander, E. J. Pollard; Lieuteuants, A. G. McKechnie and R. B. Pipon; Master, T. Robertson; Paymaster, H. P. Shanks; Chief Engineer, R. Madge; Surgeon, J. W. Leahy; Sub-Lieutenant J. T. Hardinge; Assistant-Surgeon, C. L. Ridout.

The following are the names of the vessels of war now under construction at the various Royal and private dockyards for the British navy, together with the place where building:—

Avon, 2, twin sc. gun boat, at Portsmouth.
Beacon, 2, twin sc. gun boat, at Chatham.
Blanche, 4 sc. sloop, at Chatham.
Boxer, 2, twin sc. gun boat, at Deptford.
Bruiser, 2, gun boat, at Portsmouth.
Bulwark, 81, sc. ship, at Chatham.
Captain, 6, arm.-plt. t. s., at Birkenhead.
Carron, paddle tug vessel, at Devonport.
Crocodile, 3, iron troop ship, at Blackwall.
Cromer, 2, gun boat, at Portsmouth.
Cracker, 2, twin sc. gun boat, at Portsmth.
Danae, 4, sc. sloop, at Portsmouth.
Gnat, 2, twin sc. gun boat, at Pembroke.
Hercules, 12, arm.-plt. ship, at Chatham.
Hasty, paddle tug, at Glasgow.
Inconstant, 16, arm.-plt. frig., at Pembroke.
Juno, 6, sc. corvette, at Deptford.
Lapwing, 3, twin sc. gun boat, at Devonpt.
Monarch, 6, arm.-plt. tur. sh., at Chatham.
Myrmidon, 4, sc. gun vessel, at Chatham.
Newport, 5, sc. surv. vessel, at Pembroke.
Pelter, sc. tank vessel, at East Greenwich.
Penelope, 10, arm.-plt. twin sc. corvette, at Pembroke.
Philomel, 3, twin sc. gun vsl., at Deptford.
Prompt, paddle tug, at Glasgow.
Reculse, 12, arm.-plt. ship, at Woolwich.
Ringdove, 3, twin sc. gun vsl., at Portsmth.
Robust, 81, sc. ship, at Devonport.
Sappho, 4, sc. sloop, at Sheerness.
Sirius, 7, sc. sloop, at Portsmouth.
Thalia, 6, sc. corvette, at Woolwich.
Thistle, 2, twin sc. gun boat, at Deptford.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, APRIL 24.

The First Chamber of the States-General had before Easter a long list of unimportant questions to dispose of before it arrived at the Bill granting the money to apply the measures for preventing the spreading of the rinderpest. A brief conversation, however, only followed; some objections were made, but after all the Bill met with universal acceptance, and was voted unanimously. The House then adjourned until to-morrow, when the definitive budgets will be taken up. The credit laws expire on the 1st of May, so that these budgets must be voted before that day; there cannot be an ample debate, as there is only time enough for the several divisions. From the replies of the Government to the section reports—which were as brief as the discussions promise to be,—I only derive that the Minister for the Colonies answered to the accusation of being a "turncoat," that he still adhered to the programme of Mr. Myer, and asks further for facts by which his irresolution should be proved. When the House is inclined to furnish them, these, however, will not be wanting. But I think that our Lords have too strong a desire to return to their seats. The same Minister stated that in consequence of the strong objections which were urged against his measure to abolish the alternative chartering of Dutch merchantmen to convey produce from the East Indies to our ports for account of the Government, that it was his intention to make some alterations in those stipulations, and principally with regard to those by which vessels of small charter should be excluded.

The Second Chamber will, it is rumoured, meet again on the 14th of May for the despatch of business. Amongst the new Bills that will be brought in will appear that to regulate definitively the sugar cultivation in India, and another to repeal the law by which the minimum of the revenue of the sugar duties is fixed.

"War or Peace" remains still the principal question of the day; a great number of contradictory rumours are in circulation, and the public here does not know what to believe, because it is impossible to ascertain what actually passes. If it is true what is stated by the German Press, that Count Bismarck refuses to make any concession, then the question whether peace shall be preserved is narrowed to the simple consideration, if France is prepared to assert the claim to Luxembourg at the risk of a war. In the meanwhile public opinion is highly agitated here, and the several reports have caused a very marked fall in our Exchange, as on almost all the Bourses of Europe. Public opinion has indeed very little trust in the future, and very few is the number of people that thinks that these fears are unfounded, or at least premature. But I repeat that all that we know with certitude at this moment is, that we know nothing.

Within a few days a general promotion will take place in the army. Twenty-four first-lieutenants are to be named, whilst seventy subaltern officers are to be appointed lieutenants. Several high officers were pensioned.

H.M. the King and the Royal family will leave the Hague to-morrow to pay the capital their annual visit.

About the damming up of the Easter Scheltz there is no further news. The reports of the foreign engineers are not yet published, but several rumours are in circulation about their contents. The late storms have done some damage to these works that are now repaired by 4,000 workmen, but they are much overrated by the Belgian papers who state that the works were nearly destroyed. The damages are already now restored.

The dirty weather that prevailed during the last few days caused also many losses to the navigation. Amongst the vessels that were lost on our coasts appears an East Indiaman, which, with a full and valuable cargo, stranded on the evening of the 21st. The crew of this vessel, the *Baron Pallandt van Roosendaal*, was saved. Need it be added that these heavy losses are powerful stimulations to the insurance offices for raising the insurance premiums, the necessity whereof is urged in the meetings of insurance brokers, and likewise in the papers, because these companies did not make any profit at all during the last year.

From Amsterdam I hear that a plan is submitted to the Council of that town to enlarge the town with 648 bunders, so that when this plan is approved of the total circumference of our capital will be 1,326 bunders.

A general Anti-Stamp Duty League was established some days ago with the aim to insist by all means on the abolishment of the duty levied now on the newspapers.

At the Trading Company's coffee auction half of the quantities offered was sold at the full valuation. The parcels bought in will not be sold under the bought in prices, and in parcels of not less than 5,000 b. Good ord. Java 38 c.

COMMERCIAL.

COFFEE.—In waiting for the result of the auction of the Trading Company, which will be held to-morrow, and on which 102,694 b. are to be offered, there was but little doing. The transactions only included 4,000 b. Java ex Vriendschap, at 38c.; 2,200 b. do. ex do.; 560 b. Java ex Jessie Jamieson; 1,500 b. Macassar ex Francina Wilhelmina. The prices of the last parcels are not known, but it is generally thought that the previous rates have not been realised. The Trading Company, however, announced that in the said auction nothing would be sold under the valuation, and that before the 1st of August not more than 160,000 will be offered for sale. For the result of the auction see "Latest."

SUGAR.—Holders accepting rather lower rates; there was much improvement in the demand. 6,000 mats were sold at 1¾f. under March value. Stock of raw sugar, 37,900,183 kr.

SPICES.—Dull; the business has been limited, the demand being confined chiefly to the supply of the immediate wants of consumers.

JAVA INDIGO.—There was a fair request for prima qualities, but the stock was very limited; all that was offered (40 ch.) was bought at extreme rates. For ordinary quality rather lower prices were accepted.

CUTCH sells slowly at 29f.

BANCA TIN.—The previous prices were not sustained; 300 slabs were sold at 52½f.; 1,100 slabs at 52¾f.; 1,000 slabs at 51½f.

HIDES.—350 ps. Sourabaya Rinder, ex Francina Wilhelmina, were sold at secret prices.

TEA.—The valuation of the parcels of Java that will be offered on the 2nd and 3rd in auction is as follows:—

TRADING COMPANY.

	Chests.	Chests.	Valuation.
Boei	684/4	—	c.40 to 65

Hoeven, De Casembroot, Soeters, E. Byleveld, Savoye, Milaar; per Hollandstrouw: Messrs. J. Zonneveld, Trompheller, A. H. J. Berg and family, Van Wely, Mayer.

PASSENGERS OUTWARD.—For Java, per Noach: Messrs. L. Stibbe and family, A. Van Romunde, J. M. A. Reerink, J. J. F. E. ter Klooster, Hamers and family, Van Kempen and family, Gelfske, Mrs. Wiggers ter Ville, and Miss Kakeum, besides a transport of 125 soldiers.

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, APRIL 23.

My prediction of Admiral von Wullerstorf's resignation as Austrian Minister for Commerce and Public Works has been fulfilled much earlier than I anticipated when I wrote my last letter, and it has taken an unforeseen turn, as it was expected he would at least have remained in office till the conclusion of the negotiations respecting the Treaty of Commerce between Austria and Italy, which are nearly completed. The announcement made a few days ago at Vienna, therefore, took the public by surprise, as it was to the effect that the gallant admiral had tendered his resignation as Minister, that the Emperor had accepted it, and as a mark of his particular favour, had invested him with the Grand Cross of the Order of Leopold, the highest distinction in Austria for civil services rendered to the State. It was further added that the Emperor had appointed him to the supreme command of the forthcoming expedition to the Far East, and at the same time nominated him to be Ambassador Extraordinary to the Courts of China, Japan, and Siam, with full powers to negotiate and conclude treaties of commerce, navigation, and amity with those States. As the gallant admiral commanded the former expedition known as the "Novara Expedition," he will no doubt feel himself more in his element on the quarter deck of a ship of war ploughing the ocean than when confined to his desk in the ministerial offices at Vienna. The vessels selected for the expedition are the 42-gun screw steam frigate the *Donau* (or *Danube*), in which the admiral will hoist his flag, and the 16-gun screw corvette *Friedrich*, which was employed in the North Sea two years ago during the war with Denmark, and took part in the action with the Danish squadron off Heligoland on the 9th May, 1864. They are now both fitting out at Pola, and the arrangements will be completed under the personal orders and inspection of the admiral himself. The date of their sailing is not yet fixed, but there is every reason to believe, from the admiral's well-known energy and his knack of overcoming difficulties, that it will not be later than June, though the Emperor only promised that it should be in the autumn. The appointment of the admiral's successor as Minister has not yet been made, and the office is provisionally held by Herr von Becke, the Minister of Finance.

The Treaty of Commerce between Denmark and Japan, signed on the 12th of January last by Mynheer Dirk de Greff van Polsbroek, the Dutch Consul-General in Japan, by virtue of full powers granted to him by the King of Denmark, has now been published at full length in the official *Departements Tidende* of Copenhagen. The treaty stipulates the free right on both sides to appoint diplomatic agents and consuls in the territory of the other party, opens the ports of Hakodadi, Kanagawa, and Nagasaki in Japan for Danish trade, and insures to Danish subjects the right of residence and the free exercise of their religious worship. Danes settled in Japan are to be subject to Japanese jurisdiction in all disputes concerning property and personal rights; in all other cases differences are to be settled by the consuls. Danes are permitted to import and sell all goods not prohibited by law into the above-mentioned ports, except contraband of war, and may purchase any native goods they please of the Japanese. Shipwrecked Danes are to receive every assistance and protection from the authorities in Japan. Naval stores for the use of Danish ships of war may be warehoused without the payment of duty. Danish subjects shall be treated in Japan on the footing of those of the most favoured nations. All negotiations and official communications between the Danish and Japanese authorities are to be carried on in the French language.

Under the heading of the "Siberian Question" Count Sollohud publishes an article in the *Moscow Gazette*, in which he exposes the two great antagonists of the poor and at the same time rich country of Siberia, viz., its distance from the centre of the empire, and its colonisation by criminals." "We know," says the Count, "that ten thousand criminals are annually banished to Siberia, who perish, both physically and morally, from disease and idleness; ten thousand pairs of working hands, expatriated from their homes to be mixed up with the dregs of society. We know further that a thousand prisoners annually effect their escape from penal servitude, creating continual fear and trembling in the minds of peaceable and quiet-minded inhabitants." He then suggests abandoning Siberia as a penal colony and having one and the same code of laws for the whole monarchy. With regard to the great distance, he proposes to shorten it by the construction of a railway from Tjumen to Nijni Novgorod, which would place Siberia in immediate communication with Moscow, and to let the work be executed by gangs of prisoners. The article has made a great sensation.

Amongst the most recent arrivals of passengers in this city are Mr. van Reesema from Hong Kong and Herr Bomeyer from Japan.

The Emperor of Mexico has appointed Herr Gustav Overbeck to be Consul-General at Hong Kong; Mr. O. being an Austrian subject has applied for and obtained the Imperial permission to accept the appointment.

COMMERCIAL.

The Easter holidays and the fear of a war between Germany and France, which appears to be looming in the distance, have had a depressing influence on all articles—except sulphur and saltpetre, which are in demand and dearer—prices having in most instances given way. Notwithstanding this, 17,000 bags of coffee were sold at very nearly last week's values; but sugar, both raw and refined, is quite neglected and lower. Rice and spices are dull; of the latter the only transaction reported was 1,000 bags of Singapore Pepper, at 3⅞ sch. bco., which is decidedly lower. There have been some considerable arrivals of candied ginger by the vessels from China, noted at foot, and 2,000 chests have already been sold. Spelter is extremely difficult to dispose of, though offered much lower. No sales have been made since last week, the nominal quotations are 13½ mks. bco. in loco, and 13¼ for delivery, but lower offers would probably not be refused.

DISCOUNT.—Money is fortunately plentiful and cheap, good bills being easily discounted at 2 per cent. On the Stock Exchange there was an awful panic on two different days this last week, and prices of all descriptions of securities came tumbling down 5 or 6 per cent. in the course of half-an-hour. Thus the Italian Rente has fallen from 53 down to 42, but rallied a little since, and is now at 44; Austrian Credit Bank from 72 down to 58, now at 59; Rhenish Railway shares from 117 down to 96, and most other railway shares at the same rate.

SHIPPING INTELLIGENCE.

ARRIVED.—April 18, Orion, from Whampoa; Patriot, from Singapore; 19, Schultze-Delitck, from Canton; 20, Caroline, from Hong Kong, Canton, and Macao.

SAILED.—April 18 (from Cuxhaven), Hugo and Otto, to Shanghai; Bernhard Carl, to Singapore; 20, Merida, to Nicolayefsk; Fetish, to Hong Kong; 21, Kivic, to Nicolayefsk.

EXPORTS TO THE FAR EAST.

The quantities and value of the Cotton Goods shipped from London, Liverpool, Southampton and the Clyde, to China, Japan, Singapore, Batavia, Manila and Ceylon, during the month ended 16th April, 1867, and during the four months ended 16th April of the years 1865, 1866, and 1867, are given as follows in Mr. Sam Mendel's monthly export tables:—

TO HONG KONG AND WHAMPOA.—For month ended 16th April, 1867: Plain Cottons, 3,444,849; Coloured Cottons, 177,893; Printed Cottons, 21,345 yards; Cotton Yarn, 475,788 lbs.; total value of Cotton Goods, £110,853. For the four months ended 16th April, 1865: Plain Cottons, 7,525,804; Coloured Cottons, 1,304,991; Printed Cottons, 117,826 yards; Cotton Yarn, 725,020 lbs.; total value of Cotton Goods, £298,600. For the four months, 1866: Plain Cottons, 16,234,552; Coloured Cottons, 1,708,201; Printed Cottons, 196,900 yards; Cotton Yarn, 1,678,558 lbs.; total value of Cotton Goods, £626,068. For the four months, 1867: Plain Cottons, 10,051,170; Coloured Cottons, 417,907; Printed Cottons, 206,078 yards; Cotton Yarn, 1,105,388 lbs.; total value of Cotton Goods, £301,472; decrease for 1867 against 1866, £324,596.

TO SHANGHAI.—For the month ended 16th April, 1867: Plain Cottons, 9,014,579; Coloured Cottons, 1,352,020; Printed Cottons, 474,642 yards; Cotton Yarn, 10,000 lbs.; total value of Cotton Goods, £226,589. For the four months ended 16th April, 1865: Plain Cottons, 18,251,723; Coloured Cottons, 1,612,430; Printed Cottons, 725,661 yards; Cotton Yarn, 63,580 lbs.; total value of Cotton Goods, £503,785. For the four months, 1866: Plain Cottons, 30,089,511; Coloured Cottons, 3,014,704; Printed Cottons, 1,235,268 yards; Cotton Yarn, 5,000 lbs. total value of Cotton Goods, £863,252. For the four months, 1867: Plain Cottons, 25,156,540; Coloured Cottons, 4,805,077; Printed Cottons, 2,002,084 yards; Cotton Yarn, 103,132 lbs.; total value of Cotton Goods, £688,416; decrease for 1867 against 1866, £166,736.

TO JAPAN.—For the month ended 16th April, 1867: Plain Cottons, 1,399,149; Coloured Cottons, 338,975; Printed Cottons, 29,680 yards; Cotton Yarn, 110,700 lbs.; total value of Cotton Goods, £46,023. For the four months ended 16th April, 1865: Plain Cottons, 2,406,282; Coloured Cottons, 561,049; Printed Cottons, 357,602 yards; Cotton Yarn, 56,100 lbs.; total value of Cotton Goods, £109,390. For the four months, 1866: Plain Cottons, 12,232,936; Coloured Cottons, 961,144; Printed Cottons, 1,150,296 yds.: Cotton Yarn, 738,500 lbs.; total value of Cotton Goods, £412,884. For the four months, 1867: Plain Cottons, 6,335,345; Coloured Cottons, 1,117,749; Printed Cottons, 305,630 yards; Cotton Yarn, 735,700 lbs.; total value of Cotton Goods, £218,350; decrease for 1867 against 1866, £194,534.

TO SINGAPORE AND PENANG.—For the month ended 16th April, 1867: Plain Cottons, 3,092,191; Coloured Cottons, 907,864; Printed Cottons, 193,122 yards; Cotton Yarn, 200,950 lbs.; total value of Cotton Goods, £104,155. For the four months ended 16th April, 1865: Plain Cottons, 12,160,563; Coloured Cottons, 1,406,199; Printed Cottons, 774,158 yards: Cotton Yarn, 488,501 lbs.; total value of Cotton Goods, £367,685. For the four months, 1866: Plain Cottons, 17,994,184; Coloured Cottons, 2,322,732; Printed Cottons, 1,024,487 yards; Cotton Yarn, 435,360 lbs.; total value of Cotton Goods, £573,347. For the four months, 1867: Plain Cottons, 20,900,241; Coloured Cottons, 4,049,108; Printed Cottons, 1,372,629 yards; Cotton Yarn, 783,130 lbs.; total value of Cotton Goods, £617,987; increase for 1867 against 1866, £44,640.

TO MANILA.—For the month ended 16th April, 1867: Plain Cottons, 552,938; Coloured Cottons, 1,233,568; Printed Cottons, 396,233 yards; Cotton Yarn, 4,227 lbs.; total value of Cotton Goods, £59,649 For the four months ended 16th April, 1865: Plain Cottons, 3,387,918, Coloured Cottons, 3,476,943; Printed Cottons, 550,115 yards; Cotton Yarn, 36,050 lbs.; total value of Cotton Goods, £194,006 For the four months, 1866: Plain Cottons, 2,577,640; Coloured Cottons, 3,225,386; Printed Cottons, 39,120 yards; Cotton Yarn, 15,700 lbs.; total value of Cotton Goods, £164,380. For the four months 1867: Plain Cottons, 4,940,776; Coloured Cottons, 4,660,412; Printed Cottons, 515,232 yards; Cotton Yarn, 44,016 lbs.; total value of Cotton Goods, £260,325; increase for 1867 against 1866, £96,545.

TO BATAVIA.—No return for April, 1867. For four months ended 16th April, 1865: Plain Cottons, 3,006,653; Coloured Cottons, 1,811,365 Printed Cottons, 2,217,570 yards; Cotton Yarn, 110,100 lbs.; total value of Cotton Goods, £194,202. For the four months, 1866: Plain Cottons, 11,065,936; Coloured Cottons, 3,966,101; Printed Cottons, 2,213,346 yards; Cotton Yarn, 189,710 lbs.; total value of Cotton Goods, £453,696. For the four months, 1867: Plain Cottons, 7,184,432; Coloured Cottons, 4,460,526; Printed Cottons, 5,463,092 yarns; Cotton Yarn, 207,570 lbs.; total value of Cotton Goods, £417,206; decrease for 1867 against 1866, £36,590.

TO CEYLON.—For month ended 16th April, 1867: Plain Cottons,

Digitized by Google

1,760,452; Coloured Cottons, 101,202; Printed Cottons, 162,950 yards; Cotton Yarn, 26,000 lbs; total value of Cotton Goods, £44,559. For the four months ended 16th April, 1865: Plain Cottons, 2,365,154; Coloured Cottons, 632,958; Printed Cottons, 377,502 yards; Cotton Yarn, 63,149 lbs; total value of Cotton Goods, £106,105. For the four months ended 1866: Plain Cottons, 4,565,168; Coloured Cottons, 794,559; Printed Cottons, 1,613,863 yards; Cotton Yarn, 107,173 lbs.; total value of Cotton Goods, £203,889. For the four months, 1867: Plain Cottons, 7,643,839; Coloured Cottons, 698,554; Printed Cottons, 1,177,128 yards; Cotton Yarn, 42,500 lbs.; total value of Cotton Goods, £223,540; increase for 1867 against 1866, £19,651.

Monetary and Commercial.

A meeting of the shareholders of the Bank of Rotterdam was held on the 29th ultimo, for the purpose of receiving the report of the committee appointed to investigate the charges against the directors contained in a recent letter addressed to the shareholders by Mr. Hinsberg.

The report of the committee disposes of these charges in detail. First, in reference to the connection of Mr. Bauduin, a director, with the firm of Dummler and Co., the report states that there is no evidence to prove that Messrs. Dummler have abused their position as agents of the bank, or that Mr. Bauduin has promoted the interests of that firm in opposition to those of the bank. On the contrary, the committee consider that the connection of the bank with Dummler and Co. has been attended with much advantage to the former.

Mr. Hinsberg, in the second paragraph of his letter, accuses the directors of having by various means compelled him to resign the management of the Holland branch of the bank. The report states in reply that "Mr. Hinsberg's principles as to the management of interests confided to the care of the bank appear to have been contrary to those of his colleagues and to those generally observed, and it is not surprising that these principles should have led to frequent differences, and, ultimately, to a separation."

The concluding portion of Mr. Hinsberg's letter relates to the general management of the bank. On this head the report of the committee offers the following remarks:—"The connections of the bank in Holland have been considerably extended since the departure of Mr. Hinsberg. The dispositions of the bank are not less excellent than heretofore. The Indian business is being conducted in an able and efficient manner, and since the bank was established the Indian losses have not amounted to more than 4 per cent. of the European. The European business has not been neglected in favour of the Indian. Bad debts written off have arisen, with one exception, from transactions entered into previous to July last. The above leads to the conclusion that the position of the bank is not less secure and the management not less excellent than under Mr. Hinsberg's directorship."

The result of the meeting was that the shareholders declined to accept the proffered resignation of the directors, who thereupon resumed their appointments. The auditors for the present year were elected and a vote of thanks having been presented to the Chairman, Mr. Fransen van de Putte and the Commissioners, the proceedings terminated. The balance-sheet presented at the meeting will be found in our advertising columns.

Some important robberies of silk are alleged to have taken place on board the steamers of the P. and O. Company. The loss involved, we understand, amounts to several thousand pounds. The question is an important one, as a grievance of this nature on the part of shippers will tend to curtail the shipments by this company's vessels. The company repudiate the claims, and allege that the bales may have been plundered in the godowns before shipment and skilfully sewn up again.

A meeting of the creditors of the Commercial Bank of India and the East was held on the 17th inst., when the terms of the proposal for the reconstruction of the establishment, under which the remaining 10s. in the pound will be paid by four equal half-yearly instalments, were cordially approved.

The reports of the meetings of the Chartered Bank of India and the Oriental Bank, alluded to in our last issue, will be found in another column.

The biddings for £300,000 in bills on India were made at the Bank of England. The amounts allotted were—to Calcutta £196,000, to Madras, £4,000, and to Bombay £100,000. The *minimum* price was fixed at 1s. 11¼d. on all the Presidencies. Tenders at 1s. 11½d. on Calcutta and Madras will receive about 89 per cent., and on Bombay, at 1s. 11¾d., about 78 per cent. Those above these prices will be allotted in full. The results thus obtained as regards Calcutta and Madras show a reduction of 1½ per cent. from the rate paid on the last occasion, and as regards Bombay a reduction of 1 per cent., indicating a considerable falling off in the demand for means of remittance to the East.

The annexed letter from Mr. H. H. Cannan explains some points with regard to the proceedings at the meeting of the Agra and Masterman's Bank:—

TO THE EDITOR.

Sir,—Had I been invited to attend the meeting of the Agra Bank shareholders, held yesterday, I should have offered to those present a full explanation of every matter with which my name was connected.

Your report of Mr. Thomson's speech is calculated to convey a very erroneous impression of the facts, and to lead to the conclusion that I had improperly retained in my possession large assets belonging to the bank; I therefore ask you to permit me to state the facts:— On the 11th Jan. last I handed over to the new bank a cheque for £1,130,000, and on the 12th I handed over the whole of the remaining assets and property of the old bank, with the exception of the balance standing to the credit of my official account as liquidator at the Bank of England (about £4,000) and £116,000 Consols also standing in my name as liquidator.

As I was liable to pay a large amount of dividends for which creditors were daily calling, the cash was absolutely necessary. The Consols remained in my name until the order of the Vice-Chancellor was obtained for their disposal. By my consent an order was made for the transfer to the new bank of £32,700 Consols (which I transferred), the Vice-Chancellor deciding that the balance should remain as an indemnity fund for unclaimed dividends, &c.; at the same time I offered to transfer this fund into the joint names of myself and some person to be nominated by the new bank. The bank's solicitor, however, preferred that the amount should remain standing in my name with a distringas, to which I readily consented.

I may add that everything that has been done by me with regard to the £4,000 cash and £116,000 Consols has been done with the sanction and under the direction of the Vice-Chancellor; and I cannot but think it unfair that an order made with my consent should be spoken of as an adverse order, and that the distringas to which I consented for the convenience of the new bank at the request of its solicitor, and to save expense, should be designated as a proceeding taken adversely.

I may further add, that up to this time I have not taken or received one shilling of the bank's money for remuneration or outlay, although my firm are out of pocket to a very large amount.—I am, Sir, your very obedient servant,

H. H. CANNAN.

The report of the directors of the Singapore Gas Company states that:—The profits of the company for the half-year ending the 31st of December were £990, which, together with £25 from the preceding half-year, made an available balance of £1,016, out of which the directors recommended a dividend at the rate of 3½ per cent. per annum on the amounts paid up on the original capital, free from income-tax, leaving a balance of £51. Mr. E. J. Wells, the manager, states in his report that the advantages of gas over cocoa-nut oil for illuminating purposes was fully appreciated by all classes of residents at Singapore. The total increase of lights for the half-year was 798. The collection of the gas rental had been satisfactory, and the profits on the fittings and sundries, and also the sale of the residual products, had fully answered his expectations. The total number of lights fixed at the end of the half-year was 5,310. The revenue account for the half-year showed that £4,332 had been received, and £3,342 expended, leaving a balance, as above, of £990.

The amount of bullion by the P. and O. Company's steamer *Tanjore*, from Southampton, on the 20th inst., was—In gold, to Galle, £550; in silver to Bombay, £49,300; to Madras, £50; to Hong Kong, £1,000; to Shanghai, £3,000; total in gold, £550; in silver £53,350.

MANCHESTER MARKETS.

Mr. Sam Mendel's report states:—There is not much activity in sales, either Yarns or Goods, but there are offers on a larger scale than for some time past for both Mule and Water Twist at 1d. per lb., and for India and China Shirtings, at 3d. to 6d. per piece reduction from the quotations herein given. The unsettled position of political affairs on the Continent exercises for the time a depressing influence on this market. Grey Shirtings, 7 lbs., 9s. to 9s. 6d.; 8¼ lb., 11s. 3d. to 11s. 6d. Cotton Yarn, Nos. 16-24, 1s. 3½d. to 1s. 4d.; 28-32, 1s. 4d. to 1s. 5d.; Maddapollams, 4s.; Long Cloths, 11s.; T-Cloths, 7s.; White Spot Shirtings, 12s. 9d.

ARTICLES OF IMPORT.

TEA.—The market has been generally quiet, especially in Congous, whilst in Scented Capers and Green teas there has been a large business done at full prices. There has, on the whole, been but little alteration, but the tendency is in favour of buyers for fair to good medium teas, the quantity on offer out of the recent arrivals being in excess of the wants of the trade, who still only buy on a limited scale; whilst the unsettled state of affairs on the Continent has tended to check the export demand for that quarter. Congous: Siftings, both Moning and Kaisow kinds, have been taken to a moderate extent at about previous prices. Broken-leaf have been sold a little easier. Fair to good common show no alteration. Fair to good flavoury kinds are not readily saleable at the late decline. Good to fine Kaisows and Pak Lings have been steady at full prices, with a moderate amount of sales. Common to fair black-leaf kinds have sold ¼d. to ½d. per lb. lower. Fair to good medium kinds show no improvement, the demand for them being limited, even at the low prices established. In fine to finest there is no material change, the demand being quiet. New-make Canton kinds, in half-chests, have sold ½d. per lb. lower; boxes show no change. Good to fine Oolongs remain steady at full prices. Good to fine Souchongs have been less saleable, and prices show a reduction of 1d. to 2d. per lb. In Flowery Pekeos there has been no new feature. In Scented Capers the recent arrivals have found ready buyers at a further advance of about 1d. per lb. Scented Orange Pekoes still remain heavy of sale at the low rates current. Foochow kinds show no alteration. Uncoloured Japans have been sold at fully previous rates.

GREEN TEAS.—The arrivals have been considerable, but, with a good demand, sales have been made to some extent at full prices, especially for Moyune kinds of Young Hyson and Gunpowder, Ping Sueys selling at about previous rates. Hysons have been taken to a limited extent at previous prices. The commoner kinds of all qualities are comparatively difficult of sale. Further sales of Canton-made Gunpowder have been made at very full prices. The vessels afloat now are, in addition to those sailed subsequent to the 1st March:—

SILK.—The state of politics in Europe at the present moment, more particularly the Luxembourg question, has quite stopped business in this market; for some days past nothing has been done, all operators holding back while the uncertainty as to peace or war continues; quotations of Silk are nominally the same price. The prospects of the European crop are variously estimated, but the general opinion is that the result cannot be better than last year. The future of the market depends therefore entirely upon the great question, peace or war; but even should the most gloomy forebodings be realised, we see nothing in the statistics of our article to justify the expectation of any excessive decline in prices. Deliveries from 1st to 24th inclusive, China, 1,570 bales; Japan, 483 bales; total 2,053 bales.

COTTON.—We have again to report an extremely dull market, the sales of East India afloat and on the spot only amounting to 2,830 bales, which were taken at a decline of ¼d. to ½d. per lb. on our last quotations. No China, Dhollerah, or Rangoon has been offered. During the week 33,065 bales have arrived in London, making a total of arrivals for the present year of 33,065 bales.

COFFEE.—The market generally is quiet; the reduced prices previously accepted for plantation Ceylon have caused this description to be in improved demand at somewhat enhanced rates. Native, however, continues much depressed, good quality offering at easier prices without finding ready buyers, and other kinds are also mostly of heavy sale. The following have been the sales at auction:—1,450 casks, 310 barrels and bags Plantation Ceylon realised, fine ordinary to low middling, 70s. to 77s.; middling to good middling, 78s. to 82s.; good middling to fine colory, 83s. to 90s. Of Native Ceylon, 3,450 bags, 1,193 pockets realised, good ordinary, rather mixed, 60s. to 61s. 6d.; superior, 68s. to 69s.; brown garblings, 23s. to 28s. 6d.; and black, 9s. 6d. to 10s. The only remaining sale of East India was of 2,744 bags Singapore at 60s. to 62s. per cwt. The stock of Ceylon on the 13th inst. was 6,250 tons, against 5,740 at the same time last year.

COIR YARN.—Private business is being done in Ceylon at the quotations given in our report of the 17th inst., but there has been no supply at auction.

DRUGS.—Camphor: Very quiet, and the only sale reported is of 50 tubs Japan at £5 15s. per cwt., no China having been offered. Cardamoms: Six cases Ceylon sold, medium at 2s. 9d.; fair at 3s. per lb. Cantharides: One case China was bought in at 6s. Galls: At auction 141 boxes ordinary Japan were bought in at 60s. to 62s. 6d. per cwt. Musk: Of Tonquin the sales have been 23 caddies ordinary and medium at 16s. 6d. to 20s., very ordinary bally at 12s. 6d. to 14s., 1 tin fine at 36s., and 9 tins good grain at 50s. to 50s. 6d. per oz. Rhubarb: Of 114 cases China offered at auction 90 cases sold at a decline of 6d. per lb., the prices realised being—for good medium 4s. 3d. to 4s. 8d., for medium 3s. to 3s. 1d. per lb.

GUMS.—Benjamin: Out of 201 cases Sumatra offered at auction 65 cases good fair brown thirds realised £5 to £5 15s., and 46 cases seconds sold—good at £11 10s., low medium, £8 15s. to £8 17s. 6d.; rather dark, £8 10s. to £8 15s.; dark, £7 15s. to £8 per cwt. Copal: At auction 116 cases ordinary rough-coated Singapore were bought in at 25s. to 30s. per cwt.

GUTTA PERCHA.—A further supply of 272 baskets Singapore ex wreck of the City of Delhi, sold without reserve at 2s. 8d. to 2s. 9d., a few lots 2s. 4d. to 2s. 6d.; also 2 tons ordinary at 4d. to 6d. per lb.

JAPAN WAX.—Of 450 cases offered at auction 330 cases sold at steady prices; good unmixed saucers, 92s. to 93s.; medium mixed, 70s. to 80s.; ordinary mixed, 65s. to 67s.; good block, 91s. per cwt.

MANILA HEMP.—No business of any importance has been done since our last report.

PEPPER.—No Black has been offered in public auction, and the sales privately are only of small extent, about 1,000 bags, Singapore 3¼d., Penang 2¾d. to 2 15-16d., Tellicherry at 3¼d. Of 520 bags Singapore White, at auction, little more than one-third was realised, fair at 5½d., a few lots 5¾d.

RICE.—The market maintains a firm appearance, but after the recent large purchases made by consumers, sales on the spot are comparatively limited. For arrival, a cargo of 1,400 tons Rangoon has been sold for London at 11s. 3d. landed, one of 1,400 tons Nakrenzie at 11s., and another of 1,100 tons at 10s. 9d.; 200 tons Madras at 13s. 4½d., 50 tons White Bengal, now landing, at 18s. 6d., and 250 tons nearly due, at 17s. 6d., all with an allowance of 6d. if taken ex ship.

SUGAR.—The steady tone which characterised the market at the close of our last report has continued to prevail during the present week, and the total business, which is of fair extent, has been less difficult to transact at previous rates. The pressure of floating cargoes has been rather less extreme, a considerable number still remain on hand, but in general those for sale at about the current value have been more readily taken, and the quotations are fully maintained. Privately 3,500 bags clayed Manila realised 27s. 9d. to 28s.; and 3,400 bags Muscovado Manila, 24s. per cwt. The stock in the United Kingdom on the 13th inst. was, of Penang, 570 tons against 1,380 tons; and of Manila, 28,610 tons against 20,070 tons at the same time last year.

SPICES.—The only sales since our report of the 17th inst. have been 9 bales first class Ceylon Cinnamon at 2s. 4d. per lb., and 1 case sea damaged Penang Mace at 1s. 11d. per lb.

TAPIOCA.—At auction 55 bags medium to fine Singapore sold at 4d. to 4¾d.; 15 cases ordinary dark Singapore were bought in at 2d., and 20 bags Malacca at 4d. per lb.

TAPIOCA FLOUR.—Of 448 bags Penang offered 200 bags sold at 2d. per lb.

MISCELLANEOUS.—Blacklead: At auction 507 barrels Ceylon met with a good demand, and 300 barrels sold at firm rates; fine bright silvery lump 27s.; medium, 21s. 6d.; low middling dull, 19s. 6d. to 20s. 6d.; ordinary hard, 16s. 6d.; chips, 15s.; small chips, 11s. 6d.; dust 9s. to 9s. 6d. per cwt. Ebony: At auction 1,016 logs (142 tons) Ceylon were offered, and all bought in at £7 to £10. 10s. Isinglass: One case ordinary leaf Penang realised 1s. 11d. Japan Cassia: At auction 20 cases realised 44s. Matting: 200 rolls China were withdrawn. Penang Arrowroot: 16 bags sold at 2½d. Roots: 152 bales China sold at 21s. Shells: 19 casks good small Ceylon cowrie realised 30s. Sticklac: At auction 110 boxes ordinary dusty and woody from Rangoon were bought in at 28s. Yarn: 22 bales Japan were bought in at £16.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £5 15s. to £6 nail rod, £7 10s. to £8; hoops, £8 15s. to £9; sheets, single, £9 15s. to £10; Staffordshire bars, £7 15s. to £8 10s.; rails, £6 to £6 5s.

STEEL.—Swedish keg, £16.

COPPER.—Sheet and Sheathing, £85 to £89 per ton; yellow metal, 7½d. to 7¾d. per lb.

TIN.—£89 for block; £90 for common bars. Tin plates, best charcoal I.C., 31s. to 32s.

LEAD, &C.—English pig, W.B., £22; shot, patent, £23; sheet, £20 15s.; spelter, £21 5s. to £21 10s.; zinc, English sheet, £26 10s. to £27; quicksilver, £6 17s.

The following is from the Circular of Messrs. French and Smith:—The Metal Market has continued dull, and with but little inquiry since our last report. At the Iron meeting the price was continued at same quotations. Copper in moderate demand, at quotations. Tin has been stagnant since the Dutch sale. To-day the English smelters have reduced their price £3 per ton. In other metals nothing to notice.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Hong Kong: £46. For Singapore: £40. For Shanghai: £57. For Saigon: £50. For Yokohama: £50. For Batavia: £35. From Newport, Cardiff, or Swansea, per ton.—For Hong Kong, £2 2s. For Singapore: £1 16s. For Shanghai: £2 15s. For Saigon: £2 8s. For Yokohama: £2 10s. Batavia: £1 15s. Coke.

The Admiralty have invited tenders for the conveyance of 4 tons (heavy) shot, &c., and 6 tons (meast) stores from the Thames to Hong Kong; also for the supplying and delivering into store at Her Majesty's Naval Yard at Trincomalee of 900 tons South Wales Coal.

CASUALTIES.

The Cedars, Stonehouse, which sailed from Sunderland for Hong Kong, March 25, put in at Queenstown, April 18, with loss of bulwarks, and boatsstove.

Advices from Nieuwe Diep, dated April 21, state that the Baron Pallandt van Rosendaal, Kramers, from Banjoewangie to Amsterdam, was stranded and lost at Texel on the evening of April 21.

Digitized by Google

The master (Van der Mei) of the Galilee, from Banjoewangie to Amsterdam, which vessel was assisted into Table Bay, Feb. 19, reports that it was on a sunken wreck that the vessel struck on Feb. 16, off Houtbay; some damaged coffee landed from her has been sold, and she will go on the slip for repairs, a large quantity of copper having been torn off her sides.

The Virgilia, Lesueur, which sailed from Newport, April 17, for Shanghai, arrived at Falmouth, April 22, leaky.

The Jamaica, Wright, which sailed from Glasgow, April 17, for Batavia and Sourabaya, arrived at Cairn Ryan, April 21, with sails split.

MISCELLANEOUS.

At CALLAO.—March 9, America, Donely, from Macao.

At MAURITIUS.—Feb. 18, Thomas Brown, Jackson, from Singapore; 21 Achilles (s.s.), Russell, from Shanghai, and left 23rd for London; March 5, Avenir, Barreyre, sailed for Galle.

At TABLE BAY.—Feb. 18, Anastasia, from Manila; 19, Galilee, from Batavia; 16, Fredk. Hendrik, from Java; 20, Egmont and Horn, from Macao; 22, Johan Anton, from Hong Kong.

At ASCENSION.—March 8, Panic, from Singapore, and sailed 9th for Liverpool; 20, Danube, from Java, and sailed for the Downs.

Off ASCENSION.—March 7, Isaac, from Java for Rotterdam; 21, Charlotte, from Samarang, for Amsterdam; 25, Gladiator, from Colombo, for London.

At ST. HELENA.—March 11, Catharina, Visman, from Batavia, and sailed 12 for Amsterdam; 13, John Lidgett, Polsen, from Foochow, and sailed 14 for London; Singapore, Stoop, from Tjilatjap, and sailed 14 for Rotterdam; 14, Joliba, Simpson, from Colombo, and sailed for London; 15, Charlotte, Lange, from Samarang, and sailed for Amsterdam; Queen of May, McGreavey, from Penang, and sailed for New York; Teviot, Wheelan, from Colombo, and sailed for London; 16, Gladiator, Murray, from Colombo, and sailed 18 for London; Delangle, Dupont, from Macao, and sailed for Havana; Pcess. Amelie, Groeneveld, from Banjoewangie, and sailed 19 for Amsterdam; Avondale, Ogilvie, from Shanghai, and sailed 18 for Montreal; Confucius, Stenzel, from Macao, and sailed 18 for Havana; Astrea, Koorders, from Banjoewangie, and sailed 18 for Amsterdam; 17, Aunt Lizzie, Grant, from Batavia, and sailed 18 for Rotterdam (former master, Martin, had died on the passage); Triton, Bergstrom, from Banjoewangie, and sailed 18 for Falmouth; Maria, Biesthorst, from Banjoewangie, and sailed 19 for Rotterdam.

Off ST. HELENA.—March 15, Balisama (Dutch barque), from Java, for Rotterdam, 53 days out.

At TABLE BAY.—Feb. 24, Nizam, Coreil, from Macao; March 8, Jolar, Wright, from Sourabaya, and sailed 9 for Amsterdam; 12, Josephine Amedee, Lagardee, from Saigon; 5, Kansas, Wells, sailed for China.

At SIMON'S BAY.—March 19, Laura and Adele, Lund from Banjoewangie, for Amsterdam (short of water, and with master sick).

At MADEIRA.—March 29, Hayo-Mara (s.), Carnes, from Cardiff, and left 30 for Japan.

At MAURITIUS.—March 9, Josselin, Lebesque, sailed for Galle; 6, Rover (s.s.)(Kemble, sailed for Japan.

The screw-steamer Coila, 435 tons, sailed from the Clyde on the 22nd with a cargo of coals for Shanghai. She is owned by Messrs. T. and W. Paton and Co., of Liverpool.

TRIAL OF THE STEAMER "LAMONT."—The steamer Lamont, Capt. Castilla, had her trial trip on the 16th, which proved satisfactory, although not of great speed. On the trial she did 18 miles in one hour and a-half, by the patent log. She left Greenock on the 24th, calling at St. Vincent and the Cape.

C. MITCHELL GRANT.

Agency in London—"London and China Telegraph" Office, 2, Cowper's-court, Cornhill (over the Jerusalem).

BASS AND ALLSOPP'S INDIA PALE ALES

GEORGE JONES, No. 8, Billiter-street

Present prices, 7s. 3d. 3d. per dozen quarts, and 4s. 9d dozen pints. Free on board, protected by his own and the Brewer's Labels and Patent Capsule.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

DR. J. COLLIS BROWNE'S CHLORODYNE. Vice-Chancellor Sir W. Page Wood stated publicly in Court that Dr. J. Collis Browne was undoubtedly the Inventor of Chlorodyne; that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See *The Times*, July 13, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any ervice in Cholera was Chlorodyne.—See *Lancet*, Dec. 31, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. Extract from *Medical Times*, Jan. 12, 1866.—"Is prescribed by scores of orthodox medical practitioners. Of course it would not be thus singularly popular did it not supply a want and fill a place."

DR. J. COLLIS BROWNE'S CHLORODYNE is the best and most certain remedy in COUGHS, COLDS, ASTHMA, CONSUMPTION, NEURALGIA, RHEUMATISM, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE is a certain cure in CHOLERA, DYSENTERY, DIARRHŒA, COLICS, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE. EXTRACT *from the* GENERAL BOARD OF HEALTH, *London, as to its efficacy in Cholera*—"So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. MONTGOMERY, Esq., *late Inspector of Hospitals, Bombay*.—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other remedies had failed."

DR. J. COLLIS BROWNE'S CHLORODYNE. CAUTION.—None genuine without the words "Dr. J. Collis Browne's Chlorodyne is on the Government Stamp. Overwhelming medical testimony accompanies each bottle. Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury, London. The immense demand enables the proprietors to reduce the price; it is now sold in bottles, 1s. 1½d., 2s. 9d., 4s. 6d., and 11s.

AGENT: Hong Kong, Mr. A. S. WATSON.

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor

BANK OF ROTTERDAM.

Head Office—ROTTERDAM.

Branches—BATAVIA, SOURABAYA, SINGAPORE.

EXTRACT of the FOURTH ANNUAL REPORT of COMMISSIONERS of the BANK of ROTTERDAM.

As stated in our last report a further issue of capital to the extent of ten millions of guilders took place in the commencement of the year; the new shares were held exclusively at the disposal of proprietors, 308 of whom availed themselves of their right and subscribed for 11,977 shares, representing a nominal capital of f.2,994,250, with f.1,497,125 paid up; a result which may be called satisfactory. The events of the following months, as well political as financial, continue provisionally to prevent any further issue of capital.

Our subscribed capital on 1st January, 1867, was f.7,994,250, of which one-half, f.3,997,125, has been paid up. Our commanditair capital on 1st January, 1866, amounted to f.7,149,000, and had increased on 1st January, 1867, to f.8,133,100.

The liabilities of the Bank are consequently covered by a capital of fully sixteen millions of guilders, of which f.4,403,780 have been paid up.

The Commanditair Association has rendered favourable results, notwithstanding some bad debts which had to be written off. The accounts show a commission booked, comparatively to amount of credits granted, of 2.54 per cent., against 2.39 per cent. in 1865, and 1.89 per cent. in 1864.

In accordance with our resolution to that effect steps were taken by the Direction to establish agencies at Singapore and Sourabaya.

The agency at Singapore has been opened on the 1st of October, and that at Sourabaya was to open on the 1st of February last; the former under the management of Mr. W. Hooglandt, late of the firm Hooglandt and Co., at Singapore, and the latter under that of Mr. P. H. Soeters, hitherto in the service of the Netherlands Trading Company at Batavia and Singapore.

Our head agency at Batavia continus to contribute largely to the prosperity of the Bank, and we are happy to avail ourselves of this opportunity to tender our best thanks to the Directors of that agency for their valuable services. We also look forward with confidence to favourable results from the agencies at Singapore and Sourabaya.

As to operations of the Bank in 1866, the results are shown by profit and loss account; with a few exceptions all operations mentioned in art. 12 of the Statutes have been more or less attended to, the Directors have in particular and more than ever, put their services at the disposal of our national commerce and industry, and we are happy to notice in consequence a considerable extension of business in Twente, the great manufacturing district, during the last half-year.

For further elucidation of the accounts we beg to refer you to the annexed statements; we only mention here the aggregate amount of our transactions during the year, being f.326,127,427.22, against f.228,815,610.89½ in 1865, and distributed as follows:—

	Rotterdam.	Batavia	Total.
Cash	f.61,336,928.91	f.51,291,016.83	f.112,627,945.74
Bills, Home ...	59,054,572.85	17,908,224.42	76,962,797.27
Bills, Foreign ...	51,672,847.71½	42,044,059.47	93,716,907.18½
Government Stock	5,262,339.62½	333,401.39	5,595,741.01½
Coupons... ...	607,171.42½	—	607,171.42½
Bills payable ...	81,250,372.59½	2,584,191.04	83,834,563.63½
Sundries... ...	1,918,667.19	871,043.05	2,789,710.24
	f.211,102,900.31	f.115,031,936.20	f.326,134,836.51

After making provision for all bad and doubtful debts, we are happy to declare a dividend at the rate of 7.65 per cent. per annum.

The aggregate amount of transactions between the Batavia agency and the head office, included in the above is f.26,711,717.53½, leaving a total of f.299,423,118.97½ for transactions, exclusive of business between the Bank and the agency.

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the block is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer and a Blacksmith. Dry Godowns for the reception of vessels, stores, &c., who requiring to discharge them.

Amoy, March, 1865.

PERRY and CO.'s PATENT ESSENCE OF INK

The CHEAPEST INK.

The BEST INK.

The PERMANENT INK.

The 1d. Packet equal to a 6d. Bottle.

The 1s. Bottle makes Two Quarts.

PERRY and CO.'s PATENT ESSENCE OF INK.

This preparation produces Extemporaneous Ink of the finest quality in one minute with cold water, and instantly with hot water, by simple solution as salt or sugar. Sold in packets 1d. each, and in glass bottles 1s. each. Sample free, per post, for two stamps. Sold by all Stationers, Wholesale, 37, Red Lion-square, and 3, Cheapside, London.

PERRY and CO.'s PATENT BOSTONITE GOODS.

PERRY and Co. have much pleasure in introducing their new patent BOSTONITE to the Public, and they do so with the full conviction that it will supply a want long felt, viz.: perfect Lead or Coloured Pencil Tablets Slates, &c.

P. and Co. call special attention to their Bostonite being much better adapted to all the uses that Ivory Tablets and Porcelain Slates are now applied. The smooth and pleasant nature of the writing upon Bostonite will not fail to secure it the preference over all other articles of a similar nature now in use. The Bostonite Slates possess the great advantage of being very light, and at the same time are not liable to be broken.

PERRY and CO.'s PATENT

BOSTONITE PLAYING CARDS, 2s. 6d. per pack
BOSTONITE TABLETS and SLATES from 6d. each.

HOLLOWAY'S OINTMENT. — THROAT AFFECTIONS.— All the varieties of these distressing complaints may be readily and effectively treated by rubbing this ointment twice a day upon the neck and chest, and supporting the strength by suitable nourishment. By this simple means diphtheria, ulcerated and relaxed throat, irritation of the windpipe, quinsy, and all other glandular enlargements will have their progress arrested, and the destruction they have caused repaired. Holloway's ointment is the most trustworthy remedy for all internal and external throat ailments, and may be safely and effectively employed in every case without regard to sex, age, or constitution. It is highly extolled for its ready cures of spasmodic coughs, chronic hoarseness, and all disagreeable discharges from the throat and nose.

From Marseilles, May 28.—To Singapore: Mr. T. E. Henny.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Dates hence are to the 17th March, or sixteen days later than advices received by the P. and O. mail delivered on the 29th ult. The outward mails of 10th and 17th January had arrived on the 13th March, the latter conveying telegrams from London to the 8th February.

With regard to the Mikado's death, the *Japan Times* has the following observations:—

"We mentioned, two mails ago, that the Mikado was supposed to have died of the small-pox. The Foreign Ministers received official notice of the event, and, moreover, on a day named by the Japanese as that appointed for his funeral, lowered their flags half-mast high. It is a singular fact that the non-official natives persist in maintaining that the whole story is an imposition—that the Mikado is not dead, but that Stotsbashi is. One has but to ask any native of the lower or middle class if "Kubosama," the Shiogoon, is dead, to receive an answer in the affirmative given in the most natural manner possible. As no foreigner, whatever his position, has any means of arriving at actual conviction on the subject, it is useless to argue on mere conjecture. We can only say that, considering Stotsbashi's relations with certain other Daimios who consider themselves slighted by his elevation to the Shogoonate, nothing is more probable than that he has been put out of the way."

"The war in the South," says the *Times*, "will not be resumed this spring, official notice to that effect having been made to the Daimios friendly to or dependent on the Shiogoon. Chosiu is thus left far more powerful than he was before the war, with a large accession of territory and the prestige of successful resistance to the Yedo chieftain. The circumstance makes very strongly in favour of ourselves, for though it is of course of the first importance that our treaties should be made with what is recognised as the supreme power in the country, yet, as we have now ascertained that this power is certainly not vested in the Shiogoon, it is at least to be reasonably hoped that before long the claims of other Daimios to trade with us, unfettered by restrictions hitherto imposed at the Shiogoon's ports by his Custom-house officers, will be recognised; and, the resources of the country being fairly and fully developed, that a large and rapidly increasing trade will reward our patience. The consolidation of the Japanese polity under European influence and advice, the resumption of the ancient power of his office by the Mikado, or the establishment of a confederation of Daimios, are questions which must be left for solution to time. At present, so far as we are concerned, it is evident that every Daimio with whom we have come in contact shows a more friendly disposition towards us than the Shiogoon, a demeanour imitated by his people. Witness the reception given to Sir Harry Parkes at Kagosima and elsewhere, and lately to Admiral King in the Inland Sea."

The following items are from the *Japan Herald*:—

The British Minister having now both his residence and Legation in Yedo is but rarely in Yokohama. The French Minister has taken a trip to Hiogo in H.I.M.S. *Guerriere*, which left here on the day before the mail steamer. On the following Saturday she returned having left his Excellency, as is generally supposed, paying a visit to the Shiogoon at Osaca; and it is believed she will go back to Hiogo in a day or two to convey him to Yokohama, though it is possible he may return by land. The visit of M. Leon Roches to Hiogo is said to have no political object, but the move is such an unusual one, and the more so, considering the expectation that had been held out that all the foreign Ministers would visit the Shiogoon simultaneously, in response to his special invitation, that it leads to good deal of discussion, not unmixed with suspicion. Some declare that his Excellency only went up for a change for the benefit of his health; others

Digitized by Google

that he has gone to insist upon the Shiogoon carrying out the agreement under which the officers were engaged who lately arrived from France as military instructors. But there are not wanting some who assert that the action of the foreign Ministers is not so unanimous as is desirable, and that, consequently, M. Roches resolved on accepting the Shiogoon's invitation for himself irrespective of his colleagues. For ourselves, we are not informed as to the true object of the visit, and can only hope that the last surmise may not be correct. Indeed, as a mere matter of opinion, we believe there is perfect accord between the foreign Ministers, and that the reason given in our article on the 2nd inst. in the *Japan Herald*, and transferred to these columns is about right. It is pretty certain that Sir Harry Parkes will go to Osaca in April, and that he will be suitably escorted; it is certain that the opening of the Hiogo will be deferred to the utmost time given by the agreement—but not beyond. As the time approaches for the promised opening of the port, it is very observable that preparations are being made to take advantage of it; and the fact recorded in our last, that Messrs. Mitford and Satow, on the occasion of their recent official visit, had ascertained that the merchants of Osaca were eagerly looking forward to this event as calculated to afford inlet for foreign and outlet for their own productions, and that the Daimios are also making provisions for sharing in its general commercial advantages, has had a very marked effect.

Our contemporary, the *Daily Advertiser*, has published a rumour that had also reached us, to the effect that the Shiogoon had been murdered, and also a positive statement that Oguri Bounga no Kami, Secretary of the Treasury, had been assassinated in Yedo. Both reports came from the same source, and are equally without foundation. We have much pleasure in announcing that the Commissioner of the Treasury—Oguri Kodzuk noski, so positively murdered in the columns of our contemporary, is alive and in constant communication with the Bri ish Legation. Our readers will recognise the name as one of the Commissioners who signed the agreement of 29th Dec. last for the imp ovement of Yokohama. As to the report concerning the Shiogoon, H. I. M. S. *Guerriere* has arrived from Hiogo having left the French Minister there on 6th inst., and the Shiogoon was quite well at the time of her departure. Similar reports have come to us in various shapes, every few days during the past six weeks. Within a few days we had a letter from a well known and influential resident, stating that some Japanese officers, on whose word every reliance might be placed, had given him to understand that the Mikado's death was a hoax; that, on the other hand, the Shiogoon had been murdered, and that Owari Sama had been appointed in his stead. The constant circulation of such reports proves that there is some uneasiness somewhere. We are inclined to think that they originate with some whose wish is father to the thought, and who are anxious to see a stop put to the familiarity and favour with which foreigners are beginning to be viewed by Stotsbashi and those in authority under him.

On the afternoon of the 1st March fourteen English gentlemen, thirteen of whom were officers of H.M.'s 2nd Battalion 9th Regiment, and one, a midshipman of H.M.S. *Scylla*, were riding on the Tokaido. When they were about ten miles from the settlement, they were stopped by a Jyaconin, and told that they could not pass, as a very great personage was at a certain large house that was pointed out to them, and which looked like an official residence. It does not appear that there was any incivility, but on the foreign officers offering remonstrance, they were told that they would be permitted to pass if they would dismount and lead their horses by the house. This, of course, could not be assented to, and the party were about to move forward, as if with the intention of disregarding the impediment, when, in a moment, in scarcely more time than it takes to write it, a barricade of ladders, doors, &c., was thrown across the road, so as effectually to prevent their advance. One or two yaconins put their hands on their swords but not one attempted to draw. Eight of the party had revolvers, but it was thought better to take things good humouredly, and no show of using them was made. As there were about 150 Japanese in the crowd, and all evidently determined to oppose their further progress, it was thought better to return with a good grace. On arriving at the camp a report was made to Colonel Knox, the commandant of the garrison, who, we are informed, immediately put himself in communication with Sir Harry Parkes on the subject.

On the 5th of March, by appointment of H.E. the British Minister, Captain Daunt and nine or ten officers of the garrison proceeded to Kawasaki, whither they were bound when stopped by the yaconins, as described in the *Japan Herald* on Saturday week. On arrival they were met by Messrs. Mitford and Satow, accompanying a high official of the Japanese Government. The yaconins of the village were summoned and severely reprimanded by the official for their conduct on the 28th ult., and were told that any repetition of such behaviour would entail very severe punishment. They offered a very complete apology, and after inquiring of the foreign gentlemen whether they considered the apology sufficient, and receiving an answer in the affirmative, the official invited them to accompany him to the Temple of Kawasaki, which they had been debarred from visiting on the occasion alluded to. Having thus made so completely the *amende honourable* the interview terminated, and Captain Daunt and his brother officers returned to town.

Another of our old friends, and one of the earlier foreign residents in Yokohama has just been called away by the hand of death. Mr. Woodthorpe Charles Clarke, of the firm of Hooper and Clarke, after an illness of only a few hours, died on the 6th March. His death, so unexpected, cast a gloom throughout the community as the rumour passed from one to another, for Mr. Clarke was a general favourite, from his open, genial, and kindly disposition, and his willingness at all times actively to identify himself with his fellow residents in any way in which he could be useful. He was the captain of the Yokohama Rifle Corps, the raising of which, indeed, was much aided by his joining it, and the members of the corps, as well as those of the Yokohama Pony Corps, testified their esteem for their old friend and comrade by following his remains to their last resting place. The funeral took place on the morning of Thursday, the 7th March, and was very numerously attended. Mr. Clarke was one of the party riding on the Tokaido with Mr. Richardson when that gentleman was murdered, and in the attack was himself wounded. He will be very generally regretted, and most of all by those who knew him best.

H.M.S. *Scylla*, Captain Courtney, left for Hong Kong on the 3nd March. Her service having expired she is homeward bound, and on leaving her mooring the crews of H.M.'s Navy manned her rigging and gave her three cheers. Capt. Hewitt, of H.M.S. *Basilisk*, is now the British senior naval officer. For some reason or other the gun fired at noon every Saturday since the first British man-of-war arrived in this port, is discontinued by the *Basilisk*, to the great inconvenience of the community. The only foreign war vessels now in the harbour are:—British, S. corvette *Basilisk*, S. corvette *Argus*, and the gunboat *Firm*; French, the frigate *Guerriere*, and despatch boat *Kien-Chan*; American, the S. corvette *Wyoming* and—Dutch, the S. corvette *Watergeus*.

Several very competent gentlemen have, from time to time, thought that a newspaper in the Japanese language, and giving the current news of the day on the arrival of each mail, would be both a valuable addition to the literature of Japan and a profitable speculation for its proprietor. What so many have talked of the Rev. Mr. Bailey has actually commenced, and we have much pleasure in welcoming the first number of a Japanese contemporary, the *Bankok' Shinbushi*, the "All nations news-hearing paper." It is a particularly neat production, printed from wooden blocks on fine Japanese paper. It opens with an introductory preface or prospectus by the Editor, setting forth its meaning and objects, viz., to give the currant news of the day both home and foreign, and keep the readers well informed on topics that will prove useful, interesting, and instructive. It then proceeds to give the heads of intelligence from England, France, America, and various other countries, as well as a *resume* of the events that have been passing in Japan. There is also a market report, and there are a few columns of advertisements.

The *Japan Times* gives a graphic description of the visit of Admiral King in H.M.S. *Princess Royal*, accompanied by H.M.S. *Basilisk* and a gunboat, to the Prince of Chikuzen. Having left Nagasaki on the 24th January, they arrived next day at Fukuoka, a port in the Inland Sea belonging to this Daimio. A steamer immediately went off, having on board the Prince himself to pay a ceremonial visit to the Admiral, and arrangements were made for the following day's proceedings. Accordingly next morning the Admiral and about thirty officers from the fleet landed and were invited to a banquet. The banquet hall is described as "remarkable, like most Japanese festivities of this nature, rather for the extreme neatness, order, and regularity with which everything was conducted." Nothing could exceed the kindness and affability with which the Prince

Digitized by Google

received his guests, "shaking hands with each in European style, and then motioning each to be seated." The feast consisted of about fifty courses—some very agreeable and others less so to foreign palates, but all served in the most beautiful order, and everything possessing that "exquisitely neat and clean" appearance so peculiarly Japanese. The banquet proved rather tedious from its length, and was followed by champagne and fruits served in a withdrawing-room. Many exquisite Japanese curics were here exhibited to the guests. The patience of the visitors had yet to undergo another trial in the shape of a native concert, &c., to be followed by a second banquet. The Prince and his retainers, although they must have been as tired as the foreigners, sat out the long and silent feast most benignly, keeping up the appearance of pleasure to the end. Next day a shooting party was formed, and afforded much sport. The following day the Prince visited the Admiral on board the *Princess Royal*, and saw the men at general quarters; and again, the next day, the marines were landed for a parade. Our contemporary states:—"Our correspondents unite here in expressing their wonder at the absolutely enormous crowds of people who collected to see this. Literally, as far as they could see from the parade ground, it was one moving living mass, closely packed." With the review the princes were delighted, and expressed their admiration freely. On leaving Chikuzen, the Admiral, in passing the Straits of Simonoseki, having received an invitation from Choshiu, paid him a visit at Mitageri, about thirty miles down the coast. On the 4th February the squadron left Metageri and proceeded to Hiogo.

A most malicious attempt has been made, by some person or persons unknown, to set fire to the stables of the Commercial Hotel. Some straw and paper had been piled up against the woodwork of the stabling, and set fire to. Fortunately, it was quickly discovered by some gentlemen who happened to be passing, as well as by Mr. Curtis, and was speedily put out.

NAGASAKI.

The following is from Alt and and Co.'s Market Report, dated 1st March:—

IMPORTS.—Our markets for them are only just recovering from the depression usually attendant on the celebration of the Japanese New Year; business, however, bids fair to be resumed as heretofore, and a few days will, we believe, see a considerable improvement in the demand for manufactured goods. Camlets continue in heavy stock, with small demand. Long Ells, especially scarlet, are wanted at quotations. Turkey Red Prints and Cambrics: Of these there are none on the market, with daily inquiries; the same remark applies to Velvets; of these there have been none in the place for some time. Taffechellas: Stocks of this article are very heavy. Shanghai Cotton inquired for at quotations. Metals.—Nail Rod Iron: Small sizes wanted. Pig Iron: No stock, and easily saleable at quotations. English Coal.—Stocks almost exhausted.

EXPORTS.—We have had less activity in our produce markets during the past month than we had during the previous one. Wax being in good supply and not much inquired for, receded slightly in value. Camphor remains nominally unchanged, but there is now none offering. Tobacco continues quiet with small stocks. Galls are plentiful, and sales have been made on easier terms than those quoted in our last. Tea: Shippers have come more generally into the market, and a fair amount of business has been done for both the London and the American markets, but owing to the fact that the natives are willing sellers, prices have had rather a downward than an upward tendency.

EXCHANGE.—On London, 6 months' bills, 4s. 6d. per dollar. On Shanghai, 10 days' sight, par. On Hong Kong, par. Itziboos, 318 to 320 per $100.

FREIGHTS.—To London, £3 per ton of 50 cubic feet. For New York there is at present no vessel loading, though one is shortly expected. To Shanghai the rate is $3 to $4.50 per ton. To Hong Kong, $4 per ton.

CHINA.

SHANGHAI.

From this port we have advices to the 23rd March. The London mails of the 26th January were delivered on the 21st.

We take the following items from the Shanghai *Recorder*:—We notice that the *Supreme Court and Consular Gazette* states that the French Consul-General has issued a circular letter to the French merchants and to the Chamber of Commerce inviting them to take steps for the expression of their views as to the changes necessary for the approaching revision of the treaty of Tientsin in 1868. We are glad to see that some steps are being taken in this important matter.

We hear that a fire engine, with hose and appurtenances complete, arrived per the *Sir Harry Parkes* from London, for the purpose of being sent to the British Legation at Peking. The whole of the engine, &c., was packed in only one case, which measured 12½ feet, and weighed 2¼ tons. The difficulty of landing it may be easily conceived. No sooner was it placed upon Trautman's jetty than it weighed some of the piles down. It has been subdivided into fourteen packages, and sent off per *Shaftesbury* to Tientsin.

The S.S.N. Company is already threatened with opposition to the monopoly for which it has paid so dearly. The *Tunsin* has, we are informed, been purchased, chiefly by Chinese, to be run on the river to Hankow and back, under the management of a foreign firm, and two other vessels are likely to be acquired by the same proprietary.

Hong Kong and Shanghai are to be connected by telegraph. The East India Telegraph Company have determined on the construction of a submarine line between these ports, and an envoy of the company is now in England with a view to purchasing the cable and necessary appliances.

The *Fusi Yama* brings a report that the Nienfei are within a short distance of Kiu-kiang, and that several villages were in flames on the opposite side of the river. The *Wachusett* had been requested by the Taotai to remain for a short time at Kiu-kiang.

The first steamer of the season arrived from Tientsin on the 15th March, announcing the breaking up of the ice on the 28th February.

Our Chefoo correspondent mentions that the apparatus for the lighthouse at that port is now being put up under the superintendence of two English engineers, and will be completed in about six weeks. It is also reported that the Chinese authorities have expressed a willingness to erect a lighthouse on Shantung promontory, and that the Taotai, H.M. Consul, and the Commissioner of Customs are about to visit the neighbourhood, with a view to determine on the proper spot for the structure.

News has been received from Peking of the death of Heng-ki, a mandarin well known from his association with foreigners. He was Hoppo at Canton in 1858, and to his influence Sir Harry Parkes was greatly indebted for his escape with life when captured with Bowlby and Brabazon. Heng-ki was lately a member of the Tsung-li Yamen.

The *Kiang-loong* reports that several villages have been burned down by the rebels on the banks of the Yangtze, near Grosvernor Island, and that the natives are flying from that neighbourhood in great numbers.

A slight shock of an earthquake occurred at Hankow, at half-past ten o'clock on Thursday evening, March 14, and was distinctly felt by many of the residents. The motion was lateral, but it was difficult to discern the direction which the wave took. No doubt it came from the eastward.

The following letters have been addressed by the English and French Consuls at Shanghai to the Taotai, regarding the recent action of the Silk Guild:—

British Consulate, Shanghai, March 18, 1867.

SIR,—I have the honour to bring to your Excellency's notice the following facts elicited in the course of a case tried in the Mixed Court on Friday last, from which it will be seen that a most unwarrantable system of coercion and intimidation is being exercised against certain English firms, and to request that your Excellency will take immediate measures to prevent the continuance or recurrence of so unjustifiable a proceeding:—

In the case in question, two silkmen placed 40 bales of silk in a broker's hands for sale at certain rates. The broker sold the silk to Messrs. Jardine, Matheson and Co., and the Silk Guild then intervened and prevented the completion of the contract by the threatening notice, a copy of which I enclose.

This cannot possibly be endured. I am quite ready to admit the right of any individual to refuse to deal with a person by whom he considers himself aggrieved, and any individual silkman is perfectly at liberty to refuse to deal with Messrs Jardine, Matheson and Co., or any other firm. But I cannot for a moment admit that, because several silkmen have disputed claims on a foreign house, they have a shadow of right to coerce third parties to cease dealing with it, and I must call on your Excellency to take such steps as will prevent Messrs. Jardine, Matheson and Co., and the other firms mentioned in the resolution passed at the public meeting at the Silk Guild, from being longer exposed to the injurious consequences of the reprehensible action of its publishers; failing which I shall be compelled to lay the whole matter before Her Majesty's Minister for his instructions. I am, Sir, your obedient servant,

(Signed) C. A. WINCHESTER.

French Consulate, 28th February, 1867.

To H.E. Ying, Taotai of Shanghai.

An indisposition of several days' duration has prevented me from sooner answering the despatch which your Excellency has

Digitized by Google

done me the honour to write to me on the 19th of this month, enclosing a copy of a petition addressed to your Excellency by certain Chinese merchants.

According to the desire of your Excellency, I have notified to my nationals (but only in extract) the petition in question; but it is certainly to be regretted that your Chinese merchants have laid a reproach generally, which at most may perhaps apply to a very small number of Europeans.

This reproach being also transmitted by so important an authority as your Excellency acquires thus additional gravity; and I would see with pleasure that your Excellency pass severe strictures upon the Chinese merchants, and enjoin them at the same time to address to me some apology which I would be happy to transmit to the merchants of my nation whose just displeasure I can foresee.

This happy rectification would, I think, be the more desirable, inasmuch as the complaints of Europeans against certain Chinese merchants are not less numerous nor perhaps less well founded; but at the same time, I am not aware that I ever addressed a general complaint to you against those under your rule.

When it has been my unfortunate duty to do so against some of them, I have specified their names and the facts, but have been very careful not to lay to the charge of a whole nation the errors and misdeeds of a few unscrupulous men.

There is, besides, for repressing every default and evasion of promise, Art. 35 of the Treaty, or the Mixed Court which emanates from it, and you are aware by experience that the glory of European justice, and as I doubt not of Chinese justice, is to have as a motto "absolute impartiality."

I venture, therefore, to hope that your Excellency, understanding that it is my duty to point out an error which might easily become an injury, will cause to be sent to me without delay the apology from the Chinese merchants to the European merchants, all of whom they have unjustly included, I presume unintentionally, in their grave allegation.

But one one word more, if your Excellency will permit me. Does not your Excellency think that the Chinese merchants have quite as much, if not more, want of credit than the European merchants have? And what is to become of commerce without credit?

It is, therefore, to themselves that the petitioners will do most harm, and in their place I should withdraw my petition, making apology to whom it is due, and leaving afterwards to every one to arrange business matters as he might consider most to his own interests.

Agréez, &c.—Vcte. BRENIER de MONTMORAND, the Consul General.

A new local publication entitled, "THE BUND, a miscellany of prose and verse, facts and fiction," has appeared. We have not received a copy of it, but the *North China Herald* thus reviews the first number:—Press of matter has prevented us from noticing the first number of our long-promised contemporary, "The Bund." It is at last an accomplished fact; and in spite of some shortcomings may be regarded as a success. As might be expected, the articles are nearly all more or less of a sarcastic character. Irony is the favourite vein in which young writers indulge, just as young orators at discusssion classes and debating societies hurl scathing invectives, and wither with merciless satire the honourable member of the opposition. Entering into the spirit of the writers, we heartily enjoy the grim humour of the first sketch—"How I got My Promotion." The deliberate mode in which the writer plans a series of deliberate assassinations is a capital travestie of the Guy Livingstone school of novelists. The next contribution is of a graver character, viz., a translation of Peh-chu-i, a poet of the Tang dynasty. This is a very able production. We cannot forbear quoting some lines describing the grief of the heroine:—

Her song being finished, she looked to her harp strings wishing to tell me her story,
Sweeping the harp strings, fiercely she struck them. Loud and discordant,
Rending and tearing of cloth-like, the sound which they angrily uttered.

It would not be easy in poetry to find a better instance of the sound being an echo to the sense than that to which we have called attention by italics. Here is a picture of a desolate house, a Chinese "Moated Grange," as truthful as well-chosen words and appropriate images can make it.

Swin Yang district is narrow, and my ear lacks the sweeet charm of music.
Lowly my house sunk deep in a soil which is humid and sickly.
Surrounded my door is with reeds long and thick, and by shrubs that are acrid.
Nothing is heard all day but the mournful note of the cuckoo.

The next article is in vivid contrast to "G. T.'s" translation, and is entitled "A Letter from Chesterfield junior to his Father." It is an excellent imitation of some recent papers in "All the Year Round," with an application to Shanghai. Two translations from the German follow, and then we have some poetical efforts of a more ambitious character. "Immortelles" is a very graceful poem, and the two portraits, "Phryne" and "Daphne," imitated from the Earl of Dorset, are highly finished, and sparkle with wit of the most poignant kind. The writer has very wisely modified the fierce language and softened the coarse expressions of the Earl's poems, but the imitation is sufficiently close. "Artemus Ward in Shanghai" will probably be the favourite with most readers, and indeed the great American never indulged in more reckless spelling or more violent misquotations than on the occasion of his first trip to China. The mode in which he spells the word "civilization" is enough to make the editor of the *Phonetic Nus* burst with envy and admiration. A contrast to all that precedes it, is afforded by the story called "My First Success." The author is evidently anxious to take his readers away from China, as no trace of reference to anything local is found in this simple tale of a painter's struggles. The remaining contributions are charades and acrostics of the most excruciating kind. All very ingenious, but all worthy in our poor judgment of enlistment in that "quaint regiment" so inimitably described by Addison in his account of the "Region of False Wit." "Not far from these," he writes, "was the body of Acrostics made up of very disproportioned persons. It was disposed into three columns, the officers planting themselves in a line on the left hand of each column. The officers were all of them at least six feet high, and made three rows of very proper men; but the common soldiers who filled up the spaces between the officers were such dwarfs, cripples, and scarecrows, that one could hardly look upon them without laughing."

On the whole the editors may congratufate themselves on the success of their undertaking. There is great variety in the little volume, and the different styles of the contributors are well contrasted. It would be unfair to omit a word of praise for the frontispiece, which is very creditable to one of our best scenic artists.

HONG KONG.

Dates from this port are to the 27th March. The outward mails of Feb. 10 were delivered on the 23rd March, with London telegrams to the 5th March.

With regard to the operations of the East India Telegraph Company, the *China Mail* has the following article:—

"We cannot but hail with much pleasure the announcement in the San Francisco papers that, 'owing to advices from China,' the East India Telegraph Company have at length decided upon laying down submarine telegraphs between certain of the open ports of China. We are not in a position to assert or deny the truth of the rumour, but it has doubtless some foundation, in fact the more so, as any attempt to construct land lines of telegraph across parts of the country unfrequented by Europeans must, inevitably for some years, turn out a complete failure. While we agree with the principle thus stated to have been adopted—that submarine lines only will be of any practical use—we are not so sure as to whether the lines at present indicated as the first to be constructed are those likely to prove for many years remunerative. At all events, a more practicable—not physically, but politically practicable—route suggests itself now that intelligence has arrived of Dr. Macgowan having succeeded in introducing the telegraph into Japan. And be the route we would propose better or worse than that indicated by the company, the subject is at least worth discussion. We must first consider what is primarily wanted in the way of telegraphic communication with China; and this would appear to us to be simply a means of connection between Europe and America, and Hong Kong, Shanghai, and, eventually, Peking. We may altogether leave the smaller ports out of the question, as were a main line in working order and an inconvenience begun to be felt at the want of communication between these ports and the grand termini, branch lines would spring into existence naturally. For our own part, we do not think they will for many years, if ever, be required. The circular lately issued by the directors of the East India Telegraph Company states that the ports that will be connected by the projected cable and the distances are as follows:—'Canton to Macao, 70 miles; Macao to Hong Kong, 70; Hong Kong to Amoy, 245; Amoy to Foochow, 120; Foochow to Ningpo, 245; Ningpo to Shanghai,

Digitized by Google

80; total distance from Canton to Shanghai, 830 miles. The cable, of course, will follow the shore lines closely.' The above lines will, it is supposed, be eventually placed in connection with Europe and America by a wire extending from the Amoor to Peking, and thence to Chefoo and Shanghai. The objections which occur to this route are numerous. The difficulty of constructing a land telegraph between Peking and the Amoor will be found immense, while the advantages of carrying the line from port to port along the coast are doubtful. It may be that there will be less liability to damage from the lines being shorter, but there are other reasons, such as the opposition of the natives, &c., &c., which may be deemed more than sufficient to counterbalance them. Our intention at present, however, is rather to discuss the best means of connecting Hong Kong and Shanghai with the main lines, than how to lay down the communication between these two ports."

The *Hong Kong Government Gazette* gives the following statement of the amount of notes of the various local banks in circulation for the month of February :—

Chartered Mercantile	$375,000
Oriental	286,000
Chartered Bank of India	115,000
Hong Hong and Shanghai Banking Corporation	974,000
Total	$1,750,000

(FROM OUR OWN CORRESPONDENT.)

HONG KONG, March 25.

The principal topic of interest here during the last few days has been the deadlock to which the judicial business of the Supreme Court has been brought by the view entertained by the Chief Justice as to the legality of an appointment of Acting Attorney-General made by the Governor; and as the embroglio that has resulted is likely to entail consequences of permanent importance, it is worth while to spare a few words on the subject. By a very anomalous arrangement, the Attorney-General of the colony is permitted to carry on private practice as an ordinary barrister of the Court, both here and at Shanghai, and the present Attorney-General, Mr. Pauncefote, being standing counsel for Messrs. Jardine, Matheson and Co., he has proceeded to Shanghai for the purpose of arguing in their pending litigation with their comprador in the Supreme Consular Court at that place. In his absence, the Governor gave informal directions to the Judge of the Small Causes Court, Mr. Ball, to act as Attorney-General, but no notice of the appointment was gazetted; and on the opening of the Sessions last week the Chief Justice, Mr. Small, refused to admit the legality of Mr. Ball's signature, as Acting Attorney-General, to certain indictments, and pronounced the sessions adjourned until the end of the week. A shrewd practitioner of the place hereupon made application on the following day for the release, on bail, under the Habeas Corpus Act, of a Chinese who was in custody on a charge of burglary, on the plea that the prisoner's trial was to have taken place at certain definite sessions, that these had been adjourned without having been even opened, and that his client was therefore entitled to release. The Chief Justice, before whom the application was made, refused it after protracted deliberation, but does not appear to have been at all easy in his mind as to the "law" of the case. The general opinion here is that the Chief Justice has acted injudiciously in waiting until the sessions were actually about to open before questioning the validity of Mr. Ball's acting appointment; but also that the system under which the Attorney-General is liable to temptation to leave his official duties and run away to plead as a barrister in a foreign court ought to be done away with at once.

The Governor, with his usual restlessness, has just performed a three days' cruise round the island in a junk which he purchased some little time ago for harbour-master's service, and which has been officially named the *Preposterous*—the name having been originally given to the vessel in derision in the columns of the *Daily Press*. The junk is ordinarily employed in looking after the native vessels at anchor in the harbour, and compelling obedience to the provisions of the Chinese Shipping Ordinance, which it is now freely admitted has been a great boon to the colony. The census for 1866, published last week, discloses the fact that the Chinese population of Hong Kong has diminished by upwards of 10,000 souls since the close of 1865, and there seems abundant reason for believing that a large proportion of this decrease consists in members of the criminal class, who have abandoned this hitherto congenial soil as no longer offering special facilities for their pursuits.

The *Golden Fleece* left on the 21st inst. with the 20th Regiment on board, for Natal, to convey the 5th Regiment thence to England. A virulent attack was made upon the authorities, naval and military, in the columns of one of the daily newspapers here, with reference to alleged defects of a grave nature as concerns the health of the troops carried on board this vessel; but from the counter-statements that have appeared the objections appear to be perfectly groundless. Certain it is that the 73rd Regiment has been landed in Hong Kong in capital condition; and this is the best test, after all, of the vessel's capabilities. Admiral King, C.B., leaves this port in a day or two for Singapore on board his flagship, the *Princess Royal*, and will await at that place the arrival of his successor.

Some important political changes have lately taken place in the Chinese Government. The once mighty but now humbled Viceroy, Tsang Kwo Fan, unable to put down the Nienfei rebellion, has returned to his seat of Government at Nanking, whereby the aspiring Li Hung-chang is quietly edged out of the place in which his military preparations appeared to give cause for uneasiness to the Central Government. He is to continue the campaign against the Nienfei, but is gazetted Viceroy of Hoo Kwang. His younger brother, simultaneously appointed Governor of Kiang-su, is to act for him in the above-named Viceroyalty, and Ting Ji-chang, lately Taotai at Shanghai, becomes acting Governor of Kiang-su. These changes are of no inconsiderable importance, and seem to point towards the proximate downfall of both Tsang and Li, the two confederates who have of late years on more than one occasion imposed their will upon the Imperial Cabinet.

In commercial matters there is positively nothing to notice. No business is doing worth mentioning, and the Chinese holders of the thirty chops of tea stored at Canton are beginning to believe, after all, in the possibility of Europeans holding out against high prices.

Quotations: Exchange on London, six months, 4s. 4¼d; four months, 4s. 3¾d. Piece Goods: 7 lb. T-Cloths, $2.80; 8¼ Grey Shirtings, $3.50. Little demand.

STRAITS SETTLEMENTS.

SINGAPORE.

Advices from this port are to the 5th April. The outward mails of Feb. 26 were delivered on March 31. The *Singapore Daily Times*, gives the following information regarding the inauguration of the new Government:—

The formal inauguration of the new Government took place on the 1st April at the Town-hall, and perhaps no public ceremony at Singapore has ever attracted so much interest. It was natural that the European residents—those who had perseveringly striven for this new form of Government conscientiously believing it to be necessary for the further development of the Settlements—should gather together to witness the accomplishment of their hopes. But numerous as was the gathering of the European residents that of the native community of all classes immeasurably exceeded it. For hundreds of yards around the Town-hall and along the chief approaches to it a dense and motley crowd had congregated, patiently to await through sun and rain for the small share of the spectacle that could find its way beyond the walls of the Town-hall itself. What their ideas of the event could have been it would be difficult to conjecture; but it is not probable that they fell into the same blunder as they did nine years ago, when the company handed India over to the Queen, and they imagined that the place was being surrendered as a conquest to another Power. The abolition of the time-honoured Company, with its long history—the only page of English history they had ever heard of—was beyond their comprehension, and must have given them a vague conception of the ramifications of the British Government, of which the day's proceedings will furnish them with a further example.

At eleven o'clock a company of sepoys arrived at the Town-hall, and were drawn up as a guard of honour along the approach to the front entrance. A number of the volunteer corps were at the same time ranged in front of the Council Chamber above. Shortly afterwards the residents, officers of Government, and naval and military officers began to arrive, and before noon the Council Chamber was full.

The Clerk of the Council having read the order of Council constituting the Straits a colony of the Crown, and Her Majesty's commission to Colonel Ord, the Chief Justice, Sir P. Benson Maxwell, administrated the oaths of office to his Excellency, and also to each of the members of the Legislative Assembly, all of whom were present on the occasion. The

Digitized by Google

Chief Justice then proclaimed that the Straits Settlements ceased longer to form a portion of India, and had become part of Her Majesty's Colonial Empire, upon which proclamation being given out the Royal Standard was hoisted on Fort Canning flagstaff, and a Royal salute was fired from that fort, as also by Her Majesty's ships *Pearl* and *Satellite*. This ended the inaugural proceeding, after which the Council Chamber was cleared, and the members of the Legislative Assembly proceeded to the transaction of business.

We understand that, in accordance with a requisition made by the Governor, the heads of the various departments met together at the Colonial Secretary's office, and had an interview with his Excellency, when they were informed that they might still continue to hold under the colonial *regime* the offices they had administered under the Indian Government. The Governor was understood to say that he would place himself in communication with the Secretary of State with reference to the subject of their pensions. We had hoped that this point would have been required to form a topic of communication between the Governor and the Secretary of State for the Colonies, as according to an official letter from Lord Cranborne to Lord Carnarvon, it is stated that all officials serving under the late Indian Government would, on the transfer of the Straits Settlements to the Colonial-office, be taken over together with all their privileges, by which we should imagine was meant the right and title of pension allowance at the expiration of the period of service allotted to them under the Indian Government. Should the Secretary of State for the Colonies refuse to take over the Government officials on account of pension allowances to which some will shortly be entitled, the only step left to those officials will be to resign their appointments and take what pension they can claim under the old *regime*.

The case of the *Agamemnon* versus the *Mona* came on before Sir Benson Maxwell, Recorder, on the 27th March. After a long and patient investigation his Honour came to the conclusion that the collision was wholly and solely the fault of the *Mona*, and pronounced a decision against that vessel, with costs. The evidence adduced was lengthy and complicated, and fills twelve columns in the *Singapore Free Press*.

The first step has been taken by the Legislative Council, says the *Free Press*, towards regulating the evils of which the public have complained in the passage of a law for the adoption of a dollar and cent currency. The want of an authorised currency suitable for the place had been long and sorely apparent, and had been repeatedly urged by the local press, on account of the unmitigated squeezes practised This is in our mind a serious fault in the Act, as it will doubtless afford free scope to the Kling money changers to rid themselves of some of those multifarious dollars which have so long lain neglected in their money-boxes, and give encouragement to their long-continued practice of exacting fees for changing them into small coin or copper, always making a reduction for short weight. It has long been remarked that in Singapore there have been an immense number of by the money changers in the depreciation of the dollars to the amount of 3 to 15 per cent., and the coins issued for 10 and 20 cents, to 9 and 18, or even to 8 and 16 cents, reissuing them for their full value to the next customer. The Act for the adoption of the dollar currency, however, provides for the tender of Spanish, Bolivian, Mexican, Peruvian, or British dollars of Hong Kong coinage, provided they be of the same degree of fineness as the Hong Kong dollar, and weigh 415 grains. dollars in circulation far below the standard weight; and that to change a five dollar note one must run the risk, especially when dealing with a native, of losing ten and even twenty cents through the imposition of these notoriously light dollars. Another fact, quite as remarkable, is that the "cashiers," or bill-collectors of the different firms, who make a practice of carrying their scales with them when collecting money, and who are noted for their expertness in detecting a light dollar, always manage to have on hand a number of deficient dollars, which are given out whenever opportunity offers, by ones or twos in every ten, and sometimes by fives and tens at once. Whether they obtain them by purchase, in exchange for good ones, at a commission, or not, we are not prepared to say, but should imagine such to be the likely solution of this little mystery.

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

HULLETT—On the 28th April, at Clarence Lodge, Purbrook, Cosham, Hants, the wife of J. Hullett, Esq., of a daughter.

MINTO—On the 29th April, at 24, Castlenau Villas, Barnes, the wife of G. N. Minto, Esq., of Hong Kong, of a daughter.

SILLAR—On the 29th April, at Matheran, Sydenham-hill, the wife of W. C. Sillar, Esq. of a daughter.

TYERS—On the 13th April, at Fort Washington, New York, the wife of Mr. Richard R. Tyers, late of Shanghai, China, of a daughter.

WARREN—On the 23rd March, at Hong Kong, the wife of the Rev. Chas. F. Warren, Church Missionary, of a son.

WATSON—On the 24th April, at 15, Essex-terrace, Lee, Kent, the wife of S. P. Watson of a daughter.

MARRIAGES.

CHESHIRE—SMITH.—On the 27th April, at St. Giles's, Camberwell, by the Rev. C. Bassett, M.A., Samuel Harley Cheshire, Esq., late of Hankow, China, to Kate Anne, second daughter of Charles Smith, Esq., of Grove-lane, Camberwell. No cards.

COLLINS—FRENCH.—On the 20th March, at the Consulate of the United States of America, Canton, Vernum D. Collins, of Hong Kong, to Mary L. French, of Canton.

ROBSON—LOWE.—On the 23rd April, at St. John's Church, Edinburgh, by the Rev. D. S. Sandford, Frederick A. Hope Robson, Esq., late of Shanghai, to Charlotte Anne, eldest daughter of the late Joseph Lowe, Esq.

DEATHS.

ARMSTRONG—On the 6th March, at Shanghai, of dropsy, Capt. P. B. Armstrong, late of the ship Emily Seyburn, aged 38 years.

BARTROP—On the 11th March, at Shanghai, Robert Collyer Bartrop, Esq., of Kingston-on-Thames.

BIXBY—On the 19th March, at Hong Kong, Mary Harriett, the beloved wife of George Bixby, Esq.

BOWMAN—On the 26th April, at Lone Head, near Edinburgh, William Fletcher Bowman, Esq., eldest surviving son of the late Joseph Bowman, Esq., of 19, Mecklenburg-square, and 3, Wood-street, Cheapside, London, aged 33.

CLARKE—On the 6th March, at Yokohama, Woodthorpe Charles Clarke, Esq., aged 33 years.

CLARKE—On the 18th March, at Hong Kong, Georgiana, wife of Corporal Clarke, aged 23 years.

FLEMINGTON—On the 17th March, at Hong Kong, George Flemington, seaman, H.M.S. *Salamis* aged 38 years.

FUSSELL—On the 26th March, at Hong Kong, R. S. R. Fussell, merchant, late of Foochow, aged 39 years.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—From Cardiff, March 2, Sea King.

At SHANGHAI.—From London, March 9, Maitland; from Cardiff, 13, Condor; from New York, 4, Burnside; 9, Anna Kimball; 14, Yokohama.

At HONG KONG AND CANTON.—From London, March 15, Belted Will; from Havana, 16, Carmeline; from Boston, 26, Wild Rover.

At SINGAPORE.—From Glasgow, April 1, Foam.

DEPARTURES.

From YOKOHAMA.—None.

From SHANGHAI.—For New York, March 9, Magellan.

From HONG KONG and CANTON.—For Cape of Good Hope, March 21, Golden Fleece (str.).

From SINGAPORE.—None.

VESSELS LOADING.

At YOKOHAMA.—For London, Lord Collingwood.

At SHANGHAI.—For London, John Bellamey, Dilkhoosh; for New York, Borealis.

At FOOCHOW.—For London, Shakespeare.

At HONG KONG and CANTON.—For London, Acacia; for New York, Windward.

At SINGAPORE.—For London, Ellen Radford, John Cobbold, John Stanton, junr., Summer Cloud, Willy; for Boston, Dresden.

FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London, Cotton and Tea, £3 to £3 10s.; Silk, £4 to £4 10s. per ton of 50 cubic feet. To New York, £2 10s.

At SHANGHAI.—To London, £2 to £2 5s. per ton of 50 cubic feet. To New York, £2 7s. 6d. per ton of 40 cubic feet.

At HONG KONG and CANTON.—To London, £2 10s. per ton nominal.

SHIPPING REPORTS.

The Norham, Bangkok to Hong Kong, on 3rd March, in lat. 17 N., long. 128.30 E., spoke the ship 3rd D.P., No. 3,542, Newport to Shanghai, 160 days out.

COMMERCIAL POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—May 1, at Brouwershaven, from Banjoewangie, Petronella.

DEPARTURES.—May 3, from London, for Cardiff and Shanghai, Ensign; from Hamburg, for Singapore Bernhard Carl; from Bremer, for Java, Cheribon; from Newcastle, for Foochow, Racer.

LAID ON.—At Liverpool, for Ceylon, Peter Symons; for Singapore, Panic.

SPOKEN.—Anazi (barque), London to Japan, 26 March, 3 N., 26 W.

CASUALTIES.—The Corypheus (barque), of London, from Cardiff to Hong Kong, with coals, which was reported, April 28, as having been towed into Appledore, leaky, is making half an inch of water per hour; the cargo will not be discharged. The Ottoline, Scot, from Batavia to Rotterdam, which put into the Surinam river, March 25, leaky, got on shore near the outer buoy but was assisted off, April 2, by the French mail steamer Guienne, which attempted to tow her into Paramaribo roads, but did not succeed in consequence of the parting of the hawser; the Lady of the Night and the Marnix had been chartered to take in the cargo of the Ottoline, in order to lighten the vessel.

THE HONG KONG BISHOPRIC.

The Bishop of Victoria, being unable to leave this country for China so soon as he originally intended, has addressed a circular letter to the clergy of his Episcopate, a copy of which we have been favoured with by his lordship :—

REVEREND AND DEAR BROTHER,—I had hoped to have left England for China earlier than providential circumstances permit. I hope, however, certainly to reach Hong Kong not later than September next. It is with pleasure I anticipate my arrival and personal acquaintance with the clergy and their labours. Let us pray God, for His dear Son's sake, to bless our mutual relationships. May they tend to His glory in the extension of the Redeemer's kingdom, and our individual and ministerial edification.

It is my full intention, in the course of the autumn, to visit, if practicable, every station where an episcopal visitation may be desirable. It is long since ordinations and confirmations were held in the diocese of Victoria, and I anticipate considerable arrears. I trust that several of the clergy, European and Chinese, now in deacons' orders, may be presented for admission to the priesthood, that there may be native lay agents prepared for admission to the order of deacons; and that there may be many baptised Chinese converts, as well as candidates of European descent desiring confirmation. I intimate thus early the prospect of a visitation that the clergy of the diocese may have ample opportunity to make the necessary preparations.

In the case of European missionaries in deacons' orders, I wish it to be understood that a satisfactory certificate of proficiency in the vernacular language of the mission will be required (in addition to the usual testimonials) as qualification for admission to the order of the priesthood.

In the case of Chinese candidates, both for the diaconate and the priesthood, I must be much guided by the experience and judgment of the missionaries with whom they have been associated. I have reason, however, to hope that the request, "Look ye out among you men of honest report, full of the Holy Ghost and wisdom," may result in the "choice" of some who may be "set before us," and on whom we may "lay our hands."

May the approaching season of Confirmation prove a time of refreshing from the presence of the Lord! I would urge the reverend the missionaries to make the occasion one of much careful instruction and prayerful intercourse with the *native adults* whom they have been privileged to baptise. The baptismal roll of each congregation shall be examined. Every baptised adult (not already confirmed) as well as every young person arrived at years of discretion, having been baptised in infancy, should now be sought out, instructed, and prepared for the approaching rite of confirmation.

On occasion of my first visitation I shall request each clergyman officiating in the diocese, whether a missionary or a chaplain, to exhibit his licence; or, in case of not being licensed in the diocese, to exhibit his letters of orders and the usual testimonials with a view to receiving my license.

It will give me pleasure to hear from you in reply to this communication, and I shall be glad to receive such information as you can give me as to

(1.) The number of your baptised Christian hearers—European and Chinese.

(2.) Your probable number of candidates for Confirmation—European and Chinese.

(3.) Your number of communicants, European and Chinese.

(4.) Your helpers, European and Chinese, male and female.

And (5) I shall be especially interested in receiving the names, with particulars, of any native Christians whom the missionaries may be prepared to recommend to me for Holy orders.

Earnestly supplicating our Divine Master's guidance and blessing, believe me to be, your sincere friend and faithful brother,

London, April 20, 1867. CHARLES R. VICTORIA.

M'INROY v. HARGROVE.—This was an appeal from a decree made by the Vice-Chancellor of the Duchy Court of Lancaster. The plaintiffs, Messrs. W. M'Inroy and Co., who are merchants in Liverpool, in the month of October, 1863, entered into a written agreement with the defendants, who are Messrs. Hargrove, Ferguson, and Co., shipbrokers in Liverpool, and three gentlemen named respectively Stowe, Kerr, and Sprott, respecting some sugar which M'Inroy and Co. had ordered through Messrs. Smith, Bell, and Co., of Manila. The agreement in question was as follows :—"Messrs. W. M'Inroy and Co. having ordered Messrs. Smith, Bell, and Co., of Manila, to contract for a cargo of 1,200 tons of clayed sugar, deliverable next April, per the ship *Ocean Empress*, chartered by them, it is hereby agreed that the undersigned have one-fifth interest each, and that as the bills of cost will be drawn upon W. M'Inroy and Co. they have the power of sale, respecting which they will, of course, confer with the various parties interested who agree to pay their share of the marginal draughts when they come forward, or as may be required by W. M'Inroy and Co. It is further agreed that this purchase of sugar is at the risk of the undersigned in the proportion of one-fifth each, whether it comes forward by the *Ocean Express* or by any other vessel or vessels.—Wm. M'Inroy and Co., Thos. S. Stowe, Hargrove, Ferguson, and Co., Wm. Kerr, Geo. Sprott. Liverpool, Oct. 26, 1863." This agreement was signed, and the order for the sugar given, in consequence of previous communications between the parties, which resulted in their entering into this speculation. The sugar cost upwards of £25,000, but, in consequence of a fall in the markets, the transaction resulted in a loss of more than £10,000. Kerr and Sprott were unable to meet their engagements, and M'Inroy and Co., having executed a trust-deed for the benefit of their creditors, they and their trustee filed this bill, praying to have it declared that the effect of the above agreement was that the liability of the parties respectively was not limited to one-fifth of the loss which had been incurred, but that the parties to the agreement were really constituted partners in the adventure, so that each was jointly and severally liable upon it. M'Inroy having actually paid the money, the result, if the plaintiffs were right, would be in the event which happened that Hargrove, Ferguson, and Co., and Stowe would each have to pay one-third, instead of one-fifth, of the loss. There was a large amount of evidence in the cause, but the Vice-Chancellor was of opinion that the plaintiffs could not avail themselves of anything beyond the written document, and that the true construction of that document was that the parties should not, in any event, be liable beyond the extent of one-fifth of the loss incurred. From this decision the plaintiffs now appealed. Sir Roundell Palmer, Mr. Little and Mr. North appeared for the plaintiffs; Mr. Kay and Mr. E. R. Turner for the defendants, Hargrove, Ferguson, and Co.; Mr. Fischer and Mr. Bardswell for the defendant Mr. Stowe. The case is not yet concluded.

SHROFF v. PALLANJEE.—This case was tried at Guildhall, before the Lord Chief Baron, when a verdict was found for the plaintiff. This action arose out of some cotton contracts. In January, 1866, there was a debt of £14,000 due to the plaintiff from the firm of Dadabhai and Co., of which firm the defendant was a member, and in respect of which an action had been brought in 1865 against all the members of the firm. The defendant left the firm in January, 1866, and Dadabhai stopped payment in the June following, at which time Messrs. Freshfield and Co. were the solicitors of Dadabhai, and Messrs. Upton and Co. those of the plaintiff. An arrangement was made between these firms that the action pending should be discontinued, and that the plaintiff should obtain a dividend on the debt under the deed of inspectorship under which the affairs of the firm of Dadabhai were being wound up. The Solicitor-General moved for and obtained a rule to enter a nonsuit on the ground that the action was settled by the terms as stated above, and also on the ground that the verdict was against evidence. Mr. Hannen and Mr. Arthur Cohen now showed cause against the rule; and the Solicitor-General and Mr. Philbrick supported it. The Court discharged the rule.

RARE CHINESE ENAMELS AND WORKS OF ART.—A very choice collection of Chinese enamels, bronzes, and carvings in ivory, with other rare ornamental objects, recently received from China, was lately disposed of at the rooms of Messrs. Christie, Manson, and Woods, in King-street, St. James's. Among the more important objects were the subjoined :—Chinese Enamels.—Lot 106. A pair of very fine flat-shaped bottles, with ornaments enamelled in colours on rare black ground, and insects on white ground in medallions—35 guineas (Davis). 108. A pair of beautiful Chinese boxes and covers, enamelled with animals and ornaments on rare black ground—20 guineas (Addington). 109. A pair of beautiful flat-shaped two-handled bottles, with ornaments in colours on torquoise ground, green, yellow, and purple medallions, with flowers in colours—30 guineas (Bohn). 110. A pair of very curious boxes and covers, formed as tortoises—23 guineas (Marshall). 111. A pair of very fine circular boxes and covers, with ornaments on torquoise ground, green, yellow, and purple medallions, with flowers in colours—39 guineas (Zimmerman). 113. A pair of figures of leopards, of yellow, black, and gold enamel, on carved wood stands—40 guineas (Farmer). 114. A set of altar ornaments, with flowers in colours, on torquoise ground, consisting of incense burner and cover, a pair of beakers, and candelabra—25 guineas (ditto). 115. A pair of magnificent garden seats, of the rarest ancient Chinese enamel, enriched with birds, flowers, and ornaments in colours, on torquoise ground; on elaborately carved stands—135 guineas (Bourne). 131. A fine cistern, enamelled with dragons in red and green on white ground outside, and enamelled fish inside—79 guineas (James). Bronzes and Ivories.—135. A pair of very large bronze vases, ornamented with birds and trees in high relief, on square feet—59 guineas (Zimmerman). 137. A beautiful ivory cabinet, ornamented with figures and birds in gold lacquer, on stand of ivory and tortoiseshell—45 guineas (Bourne). 159. A pair of bronze vases, chased with figures, dragons, and foliage, in high relief—25 guineas (Viscount Powerscourt).

THE PANAMA RAILROAD.—The British Consul at Panama states in his last report that the fare by the Panama Railroad from the Atlantic to the Pacific, the line being about 47 miles in length, is 25 dols.; children under twelve years of age half price, and under six years, quarter price. In 1865 34,193 passengers travelled along the line. Passengers' baggage is charged 5c. per lb. after the first 100lb., allowed free. Cattle, at owners' risk, 25 dols. each by steamer trains. Horses, by steamer trains, 40 dols. each, at owners' risk. Coal, 5 dols. per ton of 2,240 lb. Gold one quarter per cent. on the value, silver three-eighths to one-half per cent. In 1865 more than 32,000,000 dols. of gold, and nearly 15,000,000 dols. of silver were carried. Express freight by steamer trains 1 dol. 80c. per cubic foot. No package, however small, is transported for less than a dollar. Treasure amounting to more than £5,000,000 intended for England was conveyed along this line from Panama to Colon in 1865, and the Consul states that it has been found cheaper to send it from Colon to New York by American steamer, and thence to England by British steamer, than to send direct from Colon to England by British packet.

THE LORD MAYOR'S VISIT TO THE JAPANESE JUGGLERS.—A special performance was given last week by the Japanese troupe at the Floral-hall in honour of the Lord Mayor. His lordship was accompanied by the Lady Mayoress, the Misses Gabriel, Mr. Gibbs, the secretary of the Lord Mayor, and a party of friends. The boys of the Bluecoat School, numbering about 750, were also invited. The performance appeared to give great satisfaction to all, the Bluecoat-boys being loud in their expressions of approval. Asakichi, as the tiger, was never so effective in this clever piece of pantomime, and Gainsi's tops flew about in a more magical way than ever. At the conclusion of the performance the Lord Mayor, the Lady Mayoress, and their friends expressed how much they were pleased with the performance.

LIGHTHOUSES IN COURSE OF CONSTRUCTION.—There are now six lighthouses in course of construction by the British Government—one situated on the Little Basses Rock at Ceylon; one on the Roman Rocks at the Cape of Good Hope; two in the Bahamas, on Castle Island and Imagua Island; one on Sombrero Island; and one on the Dellamara Point at Malta. It will be recollected that the financial details of the lavish and fruitless expenditure on the first named of these lighthouses formed the subject of a blue book published a year or two ago, and of a debate in the House of Commons.

IT is stated that Captain M. S. Nolloth, late senior naval officer at Hong Kong, will receive the appointment of commodore and senior officer in the *Indian Ocean*, as successor to Commodore Hillyar, on that gallant officer's receiving the active flag rank, for which he is now qualified.

THE paddlewheel steam sloop *Virago*, 6, Commander M. Bingham, bound to China, is now in Keyham Steam-yard, having defects made good.

DR. JAMES LILBURNE (late of H.M.S. *Leopard*) is appointed surgeon of H.M.S. *Cumberland*, guard ship at Sheerness.

LONDON, SATURDAY, MAY 4, 1867.

FRANCE AND JAPAN.

INTERNATIONAL courtesies are being exchanged between France and Japan. TAKOUNGARA MIMBOU TAYO, the brother of the Shiogoon, has arrived in Paris, and has been received at the Tuileries in solemn audience by the Emperor and Empress. The Prince and other distinguished Japanese who accompanied him, were conveyed from the Grand Hotel to the Tuileries in court carriages with a military escort, and a guard of honour was stationed in the courtyard of the Palace to receive them. The Emperor and Empress were seated in their chairs of state surrounded by a brilliant suite, and the Prince, on being introduced, delivered a short address in his own language, and presented an autograph letter from the Shiogoon. He stated that his mission was intended as a proof of the friendly sentiments entertained by the Japanese Government towards France, and that he was instructed to remain for a time in France to study the sciences by which that country is distinguished. In his reply the Emperor expressed great satisfaction at receiving a visit from so near a relative of a "Sovereign" of such a friendly disposition, and offered his congratulations on the rapid development of relations between the two countries. A number of valuable presents from the Shiogoon to the Emperor were then formally handed over, and the Prince and his suite were reconducted to their hotel with all possible state and ceremony.

All this reads very pleasantly; and yet we cannot altogether divest ourselves of a suspicion that the *entente cordiale* between France and Japan is becoming a little—just a very little—too close to be either agreeable or advantageous to us or to subjects of the other treaty Powers. That the organ of acquisitiveness is largely developed in the cranium of a certain Imperial Personage there can be no doubt. Certain events that have lately transpired regarding the Rhine Provinces and Luxembourg in Europe; Mexico in the Western Hemisphere; and Cochin-China in the Far East, betray a restless desire for territorial aggrandisement in whatever quarter it may seem practicable that may well lead us to distrust the disinterestedness of French policy. Japan, it is true, cannot well be "colonised" with the same facility as Cochin-China, owing to the influence exercised there by England, America and other States, to say nothing of the more determined and warlike character of the people; but in the absence of any possibility of converting Japan into a French province, most persevering efforts are being made by M. LEON ROCHE to acquire an exclusive monopoly of the most remunerative branches of the Japan trade to the detriment of British and other merchants who have a just right so compete for it on fair ground. By means of the unfair ascendancy he has gained over the native Government, the enormous supplies of clothing, arms, and materials now required for the Shiogoon's army are all monopolised by a French company; and this is but a single instance of the pernicious effect of his constant interference with the legitimate course of trade. To further his nefarious plan, the French Minister is even now using his utmost endeavours to prevent the opening of Osaka at the appointed time (the 1st of January next), an object which, however, is fortunately certain to be defeated by the firmness of Sir HARRY PARKES and the other Ministers. Under these circumstances it will readily be seen why, although we cannot but acknowledge the benefit likely to accrue from the Shiogoon's brother completing his education in Europe, we nevertheless regret that France should be the country selected as the scene of his studies, since the influences that he will undoubtedly be subjected to there must necessarily tend to strengthen and perpetuate the ill-omened ascendancy already gained by the French in Japan.

THE EUROPEAN COLLEGE AT PEKING.

CHINA has remained so long stationary that until very lately it has been the fashion to receive with incredulous disdain even the slightest suggestion of any probable renewal of her progress towards a higher state of civilisation. Our reiterated efforts thoroughly to "open up" the country have been attended with a considerable measure of success in a strictly commercial sense; but as regards anything beyond this, we have ever been met with a resolute determination on the part of the Chinese neither to impart nor to acquire knowledge of any sort, in their guarded communication with the outer world. During the last few years, indeed, it has appeared as if a distinctly marked retrograde movement had commenced, owing to the disastrous effects of prolonged civil strife and irremediable social and political disorganisation, until "Chinese obstinacy" and "Chinese stolidity" have become stock phrases of contemptuous reproach. At length, however, a reaction has set in. The example of Japan appears to have awakened the members of the TSUNG-LI YAMEN, or Council o the School of Languages, to a sense of the lamentable deficiency existing in their own intellectual resources, and in their memorial to the EMPEROR, praying for the establishment of an European College at Peking, they freely and candidly admit the urgent necessity of accepting, without further scruple, such foreign aid as will enable Chinese students to acquire a knowledge of those arts and sciences which while almost unknown in China form the chief elements in the power and civilisation of European nations.

This memorial is indeed remarkable, not only for the wise moderation with which the proposal is urged, but for the cogency of the arguments adduced, and the logical nature of the conclusions derived from them. Though couched in properly respectful terms, it is firm and confident in tone, and well calculated to carry conviction to a wavering mind. The just pride with which the memorialists recall the fact that in earlier ages European nations borrowed the first elements of their sciences from the East, and the open candour with which they own their present inferiority, not only to those Western nations, but even to their near neighbours the Japanese, are alike honourable; and if there is one paragraph in the whole document more worthy of admiration than the rest it is that which says, "To those who may say that China humiliates herself in "seeking instruction from foreigners, we shall reply that if one "thing in particular can make a nation blush, it is to be ignorant of that which others know." What a startling contrast does this present to the verbose manifestoes we have heretofore been accustomed to, in which the "Central flowery land" was arrogantly assumed to be the fountain of all knowledge, wealth, and power, while all foreigners were stigmatised as "outer barbarians." Clearly the turning-point is now reached, and the establishment of the new college will inaugurate a new era in Chinese history. The memorial we have quoted is of so interesting and important a nature that we append it entire:—

PEKING, Jan. 28, 1867.

"We have had the honour previously to address to your Majesty a report, in which we stated the necessity of introducing into China the study of the mathematical sciences and of astronomy, pointing out also the facilities it would be advisable to offer to those persons who should enter into their pursuit. Your Majesty has deigned to approve our recommendations.

"We have therefore considered that, as the mathematical sciences serve as the basis for the construction of all kinds of machines, it would be advisable to join to the already existing classes of the school of languages of the Tsong-li-ya-men a special class for their tuition, and to admit thereto, after an examination of their fitness, Chinese and Mantchou doctors of letters (*Ku-jen*), and bachelors of the five classes (*pa-Kong*,) as well as civil functionaries of the fifth rank and below, furnished with diplomas as licentiates of letters (*tsin-che*) obtained at examinations. The classes should be taught by European professors. We only await your Majesty's authorisation to lay before you the regulations we propose to establish. Your Majesty has deigned to invite us to do this the 5th day of the eleventh moon.

"In proposing to your Majesty to favour the study of the mathematical sciences, the Tsong-li-ya-men is not impelled by a sentiment of blind admiration for knowledge of this kind possessed by the Europeans, nor by an extravagant love for novelty. The reason is that in reality the construction of machines for warlike and industrial purposes, so important in our days, is based entirely upon the sciences. China wishes to construct

Digitized by Google

her steamboats for herself; but, to enable her to do so, European masters must initiate her in the principles of the mathematical sciences, and point out the course to pursue. It would be a mistake and a fruitless expenditure of labour and money to hope that the Chinese could attain such a result by their imagination alone.

"We have seriously reflected upon the subject before presenting to your Majesty this present memorial. We know that persons more accustomed to debate than to reflect will say that we are concerning ourselves with matters of only moderate utility; that we wish to set aside the ancient Chinese modes to follow foreign practices; and that it is contrary to Chinese dignity to allow ourselves to be instructed by European masters. Those who speak thus show that they know little of what is passing in the world.

"Up to the present time China has tried to be powerful by her own resources. But is clear now that Chinese genius has produced all it is able to produce, and that intelligent persons do not conceal from themselves that, in order to walk alone in future, it must first resolve to receive from Europeans those sciences and arts in which it is deficient. This fact has long been perceived by able men, such as Ly-hong-tchang and Tso-tsang-tang, who have not ceased to repeat and to lay stress upon it in their reports to your Majesty.

"Last year Ly-hong-tchang established a large machine factory at Shanghai, and requested that persons from the capital might be sent there. More recently Tso-tsang-tang asked leave to establish at Fokien workshops and schools, in which European masters might teach the sciences, in order that the Chinese might subsequently be in possession of all the knowledge indispensable to the construction of steamships. Clearly, therefore, it is urgent that we should instruct ourselves in all these sciences, and this opinion is not confined to the undersigned.

"Some will say that it will be more advantageous to continue the practice hitherto pursued. Why not hire steamships, and purchase from Europeans the arms they manufacture? Is this not more simple? Should we not then have all we require without embarrassing ourselves with expenses and useless trouble? Those who will argue in this manner are no doubt the people who believe that cannons and muskets are the only things China ought to take from Europe, and this is a serious mistake. But even were such the case, and had the course hitherto pursued been at the same time practical and easy, it is not the less demonstrated that we should always remain dependent upon foreigners for these articles, and that we should have to resign ourselves never to be acquainted with their manufacture. Further, acquaintance with this manufacture of arms and machines while placing us in a position to produce them for ourselves, does not deprive us of the opportunity of pursuing our ancient course, and of profiting by the industry of others. We should then, however, do so with a knowledge of the subject. It appears to us useless to demonstrate whether knowledge is preferable to ignorance.

"It would also be a serious mistake to imagine that China abandons her ancient knowledge to adopt that of foreigners. The Europeans admit that they have borrowed from China—or at any rate from the East—the notions upon which their sciences are now-a-days based. With their spirit of research and constant application, they have increased these notions, drawn from them all the profit possible, and have finally discarded antiquated theories in favour of those more modern and exact. The root is Chinese, but the tree that has been developed is European. This is the case with arithmetic and astronomy, and perhaps also with other sciences. If China had continued to cultivate the sciences, she would not now be reduced to have recourse to the experience of other nations. Clearly this would be far preferable.

"But is the idea of having recourse to the science [of the Europeans, and of requesting lessons from them new? Did not the Emperor Kang-hi with his vast intelligence, recognise this necessity by admitting many among them to the mathematical tribunal, and treating them like Chinese functionaries? Recent generations ought not to set aside, as they have done, the science of numbers, since our philosophers themselves have placed it at the head of human knowledge.

"'In ancient times,' say the books, 'warriors and agriculturists were acquainted with astronomy, which was forgotten afterwards through a prohibition of the Emperor Kang-hi; our sacred ancestors caused it to revive. Literatis gave themselves up to its study with ardour, and published numerous books. It was said then—Whatever is unknown is a cause of disgrace to the literates.' And is it not, in fact, disgraceful for a man who makes a display of science to look up at the sky without knowing anything of the millions of stars he sees shining above him? Even if the school we desire to establish should never exist, literate persons would not, we hope, be willing long to remain in their present ignorance. If they were not desirous of recommencing these forgotten studies, they would have all the stronger reason for so doing in presence of the sacrifice the State is now willing to make.

"To those who may say that China humiliates herself in seeking instruction from foreigners, we shall reply that, if one thing in particular can make a nation blush, it is to be ignorant of that which others know.

"What immense progress have not Europeans made during the last fifty years in the construction of steam ships—to cite only a single fact—incessantly seeking after better combinations, and vying with each other in labour and efforts. Even Japan has sent to Europe officers intended to seek instruction in the various sciences there taught. Thus, without speaking of European nations, each of which seeks to raise itself above the others by knowledge and civilisation, Japan has not wished to remain in the rear. That country also desires to take its place among the strong, while China alone, continuing obstinate in her indifference and her ancient customs, would condemn herself to stand aloof from the general activity. This is a true reason of disgrace.

"If we do not feel humiliation in being inferior to others, but only in taking others as our instructors, without considering that by the desire of equalling, we may perhaps attain the glory of surpassing them, it naturally results that we shall never know anything, and shall have the eternal humiliation of inferiority.

"We foresee, also, that it will be said: The construction of machines is the task of labourers; why teach these things to literate persons? We shall reply that in the ancient book 'Tcheou-li,' there is a chapter upon carpentry which literate persons have read with interest during many ages, and for which they have a great esteem. Why is this? Because if the workman must execute the manual labour in any construction, it is the literate person who ought to know the natural law, the principle upon which that construction is based. It is by this knowledge that he may render the labour of the workman useful, by directing and applying it with discernment. It is these natural laws that we are desirous should be known, and it is by them that the literate person will point out to the artizan the full benefit he may extract from any given process. Why suppose us desirous that literate persons, or people plainly educated, should become workmen? Nothing need be studied but that which can be applied, and with the object of applying it according to the necessities of the age.

"Whatever further may be the interpretations unenergetic persons may attach to this measure, by which they are not affected, it is indispensable that it should be carried out with full desire to put it in execution, and we have only proposed it to your Majesty after mature reflection. Although we are still but at the commencement of our enterprise, we are aware that in order to interest literate persons therein, and engage them to study with ardour, it will be necessary to promise them certain advantages, and show them the utility they will derive from their studies by the employment those who shall distinguish themselves will obtain.

"We therefore submit for your Majesty's approval the following code of regulations in six articles, trusting it may meet with your high approbation.

"Lastly, we beg to suggest that as the han-lin (academicians) of the three classes, possessing a high degree of literary education, and accustomed to grave and arduous studies, are now but little employed in the administration, it would be well to invite them to study the mathematical sciences, in which they would make rapid progress.

"We respectfully await the time when your Majesty and her Majesty the Empress shall deign to acquaint us what is thought of our proposals."

The code of regulations is appended. It refers to the terms of admission to the new college, the treatment of the students, their rate of enrolment, &c., &c.

Underneath the memorial is to be found the Emperor's signature, with the words:—

"The preceding is approved.
"Respect this."

THE letters despatched by the Pacific Mail steamer leaving Hong Kong on the 18th and Yokohama on the 27th February, reached London by the West India Mail steamer on the 29th April, on which day the P. and O. mail that left Yokohama on the 1st March was also delivered. On this occasion, therefore, the P. and O. line proved the quicker by two days from Yokohama.

Literature.

The following is a brief summary of the more important works published during the past month:—

In History and Biography we have Mr. Froude's *Short Studies on Great Subjects*, in 2 vols., consisting of miscellaneous historical essays; we have also *Memoirs of the late William Hazlitt*, with portions of his Correspondence, in 2 vols.; *The Life, Letters, and Speeches of Lord Plunket*, by his Grandson, the Hon. D. Plunket; *Memoirs and Correspondence of Madame Recamier*, translated from the French, and edited by J. M. Luyster; *A Volume of Despatches, Correspondence, and Memoranda of the Duke of Wellington*, edited by his Son; and *An Inquiry into the Ancient Routes between Italy and Gaul, with an Examination of the Theory of Hannibal's Passage of the Alps*, by the Little St. Bernard.

In Geography and Travel Mr. Lamont publishes a volume descriptive of *Wild Life among the Pacific Islanders*; and Mr. Edward Dicey a narrative of *A Month in Russia during the Marriage of the Czarewitch*. We have from the Rev. George Musgrave two volumes descriptive of *Nooks and Corners in Old France*, and from Sir W. Parish a work descriptive of *Travels in Buenos Ayres and the Provinces of the Rio de la Plata*.

In Fiction we find *Mr. Wynyard's Ward*, by Holme Lee, reprinted from the *People's Magazine*, 2 vols.; *Constance Rivers*, by Lady Barrett Lennard, 3 vols.; *The Loyalist's Daughter, a Novel or Tale of the Revolution*, by a Royalist, in 4 vols.; *Captain Jack, or, the Great Van Broek Property, a Story*, by J. A. Maitland, 2 vols.; *Idols of Clay*, by Mrs. Gordon Smythies, 3 vols.; and *Begg'd at Court, a Legend of Westminster*, a one-volume *Story of the Days of Charles the First and the Commonwealth*, by Mr. Charles Knight. Also, *Ada Moore's Story*, a novel, in 3 vols.; *Raymond's Heroine*, 3 vols.; *Counting the Cost*, by William Duthie, 3 vols.; *Elinor Dryden's Probation*, by K. S. Macquoid, 3 vols.; *Raymond, an exceptional Biography*, by Harry Moreland, 3 vols.; *and A Chip of the Old Block*, by George Gretton, 3 vols.

SINGAPORE GAS COMPANY.

The ordinary general meeting of the shareholders of this company was held on the 30th ult. at the London Tavern; H. P. STEPHENSON, Esq., the chairman of the board of directors, presiding.

The following report was presented:—

"The directors have the satisfaction of reporting continued progress in the lighting of Singapore, for particulars of which they refer to the report from their engineer and manager, Mr. E. J. Wells, dated February 4, 1867. The directors going out of office by rotation are Messrs. Benjamin Cooke, Frederick William Collard, and Robert Stannard Foreman; and these gentlemen, being eligible for re-election, offer themselves for the support of the shareholders. The present auditors, Messrs. William Thomas Morrison and Alfred Williams, retire from office according to the articles, and being eligible for re-election, offer themselves to the shareholders for that purpose. The balance-sheet to 31st December, 1866, and appended

Digitized by Google

to this report, shows the financial position of the company. The profits for the half-year are £990 7s. 9d., which, together with £25 8s. 8d., the unappropriated profit of the preceding half-year, makes the available balance £1,015 16s. 5d. Out of this sum the directors recommend the declaration of a dividend at the rate of 7½ per cent. per annum, less income-tax on the preference capital, and a dividend at the rate of 3½ per cent. per annum on the amounts paid up on the original capital, free from income-tax; the balance of £51 9s. to be carried forward to the profit of the succeeding half-year."

The CHAIRMAN, in moving the adoption of the report and balance-sheet, said Mr. Wells had entered so fully in his report into the general progress of the undertaking that it was hardly necessary for him to make any remarks on that subject. The shareholders would see that the company were progressing—perhaps, somewhat slowly, but progressing in the right direction. They had got over the difficulty in the reduction of the supply of gas, which arose from the commercial circumstances in which Singapore had been placed during the previous half-year, and they were now monthly receiving advices from their manager that their gas rental was gradually improving. It would be observed that during the half-year the gas rental had somewhat increased, but he had hopes, and he firmly believed, that at the end of the current half-year they would be in possession of a gas rental of £4,000 for the half-year, or at the rate of £8,000 per annum. Referring to the balance-sheet, he said that on the debtor side of the capital account they had an increase amounting in the aggregate to something short of £4,000, which on the credit side was accounted for by an increase of £1,800 arising from the fixing of an engine exhauster and scrubber and the extension of their mains in various directions. They had also an increase of about £1,000 in the stock in hand, which principally arose from their increased stock of coal. With regard to the profit and loss account, the most material item was the cost of coal carbonised, and he might say that this item was about £200 more than it was before, with an increase of rental of about £400; but still it was not so satisfactory as they could wish, and it was higher than it ought to be. That result was attributable to a fact which he mentioned at the last general meeting, namely, that in commencing operations upon the use of Australian coal the first cargo they laid in was not of so good a quality as they had anticipated. He was glad to say that at Christmas, 1866, but a small portion of the cargo by the Rangoon was remaining. The other cargo purchased by the local committee at Singapore had turned out exceedingly good coal. It cost something like £2 per ton, and produced 9,000 feet of gas and a good quantity of coke, and the illuminating power was equal to fourteen spearm candles. Should they be able to obtain coal of that quality at the present price, he believed the item of coal in their future balance-sheets would not be so high as during the current half-year. They were led to believe that when home freights from Singapore and China changed in price, they should get coal from Australia at low prices. The other items at the debtor side of the profit and loss account varied but slightly from the former accounts. Their trade charges were slightly higher, rent and taxes were higher, and salaries were also higher, arising from the increased remuneration to their manager, Mr. Wells, and which he thought was richly deserved by him for the talent and energy with which he had carried on the business. The interest on loans and debentures was slightly higher, and bad debts were slightly higher. Then, on the credit side, gas and meter rental was £400 higher, and there was an increase of £340 in products and sundries. The only other item which required explanation was that of £100 "public lamp gas over credit (suspense account) written off." In the balance-sheet they would see there was still a sum on the credit side of £115. 17s. 10d. standing to that suspense account. The holding of meetings of foreign gas companies twice a year often led to mistakes, which could not be corrected before the publication of the accounts, and he regretted to state that in the last balance-sheet the public gas light was over-credited with the sum of £215. The usual course would have been to have written off the amount before the issue of the profit and loss account of this year, but the directors thought it would not be well to pay a smaller dividend than last year. They accordingly wrote off £100 this half-year, leaving £115 to be written off in the succeeding half-year, and leaving their dividend ½ per cent. higher than last year, and equal to what it was the previous half-year. Their manager was led into the mistake in consequence of the irregularity of the payments of the municipal commissioners of Singapore for public lamps, but a similar error could not again occur, inasmuch as the commissioners now paid the accounts every six months. He was glad that Mr. Rigg, of Singapore, was present, that gentleman having been the originator of the company, and consequently the founder of gas in Singapore. The Chairman then concluded by moving the adoption of the directors' and manager's reports and balance-sheet.

Mr. COOKE seconded the motion, and said he did so with a great deal of pleasure, because he believed the accounts were straightforward and concealed nothing.

The CHAIRMAN, in answer to Mr. Rice, said that while the Australian coal cost them somewhat under £2, the common and cannel coal from this country would cost them £3.

Mr. RICE said he considered the position of the company might therefore be considered very satisfactory, inasmuch as the original estimate of profits was based upon the price of coal from this country.

The CHAIRMAN reminded Mr. Rice that the estimate was made at a time when coal in this country was cheap and freights low.

The motion was then put and adopted.

The dividend recommended was declared.

The retiring directors were, on the motion of Mr. BROWN, unanimously re-elected.

The auditors having been re-elected,

Mr. WILLIAMS moved a vote of thanks to the directors and local committee at Singapore for the manner in which they had conducted the business of the company. He considered the company looked exceedingly prosperous, and so long as the gentlemen in question remained in their present position, he felt the concern would continue to progress.

Mr. PAYNE seconded the motion.

The CHAIRMAN returned thanks on behalf of the directors and local committee at Singapore, and in doing so took the opportunity of paying a tribute to the energy and tact of Mr. Wells, the manager and engineer at Singapore, and proposed a vote of thanks to him for the efficient manner in which he had discharged his duties.

Mr. RICE seconded the proposition, and it was carried with acclamation.

Mr. RIGG, at the request of a Shareholder, made a few remarks, in which he expressed his confidence in the stability of the concern and in the fitness of Mr. Wells.

A cordial vote of thanks to Mr. King, the secretary and engineer, was passed, and a similar compliment to the chairman brought the proceedings to a close.

POSTAL COMMUNICATION WITH INDIA.

(MONEY MARKET REVIEW.)

The mercantile community connected with India will have heard with much disappointment that the extra fortnightly postal service between Suez and Bombay, which was established as an experiment at the beginning of the year by the Peninsular and Oriental Steam Navigation Company, will be discontinued after the steamer which meets the mail leaving London on the 26th inst. Consequently, after the present month, unless Government comes forward to pay for the extra service required, our postal communication with India will revert to the unsatisfactory position it was in last year. Of course, as these extra steamers have been despatched at the entire expense of the Peninsular and Oriental Company, no fault rests with it; on the contrary, merchants have been indebted to the company for the facilities which it has given them during the last three months in addition to its ordinary contract service.

The fact is, Bombay is the natural terminus for the postal arrangements between England and India, and the progress made in the communication by railway across the Peninsula has rendered an alteration in the service to Calcutta by steamer, *via* Galle, absolutely necessary. For instance, after the discontinuance of the Peninsular and Oriental Company's gratuitous line, there will be still four mails despatched by the company each month to India—two *via* Bombay, on the 3rd and 18th, and two *via* Galle, on the 10th and 26th. The latter mails do not take mails for Bombay, Kurrachee, &c.; those addressed to Calcutta are taken, but they are only delivered at their destination about the date that letters arrive which are posted a week later in England—*i.e.*, by the mails *via* Bombay. It will even sometimes occur that letters posted by the mail of the 18th will arrive at Calcutta *before* those despatched on the 10th of the same month.

The homeward communication from India to England will be similarly, if not still more, affected. Thus, letters coming by the steamers from Calcutta will be, as a rule, invariably overtaken at Suez by those posted a week later at Calcutta, and which come by railway across the Peninsula. Consequently merchants' facilities will be reduced practically to two letters per month, although four mails are despatched. We may here parenthetically remark that if bills or *original* letters are reported by the steamer, and duplicates are forwarded *via* Bombay, these documents, which should, as a matter of safety, come separately all the way, will be in the same conveyance between Suez and London.

Communication by letter is, perhaps, subservient and secondary to the telegraph; but for all that, there are minor details and facts of the utmost importance which can only be relied upon when verified by letter. Remittances do not come by telegraph, and although it is pleasant to know that bills are on the way, it is quite as important to have them coming to hand frequently and regularly.

Sir Charles Wood said, in 1865:—"There can be no doubt that increased postal communication with India implies increased relations with that country, increased commerce, increased investment of English capital, increased settlement of energetic middle-class Englishmen; and from all these sources the wealth and prosperity of England are more greatly increased than that of India." Our commerce with India is already, and, in fact, has been for years of such an enormous extent as to justify every possible attention on the part of the Government to the postal service. The fact that Government has invited tenders for a weekly mail service with Bombay, *to be sent in by the 16th September next*, is an admission of the importance of that port as the terminus, and of the necessity of increased postal accommodation. This contract, which looms in the future, will give us fifty-two actual mails every year to all parts of India, instead of the ostensible forty-eight at present, but which are in reality only twenty-four. It is very probable that some object is gained by fixing the last date for receiving tenders so far off as next September, but in the meantime, and before the contract comes in force, most serious inconvenience will be inflicted upon all who have business relations with India, unless some temporary arrangement is made by Government with the Peninsular and Oriental Company for it to continue working the present experimental service until the next contracts are fixed. Delay is altogether unnecessary. An arrangement such as we suggest would involve, comparatively speaking, the outlay of a merely nominal amount of money. The Peninsular and Oriental Company has always shown itself willing to meet the Government liberally on such occasions. The extra outlay would simply be the difference between the terms for a temporary agreement and those to be fixed for the contract now put forward for competition. Delay would, of course, for the time, save a little money, but we should be without the mails. Surely, in a practical age like the present, some member of Parliament will take the matter in hand. Red tape and obstinate officialism should not be allowed to stand in the way of the immediate accomplishment of what is universally admitted to be advantageous to the interests of the country.

BANKS AND COMPANIES CONNECTED WITH THE FAR EAST.

Peninsular and Oriental Steam Navigation Company, 122, Leadenhall-street.

Messageries Imperiales, Head office in Paris, R. W. and H. Horne, agents, 4, Moorgate-street.

Hong Kong and Shanghai Banking Company, W. H. Vacher, agent, Gresham House, Old Broad street.

Oriental Bank Corporation, Threadneedle-street, C. J. F. Stuart, chief manager.

*** *Companies omitted in the above list will be included if the particulars are forwarded.*

EXPORTS TO THE FAR EAST.

Mr. Sam Mendel's circular, dated 1st inst., contains a return of the export of Cotton Goods from the ports of London, Liverpool, Southampton and the Clyde, to China and the Far East, from the 17th April to the 1st May, 1867, and during the twelve months ended 17th April of the present and two preceeding years:—

To HONG KONG AND WHAMPOA.—From 17th April to 1st May, 1867: Plain Cottons, 121,700; Coloured Cottons, 22,300 yards; Cotton Yarn, 20,000 lbs. For twelve months ended 17th April, 1867: Plain Cottons, 36,464,285; Coloured Cottons, 2,669,674; Printed Cottons, 866,626 yards; Cotton Yarn, 4,205,450 lbs. For twelve months ended 17th April, 1866: Plain Cottons, 42,158,650; Coloured Cottons, 3,469,750; Printed Cottons, 455,770 yards; Cotton Yarn, 2,028,550. For the twelve months ended 17th April, 1865: Plain Cottons, 21,081,793; Coloured Cottons, 2,543,690; Printed Cottons, 535,500 yards; Cotton Yarn, 1,751,380 lbs.

To SHANGHAI.—For twelve months ended 17th April, 1867: Plain Cottons, 117,421,675; Coloured Cottons, 12,437,109; Printed Cottons, 6,693,510 yards; Cotton Yarn, 168,932 lbs. For twelve months ended 17th April, 1866: Plain Cottons, 95,280,500; Coloured Cottons, 7,263,400; Printed Cottons, 3,060,150 yards; Cotton Yarn, 40,420 lbs. For twelve months ended 17th April, 1865: Plain Cottons, 44,337,244; Coloured Cottons, 5,899,834; Printed Cottons, 2,817,278 yards; Cotton Yarn, 191,691 lbs.

To JAPAN.—From 17th April to 1st May, 1867: Plain Cottons, 113,000; Coloured Cottons, 102,875 yards; Cotton Yarn, 80,000 lbs. For twelve months ended 17th April, 1867: Plain Cottons, 17,562,637; Coloured Cottons, 2,873,844; Printed Cottons, 1,537,055 yards; Cotton Yarn, 1,477,460 lbs. For twelve months ended 17th April, 1866: Plain Cottons, 25,881,113; Coloured Cottons, 1,626,815; Printed Cottons, 2,512,679 yards; Cotton Yarn, 1,216,500 lbs. For twelve months ended 17th April, 1865: Plain Cottons, 4,958,659; Coloured Cottons, 2,017,139; Printed Cottons, 1,096,007 yards; Cotton Yarn, 106,950 lbs.

To MANILA.—From 17th April to 1st May, 1867: Plain Cottons, 1,146,032; Coloured Cottons, 748,570 yards; Cotton Yarn, 8,810 lbs. For twelve months ended 17th April, 1867: Plain Cottons, 14,441,705; Coloured Cottons, 16,061,544; Printed Cottons, 1,089,740 yards; Cotton Yarn, 117,634 lbs. For twelve months ended 17th April, 1866: Plain Cottons, 12,412,660; Coloured Cottons, 13,852,850; Printed Cottons, 613,000 yards; Cotton Yarn, 84,150 lbs. For twelve months ended 17th April, 1865: Plain Cottons, 9,084,368; Coloured Cottons, 10,673,543; Printed Cottons, 1,299,332 yards; Cotton Yarn, 136,630 lbs.

To BATAVIA.—For twelve months ended April, 1867: Plain Cottons, 31,143,399; Coloured Cottons, 12,825,695; Printed Cottons, 14,526,724 yards; Cotton Yarn, 762,276 lbs. For twelve months ended 17th April, 1866: Plain Cottons, 22,510,150; Coloured Cottons, 7,503,800; Printed Cottons, 6,941,550 yards; Cotton Yarn, 575,900 lbs. For twelve months ended 17th April, 1865: Plain Cottons, 7,675,735; Coloured Cottons, 4,706,079; Printed Cottons, 6,469,928 yards; Cotton Yarn, 194,375 lbs.

To SINGAPORE AND PENANG.—From 17th April to 1st May, 1867: Plain Cottons, 1,424,827; Coloured Cottons, 137,300; Printed Cottons, 12,426 yards. For twelve months ended 17th April, 1867: Plain Cottons, 52,797,840; Coloured Cottons, 10,317,253; Printed Cottons, 5,005,682 yds.; Cotton Yarn, 2,226,947 lbs. For twelve months ended 17th April, 1866: Plain Cottons, 36,006,961; Coloured Cottons, 6,138,339; Printed Cottons, 1,594,580 yards; Cotton Yarn, 1,030,250 lbs. For twelve months ended 17th April, 1865: Plain Cottons, 21,812,423; Coloured Cottons, 2,976,355; Printed Cottons, 2,036,876 yards; Cotton Yarn, 1,352,393 lbs.

To CEYLON.—From 17th April to 1st May, 1867: Coloured Cottons, 12,600 yards. For twelve months ended 17th April, 1867: Plain Cottons, 22,694,809; Coloured Cottons, 1,483,146; Printed Cottons, 4,027,200 yards; Cotton Yarn, 748,249 lbs. For twelve months ended 17th April, 1866: Plain Cottons, 14,542,400; Coloured Cottons, 1,400,000; Printed Cottons, 3,419,000 yards; Cotton Yarn, 346,100 lbs. For twelve months ended 17th April, 1865: Plain Cottons, 6,271,158; Coloured Cottons, 1,867,077; Printed Cottons, 2,162,893 yards; Cotton Yarn, 172,180 lbs.

Monetary and Commercial.

We understand that one of the committee formed for the resuscitation of the Commercial Bank of India has gone out to Bombay to procure the sanction of the creditors there to the scheme agreed on in London.

At a meeting of the Singapore Gas Company, held at the London Tavern on the 30th April, the report (noticed in our last) was adopted, and votes of thanks passed to the manager and local committee in Singapore, and also to the directors and secretary here.

The small amount of bar silver brought by the West India mail has been disposed of at 60¾d. per oz., and the Mexican dollars at 59½d., showing no alteration in the former quotation and an advance of ¼d. in the latter upon the rates realised by the previous arrival. The steamer leaving Southampton to-day takes out the sum of £3,389, of which £1,500 in silver is for Hong Kong, £600 for Yokohama, £970 for Bombay, and the remainder (£319 in gold) for Madras.

The biddings for £250,000 in bills on India were made at the Bank of England. The amounts allotted were—to Calcutta, £137,000; to Madras, £2,000; and to Bombay, £30,000. The *minimum* price was fixed, as before, at 1s. 11¼d. on all the Presidencies. Tenders on Bombay at 1s. 11¼d. will receive about 89 per cent.; those above that price on Bombay, and those on Calcutta and Madras at 1s. 11¼d. and upwards, will receive in full. These results show a further considerable falling off in the demand for means of remittance to the East, the terms obtained being 1 per cent. below those on the last occasion.

In reference to the extracts from the Governor of Labuan's report on the condition of the coal mines, the company have issued a circular to their shareholders in which they state that "no difficulty would have arisen if the manager of the works had drawn upon the Home-office, as he was empowered to do under such a contingency as the failure of the company's agents; that the managing director, Mr. Price, was sent out last month with full powers to make all arrangements consequent on a change of agency; and funds have been placed at Singapore to enable him to carry out his instructions."

BOARD OF TRADE RETURNS.

The Board of Trade Returns for the month and three months ended 31st March again present somewhat unfavourable results, the most conspicuous being another falling off in the value of our Exports. These for the month of March amounted to a total of £15,148,797, against £17,520,354 for the corresponding month last year. For the three months the value is given as follows:—For 1867, £42,381,621; for 1866, £46,991,165; and for 1865, £35,635,707. Thus the value of our Exports for the first quarter of the present year shows a decrease of £4,609,544 when compared with the corresponding period of 1866, but an increase of £6,745,914 against 1865. The falling off this year is distributed over a number of articles. Cotton manufactures show a decrease amounting to 17 per cent., linen manufactures about 27 per cent., and silk manufactures, woollen yarn, and woollen manufactures all exhibit a marked diminution.

The Import returns for the month and two months ended 28th Feb. also present totals smaller than those of last year. For the two months of the present year the value is £24,281,048, being less by £2,176,675 than the value for 1866, when the figures presented a total of £26,457,723. In 1865, however, the value was only £19,253,701 for the two months, so that the returns for both the succeeding years exhibit an enormous increase in comparison. The value for the month of February was as follows:—For 1867, £14,828,289; for 1866, £16,610,159; and for 1865, £12,854,779.

The following is a summary of those figures relating to our export and import trade with China and the countries in the Far East:—

IMPORTS.

The total quantity of Raw Cotton imported during the month and three months ended 31st March, and the value to the 28th February are thus given:—

FREIGHTS AND CHARTERS.

Previous quotations of rates of freight to the eastern ports are maintained ; coal freights from the northern outports remain firm, there being still a demand for vessels.

Current rates of freight for vessels on the berth :—To Yokohama : 40s. weight, 50s. meast. To Nagasaki : 50s. weight or meast. To Shanghai : 45s. weight, 45s. to 47s. 6d. meast. To Amoy : 45s. weight or meast. To Foo-chow-Foo : 45s. weight or meast. To Hong Kong : 35s. weight or meast. To Singapore : 30s. weight or measurement. To Penang : 40s. weight or measurement. To Manila : 40s. weight, 85s. meast. To Ceylon : 25s. to 30s. weight, 35s. meast.

The current quotations for coal, &c., are as follows :—From Wear or Tyne per keel.—For Hong Kong : £46. For Singapore : £40. For Shanghai : £57. For Saigon : £50. For Yokohama : £50. For Batavia : £35. From Newport, Cardiff, or Swansea, per ton.—For Hong Kong, £2 2s. For Singapore : £1 16s. For Shanghai : £2 15s. For Saigon : £2 8s. For Yokohama : £2 10s. Batavia : £1 15s. Coke.

The Admiralty have invited tenders for the conveyance of 20 tons Navy provisions, &c., and 1 ton medical stores from the Thames to Trincomalee and 230 tons Navy provisions to Hong Kong.

CASUALTIES.

Advices from Amsterdam, dated April 25, state that about 300 bales, and a large quantity of loose coffee, also 25 to 30 small boat loads of tin, have been saved ex the Baron van Pallardt van Rosendaal, Kramers, from Banjoewanjie, which was stranded on the East coast of Texel, April 22, and hopes were entertained of saving the remainder. The ship was under water to her deck.

The Ottolina, List, from Batavia to Rotterdam, arrived at Surinam March 25, leaky, and is lying at the mouth of the river.

The Corypheus (barque) of London, which sailed from Cardiff, April 22, for Hong Kong with coals, was towed into Appledore, April 28, leaky. The cargo will have to be discharged.

The Navigator (barque), Brockelman, from Liverpool to Batavia, which put in at Lisbon March 18, with foremast head gone, &c., has been resurveyed, and recommended to be discharged, to have her bottom examined, the master having reported the vessel to have struck three times on a bank near Fort St. Julian when coming in.

MISCELLANEOUS.

At CALLAO.—March 20, Octavia, Wilson, From Shanghai.

CHARTERED BANK of INDIA, AUSTRALIA, and CHINA, Hatton-court, Thread needle-street, London.

DIRECTORS' REPORT

(for presentment at the Thirteenth Ordinary General Meeting, 17th April, 1867).

The Directors have to lay before the shareholders the general balance sheet of the Bank, made up to the 31st December last, which shows a net profit on the operations of the year amounting to £97,028. 17s. 10d.

This result the Directors deem satisfactory, considering the long continuance of the late crisis, with its depressing influence on every branch of Eastern business. That crisis not only led to more failures, but seriously prejudiced the realisation of the Bank's claims on the estates of firms which had previously suspended payment, especially those connected with Bombay. Under these circumstances the Directors, after instituting a fresh careful revision of all bad and doubtful debts, calculated up to the present time, have considered it their duty to write off the sum of £68,332. 14s. 8d. from profit and loss account, to be met in great part by the earnings of the year, but necessitating the further transfer of £10,000 from the reserved fund, which now only stands at as much more.

The Directors believe that the crisis in the East is now at an end, and knowing the excellent position of the Bank, and that its capital is quite intact, have no hesitation in recommending the shareholders to declare a dividend for the half-year ended on the 31st December last at the rate of 5 per cent. per annum, free of income-tax, which will leave the sum of £1,134 18s. 9d. to be carried forward.

In reference to the increased amount standing at the debit of bank premises, the Directors can congratulate the shareholders on now possessing in London a new and most convenient freehold building.

Mr. T. A. Mitchell, M.P., and Mr. John Jones, are the outgoing Directors on the present occasion, and being both duly qualified and re-eligible, offer themselves again to the choice of the shareholders.

The auditors, Mr. Alderman Dakin, and Mr. Jonathan Thorp, now complete their year of office, and present themselves for re-election.

THOMAS DAKIN,
JONATHAN THORP, } Auditors.

London, March 29, 1867.

CHARTERED BANK of INDIA, AUSTRALIA, and CHINA.

MINUTES of the THIRTEENTH ORDINARY GENERAL MEETING of the Shareholders, held at the London Tavern, Wednesday, the 17th day of April, 1867, THOMAS ALEXANDER MITCHELL, Esq., M.P., in the chair.

The advertisement convening the meeting, and the Directors' report, with the general balance-sheet and profit and loss account closed to the 31st December last, having been read, the following resolutions were successively put:—

Moved by the Chairman, seconded by W. Macnaughtan, Esq., and carried unanimously;

1. That the report now presented, together with the balance-sheet and profit and loss account, be approved and adopted.

Moved by the Chairman, seconded by John Jones, Esq., and carried unanimously;

2. That a dividend for the half-year ended 31st December last, at the rate of 5 per cent. per annum (free of income-tax), be now declared, payable on and after the 24th inst.

Moved by C. B. Skinner, Esq., seconded by Thomas Lancaster, Esq., and carried unanimously;

3. That Mr. T. A. Mitchell, M.P., who now retires by rotation, be re-elected a director.

Moved by W. Macnaughtan, Esq., seconded by Robert Ellis, Esq., and carried unanimously;

4. That Mr. John Jones, who now retires by rotation, be re-elected a Director.

Moved by Captain E. Hight, seconded by W. H. Mann, Esq., and carried unanimously;

5. That Mr. Alderman Dakin be re-elected an auditor for the ensuing year.

Moved by Captain E. Hight, seconded by W. H. Mann, Esq., and carried unanimously;

6. That Mr. Jonathan Thorp be re-elected an auditor for the ensuing year.

A vote of thanks to the Chairman and Directors, for their able and zealous services, moved by W. H. Mann, Esq., was seconded, and carried unanimously.

T. A. MITCHELL, Chairman.

Warrants for the dividend above declared, payable at the City Bank, Threadneedle-street, London, on and after the 24th inst., will be issued forthwith to all the shareholders.

PERRY and CO.'s PATENT **BOSTONITE GOODS.**

PERRY and Co. have much pleasure in introducing their new patent BOSTONITE to the Public, and they do so with the full conviction that it will supply a want long felt, viz.: perfect Lead or Coloured Pencil Tablets Slates, &c.

P. and Co. call special attention to their Bostonite being much better adapted to all the uses that Ivory Tablets and Porcelain Slates are now applied. The smooth and pleasant nature of the writing upon Bostonite will not fail to secure it the preference over all other articles of a similar nature now in use. The Bostonite Slates possess the great advantage of being very light, and at the same time are not liable to be broken.

PERRY and CO.'s PATENT BOSTONITE PLAYING CARDS, 2s. 6d. per pack BOSTONITE TABLETS and SLATES from 6d. each.

HOLLOWAY'S PILLS. — LIVER COMPLAINTS AND DISORDERS OF THE BOWELS.—It is impossible to exaggerate the extraordinary virtue of this medicine in the treatment of all affections of the liver or irregularities of the bowels. In cases of depraved or superabundant bile these pills, taken freely, have never been known to fail. In bowel complaints they are equally efficacious, but they should then be taken rather more sparingly, for every medicine in the form of an aperient requires caution when the bowels are disordered, though a gentler or more genial aperient than these pills in moderate doses has never yet been discovered. If taken according to the printed instructions, they not only cure the complaint, but improve the whole system.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

DR. J. COLLIS BROWNE'S CHLORODYNE. Vice-Chancellor Sir W. Page Wood stated publicly in Court that Dr. J. Collis Browne was undoubtedly the Inventor of Chlorodyne; that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See *The Times*, July 13, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any service in Cholera was Chlorodyne.—See *Lancet*, Dec. 31, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. Extract from *Medical Times*, Jan. 13, 1866.—"Is prescribed by scores of orthodox medical practitioners. Of course it would not be thus singularly popular did it not supply a want and fill a place."

DR. J. COLLIS BROWNE'S CHLORODYNE is the best and most certain remedy in COUGHS, COLDS, ASTHMA, CONSUMPTION, NEURALGIA, RHEUMATISM, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE is a certain cure in CHOLERA, DYSENTERY, DIARRHŒA, COLICS, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE. EXTRACT *from the* GENERAL BOARD OF HEALTH, *London, as to its efficacy in Cholera*—"So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. MONTGOMERY, Esq., *late Inspector of Hospitals, Bombay*.—"Chlorodyne is a most valuable remedy in Neuralgia Asthma, and Dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other remedies had failed."

DR. J. COLLIS BROWNE'S CHLORODYNE: CAUTION.—None genuine without the words "Dr. J. Collis Browne's Chlorodyne is on the Government Stamp. Overwhelming medical testimony accompanies each bottle. Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury, London. The immense demand enables the proprietors to reduce the price; it is now sold in bottles, 1s. 1½d., 2s. 9d., 4s. 6d., and 11s.

AGENT: Hong Kong, Mr. A. S. WATSON.

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor

THE SHORTEST ROUTE TO AND FROM MANILA AND THE PHILIPPINES.

NOTICE to SHIPPERS and PASSENGERS by the OVERLAND ROUTE:—

The CHINA STEAM and LABUAN COAL COMPANY (Limited), in pursuance of an agreement entered into with the Government of Manila, have arranged to despatch the steamships "MONA" and "JAPAN," or other of their first-class steamers, with the mails and passengers monthly between Singapore and Manila, and Manila and Singapore, in correspondence with the Messageries Imperiales Overland Route.

By a special permit all goods by these steamers from the 1st August, 1866, will be admitted into Manila at the reduced duty of 10½ per cent.

The Company's agents at Singapore will take charge of goods for transhipment. For further particulars apply at the Offices of the Company, Ethelburga-house, 70 and 71, Bishopsgate-street, London, E.C.

OVERLAND ROUTE.

COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., *via* EGYPT.—From SOUTHAMPTON and MARSEILLES.—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and RECEIVE CARGO and PARCELS for GIBRALTAR, MALTA, EGYPT, ADEN, and BOMBAY, by their steamers leaving Southampton on the 4th, 12th, 20th, and 27th of every month. For CEYLON, MADRAS, CALCUTTA, the STRAITS, CHINA, and JAPAN (YOKOHAMA), by those of the 4th and 20th of each month; and for KING GEORGE'S SOUND, MELBOURNE, and SYDNEY, by the steamer leaving Southampton on the 20th of every month. The steamers leave Marseilles on the 5th, 12th, 20th and 28th of the Month.

For further particulars apply at the Company's Offices 122, Leadenhall-street, London, E.C., or Oriental-place Southampton.

N.B. The extra service between Suez and Bombay in correspondence with the steamers leaving Southampton on the 4th and 20th, and Marseilles on the 12th and 28th of the month, will terminate with the departures from Southampton on the 20th, and Marseilles on the 29th May.

OVERLAND ROUTE VIA MARSEILLES.

SERVICES MARITIMES DES MESSAGERIES IMPERIALES.

FRENCH MAIL STEAM PACKETS

The 19th of every Month at 2 P.M. for—

MESSINA, ALEXANDRIA, ADEN, POINT DE GALLE (Ceylon), PONDICHERRY, MADRAS, CALCUTTA, SINGAPORE, BATAVIA, SAIGON, HONG KONG, SHANGHAI, and JAPAN.

The 9th of every Month for—

MESSINA, ALEXANDRIA, ADEN, SEYCHELLES REUNION, MAURITIUS

For passage, freight, and information apply to R. W. and H. HORNE, 4, Moorgate-street, London; G. H. FLETCHER and Co., Liverpool; at the offices of the Services Maritimes des Messageries Imperiales in Paris, Lyons, Bordeaux, and Marseilles; or to SMITH and Co., Rotterdam.

*** Passengers eastward of Suez securing their berths in London are entitled to the conveyance of their luggage free to Marseilles.

INDIA AND CHINA VIA ITALY.

SHORTEST SEA PASSAGE FROM EUROPE TO EGYPT.

BRINDISI to ALEXANDRIA—Contract Passage, 82 hours It is frequently done in 72 hours.

THE Società Anonima Italiana di Navigazione Adriatica Orientale, under contract to carry the Direct Mails despatch as under their first-class English-built steamers CAIRO, BRINDISI, PRINCIPE DI CARIGNANO, or PRINCIPE TOMASO, between BRINDISI and ALEXANDRIA. The vessels of the Company sail as follows:—From Brindisi for Alexandria on the 7th, 14th, 22nd, and 30th of each month, at 2 P.M.; Alexandria for Brindisi, on the arrival of the mails, about the 5th, 12th, 20th, and 29th of each month. The arrivals at and departures from Alexandria are in coincidence with those of the steamers of the Peninsular and Oriental Company, with the Calcutta, China, and Bombay Mails.

Fares:—Brindisi to Alexandria, including provisions, 1st class, 575f.; 2nd class, 200f.; third class, 90f., and *vice versa*.

For further particulars apply to the Company's offices at FLORENCE, via Montebello, 42; PARIS, Rue de L'Universite, 108; LONDON, Messrs. PALMER, 44, Eastcheap, E.C.

JAPAN AND CHINA NEW MAIL ROUTE VIA PANAMA AND SAN FRANCISCO.

THE PACIFIC MAIL STEAM SHIP COMPANY despatch their splendid side-wheel steamers from NEW YORK on the 1st, 11th, and 21st, and from PANAMA on the 9th, 19th, and 29th of every month for SAN FRANCISCO, calling at ACAPULCO, MANZANILLO, MAZATLAN, *en route* thence to YOKOHAMA and HONG KONG. Passengers from England may connect with this line at New York by any of the various steamers from Liverpool, Southampton, or Falmouth, to that port, or at Panama by the steamers of the Royal Mail Steam Packet Company leaving Southampton on the 2nd and 17th of every month.

The COLORADO, 4,000 tons, leaves SAN FRANCISCO with mails and passengers July 3rd, 1867; to be followed monthly by the other steamers of the line.

For particulars of Freight, through passage rates, &c &c., apply to H. STARR and Co., General European Agents, 145, Cheapside, London.

STEAM to INDIA, via the CAPE.—The UNION STEAMSHIP COMPANY (Limited) have entered into an arrangement with the Government for the extension of the Packet Service from Mauritius to Ceylon. Passengers can proceed from Southampton on the 8th of every Month to Point de Galle, where a junction is formed with steamers proceeding to India, China, Australia, &c. Rates of freight and passage very moderate.

Apply to FALCONER and MERCER, 23, Leadenhall-street, London; or THOMAS HILL, Southampton.

OPENING OF THE NEW CHINA STEAM ROUTE FROM LIVERPOOL.

VIA THE ISTHMUS OF PANAMA AND SAN FRANCISCO.

THE WEST INDIA and PACIFIC STEAMSHIP COMPANY (Limited) have made special arrangements with the PANAMA RAILWAY COMPANY and the PACIFIC MAIL STEAMSHIP COMPANY for the conveyance of Passengers, Specie, and Cargo between EUROPE, YOKOHAMA, NAGASAKI, SHANGHAI, and HONG KONG.

THE NEXT DEPARTURE WILL BE:—

From Liverpool	5th and 20th May.
Leaving San Francisco ...	3rd July.
Due at Yokohama	22nd July.
Due at Shanghai	27th July.
Due at Hong Kong ...	29th July.

The branch steamer to Shanghai calls at Nagasaki on both trips. It is expected that the communication will be monthly after these dates.

The Pacific Mail Company's steamers on the China station are large paddle-wheel vessels, of upwards of 3,000 tons register. The greatest attention has been given to insure the comfort and convenience of passengers by the vessels of all the connecting companies on this route.

Shippers will find this route cheaper and as expeditious as any mail service to the East.

RATES OF PASSAGE FROM LIVERPOOL.

To Yokohama	First Cabin, £110 10s.
To Hong Kong	,, £120 10s.
To Shanghai	,, £120 10s.

FREIGHT, FREE OF PRIMAGE.

Liverpool to Yokohama, Hong Kong, and Shanghai, £18 5s. per ton of 40 cubic feet.

The homeward rates of freight will be fixed by the Agent of the Pacific Mail Steamship Company at the above Ports.

ARTHUR B. FORWOOD, Managing Director.

OFFICES:—LIVERPOOL, The Temple, Dale-street; LONDON, 117, Leadenhall-street; HAVRE, J. M. Currie.

JAPAN AND CHINA.—Arrangements have been made with the United States Pacific Mail Steamship Company by which GOODS for Japan and China can be shipped under through bill of lading via Panama by the ROYAL MAIL STEAM-PACKET COMPANY'S STEAMER leaving Southampton on 17th May. Freight from Southampton, £21. 7s. per ton measurement, with 10s. per ton primage.

Further particulars can be obtained on application to J. M. LLOYD, Secretary.

Royal Mail Steampacket Company, 55, Moorgate-street, London, E.C.

ORIENTAL, AUSTRALIAN, AND GENERAL STEAM AGENCY, AND GLOBE PARCEL EXPRESS.

PARCELS, PACKAGES, and MERCHANDISE forwarded, and ASSAGES engaged to all parts of the world. Baggage collected nd shipped, insurances effected, &c.

CALCUTTA, MADRAS, CEYLON, and ADEN—Overland, 4th and 20th of every month.

BOMBAY and ADEN—Overland, 12th and 27th.

CHINA, JAPAN, SINGAPORE, and EASTERN SEAS—Over nd, 4th and 20th.

AUSTRALIA, TASMANIA, and MAURITIUS—Over land, 20th.

NEW ZEALAND and AUSTRALIA via PANAMA, 2nd

INDIA, CHINA, and AUSTRALIA—Via Cape of Good Rope. Clipper Ships, weekly.

Prospectuses, with through rate to a thousand places free on application.

G. W. WHEATLEY and Co. (late Wagnorn), 150, Leadenhall-street, E.C.; CHAPLIN'S, Regent-circus, W. and 32, Regent-street, S.W.

CHINA AND JAPAN, &c.

ROBERTSON and CO. will despatch the following first-class clipper VESSELS:—

Destination.	Ships.	Class.	Dock.	To Sail.
Shanghai	Tyburnia ...	A1 14 yr.	E.I.D.	May 8.
Shanghai	Patna	Brekbnk	W.I.D.	May 10.
Shanghai	John Lidgett	A1 15 yr.	E.I.D.	May 22.
Hong Kong ...	Corea	A1 14 yr.	W.I.D.	May 8.
Hong Kong ...	Chetah ...	A1 10 yr.	W.I.D.	With des.
Kanagawa	Neville ...	A1 10 yr.	W.I.D.	With des.

For Freight and Passage apply at 5, Newman's-court, Cornhill, London; or York Chambers, 55, King-street, Manchester.

With quick despatch.

FOR HONG KONG and WHAMPOA, the fine China clipper-ship RED DEER, A 1 10 years, 691 tons register, A. BRUCE, Commander; East India Docks. Has good accommodation for passengers.

For Freight or Passage apply to KILLICK, MARTIN, and Co., 10, George-yard, Lombard-street, E.C.

CHINA AND AUSTRALIA.

SHAW, LOWTHER, & MAXTON will despatch the following first-class SHIPS as under:—

Destination.	Ships.	Class.	Date of Sailing.
Shanghai	Tamerlane..	A1 12 yrs	10th May.
Hong Kong & Whampoa	Ospray ..	A1 10 yrs.	10th May.
Ditto	Sthn. Cross	A1 13 yrs.	To follow.
Melbourne	Lanarkshir	A1	5th May.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, E.C.

JOHN C. CAMPBELL will despatch the following splendid first-class VESSELS:—

Destinatin.	Ships.	Tns.	Class.	Dock.	Date of Sailing.
Bombay ...	Haddington	1459	AA 1	Victor.	May 10
Bombay ...	KooriaMoria	1112	5-6ths L.11	E.I.D.	May 15
Colombo ...	Skimmer of the Waves	396	A 1 11 yrs.	W.I.D.	May 25
Colombo ...	Palmerston .	978	A 1 15 yrs	W.I.D.	To fol.
MalabarCst	Life Brigade	245	A 1	W.I.D.	May 5

No. 22, Great St. Helen's, E.C.

WITH DESPATCH.

FOR KANAGAWA (YOKOHAMA) and NAGASAKI, JAPAN, the fine clipper, EARLY DAWN, A 1 11 years, 519 tons register, W. NORRIE, Commander; East India Docks. This ship has good accommodation for passengers.

For Freight or Passage apply to KILLICK, MARTIN, and Co., 10, George-yard, Lombard-street, E.C.

COLOMBO Direct (first ship) the magnificent new clipper ARABELLA, A 1 9 years, 350 tons register, built under special survey; JOHN RAPER, Commander; now loading in the West India Docks. This beautiful vessel has only room for light measurement goods.

For freight or passage apply to F. TALLACK, No. 23, Birchin-lane, E.C.

To follow the "Saladin," will sail May 25.

DIRECT for COLOMBO, the well-known fast-sailing ship SKIMMER OF THE WAVES, A1 11 years, 396 tons register, J. HAMMOND, Commander; lying in the London Docks. This fine vessel, well-known in the Colombo trade, has the greater portion of her cargo engaged, and offers the best opportunity to shippers of fine goods.

For Freight or Passage apply to JOHN C. CAMPBELL 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

MALABAR COAST.—FIRST SEASON SHIP.

Has a large portion of her Cargo engaged, and will sail May 5.

DIRECT FOR MANGALORE, CANNANORE, CALICUT, COCHIN and ALEPPE, the fine, fast-sailing British Ship LIFE BRIGADE, A 1, 245 tons register, WM. SHEARER, Commander; West India Docks. This beautiful nearly new ship offers a first-rate opportunity to shippers of Season Goods.

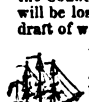
For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

To follow the "Janet Mitchell."—Has the greater portion of her cargo engaged, and will sail May 10.

FOR BOMBAY DIRECT, the splendid clipper ship HADDINGTON, Aal (belonging to the Peninsular and Oriental Steam Navigation Company), 1,459 tons register, G. BROWNE, Commander; East India Docks. This vessel is well-known in the Bombay trade for her very rapid passages.

For Freight or Passage apply to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

To follow the "Haddington." Under engagement to the Council of India for the Conveyance of Stores, and will be loaded according to their regulations, at an easy draft of water.



FOR BOMBAY DIRECT, the well known fine fast-sailing British-built Ship, KOORIA MOORIA, 5-6ths L. 1. 1., 1 112 tons register, W. ADAM, Commander; East India Docks. This splendid vessel is newly coppered, and now in her loading berth, will sail May 15.

For Freight or Passage apply to JOHN C. CAMPBELL 22, Great St. Helen's, E.C.; or to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

From Marseilles, May 28.—To Singapore: Mr. T. E. Henny.

Summary of News from the Far East.

JAPAN.

The present mail brings no later advices from either Yokohama or Nagasaki that those received by the French mail delivered here on the 4th inst.

CHINA.

SHANGHAI.

From this port we have advices to March 26th (three days later). No further outward mails had been received. The following items are from the *North China Herald*:—

Great commotion still prevails in the silk market, in consequence of the dispute pending between Messrs. Jardine, Matheson, and Co. and the Silk Guild, regarding the transaction with Che-quai. The Guild has tabooed Jardine, Matheson, and Co. and Chapman King, and a case has lately come before the Mixed Court, in which terrorism was brought to bear to prevent a member of the Guild from completing a silk contract entered into with the former. The French and English Consuls have both expressed to the Taotai the indignation generally felt at the recent action of the Silk Guild. The intimation that no further dealings would be entered into with foreigners, save on a cash basis, was sufficiently impertinent in the face of the vast advantage the Chinese are deriving from foreign credit; but the subsequent edict of exclusion passed by the Silk Guild itself, against certain foreign Hongs, was a culminating piece of insolence which could not be allowed to pass unnoticed. Emphatic and well merited rebukes have been addressed by M. de Montmorand to the former, and by Mr. Winchester to the latter of these documents; which will, we trust, convince the Taotai and his *proteges* of the absurd course of action they are adopting. The old proverb anent the goose that laid the golden eggs, is here being more than exemplified. The owners of that invaluable bird slaughtered her in their efforts to secure larger stores of metal. The Chinese may possibly succeed in stopping supplies without at all injuring the bird. H.I.M. Consul pertinently observes that the Chinese merchants have quite as much, if not more, need of credit than European merchants. If that credit were suddenly stopped, in the way the former assert their intention to stop credit sales of silk, many native merchants would, we suspect, find themselves poor indeed. Taken at its actual value, the threat might well excite ridicule; it is only its insolence that causes annoyance. The silkmen themselves admit privately that it was never intended to enforce indiscriminately the rule so sweepingly enounced. It is only in the case of suspected Hongs that they dream of holding out for cash. Merchants in whom they have confidence may buy as before. The whole body of foreigners, therefore, are insulted in order to restrict dealings with a certain few. The clumsy folly of such a proceeding is only surpassed by the weakness of the Taotai in permitting himself to be made its exponent, and we trust the hint to this effect conveyed in the third paragraph of M. de Montmorand's letter will not be lost.

So far, however, the silkmen were at least within the bounds of legality. The abstract right of any man or body of men to ask ready money for goods is undoubted. Equally clear is the right of any man or body of men to refuse to sell goods to another if they don't choose. But an attempt to coerce a third party into the same course of action is altogether another matter. Combinations and monopolies may be recognised among the natives themselves; but even the silkmen could hardly imagine such a document as that produced before the Mixed Court would pass unquestioned. They could not be prevented from adopting a resolution to refrain from dealing with E-wo and Fuh-shing. But the open confession of punishment having been inflicted on the Ya-cheng firm, for taking a different view, invited the vigorous remonstrance by H.M. Consul which we publish elsewhere. In the meantime the action brought by the silkmen to recover the value of silk impounded by Jardine, Matheson and Co., as a set-off against Che-Quai's debt, is ex-

Digitized by Google

citing great interest. The facts it will be remembered are simply these :—Che-Quai owed Jardine an enormous sum. He handed them a large quantity of silk for shipment. They retained the value as a set-off against his debt. The silkmen say he was only a broker and claim payment direct from Jardine's. The plaintiff's case has already occupied three days, the Court being always crowded with Chinamen.

The following notification has been issued by the Taotai with reference to the late attempts at coercion on the part of the Silk Guild :—

"Whereas the undersigned is informed by the British Consul, Mr. Winchester, that silkmen, on account of some disputed claims on foreign firms, are coercing third parties to cease dealing with those firms, and the Consul requests that this coercion may be prohibited, and, considering that trade between Chinese and foreigners ought to be completely free, no hindrance can be allowed that may interfere with the market. Therefore the undersigned directs the heads of this Guild to notify immediately to all merchants that they must conduct business fairly and justly, and that any recurrence of the obstruction will be dealt with severely and without favour.—Tremble ! A special Notification."

A proposition of something more than passing interest to those engaged in running steamers on the Chinese coast has been discussed in the columns of the *Shanghai Recorder*. The subject of its article is the advisability of taking steps to throw open a coal pit in the Gulf of Pei-chi-li—or, to correct its geography, the Gulf of Liao Tung—and it names Fuchau on the coast of the Shin-king province as the port in question. The idea of establishing a coal port somewhere in the North was first started at a meeting of the N. C. branch of the Royal Asiatic Society, and is likely to be amongst the most valuable of the suggestions which so frequently originate at the meetings of that valuable body. More even than discussions about railways and telegraphs, the proposal meets a real and existing want, and is moreover comparatively easy of accomplishment. We differ, however, from our northern contemporary as to the means to be adopted to induce the Chinese Government to throw it open to foreign trade. The *Recorder* advocates the idea of endeavouring to induce the Chinese authorities to exchange the ports of Kiung-chow (in Hainan) or Nanking, of the permission to trade at which foreigners have not as yet availed themselves, against a port in the gulf or at the entrance of the Yellow River. The surrender of any privilege already acquired would seem to be highly injudicious. And considering how short a time has yet to elapse before the revision of the Treaty tariff—and very possibly of certain articles in the Treaty itself—will be under consideration, it would be far preferable to wait until a negotiation upon this subject could be included amongst those which will inevitably come under discussion when that time arrives. There are many inducements which could be held out to the Chinese Government to consent to a coal port being opened. Even a small royalty payable to the authorities would yield no inconsiderable revenue while the steamers in its own employ would affect a material saving in this item by the increased facilities which would be furnished for the transport and shipment of this necessary means of motive power.

With regard to the locality of the new port, the first desideratum is doubtless to obtain good steam coal at a rate which would make its transport to the south profitable to the purchasers as well as to the producers and conveyers. That these conditions would be fulfilled at Fuchau is very possible, and it would therefore be the most advantageous port to select. It would, doubtless, be more politically advantageous to draw the coal from the neighbourhood of the capital, where it would soon be discovered that the present means of transit were insufficient to satisfy the demand, and where the Chinese coal dealers might be readily induced to back up any proposition for constructing a tramway for its conveyance. The distance of the mines, on the western side of the Gulf of Liao-tung, from the sea—between 150 and 200 miles—would, we fear, render any attempt to draw coal from thence a failure in the face of the smallest attempt to obtain it at Fuchau. The distance between that port and the entrance of the Peiho—some 280 miles—would be easily traversed, and the supply of coal for railway purposes would not, moreover, be dependent on the good or ill feeling of the natives in the neighbourhood of the works.

The price at which coal could be furnished at Tientsin or Taku from the Peking side of the gulf was estimated in 1862 at some six taels per ton. This includes its transport in small quantities for a distance of nearly 200 miles. If the mines at Fuchau could be successfully worked, the price would very probably be less than half, the actual transport expenses in the former case amounting to nearly two-thirds of the price, the cost per ton at the pit's mouth being nearly 2½ taels or 16s. English. Were European capital and European skill and energy to be employed in developing the resources of this hitherto unknown portion of Manchuria, there is little doubt that a source of industry would be opened up which would form not only a profitable speculation to those engaged in it, but would also tend towards the great end which all foreigners in China must desire to see accomplished—a clearer recognition on the part of its Government of the advantages to be derived from the employment of foreign skill and mechanical appliances in the Far East.

The sentence of death passed upon James Wilson for the murder of his companion MacGrath up the country, which was referred to H.B.M.'s Minister at Peking with a recommendation to mercy from the Jury, has been commuted to ten years penal servitude in Hong Kong, to which port the prisoner was sent on board the steamer *Aden*.

The steamer *Lancefield*, which left this port several months ago for Hong Kong to undergo repairs, returned on Saturday last under the new name of *Yung-Hai-U*, and is commanded by Captain Whiting, late of the *Varuna*. She has received very extensive repairs, and has had a third mast put into her, and now presents the appearance of a very handsome and comfortably fitted passenger ship. We believe she is intended for the Japan route, to form a junction with the P.M.S.S. Co.

It has been resolved to make a Botanical Garden, if possible, in the interior of the Racecourse. A place of general resort is much wanted here to supersede the time-honoured but rather uninteresting bund. The course itself is already a favourite promenade, but its attractions will be greatly enhanced if the bare and unsightly tract of land which it surrounds can be brought under cultivation. No more deserving claim for aid could have been made on the Recreation Fund than for this object, but a general understanding seems to have been come to that that unhappy deposit is hopelessly sunk. Subscriptions, therefore, have again to be relied on, and there is little doubt, we believe, that 200 persons will be found to readily pay $5 a year to obtain so pleasant a place of resort.

Dr. Macgowan started on the 14th March for Nanking, with a view of arranging, if possible, with the Chinese officials there in reference to his proposed telegraphic scheme.

HANKOW.

The *Hankow Times* of the 6th March says :—There has been during the past week a prevailing impression that the Nienfei have been returning on Hankow, and again threatening our peace. They certainly had come nearer to this place than they had been for some time before, some of them being stationed for a short time at Keting, a small place on the Hwangpe, near about 112 le from this. They had, however, no intention of coming to Hankow, nor was their return voluntary. They had made several attempts to escape out of the province, which they had found too hot to hold them, but had been pursued and headed by troops too strong to be attacked with any hopes of success. They are now said to be nearly all gathered together in a large body, and making with all possible dispatch for Kwang-tse, a heen bordering on the Yan-Hwang province, and the van has already crossed the border. If this intelligence is true, and we have no reason to doubt it, we shall soon be quit of the last of these pests, for this season at least."

AMOY.

(FROM A CORRESPONDENT.)

News reached here on the 27th March that the American barque *Rover* was wrecked on the Bashee Islands. The captain and crew, thirteen in number, embarked in boats and landed on the north coast of Formosa, near Tamsuy. Whilst seeking for shelter the hill savages came down and brutally murdered them —only one Chinese boy escaped. No farther particulars yet. General Le Gender, U.S. Consul at Amoy, leaves for Foochow tomorrow, whence he will proceed in an American sloop of war now there, to the scene of the murder. H.M.S. *Cormorant* has also gone to make inquiries.

The P. and O. steamer *Formosa* left here for Foochow on the evening of the 25th inst., and about 11.3 P.M. struck on a rock off the north end of Oksu Island, sixty miles from Amoy. She put back to Amoy, and though nearly sinking managed to reach this on the afternoon of the 26th, was beached here and temporarily repaired, and returns to Hong Kong to be docked.

Digitized by Google

She is very much damaged. The third mate is reported as responsible for the accident, he having been instructed to call the captain at 11 P.M., or sooner in foggy weather or if he saw the land. At half-past eleven the captain awoke and came on deck. He saw the land ahead, and his order to 'bout ship came too late—she had struck. Inquiries will probably be instituted at Hong Kong.

A curious salvage case has arisen here which shows the necessity for shipowners to have properly qualified mates as wells as masters on board their ships. The *Oceania* of Belfast, from Sourabaya to Amoy, arrived here on the 1st inst., her master having died at sea. The mate, who had a certificate of service but none of competency, was unable to navigate the vessel, and falling in with the *Young Greek*, bound to Hong Kong, asked assistance of her master. The mate of the latter vessel took charge and brought her to Amoy. Shortly afterwards the master of the *Young Greek*, having completed his own voyage, came up here and claimed salvage of the *Oceania*. Under the new Order in Council, the provincial Consular Courts have no Vice-Admiralty jurisdiction, and in order to save the delay and expense of making the claim in the Supreme Court at Shanghai both parties agreed to submit it to the arbitration of Mr. Wardlaw, partner in the house of Tait and Co. here, and Mr. Gibson, of this Consulate, Mr. Cass, Superintendent of the Dock Company, being referee. The award of $1,500 to *Young Greek* was thus apportioned :—To owners, $700 ; master, $300 ; mate, $300 ; crew, 200—$1,500 ; each party to pay half the entire costs and expenses. Had a properly certificated mate been on board this expense would have been spared the owner of the *Oceania*.

HONG KONG.

Advices from this port are to the 1st April, three days later than those received by the French mail delivered on the 4th instant. No later dates from home had been received in the interval, but the French mail of February 17th was hourly expected. Telegrams from London extended to the 5th March. The news by the present mail is of course very meagre, but we glean the following items from the *Overland Trade Report* :—

Mature consideration of the manner in which the memorial on the Stamp Act, sent home in October last by the community, has been treated by the Colonial-office, has excited great indignation during the past fortnight. That this document, containing as it did so careful a review of the question, and signed as it was by the whole mercantile community with one or two utterly insignificant exceptions, should have been thrust into the paper basket without receiving a word in reply from the Secretary of State is felt to have been an insult to this colony. It has, in fact, not only been left unanswered, but has been contemptuously ignored by the Secretary of State in that part of his despatch where he says that he observes the arguments of the Governor in reply to the first memorial had been producing a marked effect on the public opinion of the community. At first it was natural that this sentence should lead to the idea that the Governor had unfairly overrated the influence of his own arguments in writing home, but further consideration will show that the extraordinary delusion of the Secretary of State cannot be explained in this manner. Whatever the Governor may have written it is manifest that the memorial of the Colonial-office, with its overwhelming list of signatures, must have been, at the time Lord Carnarvon's despatch was written, the latest indication before him of what was the actual state of public feeling in Hong Kong. The Governor, when writing the despatch to which this is an answer, knew of course what sort of document would go home by the same mail, and it is therefore impossible to suppose that he would do anything so obviously futile as misrepresent the facts at such a time, apart from every other consideration which leads to the same conclusion. This consideration, however, though exonerating the local Government, leaves in a still stronger light the gross discourtesy of the Colonial-office. So far as the vital point is concerned, public opinion on the Stamp Act seems to have remained unchanged, though the excitement on the subject has entirely died out. This has given place to a resigned feeling that there is now no help for it, and that the community has been beaten ; and that, however injurious the contemplated measures may be, there is now no use in saying anything more about them. Up to the present time the Governor has made no sign of his intention regarding the ordinance, and nothing is known as to the probability or period of its introduction.

The 2nd battalion of the 20th Regiment has sailed for the Cape in the *Golden Fleece*, the same vessel which brought the 73rd, the regiment now in garrison here. The departing regiment was in perfect health, and it is to be hoped that it may reach its destination in the same state ; but there are painful stories going about concerning the want of proper comfort and ventilation on board the *Golden Fleece* from which the 73rd suffered on their passage out. They lost some men on the voyage, though how far this is attributable to faults inherent in the ship, from which the 20th may suffer also, and how far to peculiar circumstances, it may be difficult or impossible to ascertain. At any rate it appears that the men have had a great deal to complain of on their voyage. They were unprovided with the clothing suited to the climates they had to pass through, and in parading on board under the burning sun of the Equator, they had to wear thick woollen and wadded clothes made for England, and forage caps. The gross negligence of the War-office in not supplying proper clothes can scarcely be dealt with too severely, but it may be questioned whether any lighter censure can be awarded to the commanding officer, who, circumstanced as his men were, insisted, as he appears to have done, on these terrible and distressing parades. The men, according to the statements which have been made, were harassed in the most irritating manner during the passage, required to appear constantly in pipe-clayed accoutrements, with the bandsmen in white coats, and harshly reproved if their clothes and belts were not as free from spot or stain as they would have been on a parade ground in England. To keep them in proper order on board a crowded transport in the tropics was of course next to impossible, as the work of cleaning them induced streams of perspiration, and wearing them afterwards was a torment. Now that they have arrived they are still without the usual serge tunics worn by soldiers in Hong Kong at this time of year, and have to attend the constant parades and drills which go on, in European clothes thickly padded and utterly unsuited to the place.

This is not the worst part of their position. The women, on the arrival of the regiment, were sent to the barracks at Stanley, and though there is half a company with them in which are some of the married men, a large number of the married men are in the town barracks, from which Stanley by the circuitous path amongst the hills is about ten miles. The men, however, are refused leave to go and see their wives! Since the regiment arrived on the 3rd of March only seven men have received leave to go to Stanley, and these have had but a day's leave each, the greater part of which in every case must have been taken up in the walk there and back. To make matters worse, the women are said to be in serious straits for ordinary provisions. The rations served out to them by the Government are meagre and insufficient for the wants of this climate, and the men have been reduced to a condition of complete penury by the expenses of their voyage out. It is usual for them to provide, out of the small surplus of their scanty pay, certain simple comforts for their wives, which indeed in a place like this may be called absolute necessaries. The men of the 73rd are absolutely unable to do this, and the women are consequently said to be in the condition of want described. It is but just as the present mail is going away that this state of things has been made public. That the community of Hong Kong would most gladly provide for the comfort of the women belonging to the garrison in any way which the rules of the service will allow, is a matter of course, and before long there is little doubt that one of two things will happen. Either the accounts which have appeared will turn out to be over-coloured, or arrangements will be made for the proper maintenance of the women, through the liberality of the colony. This, however, does not lessen the culpability of those who have denied the men, who at any rate believe their wives, in their own phrase, to be "starving," the opportunity of visiting them and ascertaining their position with certainty. The unreasoning cruelty of such a denial is a subject about which it is impossible to speak calmly.

During the past fortnight the Hong Kong Colonial Surgeon's report for 1866 has been published in the *Government Gazette*, and presents a very favourable review of the public health during that year. It appears that only 74 residents have died during the year, bringing the mortality down as low as 3·50 per cent. The police force has had much better health during the year 1866 than previously, the mortality and sickness being both below the average, the death-rate being only 1·78 per cent. With regard to the Civil Hospital, it is necessary to

Digitized by Google

separate the patients into different classes to arrive at intelligible results. So far as the Europeans are concerned the rate of mortality has been very favourable, while in the case of the Indians it is but a little higher than the average. Amongst the Chinese patients, however, a frightful rate of mortality (33·56 per cent.) is observable. This is explained by the Colonial Surgeon on the ground that the great majority of the Chinese admitted to the hospital are only sent in in a moribund state. To recur to the feature of the report which is most interesting to Europeans, it appears from a comparative table at the end of the report that the death-rate amongst foreign residents during 1866 was lower than it has been since 1862.

The third annual report of the Seamen's Hospital has been published recently. This hospital, it will be remembered, is a gift to the town from the firm of Messrs. Jardine, Matheson, and Co., who never tire of using their colossal wealth for the benefit of the community amongst which they live. The new building, which was opened for patients during the past year, has now been in occupation about seven months, and the resident surgeon, Dr. Adams, reports most favourably on the effect of the superior situation in which it is placed, which has had a marked effect in lessening the amount of fever previously noticeable. The advantage of the thorough sanitary arrangements, and the ample bath accommodation, are pointed out.

Within the last few days a pleasure of an unusual kind has been afforded to the residents of Hong Kong by the arrival of a really good Italian Opera Company from Bombay. It is so seldom that any competent artistes find their way to such a remote region of the world as this that expectations are never raised very high beforehand when any new company arrives. In this case however a surprise of the most gratifying nature awaited the colony. The company, which is under the direction of Signor Pompei, although weak numerically, consists of thorough operatic singers, and though of course the operas have to be curtailed a great deal, especially in the matter of choruses, their execution in all other respects is admirable. The prima donna is a Madame Bouche, who but recently made her *debut* at La Scala, and is as yet unknown in England, having accepted her present Oriental engagement while still in Italy. She is an accomplished musician with great natural gifts, of whom more will certainly be heard eventually, in an enlarged sphere of action.

The American ship *Wild Rover*, from Boston October 31st, 1866, reports having come East-about and experienced a fine weather passage throughout. On the 22nd inst. when about 200 miles from Luzon at about 5.30 P.M., felt what was supposed to be the shock of an earthquake; the ship trembled violently as if she were grating over some hard substance, but there was deep water all about and no signs whatever of anything in the shape of a bank; the shock lasted for about three minutes, and was so violent that it was almost impossible to hold on to the wheel.

STRAITS SETTLEMENTS.

SINGAPORE.

Dates from Singapore are to the 8th April (three days later). The mail of 27th February was still the latest received, but telegrams from London *via* Calcutta extended to the 23rd March.

The change in the Government is already recognised as beneficial, and the new Governor, Colonel Ord, appears to have made an exceedingly favourable impression. The following is is from the *Straits Times*:—

The past fortnight has in a political point of view been the most important which these Settlements have witnessed for very nearly half a century, that is from the time of their incorporation. The Indian rule, which up till now guided their destinies, ceased to have power and effect on the 1st instant, when the formal inauguration of Singapore, Penang, Province Wellesley and Malacca as a Crown colony was carried into effect. The ceremony was, as compared with previous demonstrations here, an imposing one, and will serve to fix in the minds of the natives the date of a political change of which, though of the full effects they can only have a meagre conception now, it is to be hoped they will in all time to come participate in the advantages. It is needless to say that to those who have striven for many years to bring about the change the event was one possessing grounds for some measure of pride as well as congratulation. Nor was there long to wait for a practical illustration of the good effects of the new system, for on the day of the inauguration, the very first of its constitution, the Assembly passed a series of Acts which could not have become law under the old system without months of protracted agitation. The nominations for the Council made by his Excellency Colonel Ord, though wisely temporary in their nature, have the approval of all classes of the community, and there is little doubt that they will be permanently confirmed.

His Excellency held a levee at the Council Chamber on the 5th of April, which was numerously attended; and the impression created by the new Governor is decidedly favourable. A misunderstanding appears to have arisen regarding the position of the Indian Uncovenanted Servants who have been retained in the Colonial Service, in so far as their pensions are concerned. But we are of opinion that this misunderstanding cannot long exist. These servants have one and all earned their pensions in the exclusive service of the Straits, and their rights to pension are one of the obligations which the new Government inherits, against the heavy list of public works and improvements which it takes over for nothing. A reference in the matter is to be made, we believe, to the Secretaries of State for the Colonies and for India, but, from correspondence which has been published, the question appears already to have been decided in these quarters in the spirit which we have indicated.

By the French mail which left this port on the 4th April Sir P. Benson Maxwell took his departure on leave of absence for Europe. Sir Benson has been ten years Recorder of Penang, and one year that of Singapore, of which he is now, under the colonial system, Chief Justice. By an able and conscientious discharge of his duties he has conciliated the respect and goodwill of all classes of the community, who will honestly welcome his return to the Settlements. One good example he has set his contemporaries and successors is that of recording his judgments in the various cases of interest, which, owing to the modified character of the English law as administered among the natives here, are constantly cropping up. During the absence of Sir Benson Maxwell, Sir William Hackett, Judge of Penang, will officiate as Chief Justice.

Major-General Studholme Hodgson, Commander-in-Chief of the forces in the Straits, and Admiral Sir Henry Keppel were both passengers by the mail steamer *Ottawa*, which arrived here on the 31st March.

LATEST TELEGRAMS.

The Times of to-day publishes a telegram, dated Shanghai, March 26, which embodies the news brought by the French mail and published *in extenso* in our issue of the 4th instant. The following had been previously received:—

CHINA.

SHANGHAI, April 8.

The reports concerning the movements of the rebels in the north are of an alarming character, and apprehensions are felt for the safety of Nanothing (Nganking).
Tea, firm, but little doing.
Silk crop exhausted.
Total export, 41,375 bales.
Exchange on London, 5s. 11d.
Freights, 60s.

HONG KONG, April 15.

Grey shirtings, 6¼.
Water-twist, 16-24.
Total export of tea to date, 114,500,000 lbs.

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

DURHAM—On the 6th May, at 4, Belgrave-terrace, Lee, S.E., the wife of William Durham, Esq., of Calcutta, of a son.
FEARON—On the 19th March, at Shanghai, Mrs. R. J. Fearon, of a son.
LARKEN—On the 25th March, at Foochow, the wife of Thomas Lancaster Larken, Esq., of a son.
NIVEN—On the 23rd March, at Carns Hill, Singapore, Mrs. P. J. Niven, of a son.

MARRIAGES.

FORD—NUNNS.—At Shanghai, by the Rev. Charles H. Butcher, John, eldest son of the late Mr. William Ford, of Huddersfield, Yorkshire, to Mary, youngest daughter of Mr. William Nunns, of Manchester.
ROBB—SANDILANDS.—On the 26th March, at Singapore, by the Rev. W. Jeffery, D. Robb, Esq., to Jane, eldest daughter of the late W. Sandilands, Esq., of Glasgow.

DEATHS.

DUNDAS—On the 7th May, at Dundas Castle, James Henry, son of Henry Dundas, Esq., aged 6 months.
HOCKLY—On the 29th April, at Plympton St. Mary, Caroline Rebecca, the dearly beloved wife of John M. Hockly, Esq., Harbour Master of Shanghai, aged 37.
HOWARD—On the 7th May, at 17, Belgrave-square, after a very short illness, Charlotte Anne, wife of Sir Ralph Howard, Bart.
JESSEN—On the 21st March, at the Seaman's Hospital, Hong Kong, H. P. Jessen, native of Germany.
MACKIE—On the 7th May, at Exmouth, Catherine Ceely, widow of Major-General George Mackie, C.B.
MYERS—On the 12th April, at Halifax, Nova Scotia, Colonel William Myers, late of the 71st Light Infantry.
NIVEN—On the 23rd March, at Singapore, Catherine, the beloved wife of P. J. Niven, Esq.
PEILE—On the 4th May, suddenly, at Bombay, in his 29th year, William Hall Peile, Manager of the Agra Bank in that city, and fifth son of Thomas Williamson Peile, D.D., incumbent of St. Paul's, Avenue-road. Friends will kindly accept this intimation.

At Shanghai, bills on India, Rs. 300 per 100 taels. At Hong Kong, Rs. 218 to 218½ per $100. Bar Silver at Shanghai, tls. 111·3·0; at Hong Kong, 11 per cent. prem. Mexican dollars at Shanghai, tls. 74·6·5 per 100; and exchange on Hong Kong, 27 discount. Hong Kong and Shanghai Bank shares new, 2 per cent.; old, 8 per cent. dis.; Gas Company, 5 per cent. prem.; Hong Kong and Whampoa Dock, 25 to 30 per cent. prem.; Steam Shares, 10 per cent. dis.; Union Dock Company, 85 per cent. dis.; China Traders' Insurance, 2 per cent. premium.

The following is from Sharp and Co.'s Circular:—

GOLD.—The receipts during the fortnight have been $490,000 value, and the exports $330,000, including the shipments per *Benares* on the 15th, and excluding those to leave on Monday. The recent arrivals have at once lowered the market from the extreme rates ruling during the early part of the mail.

SILVER.—$1,450,000 worth of Sycee has been received, and $1,420,000 exported, the capacity of India to drain China of the precious metals appearing unlimited. The present mail takes forward fully a million dollars in silver and gold.

DOLLAR CURRENCY.—The movements in dollars have been confined to to the receipt of $310,000 from the coast, and the export of $630,000 chiefly to India.

EXCHANGE.—The supply of sterling bills has again been very limited and it is considered that the trifling advance in rates is not attributable, to any present necessities. The business in rupees has been quite nominal.

DISCOUNT AND MORTGAGES.—Unexceptional securities are, as before quoted, 7 and 10 per cent. respectively.

SHARES.—Banks have advanced, especially the new shares, as presenting an opportunity for investment in an undoubted stock, with a small present outlay.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—In spite of the lateness of the season, some business has been done at rates rather easier at Canton, but considering an alleged decline in the quality of the leaf, unfavourable to buyers in the north. In some cases the season must be considered over, and the teamen are beginning to return to the interior. Canton: Considering the lateness of the season, a fair business has been transacted during the past fortnight. Prices have ruled somewhat easier as regards Scented teas; stocks, however, are pretty well exhausted, and but little desirable leaf is now to be met with in these kinds. Country Congous: A Parsee firm has taken 110 chests out an average chop Oonam at 22 taels; with this exception, nothing has transpired, and present stock is 20,472 packages. Country Greens: One small chop has been settled at 37 taels, which reduces the stock to about 5,000 packages. Canton-made Teas: Some 10,000 boxes Scented Orange Pekoe have been taken, say common to fine 17 to 25 taels; 3,300 boxes Scented Caper, common to fair medium 12 to 17½ taels, and 1,000 boxes Gunpowder 18½ to 20 taels. The teamen are now making arrangements for the new season, and already musters of new district Congou have been shown, but evidently in order to gather foreigners' ideas as to the range prices are to take at this port for the forthcoming season. Sales, &c., are reported as follows:—Country Congous, 110 chests at 22 taels; Country Greens, 427 half-chests at 37 taels; Scented Orange Pekoe, 10,000 boxes at 17½ to 25 taels; Scented Caper, 3,300 boxes at 12 to 17½ taels; Gunpowder, 1,000 boxes at 18½ to 20 taels. Stock 32 chops or 20,472 packages Country Congous, and 5,000 packages Country Greens.

FOOCHOW, 23rd March.—There are no settlements of tea to report.

SHANGHAI.—There is no vessel on the berth here for London, but a fair business has been doing in Congous, at full prices, notwithstanding. The inquiry for Green teas has been limited only by the undesirable character of the stock. The export of teas from this port and Hankow to Great Britain is about 4,300,000 lbs. above, and to America 2,400,000 lbs. above last year's to same date. Black Teas: There has been a fair inquiry for these, but the firmness of holders has prevented the exhaustion of the stock. Prices have been fully up to those paid during the previous fortnight, while the quality of the settlements shows a steady falling off. The majority of the teamen have now left to prepare the coming crop, and as their losses have been exceptionally heavy this season, there is every reason to expect a very large reduction in the laying down cost of the new teas The sales comprise:—3,000 chests, Ningchow, common to low medium at 18 to 23 taels, and 200 chests Hohow, common at 16 tls. Re-shipments, none. Stock, 5,000 chests. Total settlements, with re-shipments from the River Ports from 1st June, 1866, to date, 325,200 chests against 271,300 chests last year. Green Teas: A moderate busi-

Digitized by Google

ness has been doing, again almost exclusively for America. The sales comprise chiefly common teas, for which very full prices have been conceded nothing fine being now left. Teamen, though anxious to realise, still refuse offers on a par with London value. Of the two vessels on the berth for New York, one is engaged full, and the other nearly so, and as there is nothing on the berth for England, an easier market is expected. About 18,000 packages of all kinds remain in stock, the bulk consisting of inferior Tekhing, and common Shanghai-packed teas, with the exception of Chinkiang, where some 3,000 half-chests of fine Moyunes are held for abnormal rates. The settlements comprise:—500 half-chests fine lines of a fine Moyune chop, taels 57; 3,300 half-chests medium Moyune to good Teenkai, taels 35 to 40.5; 2,500 half-chests medium Tekhing and common Moyune, taels 31.5 to 35; 2,100 half-chests common Taiping Tekhing and Shanghai-packed, taels 20 to 28; 600 half-chests common Pingsuey, taels 34. Re-shipments, none. Total settlements from 1st June to date, 358,000 half-chests, against 224,000 half-chests to date last year.

HANKOW.—The latest date is the 19th instant. One small chop had been shipped to Shanghai, and another parcel had been returned to the country to be mixed with new leaf, leaving 3,100 chests in stock.

KIUKIANG.—There had been no settlements; 730 chests Black and 1,909 half-chests Green had been shipped to Shanghai during the fortnight, leaving about 1,000 packages of both descriptions in stock.

YOKOHAMA.—Within the last few days the teamen have slightly given way in their demands, and a few settlements have been made both for the English and American markets; they consist of good medium to fine kinds. There are no transactions in the commoner grades, although the teamen are anxious sellers, and are willing to accept very low rates; yet foreigners do not seem to touch this class at present, owing to the large stocks in America, which cannot be worked off except at a great loss.

RAW SILK.—CANTON.—Very little has transpired during the fortnight, the only important settlement being some 300 cases re-reeled Cumchuck at $560 to 570, showing a decline of $30 on last quotations; arrivals have ceased, and the season altogether may be considered closed. It would be premature as yet to express any opinion on the prospects of the approaching season. Stock 20 bales No. 1 Tsatlee Reel, 100 bales No. 1 Loongkong, 200 piculs Kow-kong, 300 piculs Lacklow and Cumchuck, 300 piculs Seulam, and 800 piculs Punjum.

SHANGHAI.—The small purchases of China silk which have been added to settlements during the past fortnight have been taken chiefly as a method of remittance, and the prices paid have been so very irregular that it is almost impossible to give entirely correct quotations. The French mail steamer left on the 23rd instant, taking 444 bales of Japans for Marseilles (of which 119 were received from Nagasaki) and 315 bales for London; also 43 bales Chinas for France, and 324 for England. The present steamer has 400 bales engaged, and is expected to take about 500 bales Chinas and Japans. Settlements for the past fortnight: Chinas, 650 bales. Total settlements since 1st January: Chinas, 3,100 bales. Stock, 300 bales. The quotations are as follows:—Tsatlees, No. 3, 600 to 605 taels per picul; Tsatlees, Market No. 3, 560 to 570 taels per picul; Tsatlees, market No. 4, 540 to 550 taels per picul; Taysams, chops No. 2, 500 to 510 taels per picul; Taysams, chops No. 3, 470 taels per picul; Taysams, No. 4 5 and com., 400 to 430 taels per picul; Yuenfas, No. 1, 550 taels per picul; Yuenfas, No. 2, 530 taels per picul; Yuenfas, No. 3, 500 to 510 taels per picul; Yuenfas, No. 4 and com., 470 to 490 taels per picul; Hainins, 470 to 550 taels per picul. Exports: Chinas, from 1st June to 31st December, 1866: To Southampton, 20,442; Marseilles, 3,074; Bombay, 85; Hong Kong, 1,095; total, 24,696 bales.

YOKOHAMA.—Exchange since the last report has continued in favour of buyers; and purchases having been as large as a very small available stock could allow them to be, prices, which were very steady throughout the fortnight, close slightly in advance of last quotations. The settlements amount to about 600 piculs, consisting of 300 piculs of Hank Silk, among which are several parcels of fine Mybash, sold at from 900 to 920 dols., 150 piculs of Oshio and 150 of other sorts. Arrivals since the beginning of the month have taken place at the very moderate rate of about 25 piculs a day, and the unsold stock including the deposit in foreign hands still unredeemed may be estimatad at 450 piculs against 1,700 same time last year. Total settlements since the beginning of the season amount to 11,000 bales against 9,178 same time last year. If arrivals from this day to the end of June are not to be in excess of what they were during the same period last year, viz., about 1,000 bales, this quantity, in addition to the present unsold stock, would, if settled, give a total figure of 12,500 bales for the export of 1866 67. The quotations are as follows:—Mybash and Sinchu, best, $890 to 920 per picul; do., medium, $820 to 870; do., inferior, $750 to 800; Ida, none; Ooshio, best, $820 to 850; do., medium, $750 to 800; do., inferior, $650 to $710; Koshio, best, none; do., medium, $720 to 760; do., inferior, $640 to 680; Sodai, best, $780 to 730; medium, $660 to $680; inferior, $620 to 650; Echizan, best, $710 to 720; medium, $670 to 700; inferior, $560 to 620.

DRUGS AND OTHER EXPORTS.—CANTON.—Cassia Lignea: The nominal quotation remains $19.50, no stock being left on the market, but the first arrivals of the new season's supplies are expected about four weeks hence. Cassia Buds: $38, and 100 piculs offering thereat. Galangal: 300 piculs in stock, but neglected at $1.80. Cassia Galls: No change, $13.50, and supplies amount to 100 piculs. China Root: $3.50 to $3.75 for good trimmed quality. Vermilion: $39 per box of 50 catties. Cassia Oil: Stock 6 piculs quoted at $185. Musk, Aniseed and Aniseed Oil: No stock on the market.

CAMPHOR.—HONG KONG.—The holders asking from $30 to 31 per picul unpacked, which buyers are not inclined to pay, no transactions have taken place during the fortnight, and the stock on hand is about 800 piculs. No further supplies have arrived, but some 1,000 piculs are expected within four or six weeks.

CHINA GRASS.—SHANGHAI.—Reduced stocks. Fair demand among Chinese, at following quotations, viz:—No. 1, 16.5 taels; No. 2, 13 to 15 taels; inferior, 12 to 13 taels per picul.

MACAO. Cassia Lignea: No advices have been received as yet about the new crop, but supplies may be expected about the end of May. Meanwhile, in the absence of stock the quotation is nominally $19.50. Cassia Buds: There is a stock of about 40 piculs, but no demand, and in the absence of transactions the quotation is about $32. A sale of 40 piculs of Cassia Oil has reduced the stock to 11 piculs, for which dealers now ask $80. Owing to the high ruling prices the demand for Star Anniseed continues to be limited, and only 70 piculs have found buyers for shipment to the northern markets. Rates for new are $25, for old $23. About 250 piculs of each kind are on offer. Star Anniseed Oil: 4 piculs have been sold at $270. For the remaining 8 piculs holders ask $300, and will probably obtain the high price, as the demand is active. China Galls: New supplies are expected in addition to the stock of 220 piculs. 30 piculs have been placed at $12.50. Galangal: Quoted at $1.50, with a stock of 800 piculs, but no transactions. China Root: $3.50, nominal. Vermilion: $33.50 to $37.50.

CHINA AND JAPAN IMPORTS.

COTTON GOODS.—Grey Shirtings: These goods have been in fair request. Prices show a decline of 2½ cents since last report, a lot having been placed at $3.45 and $3.55, being the other extreme; the average price, however, is a trifle over $3.47½; a lot of slightly damaged were placed at $3.42½, but these are not included in the sales. White Shirtings: A comparatively large business has been in progress, much in advance of any corresponding period during the season, but prices are by no means satisfactory, and far from showing any margin to importers. Sales 50 to 60 reed at $2.83 to $3,15,66 to 68 reed $3.40 to $3.75 and Fine $5.90 to $6.50 T-Cloths: Stocks are at present comparatively small. A fair business has been done, and for the best chop as high as $2.98 has been obtained for 7lbs., which should have brought a corresponding price of from $2.80 to $2.85 for Eagle chop, but a majority of goods have been placed at an average under $2.75. Fancy Cottons: An improvement is noticed in the amount of business, but prices remain without any change. Transactions embrace Dyed Brocades at $4.90 to $5. 15. Turkey Reds at $3.30 to $3.95, and White Spots, at $3.80.

WOOLLENS.—A fair business has been in progress, but prices are a shade lower. Sales embrace Spanish stripes, at 98 cents. Camlets at $19.30 to 20. Lastings at $17 to 18.25. Scarlet long ells at $9.50 to 9.70, and Blankets 9 to 10 lbs. at $5.

AMERICAN GOODS.—The only sales reported include 1,050 pieces Grey Drills at $5.90 to 6. Cotton Yarn: The advance that took place in this article in the beginning of the fortnight seems to have had the effect of driving purchasers quite out of the market for the better qualities, and the inferior grades of Singapore cargo have been substituted. The present stocks are very limited, and there is no doubt but that before fresh supplies arrive high prices will have to be paid; two small lots of 16.24 and 38.42 were placed at $190 and $210 respectively.

METALS.—Have been in rather active demand, especially Nail Rod Iron, of which 9,000 bundles found buyers at $3.25 to 3.45, a considerable advance on last quotations. Hoop Iron has also been in fair request; sales include 4,000 bundles at $3.75. Iron Wire: Sales 468 bundles at $7.20 to 8.20. Tin Plates: sales 400 boxes at $7.50 to 7.55 per box.

COALS.—HONG KONG.—The arrivals have been confined to the Friede, from Formosa, with about 200 tons Keelung coals. Market firm. English, $13.50; Welch, $14.50; Australian, $8 75 to 9.

SHANGHAI.—The Coal market has shown more activity during the past fortnight; prices are higher and firm. The small arrivals, for sale, for Cardiffs have been sold at taels 17.5 per ton from ship. No supplies of English and North Wales coals have reached this port. Of Australian coals the arrivals have been small, and last sales have taken place at taels 9.5 per ton from ship to arrive. Supplies have been—505 tons Japan, 2,209 tons Anthracite, 1,796 tons Cardiff, and 540 tons Australian; total, 5,050 tons. The quotations are—English, taels 12 to 13 per ton; Cardiff, 16 to 17; Welsh, 14 to 15; American Anthracite, 12 to 12.5; Sydney, 9.5; Japan, 6; Formosa, 5.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—From London, March 15, Havelock.

At SHANGHAI.—From London, March 17, Whiteadder, Chinaman; from Swansea, 19, Fort Regent; from Shields, 24, Vanguard; from Boston, 21, Nabob.

At HONG KONG AND CANTON.—None.

At MANILA.—From London, March 19, Angela; from Barcelona, 12, Carmen.

At SINGAPORE.—From London, March 24, Spirit of the Deep; April 4, Belle of Southesk; from New York, 7, A. J. Ingersoll (str.).

At PENANG.—None.

At SINGAPORE.—From Liverpool, March 27, Wealth of Nations; from New York, 28, Rover (str.).

DEPARTURES.

From YOKOHAMA.—None.

From SHANGHAI.—For London, March 18, John Bellamey.

From FOOCHOW.—For London, March 16, Shakspeare.

From HONG KONG and CANTON.—For England, via Cape of Good Hope, March 24, H.M.S. Scylla; 26, H.M.S. Princess Royal.

From MACAO.—For Havana, March 15, Onrust; 16, Altagracia.

From MANILA.—For Cork, March 19, Cinco Hermanes; for Havana, 15, Eulalia; Jose y Maria; for New York, 21, Hotspur; for Boston, 14, Cyclone.

From SINGAPORE.—For London, March 28, Ellen Radford; 30, Willy; for Boston, April 7, Dresden.

From PENANG.—For London, March 30, James Paton.

VESSELS LOADING.

At YOKOHAMA.—For London, Lord Collingwood; for New York, Glenclune.

At SHANGHAI.—For London, none; for New York, Borealis, Condor.

At FOOCHOW.—None.

At HONG KONG and CANTON.—For London, Acacia (full), Hugh Fortescue; for New York, Windward.

Digitized by Google

At MANILA.—For London, Her Majesty; for Liverpool, Silesia; for Cork, Espana; for New York, Helena, W. G. Russell.

At SINGAPORE.—For London, Eastern Star, John Stanton, junr., Summer Cloud; for Liverpool, Mataura; for Bordeaux, Argonaute, Suzanne.

At PENANG.—None.

FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London, Cotton and Tea, £3 to £3 10s.; Silk, £4 to £4 10s. per ton of 50 cubic feet. To New York, £2 10s. to £3.

At SHANGHAI.—There is no vessel on the berth for London. To New York the rate is £2 10s. per ton of 40 cubic feet.

At FOOCHOW.—No vessel on the berth.

At HONG KONG and CANTON.—The market is somewhat firmer, while tonnage is not plentiful. For London the Hugh Fortescue has taken the berth at £2 10s. For coasting there is not much enquiry, small vessels are getting 82½ cents. to Tientsin, and 60 cents. to Newchwang. The circular of Geo. Holmes gives the number of disengaged vessels in harbour (exclusive of Siamese) at sixteen, representing 9,701 tons.

At MANILA.—The Maria y Vicenta has obtained £4 for Rice to the Havanna; the Espana loads a cargo of Sugar and a little Hemp for Cork for orders, and a port in the United Kingdom, at £2. For London: Her Majesty has taken the berth at £3 for Sugar, the Hemp rate not having been fixed. The Geffrard obtains a lump sum of £1,400 to load a cargo of Hemp and Leaf Tobacco to a port in the United Kingdom for orders.

At SINGAPORE.—Tonnage in the harbour has been slightly increased, but there is still a very moderate supply of available tonnage. Rates to London are £2 per ton for dead weight, and £2 5s. light cargo.

At PENANG.—For London, there is no vessel on the berth and a considerable quantity of cargo has accumulated waiting for tonnage.

COMMERCIAL POSTSCRIPT.

ARRIVALS NOT INCLUDED IN THE TABLES.—May 7, at Brouwershaven, from Pasaroeang, Grootmeester Nationaal; April 25, at New York, from Foochow, Isabella Ridley; 26, from Penang, Ceylon; May 11, at Falmouth, from Java, Triton, Danube; 12, at London, from Colombo, Sultan, and Brinkburn.

DEPARTURES.—From Rotterdam, for Singapore, Otto; — for Batavia, Gravenhage (s.); May 6, from Sunderland, for Shanghai, Sydenham; 7 from Liverpool, for Shanghai, Thomas Blyth; 8, for Manila, Doriga; 10, from London, for Hong Kong, Korea; 9, from Liverpool, for Batavia, Susanna Elizabeth; 6, from Newcastle, for Singapore, Antje; 9, from Liverpool, for Shanghai, Our Queen.

LAID-ON.—At Liverpool, for Galle, Queen of England. At London, for Colombo, Teviot; for Shanghai, Talbot.

SPOKEN.—Southern Belle, for Hong Kong, April 4, 3 N., 32 W.; California, for Batavia, May 4, 48 N., 9 W.; Beemah (ship), Shanghai to London, 6 N., 20 W.; Sintjan (Dutch barque), Rotterdam to Batavia, 40 days out, Jan. 26, 11 S., 31 W.; Coulnakyle (ship), London to Shanghai, Feb. 17, 16 S., 30 W.; Tweelingen, Cardiff to Batavia, April 1, 3 N., 26 W.; Queen of the Sea, New York to Hong Kong, 23 April, 32 N., 41 W.; Victory, Shields to Shanghai, May 4, 48 N., 14 W.; Condor, Liverpool to Singapore, April 2, 3 N., 26 W.

CASUALTIES.—The Hotspur, Bryant, from Manila to New York, lost at Brouwers Reef, had 1,050 tons hemp and 500 tons sugar on board. The Ceylon, Brewer, from Penang, arrived at New York April 26, with bulwarks stove, having experienced heavy weather.

MISCELLANEOUS.—At Table Bay, March 23, Carnarvonshire, Richards, from Nagasaki, and sailed 27 for London; 26, Bangkok, Chappot, from Macao, and sailed 30 for Havana; 25, John Fraser, from Java.

Off Cape Point Lighthouse, March 28, Shallet, from Colombo, for London.

TEA.

(PRODUCE MARKETS REVIEW.)

With the approaching end of our tea season come the usual uncertainties respecting the prospects of our supplies for the next, the usual differences of opinion regarding the amount of stocks, and the usual apprehensions of consumption increasing with greater rapidity than the production, and therefore incapable of being satisfied without introducing elements of disturbance in the equilibrium of trade, and giving rise to violent and irregular fluctuations. For ourselves, we confess to have so often heard the same anticipations of a scarcity expressed, and have so often found them falsified by subsequent events, that like the country people in the fable, whom the boy so frequently alarmed with the cry of "wolf," we feel no very great apprehensions on this score; but as it is very likely that some of the trade may still suspend their judgments on this point, we venture to traverse the ground of argument once more, and propose to give reasons for the belief that the present year will be no exceptional one, and that our supplies will, under almost any possible combination of circumstances, prove more than equal to the demand. Our total demand resolves itself into the deliveries for home consumption, and the deliveries for export; and the average amount of both, obtained from an analysis of the last six years, is easily found for the last six months of the season, the period between April 1st and September 30th. We can in the same way ascertain the probable arrivals between the two periods; and deducting demand from supply, we can obtain a tolerably fair estimate of the probable stocks in the United Kingdom at the commencement of the new season. Taking the figures for the six months from April to September, both inclusive, we get a total of 44,455,473 lbs., the amount which we may assume to represent our total supplies for the corresponding period during the present year, though it is evident that we should be fully justified in taking an even larger amount than this, inasmuch as we have not taken into account the circumstance that our supplies are yearly on the increase. If to this sum we add the stock on the 31st of March, or 108,190,332 lbs., we get a total of 152,690,332 lbs. to supply our wants from April to the end of September. Having ascertained the extent of our supplies, we now turn to the demand. Estimating our monthly deliveries (for export and home consumption) at eleven and a quarter millions per month, we get a total of 67,500,000 lbs. for our demand, which subtracted from the sum total mentioned above, 152,690,332 lbs. gives a remainder of 85,145,805 lbs. Taking therefore these figures as our basis, we think it may be fairly assumed that the stock on September 30th will be at least 80,000,000 lbs., and may even range as high as 85,000,000 lbs. Considerations from an opposite point of view lead us to almost identical results. 1. The quantity of tea from Chinese ports afloat and not included in stock is 24,000,000 lbs.; 2. From India, about 2,250,000 lbs.; 3. The stock in Chinese ports to March 14th (the date of our most recent advices from China), 8,500,000 lbs.; 4. The quantity of Chinese tea which has probably still to come down to the ports from the country, about 9,000,000 or 10,000,000 lbs.; 5. 3,000,000 lbs. or even 4,000,000 of Indian tea. These figures added together give a total of about 44,000,000 lbs. to represent our supplies to the end of September. To those who appear to think a stock of 85,000,000 too small when compared with the stocks of the three preceding years, after taking the increased consumption into account, we reply that the figures of a previous date, representing the period before the American war, are much nearer to the amount of stock that we ought to have, as these figures represent the condition of the tea trade before it was thrown into confusion by the American war. We shall approximate even nearer to the actual state of the supply and demand if we take also into consideration the relative increase of supplies as compared with the increasing demand. Comparing the probable stock of 80,000,000 lbs., or 85,000,000 lbs. with former years, we learn from official sources that the amount of stock in the United Kingdom on the 30th September, of the years 1861, 1862, 1863, 1864, 1865, 1866, was 66,280,318 lbs.; 65,909,949 lbs.; 83,176,427 lbs.; 86,274,583 lbs.; 81,639,089 lbs.; 83,862,890 lbs. respectively. From these figures it will be seen that it is only for the last four years that we have had such heavy stocks on the 30th of September. It is true that the deliveries have increased more than in proportion to the accumulation at that particular date, but surely a stock of 80,000,000 lbs., or nearly seven months' deliveries, at the threshold of a new season, and with constantly increasing supplies, is more than sufficient for any possible calls upon it. The production of fine tea is at all times comparatively limited; hence the better kinds are usually rather scarce towards the end of the season. It is thus, no doubt, that the idea arises of a scarcity of tea generally, though we need hardly point out that no necessary relations exist between the demand for fine and for inferior kinds. The tea market is, in fact, a series of markets, each being, in its action, almost wholly independent of the rest. When the tea market generally is spoken of, the market for the commoner and medium grades of Congou is meant, these being the kinds mostly in demand, and consequently the most plentiful.

The figures given in the Board of Trade Returns for the month of March have this remarkable property—that advocates of distinctly opposite and even conflicting views may find in them corroborative testimony to the truth of their own theories. Those who affect to believe that the supply of tea will be small may point to the apparently progressive decrease in our imports, which for the month ending March 31st were 14,830,634 lbs., against 15,625,769 lbs. in the year 1866, and 15,730,049 lbs. in 1865. Those, on the other hand, who take larger views, and decline to judge of the character and architecture of a house by the inspection of a single brick, remark the considerable increase in the imports for the three months. The deliveries for home consumption for the single month of March and the first three months of the year, are in excess of those for the year 1866, and considerably greater than those of 1865. A similar increase, however, exists with regard to the stock, which is 108,190,322 lbs., twelve millions in excess of that of last year, and barely more than five millions in excess of the stock at the same period in 1865.

INDIAN TELEGRAPHS.—Colonel Glover, the temporary head of the Indian Telegraph Department, has come to the rescue of the telegraph in a report which defends its character and efficiency. In December last the percentage of serious errors in 29,968 Indian messages was only a quarter, and trivial errors 2¼, while in 1,978 Indo-European messages it was 9½, of which 1½ were serious. Since 1850, when the first wire was laid, the telegraph has cost £1,218,843 of working expenses, in addition to £1,354,328 of capital. Allowing for free messages sent by officials, the revenue has been £708,887, showing a loss of more than half a million sterling, besides the interest on capital. In a few months we are promised a special wire for Indo-European messages between Kurrachee and Bombay, if not between Bombay and Calcutta.

NOTICES TO CORRESPONDENTS

No notice can be taken of anonymous correspondence. Whatever is intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication, but as a guarantee of good faith.

A REGISTER is kept of the addresses of all persons connected with the FAR EAST, and reference can be made to the same by personal application at the office or by letter.

Any information required by Subscribers, in reference to Commercial or General matters in CHINA, JAPAN, SINGAPORE, *and other parts of the* FAR EAST, *will be supplied on application at the Office, where files may be seen of the Journals published in those countries.*

THE LONDON AND CHINA EXPRESS.

PUBLISHED on the departure of the Mails *via* Marseilles on the 10th, 17th, and 26th, contains a Summary of European, American, and General News; Commercial and Shipping Reports, and Special notices of Trade with the FAR EAST.

Subscription 54s. per annum, including Postage. Export Supplement 12s. extra.

The London & China Telegraph.

LONDON, MONDAY, MAY 13, 1867.

THE CHINA STATION.

IN a recent article on the subject of the China Squadron, we have had occasion to comment on the extraordinary proposals made by Mr. CHILDERS, Mr. STANSFELD, and other economically-disposed members of the House of Commons, with the view of reducing the expense, and therefore the efficiency, of our naval establishment in the Far East. Although these produced no apparent effect at the time, and the estimates were passed without reduction, it was evident that the advocates of retrenchment had a good many supporters on the Opposition benches, and that many of those who approved of the scheme were not unwilling to try the experiment on the China squadron first—probably on the principle that as charity begins at home, so parsimony should commence as far, abroad as possible. As we then observed, praise, not blame was due to the present board of Admiralty for their determination to supply Admiral KEPPELL with a new and more powerful class of gunboats, and generally to maintain and even to increase the efficiency of the force at his command; and, we might have added, still greater praise would have been their due had they resolved to send out at least one powerful armour-plated vessel instead of, or in addition to the *Rodney*. We doubted, however, whether such a course was at all likely to be adopted in the face of the urgent demands made for economy, and it is with as much surprise as pleasure that we hear of their Lordships' decision to send the *Ocean*, a fine iron-clad frigate of 4,047 tons, and 1,000-horse power, and carrying 24 heavy guns, from the Mediterranean station to reinforce the China squadron. This has been characterised as a bold step, but we have already an ironclad flagship in the Pacific, and another on the West India station, and why not one in China waters also? It is well known that Spain has several armour-plated ships in the Pacific, and from the Pacific to China is no great distance. Russia too will soon have one or more such vessels in these waters, and the United States, if occasion required, would soon have a fleet of monitors there, by the most insignificant of which the poor old *Rodney* could be "knocked into a cocked hat," as the phrase is, in ten minutes. But the *Ocean* is really a magnificent vessel; she is already heavily armed, but is now ordered to Malta to fit four more 300-pounder guns, of 9 tons each, after which she will be more than a match for any foreign ironclad she is likely to meet with. The *Army and Navy Gazette* says the *Pallas*, certainly a more handy vessel, of little more than half the size of the *Ocean*, would be better suited for the voyage; but we are quite content with the latter. She has already proved herself a good sea-boat, and we doubt not will reach her destination with speed and safety.

LIGHTHOUSES FOR THE COAST OF JAPAN.

A STATEMENT recently appeared in the columns of a weekly paper to the effect that, at the request of the SHIOGOON, Her MAJESTY'S Government had undertaken forthwith to construct eleven lighthouses at different points on the coast of Japan. The report, however, is not quite accurate. It is no doubt very desirable that the 11th article of the Convention of Yedo, by which the Government of Japan engaged to provide all the open ports with whatever lights, buoys, and beacons might be necessary to render navigation safe in approaching them, should be carried out as speedily as possible. At present nothing whatever has been done towards it, nor is it likely that the native Government will be able to carry out the scheme properly without European aid. We are glad, therefore, to be enabled to state that the assistance of the English Government has been asked, and that the matter is now under consideration; the subject is, however, one of a complicated character, and will require careful and technical examination before any active operations can be commenced. It is no little source of satisfaction, too, that in carrying out these improvements, British skill and industry will have a chance, and that in this instance the French monopoly of Government contracts has been broken through.

MAIL COMMUNICATION WITH THE EAST.

UP to the present time nothing satisfactory has transpired regarding the impending change in the mail service. The matter was brought to the notice of the House of Commons on the 10th by Mr. CRAWFORD, who asked the SECRETARY to the TREASURY if the present weekly postal communication with India by way of Bombay was to be discontinued after the despatch of the mail from London on the 26th of May, and if he would lay upon the table copy of the advertisements and forms of tender for the new postal services to India and China recently issued from the Post-office. To this Mr. HUNT answered on behalf of the Government that the Peninsular and Oriental Company having given notice of their intention to withdraw the extra steamers running between Suez and Bombay, the Indian service, until further notice, will, after the despatch of the mail from London on the 26th of May, be as formerly, twice a month to Bombay, and twice a month to Calcutta. The result of this is that our communication with Bombay reverts to its former position, while that with China remains for the present *in statu quo*.

THE GOVERNORSHIP OF LABUAN.

WE understand that Mr. J. POPE HENNESSY, late M.P. for King's County, has been offered the Governorship of Labuan and Consul-Generalship of Borneo. The salary of the joint offices is £1,100 per annum. We do not yet know whether the appointment has been accepted. Little notice has been taken of the matter by the London papers, but the Irish journals are less reticent. The *Cork Examiner* says:—

> It would be cutting blocks with a razor to banish a man of the varied gifts of Mr. Hennessy to a remote and savage domain like this, when it is remembered what faithful and brilliant service he did during seven years to the Conservative party while they were in the cold shade of Opposition. It would seem the grossest ingratitude to discharge his claims in this way. At the time when he gave his fealty to the party talent was scarcely to be found in its ranks, and certainly for the skirmishes of debate they were able to show no equal to him. The services he then rendered might fairly be expected to have reaped something like a corresponding reward. This is especially the case when we remember the way luck fell in showers upon the present Government. Since they got into office it has seemed to rain appointments. Nor was the stream composed of unconsidered trifles, but of the very richest and most tempting that lie in the gift of a Government. Out of these could they have found nothing for a man like Mr. Hennessy save a place such as might be counted in the patronage of a member of Parliament?

The *Irish Times* also disapproves the appointment, and says:

> Until we see the announcement in the usual authorised shape, we can scarcely believe that a gentleman whose Parliamentary career has been so distinguished, and who has been universally regarded as one of the most promising among the younger members of the Conservative party, should be offered by his political friends the governorship of a tropical colony so insignificant that many had to look to a gazetteer in order to discover in what part of the world it lay.

THE Berlin correspondent of *The Times* states that the Amour telegraph line, which was to be one of the connecting links in the grand scheme of a Russo-American cable, has been finished in its entire extent from Nicolaieffsk on the Pacific to Novgorod harbour in the bay of Possiet. It is proposed to continue it to Nagasaki and Shanghai.

THE *London Gazette* of the 7th instant contains a notification to the effect that "the QUEEN has been graciously pleased to appoint ABEL A. J. GOWER, Esq., now Her Majesty's Consul at Hakodadi, to be Her Majesty's Consul at Nagasaki; and MARCUS OCTAVIUS FLOWERS, Esq., to be Her Majesty's Consul at Hakodadi."

THE CHARTERED MERCANTILE BANK OF INDIA, LONDON, AND CHINA.

(MONEY MARKET REVIEW.)

The Chartered Mercantile Bank of India, London, and China, as appears from the annual report of the directors, earned in the year 1866, with the addition of a small balance brought forward, no less than £104,934, upon a paid-up capital of £750,000; and it paid £75,000, in two half-yearly dividends of 5 per cent. each. On the other hand, the reserve fund has been reduced from £250,000 to £145,902. To explain in detail how this occurred would require a recapitulation of the events of the disastrous year 1866, for which we have neither room nor inclination. It is enough to say, that through the incidents and the consequences of those disastrous events in India and China, the directors of this bank, notwithstanding all their sacrifices of time and anxiety, have been unable to prevent a considerable loss. Hence the draft upon the reserve fund.

The course of trade during and after the American civil war directed the employment of capital to the productions of India and China, and with the change came a period of excessive competition in banking. This proved injurious, in so far as the demand for produce here stimulated producers and merchants in the East to the utmost exertions to move their produce and goods to market, and to hold speculatively where they could not satisfactorily realise. It is, of course, easy to argue after the event, that the danger of such a course should be foreseen in the midst of it; but who is sufficient for these things? There never yet was found a body of men engaged in a pursuit the chief weight of which is the responsibility of making profits for those whose capital is embarked in it, willing voluntarily to incur the odium that would inevitably have followed from their own shareholders for neglecting their opportunities. Shareholders must not, now that they are, in some degree, on the dark side of the cloud, forget that in the halcyon days they demanded high dividends, and that high dividends can only be earned by incurring the full average risks of the mercantile season. On the other hand they must, in common equity, prepare themselves for the casualties of exceptional seasons, against which no human foresight can completely guard. They must also remember that one of the first principles of a reserve fund is that it is a sort of insurance of their dividend against such exceptional casualties. Owners of a profitable business, they have gained a very large profit, which has been absorbed by exceptional losses; but the reserve or insurance fund has effected its main purpose of securing the dividend, and they have safely emerged from the temporary yet serious troubles which necessitated their having recourse to it. Considerations of this kind must especially be kept in view after such a year as 1866.

Having said thus much as to the past, it becomes us to look to the future; and, on doing so, we at once see the silver lining of the cloud which looked so black from the other side. The Chartered Mercantile Bank of India, London, and China have all along met their position manfully. Though at the expense of a material reduction in the usual profits, they have curtailed their business at all points; and it would, as we understand, have been unnecessary to make so great a draft upon the reserve had not the Bombay losses of 1865 exceeded the provision made for them at the time. However, the result of these reverses was a determination to ascertain the real state of affairs; and, with a view to a thorough examination into them, Mr. Robertson, the chief manager, *personally inspected every branch in India, China, and Japan.* Up to the end of 1866 the statements from the managers of the several branches, and also the books in London, upon which the balance-sheet and profit and loss account are made out, were examined by independent auditors, Messrs. Coleman, Turquand, and Co., and they have certified to their correctness; while the shareholders' auditors testify that the bills of exchange, bills discounted, and other securities held by the bank, are available, and that "sufficient deductions have been made for all bad and doubtful debts, according to the statements received from the several branches in India and China." Nothing can be more conclusive than these certificates; and the directors assure us in their report that the result of Mr. Robertson's personal examination of the branches has been perfectly satisfactory. We receive these assurances with entire confidence. It is evident, therefore, that a new epoch has commenced in the history of the bank, and that it has commenced under favourable conditions. The worst has passed, and is provided for; and, whilst the business has been curtailed, it has yet been fostered. Not a single permanent connection has been lost. And, while the Eastern trades, like our home trades, are now being managed with a soberness which we have sometimes thought equivalent to a want of ordinary enterprise, we must bear testimony to the fact that this feature offers the greatest security for the permanency of banking profits. The exchange business of the Chartered Mercantile Bank is a valuable possession, and it will grow with the expansion of trade, for we cannot contemplate trade long remaining so nearly stationary as it now is. It is most unlikely that speculative impulses can for many years be so strong in the Eastern trades as they proved to be consequent upon the direction imparted to them by the American war. Nor can any political event be anticipated in the East likely to produce disturbing elements either in the course or in the expansion of trade. The natural seasons may be bad or indifferent, but they may also be good or bounteous, we cannot tell; but experience has shown that there are sufficient compensations over so wide an area to create an average, so that banking profits are seldom affected injuriously by bad seasons; while we all know they are strengthened and confirmed by good. Opening thus on a new period, with such rational prospects, and with a position ascertained apparently to the utmost minuteness, we may reasonably congratulate the shareholders on the advantages within their reach. They have a reduced reserve, it is true, but they are in the right and only path to replace it without infringing upon the regular distribution of profit. The reserves of other banks, and banks in London, too, have, on occasion, been partially or wholly absorbed, but replaced and even increased. There is no reason whatever for doubting that the like result will follow in this case. At all events the examination we have been able to give to the history and to the present condition of the Chartered Mercantile Bank of India, London, and China satisfies our mind that, with the sound business it possesses, not only are these things within reach in a comparatively short period, but that it has a promising future before it.

Naval and Military.

It is stated that Captain M. S. Nolloth, late senior naval officer at Hong Kong, will receive the appointment of commodore and senior officer in the Indian Ocean, as successor to Commodore Hillyar, on that gallant officer's receiving the active flag rank, for which he is now qualified. In the meanwhile Captain Nolloth is appointed to the St. George (coastguard service). This appointment has been received with satisfaction by naval officers, who felt indignant at the announcement made in the House of Commons by a late official that service in Hong Kong and Rio de Janeiro was not to be considered "active," while that in the home ports, the Mediterranean, and other healthy stations, was to be so considered.

Rear-Admiral Hastings R. Yelverton, C.B., has struck his flag on board the armour-plated screw steamship Caledonia, 30, Captain the Hon. Fitzgerald A. C. Foley, in Plymouth Sound. Rear-Admiral F. Warden, C.B., has been appointed to the command of the Channel Squadron, vice Rear-Admiral Yelverton, whose period of service has expired.

Letters have been sent out from the Admiralty to all the principal shipbuilding firms and companies of eminence, including the Thames Shipbuilding Company, the London Engineering Company, Messrs. Wigram, Messrs. Laird Brothers, of Birkenhead, Messrs. Napier, Glasgow, and Messrs. Palmer and Co., of the Tyne, calling upon them to tender for the construction of two armour-clad ships of 3,700 tons, of a novel and improved description. Not only will these ships be plated with the thickest iron that can be placed on their sides, but the armour will be carried so low down that, except under most exceptional cases, their bottoms will be perfectly safe from the fire of an enemy. They will be provided with the heaviest known artillery, which they will be enabled to fire in a direct line with the keel.

Her Majesty's screw storeship Supply, Staff Commander C. Bawden, has arrived at Spithead from Ascension, with naval invalids, and a cargo of returned stores. The invalids were transferred to the Victory flag-ship, in Portsmouth harbour, soon after arrival, and the Supply received orders to proceed round to Woolwich to land her cargo of stores, &c.

The Chanticleer, unarmoured screw sloop, 950 tons, 200-horse power, Commander W. S. Bridges, sailed from Spithead on the 4th instant for the Pacific, and would call in at Plymouth Sound on her way down Channel.

The new screw sloop Dryad, 4, at Devonport, is ordered to be put into commission, with a complement of 130 officers and men, for service in South America.

As an instance of the great anxiety evinced by naval officers for employment, and the great difficulty of obtaining it, all the captains on the 14s. 6d. list, and even a little below it, who are not now serving and are duly qualified, were candidates for the command of either the Donegal or the St. George almost without exception. This will show the anxiety felt for employment.

The iron frigate Warrior, ordered for commission at Portsmouth, was undocked at that port on the 4th, to make room for the iron frigate Minotaur, Capt. G. P. Goodenough, flagship of the Commander-in-Chief of the Channel Squadron, Rear-Admiral F. Warden, C.B. The Minotaur will be docked to have her four-bladed screw and hull below the water line examined, previous to making her final speed trials at seagoing draught of water over the measured mile in Stokes Bay.

A batch of guns of various calibres, ranging in diameter of bore up to seven and nine inches, manufactured by Sir W. G. Armstrong and Co., at Elswick, for the Egyptian Government, have been placed on the T pier at Woolwich, in readiness for embarkation for Alexandria, to be shipped on board the Coycyra, to call at the pier for that purpose.

The hired sailing troopship *Cospatrick*, Commander James A. Elmslie' R.N.R., has arrived at Spithead from Kurrachee, having sailed thence on the 29th of January, and called in at St. Helena on the 24th of March. She has brought to England 175 invalided soldiers from Her Majesty's regiments serving in India, with 15 women and 38 children.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, MAY 8.

Since the last mail the Parliamentary business has been of little importance; the different Budgets having passed after a very short and insignificant debate. Our Lords did not move for a party-fight, which might have caused a Ministerial crisis, which at this moment would have been most unfortunate. Even the Budget for the Colonial Department was, like all but one, carried unanimously, and only a few objections were urged regarding the abolition of the alternative chartering of merchantmen on account of the Government to convey produce from the East Indies to our harbours, and the abolition of furnishing samples of coffee from the auctions of the Trading Company; as in all matters the Minister promised to reconsider the measures. He, however, declined to own that the miserable condition of our merchant marine was due to this measure, and with regard to the fact that no coffee samples were now furnished he stated that this resulted only from the fact that this caused too many expenses for the Exchequer. After these matters had been disposed of the House adjourned until a further convocation.

The Second Chamber will meet on the 14th inst.

A personal fact between Mr. Cremers (member of the First Chamber) and Mr. Keuchenius (member of the Second Chamber) caused much discussion in the papers. The first said in the House of Lords that Mr. Keuchenius should have said, after having proposed his motion, when the remark should have been made that this motion did not agree with his principles—"I do not care for that, but Myer shall not go to the East." As usual in these cases, it was proved that Mr. Cremers was a great talker—no more.

His Majesty the King and the Royal family have returned to the Hague from their trip to Amsterdam.

Amongst the rumours current in well-informed circles appears this,—that our Cabinet has the plan to restore the departments of public worship;

Digitized by Google

ergo, another step backward with regard to the separation of the Church and State, so long and so fervently wished for. Better is the idea to establish a department for public works.

In the masonic lodge *l'Union Royale* great solemnities took place in consequence of the death of Jkr. Frans Alexander Knight van Rappard, so well known by his friends in India.

The great slaughter amongst the cattle in those provinces attacked by rinderpest that was finished on the 1st of May has had a good result. In the week ending the 27th April 362 head of cattle were attacked, against 614 and 761 in both the previous weeks. In some places the peasants offered so much resistance that military force was required, and in the village Schoonrewoerd the soldiers were obliged to fire, so that two peasants were killed and some others severely wounded.

I think it is quite unnecessary to ring still the changes on the theme, "Is it peace, is it war?" For the present the peace current continues to prevail, only disturbed by some pessimists who have no trust at all in the London Conference; and it is even said that the meeting at London will be adjourned. The utmost uncertainty prevails with regard to what will be proposed at that diplomatic conference, and the Luxembourgers themselves do not know what they wish and what is their interest. To-day a deputation of inhabitants of the town of Luxembourg arrived at the Hague, and started, after a long conference with the Prince-Stadtholder, Prince Henry, for London to deliver an address to the Conference, begging that the neutrality of the duchy might be proclaimed, and its independence and inviolability of its territory warranted by handing it over to Belgium, who in that case would have to pay an indemnity of 5,000,000 guilders to the Grand Duke. Another rumour says that these are not guilders, but francs; and still others state that the sum is not fixed at all, and that the amount will be settled by the Conference when it accepts the proposal of the deputation. That the fear of war was most imminent some days ago is proved by the fact that it was officially announced at the Exchange here that the insurance brokers had resolved not to insure vessels except with a stipulation referring to war (free from molest). This news, which was telegraphed to Batavia and caused so much confusion, was quite right. That the political atmosphere is not yet quite sound is, so the pessimists say, proved by the fact that measures are taken by our Government to finish with the utmost speed the public works destined for the principal line of defence of the Netherlands.

The trade report for the year 1866, published by the Consul at Singapore in the *Javaische Courant*, in which was stated that the agency of the Rotterdam Bank, that was established there, promised to become very lucrative, made a very favourable impression here. By this fact again it was clearly proved that the ex-director Hinsberg, by publishing his well-known pamphlet, endeavoured in vain to prejudice this bank by underhand means.

No particulars are published here about the Paris Exhibition, and the number of Dutchmen who are going to visit the French capital is very limited. It was with great pleasure that we heard that two of our *peintre-artistes*, viz., Messrs. Alma Tavema and Jozef Israels, were rewarded with medals, and that a beautiful picture of Mr. C. Bisschop was bought by Princess Mathilde.

Mr. F. S. Jacob resigned as manager of the East India Railway Company; Mr. J. Groll was appointed in his place.

Her Majesty has consented that Mr. D. de Graeff van Polsbraek, Dutch Consul-General and Political Agent in Japan, and Mr. L. F. Kleintjes, Chancellor of that consulate, should accept the insignias of the Daneborg's Order conferred on them by the King of Denmark.

An exchange building was opened in Hengelo (the Dutch Manchester) some days ago.

A brilliant exposition of pictures was opened here last Saturday; for the first time the work of an English artist was exhibited here, namely, that of Mr. William Melby.

Within a few days a meeting will be held at Roosendaal by Belgian and Dutch litterators and other gentlemen, to consider what means the nationalities of both the countries could be maintained.

On the 22nd 125 soldiers will be forwarded by the *Java Packet* to the Far East.

A good deal is said about the measure of the Ministers of the Colonial and Financial Departments, who rejected the proposal of the special commission to appoint a liberal minister (rev.) for the service in India. Our Minister of Finance being orthodox declines to appoint a liberal man; the Minister of the Colonies stated that he did not care much for this matter.

COMMERCIAL.

Coffee.—The confidence in this article was highly improved in consequence of the peaceful prospect. There was an active demand, whilst on the 24th of April, when the Trading Company offered its 102,694 bags in auction, speculation was still so checked that only the half of this quantity could be sold. The parcels now in the second hand were all sold at gradually improving prices, so that the quotation now is 1½c. higher than in the former week. The Trading Company however declines to operate without a further advance, and refused even an offer for 6,000 b. with an advance in price of 2c., and in consequence of this behaviour there are but a few private parcels brought in the market. The private transactions since the auction include 14,000 b. Java, and 3,778 b. Padang per several vessels and at several prices. The quotations of good ordinary Java is now from 39½ to 40½. Total stock, 576,300 b., amongst which 499,848 b. of the Trading Company, who will sell on the 22nd 73,900 b.

Sugar.—Raw: After the market had strongly been influenced by the unsatisfactory state of politics, there was an important improvement, since it was announced that the Conference should meet in London. The transactions, however, remained unimportant, because holders decline to operate without any considerable advance on the last prices, say 2f. under March value, that were paid for 2,000 mats Java. Not only the improved state of politics urges the holders to show great firmness, but there is for England from Mauritius only a very reduced quantity afloat, whilst also the last beet-root crop in France has partly failed. The unsold stock of raw sugar of the Trading Company is 72,720 mats against 112,875 mats in 1865, and the private stock 41,449 mats.

Rice.—Since the 12,000 bags cargo ex Johan were sold at 8¼f., only a limited business has been done, including 935 bags Java ex Majestic, and 2,708 bags Java ex Baltimore.

Spices.—The good qualities sell slowly, and in general the market is inactive, but nothing is offered at lower prices. The unsold stock on the 1st inst. was:—Nutmegs, 466 casks; Mace, 420 casks; Cinnamon, 195 fard.; and Pepper, 1,462 bags; whilst the stock on warrants was: Nutmegs, 4,788 casks; Mace, 736 casks; Cinnamon, 771 fard.; and Pepper, 183 bags.

Tea.—The Trading Company offered for sale on the 2nd inst. 8,544 ¼ and 330 ½-chests Java; nearly the whole quantity was sold, except 178 ¼-chests Pecco, 8 lots Congo and 11 lots Pecco Congo, at the following prices:—

904/4		ch.	Boei	from	39	to 71c.
563/4		„	Congo Boey...	„	50	88
2579/4	13/12	„	Congo	„	49	86
354/4		„	Pecco ditto	„	75	79
1474/4	13/12	„	Souchong	„	57	107
451/4	131/12	„	Pecco ditto	„	72	123
884/4		„	Pecco	„	76	158
20/4	50/12	„	Oranje ditto...	„	107	131
902/4		„	Thunkay	„	53	138
86/4		„	Schin	„	51	66
277/4		„	Hysant	„	56	140
50/4	8/12	„	Uxim	„	42	167
113/4		„	Joosjes (G. B.)	„	92	117
7/4		„	„ (F. B.)	„	166	169

On the same day was offered for private account some small parcels Java, that were sold as follows:—

Trademark Madjo, 18/4 k. Congo at 71c., 14/4 k. Souchon at 74c., 4/4 k. Pecco, at 136c., 3/6 k. ditto at 139c.

Trademark Nangoeng, 51/4 k. Congo, 65 to 66c., 17/4 k. ditto at 61c., 26/12 k. ditto at 27c., 317/4 k. Souchon, 103 to 105c., 68/12 k. Pecco, 157 to 168c.

On the 3rd of May another auction of Java tea took place for private account, which gave the following result:—

485/4	chests			Boey	sold at	44c.	to 75c.
1488/4				Congo ...	...	43	92
15/4	606/8			Kempoey ...	...	55	130
103/4				Souchon Boey	...	70	78
3847/4		50/12		Souchon ...	...	61	121
40/4				Pouchon Boey	...	47	48
34/4				Pouchon ...	...	72	88
	204/8	116/12		Pecco Kempoey	...	115	141
280/4	94/8	142/12	132/16	„ Souchon	...	66	180
272/4	124/8	1158/12	281/16	Pecco ...	...	79	260
5/4				Orange Pekoe	...	87	—
269/4				Tonkay ...	...	43	103
72/4				Schin ...	...	52	68
277/4				Hysant ...	...	66	138
9/4	15/8	52/12		Uxim ...	...	68	196
	37/8	126/12		Joosjes (F B)	...	171	199
	22/8	20/12		„ (G B)	...	158	194

Only 5 ¾-chests Congo were bought in at 50 to 55c., and 10 ¼-chests Kempoei at 65c., and 109 ¼-chests Souchon at 65 to 75c.

Tobacco.—Java.—The market is inactive; the business has been confined chiefly to the supply of the immediate want of consumers. Stock of Java, 6,463 bags, and 195 bags Manila.

Arack.—80 casks Sourabaya, ex Ferdinand and Louis, and 100 casks Sourabaya ex Camperdown, were sold at secret but firm prices.

Indigo.—The Trading Company offered on the 1st and 3rd May 1,128 Java for sale, which were all sold. Compared with the prices paid last autumn the result was as follows:—Ordinary, from 10 to 40c. lower; good ordinary, from 10c. lower to 20c. higher; middling, from 10 to 40c. higher; fine, from 20 to 50c. higher; finest, 80c. higher. On the same day was sold for private account—117 cer. Guatemala, at 320 to 425c.; 85 cer. Mexican, 260 to 400c.; 311 ch. Java, at 280 to 650c.; 10 ch. Bengal, at 510 to 520c.

Java Cochineal.—The 166 ch. offered by the Trading Company were sold as follows:—No. 1, at 245 to 265c.; No. 2, at 210 to 230c.; No. 4, at 130 to 195c.; No. 8, Zaccatille, at 175 to 255c.; No. 9, at 170 to 210c.

Rattans.—There is a very large stock, and the demand is only very limited. Only the following parcels were sold:—100 piculs ex Jessie Jamieson, 178 piculs ex County of Argyle, 300 piculs ex Felicia, 175 piculs ex Almelo, 90 piculs ex Peter Rowland, and 118 piculs ex Oscar.

Tin.—The political complications at home and abroad rendered all operators disinclined to do business of any kind, and transactions have therefore chiefly been confined to actual necessities. During the last few days the aspect of things has quite changed under the prospect of continued peace. The sellers of last week are now buyers again, consumers operate more freely, and there is also some demand for export. The statistics of the Trading Company are satisfactory, but still the stock is large, and the spirit of speculation is so dead, that when any realisation of importance requires to be made, no speculators can be found. Since the last mail were sold at Banco: 1,000 slabs at 51½f.; 1,400 do. at 51f.; 300 do. at 51f.; 1,000 do. at 51¼f.; 2,300 do. at 51½f.; 200 do. at 51¾f.; 1,100 do at 52¼f.; 3,000 do. at 52½f.; 1,000 do. at 52¾f.; 1,500 do. at 53f.; 300 do. at 53¼f. Of Billiton were sold 500 slabs at 50f. Stock on warrants, 99,347 slabs against 61,850 in 1866; unsold stock, 35,948 slabs against 66,165 in 1866; floating, 11,000 piculs.

Drugs.—Camphor, there is much demand but no stock. Cassia Vera: The 609 bags imported per Almelo were sold at secret prices. Cubeben: 383 bags ex Felicia were sold. Gutta Percha: A parcel of 10,000 kilo. ex Jozeph Willem were sold at prices that did not transpire; next week 16,000 kilo. ex Joachim and 4,000 kilo. ex Carolina will be brought in the market. Oleum Cajaputi: 1,000 bottles ex Rothley were sold at secret prices.

Manila Hemp.—106f.

Hides.—Without transactions in waiting for the several parcels that will be offered by inscription within a few days.

SHIPPING INTELLIGENCE.

Departures.—Brouwershaven, 26th April: Catharina Maria, Anna Digna, Noach, Huydecoper, Jason; all for Batavia; Hendrika, for Samarang; Stad Schiedam, for Melbourne. Helleveet, 26th April: Jedo, for

Singapore, *via* Cardiff; Ymuiden, for Java, *via* Cardiff. Texel, April 26: Jacob Roggeveen, for Batavia; Sourabaya Packet, for Sourabaya; Aria and Betsy, for Java, *via* Cardiff; Nicot, for Samarang; Ocean, for Singapore, *via* Cardiff; Maria Adolfine, for Bombay, *via* Cardiff; Bestevaer, for Java, *via* Cardiff. Zierikzee, 25th April: Gronowet, for Java, *via* Cardiff. Browershaven, 29th April: Jan van Galen, for Batavia; Otto, for Singapore. April 30: Susannah, for Batavia. May 2nd: 'S Gravenhage, for Batavia. May 2nd, from Texel: Insulinde, for Batavia; Alcyone, for Sourabaya. Brouwershaven, May 3rd: Kortenaar, for Batavia. Hellevoet, 3rd May: Mary Goddard, for Padang. Texel, 3rd May: Doesborgh, for Macassar: Zeebloem, for Singapore. May 5th: Henriette, for Padang.

ARRIVALS.—At Texel, April 24th: H.M.S. Zoutman, from Batavia. April 29th, at Zierikzee: De Schelde, from Samarang. April 30th, at Brouwershaven: Petronella, from Banjoewangie. May 4th: Leopold, Graaf van Lunburg Stirum, from Banjoewangie. May 7th, at Brouwershaven, from Passaroeang: Grootmester Nationaal.

PASSENGERS OUTWARD.—From Java, per Sourabaya Packet, Mrs. H. Steup and two children, Messrs. M. M. Versteeg, A. Ketelschlager, S. Klonne, E. Vaneker, and J. M. Kenens; per steamer Gravenhage, Colonel Jkr Flugie van Aspremont, Captain van Swieten and family, Lieutenant Boes and family, Lieutenant Smallenbach, the medical officer Gutteling, the second Lieutenant Heinsch, Mrs. Steenbergen and six children, Mr. Vreede Bik and family, Mr. van der Valk and family, Mr. Ilcken and family, Mr. Scharp de Visser and family, Mr. Struyck and family, two Messrs. de Quay and family, Mr. Hajenius, Mr. Buisson de St. Remij, Mr. Scheurbein, Mr. C. G. Kramer, Mr. J. Hinlopen, Mr. Schneider, Mr. H. van Gessel, Mr. Rindhoven, Mrs. Ledeganck with a child and governess, Mrs. van Berkel and daughter, Mrs. Stort, Mrs. Salmon-vas Dias, and Miss Sassenberg, besides 300 soldiers; per Alcyone, Mrs. E. van Wicheren, A. Moraan, K. J. Valkenhoff, J. Neukerchen, Misses E. B. Greswich and J. Kooiman; per Insulnide, Mr. Brouwer and family, Mr. Bleekrode and family, Messrs. Polak and Bousfar, Mrs. Quant and two children, Mrs. van Gent and daughter.

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, MAY 7.

By order of the Imperial Government the shareholders of the Russian-American Company are convened to hold a general meeting next week, probably the last they will ever hold, as it has transpired that the object of the meeting is to receive the official announcement that the company is dissolved by the sale of the Russian territory in America to the Government of the United States, and that they are therefore called upon to wind up their outstanding affairs and liquidate as soon as possible. The first question, however, that they will have to settle at the meeting will be a decision as to whether proprietors of ten shares bought within the last six months are entitled to vote and take part in the discussion of the company's affairs or not. If negatived the number of the shareholders will be but very limited, as most of the shares have changed hands since their value became depreciated, and there are but few in possession of the original owners and standing in their names, whilst a large proportion have been transferred by a simple endorsement *in blanco*, like a bill of exchange, and passed through so many hands that it is impossible to control any knowledge of the present possessors. There are 7,444 shares of the original value of 150 roubles each when issued. There was a time when they were sold at 500 roubles, but they have sunk so low that two months ago they were offered for sale on the St. Petersburg Exchange at 80 roubles, and since then have not been quoted in the share lists, though now that it is known that the territory occupied by the company is sold, the shares have somewhat recovered, and may be had at par, as it is hoped that some compensation will be given out of the proceeds of the sale of Russian America, even though the purchase money be paid not in cash, but, as it is understood, in ships of war. This great fall in the value of the shares was not in consequence of any mismanagement on the part of the directors, but to the state of uncertainty that has for so long existed as to the duration of the company, whose privilege expired in 1861, and was only renewed last year, so that for five years they were suspended, like Mahomet's coffin, between heaven and earth, which of course paralysed their commercial enterprise and almost annihilated their credit at Hamburg, London, and San Francisco; whilst since 1862—till which year their dividends were never less than 18 roubles—no dividend has been paid. The shareholders now complain that the Russian Government has not only destroyed their privilege, but sold their property; for the colonies were purchased singly in the year 1789 by Schelechow, the original founder of the company, and the transaction was simply confirmed by the Empress Catharine. The company had to provide for and pay the salaries of their civil and military servants, and it was only in the beginning of this century, when the value of the paper rouble fell to 30 per cent., that they were permitted as a great favour to exchange annually 45,000 half imperials in gold at the nominal value. As above stated, the company's charter was renewed in 1866, together with the promise of an annual subvention of 200,000 roubles, as they had fallen terribly in debt, to the extent of 1,000,000 roubles. The shareholders therefore are in hopes that the Emperor will not allow them to be losers by their enterprise. Their ships will be sold for what they will fetch, but no more business will be transacted. In the Washington treaty it is stipulated that three years are to be allowed for them to wind up their affairs and realise their property; but it is believed that no Russian subjects will remain in the colony after the expiration of that period, as none of them are landed proprietors but only tenants in occupation of the company's lands. The expense of bringing home the officials, clergy, and soldiers, will be heavy, and it is therefore at present quite uncertain whether, after paying all these charges out of the sale price, there will be any surplus left.

COMMERCIAL.

COFFEE.—As the fear of an immediate war has subsided, an animated demand has sprung up, the prices are firm and for some descriptions higher. Sales of the week, 23,000 bags. The imports this year have been 31,300,000 lbs., against 21,800,000 lbs. at the corresponding period last year. Present stock 19,000,000 lbs., against 19,500,000 lbs. last year.

SUGAR.—Raw continues in a depressed state, but for Refined there is more inquiry.

RICE.—There is an improved demand for cleaned grain, whilst prices remain without alteration.

SPICES.—Cassia Lignea in demand, and 7,000 chests of the late arrivals have been taken at 11 sch. banco. Prices of Pepper well supported, but transactions of limited extent.

TEA.—Calm, with a fair consumptive sale. Prices firm, as stocks are low, and but little is expected to arrive. Good Congou commands 14 sch. banco, ord. to mid. Souchong, 20 to 24; Pecco, good mid., 24; Young Hyson, 36 to 38.

SPELTER.—The market has been very irregular. At the beginning of the week 3,000 centners for spring delivery, were sold at 13.12, and 5,000 centners in loco, at 13.15. Prices then receded, and 10,000 centners were taken at 13.7½, since which they have somewhat recovered, the quotations being 13.10, both for delivery and in loco. Quantity arrived this year, 158,000 centners, against 152,000 in 1866.

DISCOUNT.—The panic on the Stock Exchange has subsided and the prices of most funds have nearly recovered their former position. A good deal of silver in bars has been withdrawn from the Bank, the discount has risen to 3½ per cent.

SHIPPING INTELLIGENCE.

ARRIVED.—Voltigeur, from Singapore.

SAILED.—Ceres, to Macassar and Hong Kong; Hugo and Otto, to Shanghai.

LOADING.—Freya, for Singapore; Emma, for Penang and Singapore; Arizona, for Manila; Overmann, for Hong Kong; Mikado, for Yokohama and Nagasaki.

Monetary and Commercial.

Until very lately great hopes had been entertained that the firm of Dent and Co. would be enabled to surmount their difficulties. It is with great regret that we have to announce that these hopes have proved unfounded, and that at a meeting of creditors convened on the 8th instant, it was deemed advisable to accept a composition of 2s. 6d. in the pound, payable only within two years and a half from the 30th of June next, in relation to which the annexed resolutions were adopted:—

"I. That the proposition made by Mr. Chumley, on behalf of Messrs. Dent and Co., of China—the payment of a composition of 2s. 6d. in the pound within two and a-half years from the 30th of June next in discharge of the debts of the firm—be, and is hereby, accepted by the creditors here present conditionally upon the payment being secured by an assignment of the assets enumerated in the annexed schedule to trustees, on the understanding that if those assets realise more than the sums set against them as the estimated value thereof, so as to enable Messrs. Dent and Co. to pay a larger composition out of those assets than the 2s. 6d. before mentioned, the excess to be divided among the creditors rateably and conditionally upon the requisite number of creditors assenting to this arrangement; and on the further understanding that it be in the judgment of the trustees as to the time when and manner in which the assets shall be realised, and whether a partial division should not take place from time to time on account of the composition.

"2. That Messrs. Freshfields and Newman be requested, in communication with the chairman of the meeting and the members of the committee, to prepare a deed giving effect to these arrangements, subject to such modifications as they may consider essential to giving effect to the foregoing resolution.

"3. That Messrs. Alexander Turing, William Lemann, and Victor Kresser be appointed the trustees, with power to add one to their number, and to appoint a substitute or substitutes. The number of trustees never to be less than three.

"4. That Messrs. Thomas Dent, Edward Pereira, and William Henry Harton be appointed a committee in London to correspond with the trustees in China."

In the matter of Overend, Gurney, and Co. (Limited), the adjourned appointment upon the application of Mr. Oppenheim for a £10 call came on before Vice-Chancellor Malins on the 4th instant, who, after hearing the solicitors for Mr. Oppenheim, for the liquidators, and for the opposing contributories, directed the call should be made as asked, of £10 per share, payable on the 25th of June next.

The following is the ninth annual report of the directors of the Chartered Mercantile Bank of India, London, and China, to be presented at their general meeting on the 21st instant:—

The directors now submit to the shareholders the audited balance-sheet profit and loss and reserve fund accounts, for the year ending 31st December last. From these it will be seen that the profit amounts to £102,221 3s. 2d., to which has to be added £2,713 14s. 2d., brought forward from the previous year, making a total of £104,934 17s. 4d. A sum of £75,000 has been paid in two half-yearly dividends of five per cent. each. The shareholders will probably have anticipated from the disastrous events of 1866, that the result of the bank's operations for that year have been unsatisfactory. Looking forward to the possibility of continued danger, the directors considered it their duty to curtail as much as possible their business at all points, and it will be seen from the accounts that this policy has been strictly carried out, though at the cost of a very material reduction of the usual profits of the bank. In the report of last year it was stated that losses of an exceptional character had been incurred at Bombay in 1865. Full provision was made for them on closing the accounts for the year, in accordance with the report received from the branch, but the amount proved to be insufficient, and this added to losses incurred in 1866—though these have been comparatively small—has necessitated a heavy sum being withdrawn from the reserve fund, which now stands at £145,902 14s. 8d. The directors, however, express the

Digitized by Google

confident opinion that all further danger having now passed away, a prosperous future may be fairly reckoned on, more especially as the previous excessive banking competition is much reduced, and the great laxity consequent thereon no longer exists. Since the date of the last report, Mr. Robertson, the chief manager, has personally inspected every branch in India, China, and Japan, and the directors are gratified in being able to state that the result of his inspection has been perfectly satisfactory. The directors retiring on this occasion are Mr. George Garden Nicol and Mr. James Murray Robertson, who, being eligible, offer themselves for re-election, and the court recommends them accordingly. The shareholders will have to appoint auditors for the current year. GEO. G. NICOL, Chairman.

Accounts from New York report the failure of Messrs. Watts, Crane, and Co., for a large amount, and the drafts on London of their Liverpool correspondents have been returned unpaid.

At the meeting of the Standard Life Assurance Company at Edinburgh the new proposals for the past year were stated to have been 2,013 for an aggregate of £1,190,281, yielding in new premiums £38,918. The accumulated fund is £3,700,005, and the annual revenue £675,267.

The report of the Universal Life Assurance Society stated the new policies for the past year to have been 278 for an aggregate of £306,314, yielding in new premiums £13,251.

The report of the Metropolitan Life Assurance Society stated the new policies of the past year to have been 236 for an aggregate of £196,595. The accumulated capital is £1,160,853.

Messrs. Emile Erlanger and Co., of Paris, have brought out a new 7 per cent. Tunisian loan of £4,000,000, in bonds of 500f. or £20 each. One half the amount is to be reserved for the conversion of former loans in a manner hereafter to be proposed by the Government. The other half is offered to the public at the price of 63, or, reckoning the advantage from the instalments extending over five months, at 62. The bonds are to be redeemed within 30 years by drawings at par, and are secured by special hypothecations. Subscription lists are opened at Paris, Frankfort, Lyons Marseilles, Amsterdam, Brussels, and Berlin.

Considerable fluctuations have taken place in Union Bank of London shares, and they were at one time negotiated as low as 37. It is stated that sales have been effected on the ground that as the bankers of the London, Brighton, and South Coast and the Great Eastern Railways, they have made advances to these undertakings. There seems no reason whatever for the decline in price, and it is understood that the bank is more than fully secured, everything they hold being in the shape of preference shares with ample margins. There has since been a sudden recovery in the value of the shares of £2 per share, and the price closed with much firmness at 38½ to 39½.

A scheme has been brought forward to establish an Open Stock Exchange (Limited) for the purchase and sale of public securities. The project appears in some respects to be a rival to the London Stock and Share Company, and the circulars issued are signed "Joseph Aspinall, manager; late manager of the London Stock and Share Company."

The following is from the London Stock and Share Company:—

"At the last auction the following were some of the sales made: Agra Bank (£3 paid), at £2 15s. per share; Agricultural Hotel Company (£10 paid), at £2 12s.; Bedford Pantechnicon (£7 paid), at £1 9s. 6d. to £1 16s.; Berks and Hants Extension Railway (£10 paid), at £1 6s. to £1 17s.; China Steam and Labuan Coal (£13 10s. paid), at 12s.; Confederate States Loan, at £5 12s. 6d. per cent.; Copiapo Extension Railway (£10 paid), at 5s. to 6s. per share; Dagenham Docks (£8 paid), at 10s.; European Assurance (10s. 6d. paid), at 4s. 8d.; Guildhall Taverns (£10 paid), at £4 to £5 5s.; Hercules Insurance (£2 paid), at £10s. 6d.; Imperial Land and Marseilles Debentures (£20 paid), at £6 15s. to £8; International Hotel (£5 paid), at 10s.; Langham Hotel (£10 paid), at £8 10s.; London and County Land and Building (£2 paid), at 6s. to 7s.; Chatham and Dover Railway (Metropolitan Extension) preference B stock, at 29½ per cent.; National Provincial Marine Insurance (£4 paid), at 3s. per share; New Devon Consols Copper (£11 10s. paid), at £4; Novara and Lake Orta Railway shares (£10 paid), at 2s. 6d.; ditto, 7 per cent. bonds of £500 each, at 2 per cent.; Reinnie Laxey Mining (£4 paid), at 7s. per share; Vale of Neath Junction Railway (6 paid), at 24s., &c.

Accounts from New York report the failure of Messrs. Watts, Crane, and Co., for a large amount, and the draughts on London of their Liverpool correspondents have been returned unpaid.

ARTICLES OF IMPORT.

TEA.—We have still to report a very quiet state of things in our market, although perhaps there has been latterly rather more inquiry from the trade, but as yet without leading to any large business. Prices, however, for all kind have been firmly maintained, importers, in the present position of supply and demand, showing less inclination to sell. The deliveries continue on the same large scale as before, and the quantity afloat now being not more than about one month's consumption, we look for a better tone shortly. Congous: Siftings show no material change, there being a moderate demand for them at about previous prices. Broken leaf show no alteration. Fair to good common are saleable at from 11½d. to 1s. per lb. Fair to good flavory kinds have been sold at about former rates. Good to fine Kaisows have met with a fair inquiry at fully previous prices. Common to fair black-leaf kinds have sold to a fair extent at the decline last quoted. Fair to good medium show no great alteration, the finer parcels among them, perhaps, being rather more looked after. Fine to finest have sold in small parcels at fully former prices. In new-make Canton kinds there is no new feature to notice. Oolongs remain firm at the recent advance. Souchongs have been dull, the demand for them being less active than before. Flowery Pekoes remain steady. Scented Capers continue to command full prices. Scented Orange Pekoes have been rather more in demand at the low prices current, but as yet there is no improvement in prices. Green: The demand has been active, and prices have ruled exceedingly steady, especially for Moyune; but all kinds rule much above an average value, and it will be necessary for operators in China to buy with a good margin on current rates to ensure profit, as the comparatively favourable results of the bulk of this season's import are likely to stimulate supplies being sent on early; and should such be the case, a very different range of prices will rule next autumn. Again, the increasing and improved manufacture of Japan leaf, though there is yet much to be achieved before they equal China grown, but which is capable of being cured to attain this end, must tell against high prices, should supplies again be liberal. In coloured Japan leaf several large parcels have come to hand, via Shanghai, from Nagasaki, mostly of Young Hyson which, being of desirable quality, have sold at satisfactory rates. In uncoloured leaf there has been more offering than for some time past, but business has been checked in consequence of the extreme prices asked. The Public Sales of China Tea which commenced on the 7th comprised 22,995 packages, of which 16,484 packages were printed without reserve. The sales passed off with fair spirit at fully previous prices. The stock in the United Kingdom on the 30th ultimo was estimated at 99,500,000 lbs., against 113,500,000 lbs. last year, and the quantity afloat as follows:—

					lbs.
Oct.	5	Agamemnon*	Shanghai		1,003,045
,,	11	Charlotte	Foochow		842,900
,,	19	Beemah	Do.		1,072,625

* Put into Singapore for repairs. † Particulars not yet ascertained.

SILK.—We have still a very quiet market in Silk; occasionally a small parcel or two is sold, but it might almost be stated that the market has been uninterruptedly quiet. At one moment there was an appearance of a resumption of business, but the apprehensions of war were too seriously entertained to be promptly dismissed. Just now is the period of hatching and "education" of the worms for the new crop in Europe, and although there is no expectation that it can be good—scarcely equal, indeed, to last year, in consequence of the very limited supply of "seed"—still at present all that is going on well. The critical moment is not yet reached in the larger districts of production, but there is no general apprehension of danger. The reported prices of cocoons are, of course, an uncertain element upon which to form an estimate, still they are more or less an index of opinion, and they are reported high. In the meantime the deliveries are very small, in a measure, perhaps, in consequence of the Easter holidays, but until some better feeling exists they cannot be much otherwise.

COTTON.—An improvement in the Liverpool Market which set in shortly after our report of the 26th ult. has had a good effect upon the London sales, and although a slight reaction was at one time observable, the demand generally has continued brisk, and quotations for all East India descriptions show an advance of ¼d. to ½d. per lb. The London sales have comprised a total of about 6,880 bales on the spot, and 7,600 to arrive, out of which 20 bales fully fair China realised 10¼d., 50 bales fully fair Rangoon 8d., and 50 bales medium fair Dhollerah, 8¾d. per lb. No China or Rangoon sold for arrival, but 300 bales Dhollerah guaranteed fair were placed at 9d., the ship being named. The total import of East India from 1st January to 2nd May was 42,114 bales; of China, 1,048 bales; stock on 2nd inst., 47,929; of China, 767 bales.

COFFEE.—The unsettled state of political affairs on the Continent had for some time a depressing effect on the market, and prices for Ceylon—both Plantation and Native—gave way on the average 1s. per cwt. Subsequently, however, the advice from Holland that the Trading Company refuse to sell the bought-in portion of their recent sale unless at an advance of 2 cents on the taxations (40 cents for good ordinary Java), has led to a return of firmness and increasing activity in the market for Colonial descriptions, and produced a reaction in Ceylon of 2s. to 3s. per cwt. on the reduced prices. The following have been the public sales:—1,940 casks, 1,183 barrels and bags Plantation Ceylon at 70s. to 80s. for fine ordinary to low middling, and 81s. to 88s. for middling to good middling colory; 354 casks, 3,976 bags Native Ceylon at 57s. 6d. to 60s. 6d. for common to good ordinary, and 64s. to 68s. 6d. for fine bold. By private contract a good business has been done in both descriptions. Total stock of Coffee in the United Kingdom on the 3rd inst., 10,140 tons, against 10,790 last year; of Ceylon, 6,700, against 6,010 tons.

COIR YARN.—A fair demand is still experienced, and the following sales have taken place at auction in addition to extensive private transactions; 65 bales and 126 tons Ceylon Yarn at £31 per ton for medium, and £24 10s. to £27 10s. for common and good common; 544 coils Ceylon rope averaging 2½ to 5 inch, realised £29 15s. to £30; and 5 tons Ceylon Fibre were bought in at £50 per ton.

COCOA-NUT OIL.—The market still remains extremely flat; the private

Digitized by Google

business is unimportant, and at auction 66 casks fine to very fine Ceylon met with no offers and were bought in at £50 to £51 per ton. Stock 1st inst., 5,780 tons.

CUTCH.—At auction 870 boxes fine unmixed Pegu were held for firm prices and withdrawn, and 419 bags very common Penang realised 15s. to 18s. per cwt. Stock, 403 tons.

DRUGS.—Anniseeds: At auction 23 cases slightly mouldy China Star were bought in at £6 per cwt.; stock 538 chests. Camphor: An advance of 5s. to 10s. has been established, and 200 chests China have been taken realising £5 10s. to £6 10s. per cwt.; stock 1,828 chests. Cardamoms: Of 20 cases and 39 bags offered at auction 5 bags Ceylon sold at 2s. 10d., and the remainder was bought in at 3s. to 3s. 2d. per lb. Cantharides: Four cases China were bought in at 4s. 6d. to 5s. Cubebs: Market extremely flat, and 735 bags fair stalky Singapore offered were all either withdrawn or bought in at 50s. per cwt.; stock 1,180 bags. Galls: Extremely dull, scarcely any business, and 543 boxes Japan withdrawn for want of bids. Rhubarb: Slightly declined, and of 170 cases and chests China offered at auction 140 packages sold realising for fine (2 cases) 9s. 6d., good medium, 3s. 11d. to 4s. 1d.; fair small, 4s. to 4s. 6d.; medium small, 3s. to 3s. 7d.; ordinary, 2s. 6d.; small ordinary, 1s. 9d. to 1s. 11d. per lb.

GUMS.—Benjamin: Quotations for Siam are ruling £2 to £3 per cwt. lower, and 64 cases at auction realised, good seconds in block, £24 to £24 5s.; fair, £22 5s. to £22 15s.; dark hard block, £12 10s. to £13; siftings in block, £10 to £10 10s.; sandy siftings, £9 15s. per cwt. Of Sumatra 13 cases rather dark seconds were bought in at £9. Copal: At auction 46 chests fair bold mixed Manila sold at 32s. 6d. to 33s. per cwt. Damer: The market is firm, and out of 263 cases Singapore at auction one-third sold at 79s. 6d. per cwt. for good picked, and 73s. for fair to good.

HIDES AND SKINS.—The sales of East India Hides during the past month have been 80,767 Hides. The quantity offering has been moderate, and the clearances are restricted, by only one public sale having been held, at which, though the demand was not active either for consumption or export, the greater part sold at from former prices to ¼d. per lb. advance. No Batavia Hides have been offered, but of Singapore, &c., 1,815 Penang Cow Hides and 357 Penang and Singapore Buffalo Hides have been sold at. about late prices. Ox and Cow Light 7d. to 9¼d. per lb.; Heavy 5d. to 7d. per lb.; Thirds 4¼d. to 4½d. per lb.; Buffalo Hides Best, 5¼d. to 6d. per lb.; Seconds and Light 4¼d. to 4½d. per lb.

HORNS.—Buffalo Horns are 2s. to 3s. lower, and 25,755 horns (30 tons) Siam sold as follows:—Averaging 600 at 49s.; 755 to 687 at 44s. to 45s. 6d.; 998 to 936 at 42s. 6d.; and 1,350 to 1,289 at 39s. Deer Horns are firm, and 8,944 horns (105 cwt.) Ceylon realised 61s. to 68s., and 1,012 horns (19 cwt.) Siam 53s. 6d. per cwt.

INDIA RUBBER.—Market firm, with a slight advance in prices; of 27 baskets Singapore at auction one-third sold at 1s. 8¼d. to 1s. 8½d. per lb. for fair quality, and 1s. 4¼d. for Borneo. Limited quantities have sold privately at full rates.

JAPAN WAX.—Good qualities obtain advanced rates, and of 234 boxes at auction one-third sold, fine saucers at 93s. to 93s. 6d. and 77s. to 85s. greasy.

MANILA HEMP.—This market exhibits a downward tendency, and there have been no sales by private contract since our last report. At the auctions 610 bales Tobasco and Albay of direct import were bought in at £52; of 180 bales of indirect import 70 bales sea-damaged realised £49. 15s. to £50. 15s., and the sound portion was withdrawn; and of 476 bales Sunn 250 sold at £15. 10s. to £15. 15s. per ton. Stock, 951 tons.

PLUMBAGO.—The market for Ceylon continues firm, and of 281 barrels offered 180 sold—good fair lump at 23s. 6d.; medium lump, 17s. 6d. to 18s. 6d.; bright chips, 14s. 6d. to 16s.; small chips, 11s. 9d.; good bright dust, 10s. 6d. per cwt.

PEPPER.—Black: This market is steady, but quiet, with private business limited; at auction a few bags common Penang sold at 2⅞d. per lb. out of 1,558 bags offered, and 311 bags Singapore were bought in. White: Fine qualities scarce and advanced; common sorts in limited demand. Of 250 bags Singapore one-fourth sold at 6⅝d. to 7d. per lb. for fine, and 5¼d. for ordinary.

RICE.—The tendency to advance observed in our last has since been well maintained, and the sales effected on the spot have been at a further improvement, viz.:—About 25,000 bags Rangoon at 12s. 7½d. to 12s. 9d. The demand for arrival is unabated, and the following transactions have resulted, viz., a cargo of 1,600 tons Rangoon for Liverpool, three of 2,000 tons for the Continent, and one of 1,200 tons Bassein for this port, all at 11s., besides two of Nakrenzie, 2,000 tons, at 10s. 9d. landed terms, also one of 1,000 tons at 10s. 4½d. for the Continent. Later a sale was reported of 1,700 tons Nakrenzie at 10s. 7½d. for Liverpool, also one of 1,200 tons for the United Kingdom at the same price.

SPICES.—Cloves: 20 cases Penang were bought in at 1s. per lb. Cinnamon: The quarterly sales which took place on the 29th ult. comprised only 1,310 bales Ceylon, which went off with a brisk competition at an improvement on the January rates of 1d. to 5d. per lb., the better qualities realising the greatest advance, viz.,—ordinary to fine firsts, 1s. 10d. to 2s. 4d., superior, 2s. 7d. to 2s. 10d., seconds 1s. 6d. to 2s. 2d., superior, 2s. 8d., thirds, 1s. 1d. to 2s., and fourths, 11d. to 1s. 4d. Mace: Firm prices were obtained for Penang at auction, and 5 cases realised good medium 2s. 9d., medium 1s. 10d. to 1s. 11d. per lb. Nutmegs: Rates have slightly declined. At auction 53 cases Penang were taken, realising as follows:—Averaging 112 to the lb., 1s. 2d. to 1s. 3d.; 90-86 to the lb., 1s. 4d. to 1s. 6d.; 79-76 to the lb., 1s. 9d. to 1s. 11d.; 70 to the lb., 2s. 10d.; and 68-67 to the lb., at 3s. 4d. to 3s. 6d. per lb.

SUGAR.—Since our report of the 26th ult. a fair demand has prevailed, and in the business done the previous value has been maintained. The alteration of duties and drawbacks, which came into operation on the 1st instant, has so far produced no material change; quotations remain as before; in the instances where the duty has been reduced sellers appear to secure the advantage, but in that where it has been raised importers have to bear the loss. Cargoes afloat are still abundant, and a continuance of the disposition on the part of holders to realise, combined with a fair inquiry, has resulted in very large sales at steady to full rates. The East India offered has consisted solely of Madras, Penang and Manila being entirely absent. The stock of sugar in the United Kingdom on the 1st inst. was 73,510 tons, against 81,220 last year; of Penang, 540 tons, against 1,880; and of Manila 28,780, against 20,490 tons.

TAPIOCA.—The following sales at auction are reported:—15 cases fine white Singapore, at 5½d.; 256 bags Singapore, at 4d. to 5d. for good and fine; 175 bags fine Penang, at 5d. per lb.; and 59 bags fine large Singapore Pearl, at 28s. 6d. to 29s. per cwt.

MISCELLANEOUS.—Beans: 9 packages good medium Tonquin sold at 1s. Cowrie Shells: At auction, 221 bags good small Ceylon were bought in at 30s. Ebony: Of 104 logs (41 tons) Ceylon, one-fourth sold at £5 15s. to £6 2s. 6d., and the remainder was bought in at £10 per ton. Orchella: 3 bales Ceylon realised 44s. Rattans: 8,617 bundles Singapore, sold, good medium at 3s. 8d. to 3s. 10d.; good common, 2s. 7d. to 2s. 9d. per hundred. Roots: 40 bags Colombo were bought in at 40s. Sapanwood: At auction, 6 tons sea-damaged Siam realised £10 2s. 6d. to £10 5s., and 16 tons dirty Manila, £7 5s. Satinwood: 52 logs (31 tons) Ceylon were bought in at £9 per ton. Tortoiseshell: At auction, of 2 cases (134 lbs.) Penang 1 case sold at 10s., and 3 cases (315 lbs.) Manila were withdrawn. Turtleshell: 1 case (131 lbs.) Singapore sold at 5s. per b Vermilion. 90 boxes China were bought in at 2s. 7d. to 2s. 8d.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £5 15s. to nail rod, £7. 12s. 6d. to £8; hoops, £8. 12s. 6d. to £9; sheets, single, £9. 15s. to £10; Staffordshire bars, £7. 12s. 6d. to £8 10s.; rails, £6 to £6. 5s.

STEEL.—Swedish keg, £16.

COPPER.—Sheet and Sheathing, £83 to £89 per ton; yellow metal, 7¼d. to 7½d. per lb.

TIN.—£89 for block; £90 for common bars. Tin plates, best charcoal I.C., 30s. to 31s. 6d.

LEAD, &c.—English pig, W.B., £22; shot, patent, £23; sheet, £21; spelter, £21 to £21. 5s.; zinc, English sheet, £26 10s. to £27; quicksilver, £6 17s.

The following is from the Circular of Messrs. French and Smith:—We have again had a dull month in the metal trade. The fear of Continental war checked the demand generally, and when buyers are few there is a fine opportunity for "depreciating buyers" to talk down prices, of which they took care to avail themselves. As continued peace seems now probable, we think some improvement may be looked for. Iron: Welsh was quiet in the beginning of the month, but is now firmer. Staffordshire: For best brands there has been considerable demand; second-class makers have been but poorly supplied with orders. Copper appears to have suffered more severely than any other article in this trade. Although the price at the commencement of the month was as low as could be remembered by any one now in the trade, yet when war became probable a further reduction was submitted to. Chili Bars were offered at £70; the price is now a little firmer, at £71 to £71 10s.; Burra, £84; Wallaroo, £82; and Tough, £78 to £80; Ores, 14s. to 14s. 6d. Tin: The general depression in trade has had its effect on this article also. The English Smelters reduced their price £3 per ton on the 15th ult., and a few pressing sellers of Straits appearing, some sales were made as low as £81 10s. for round, and £82 10s. for square; these, however, were quite exceptional transactions. In Holland, the price went back to 51 guilders, but on the prospect of peace, it speedily rallied. The last advices make the market strong there at 53. Here we had some considerable business up to £84 10s. for Straits, and holders now ask £85. Tin Plates have been much easier, and all makers have had to give way. The shipments for April were 140,000 boxes, against 110,000 boxes in 1866, and 100,000 in 1865. By the Board of Trade returns the exports January to March were 16,407 tons in 1867, against 18,912 tons in 1866. Lead: The price has slowly but steadily improved, and the demand, though not active, has been good; WB is £22; Ordinary Brands, £20 to £20 5s.; Spanish Soft, £19 15s. Spelter: With the prospect of peace Spelter receded, and is now £21 to £21. 5s. for parcels.

ROXBURGH CASTLE (?), Java to Holland, April 29, 44 N., 9 W.

FREIGHTS AND CHARTERS.

Outward freights to the Eastern ports have a slight downward tendency, owing to the amount of tonnage which has arrived since our last issue. We have no material change to note in the coal freights from the northern outports.

Current rates of freight for vessels on the berth:—To Yokohama: 40s. weight, 50s. meast. To Nagasaki: 50s. weight or meast. To Shanghai: 45s. weight, 45s. to 47s. 6d. meast. To Amoy: 45s. weight or meast. To Foo-chow-Foo: 45s. weight or meast. To Hong Kong: 35s. weight or meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Manila: 40s. weight, 85s. meast. To Ceylon: 25s. to 30s. weight, 35s. meast.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Hong Kong: £46. For Singapore: £40. For Shanghai: £56. For Saigon: £50. For Yokohama: £52. For Batavia: £35. From Newport, Cardiff, or Swansea, per ton.—For Hong Kong, £2 2s. For Singapore: £1 18s. For Shanghai: £2 12s. 6d. For Saigon: £2 8s. For Yokohama: £2 10s. Batavia: £1 15s. Coke.

CASUALTIES.

The Corypheus (barque), of London, from Cardiff to Hong Kong, with coals, which was reported April 28, as having been towed into Appledore, leaky, is making half an inch of water per hour, the cargo will not be discharged.

The Royalist (s.), from Clyde to Singapore, arrived at Queenstown, May 4, short of coals, but left again on the May 6.

The Hotspur, Bryant, from Manila to New York, has been totally lost, at Browers Reef, crew at Anjer.

MISCELLANEOUS.

At ST. VINCENT.—April 5, Hayo Maro (s.), Carnes, from London, and left 6th for Japan. March 29, Dragon (s.), Gibbon, from Glasgow, and left 30th for China.

At TABLE BAY.—March 25, Peiho, and sailed 30th for China.

If an Annual Subscriber or his Agent publishes in any newspaper, or allows the contents of any Telegram to be made public without the special consent of the undersigned, the said Annual Subscriber shall forfeit his subscription. Telegrams for publication, 50 per cent. extra.

Telegrams may be despatched from Europe—From Tuesday, 19th February, to Tuesday, 19th November inclusive.

From Shanghai, on the departure of the first steamer to Tientsin till the freezing of the river Peiho.

C. MITCHELL GRANT.

Agency in London—"London and China Telegraph" Office, 2, Cowper's-court, Cornhill (over the Jerusalem).

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

DR. J. COLLIS BROWNE'S CHLORODYNE. Vice-Chancellor Sir W. Page Wood stated publicly in Court that Dr. J. Collis Browne was undoubtedly the Inventor of Chlorodyne; that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See *The Times*, July 13, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any service in Cholera was Chlorodyne.—See *Lancet*, Dec. 31, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. Extract from *Medical Times*, Jan. 12, 1866.—"Is prescribed by scores of orthodox medical practitioners. Of course it would not be thus singularly popular did it not supply a want and fill a place."

DR. J. COLLIS BROWNE'S CHLORODYNE is the best and most certain remedy in COUGHS, COLDS, ASTHMA, CONSUMPTION, NEURALGIA, RHEUMATISM, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE is a certain cure in CHOLERA, DYSENTERY, DIARRHŒA, COLICS, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE. EXTRACT *from the* GENERAL BOARD OF HEALTH, *London, as to its efficacy in Cholera*—"So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. MONTGOMERY, Esq., *late Inspector of Hospitals, Bombay*.—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other remedies had failed."

DR. J. COLLIS BROWNE'S CHLORODYNE. CAUTION.—None genuine without the words "Dr. J. Collis Browne's Chlorodyne is on the Government Stamp. Overwhelming medical testimony accompanies each bottle. Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury, London. The immense demand enables the proprietors to reduce the price; it is now sold in bottles, 1s. 1½d., 2s. 9d., 4s. 6d., and 11s.

AGENT: Hong Kong, Mr. A. S. WATSON.

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor

PORT OF AMOY. CHINA.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford facility for REPAIRING and REFITTING STEAM and SAILING VESSELS.

Their large Granite Dock, 286 feet on the blocks, 307 feet over all, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet. It is fitted with Caisson Gate and with a powerful Centrifugal Steam Pump, ensuring despatch in all states of the tide.

Their two smaller Granite Docks, one 223 feet, the other 160 feet on the blocks, can take vessels at average spring tides drawing 12 feet to 13 feet.

A stock kept on hand of Timber, Spars, Copper and Metal Sheathing, Paints for Iron Vessels, and other material required for Dockyard use.

The premises comprise Carpenters' Shops, Mast Sheds, Blacksmiths' Shops, superintended by experienced European Foremen; also an Engineer's Workshop, supplied with Lathes and other tools worked by Steam, in charge of a Resident European Engineer. Dry Godowns for the reception of stores of vessels requiring to discharge them.

CHARTERED BANK of INDIA, AUSTRALIA, and CHINA.

WILLIAM BEATTIE, Assistant Chief Manager.

London, May 6, 1867.

PERRY and CO.'s PATENT

ESSENCE OF INK

The CHEAPEST INK.
The BEST INK.
The PERMANENT INK.
The 1d. Packet equal to a 6d. Bottle.
The 1s. Bottle makes Two Quarts.

PERRY and CO.'s PATENT ESSENCE OF INK.

This preparation produces Extemporaneous Ink of the finest quality in one minute with cold water, and instantly with hot water, by simple solution as salt or sugar. Sold in packets 1d. each, and in glass bottles 1s. each. Sample free, per post, for two stamps. Sold by all Stationers. Wholesale, 37, Red Lion-square, and 3, Cheapside, London.

PERRY and CO.'s PATENT BOSTONITE GOODS.

PERRY and Co. have much pleasure in introducing their new patent BOSTONITE to the Public, and they do so with the full conviction that it will supply a want long felt, viz.: perfect Lead or Coloured Pencil Tablets Slates, &c.

P. and Co. call special attention to their Bostonite being much better adapted to all the uses that Ivory Tablets and Porcelain Slates are now applied. The smooth and pleasant nature of the writing upon Bostonite will not fail to secure it the preference over all other articles of a similar nature now in use. The Bostonite Slates possess the great advantage of being very light, and at the same time are not liable to be broken.

PERRY and CO.'s PATENT BOSTONITE PLAYING CARDS, 2s. 6d. per pack BOSTONITE TABLETS and SLATES from 6d. each.

CHINA CLUB.

HOLLOWAY'S OINTMENT AND PILLS.

—DANGEROUS DISEASES.—How many life-long maladies spring from neglecting trifling symptoms. The pimple readily curable in the nursery becomes through carlessness the irremediable torment of after life. With a knowledge of the curative powers of Holloway's Ointment and Pills, those who fail to use them for extirpating the first seeds of hereditary ailments will have to bear the punishment resulting from their folly. Holloway's remedies will remove eruptions of the skin, scorbutic diseases, and scrotula, and heal every description of ulcer, sore, wound, or abrasion. By the employment of Holloway's excellent, speedy, and safe medicaments much pain and immense expense will be saved, and a great benefit conferred on the present and succeeding generations.

THE SHORTEST ROUTE TO AND FROM MANILA AND THE PHILIPPINES.

NOTICE to SHIPPERS and PASSENGERS by the OVERLAND ROUTE:—

The CHINA STEAM and LABUAN COAL COMPANY (Limited), in pursuance of an agreement entered into with the Government of Manila, have arranged to despatch the steamships "MONA" and "JAPAN," or other of their first-class steamers, with the mails and passengers monthly between Singapore and Manila, and Manila and Singapore, in correspondence with the Messageries Imperiales Overland Route.

By a special permit all goods by these steamers from th 1st August, 1866, will be admitted into Manila at the reduced duty of 10½ per cent.

The Company's agents at Singapore will take charge of goods for transhipment. For further particulars apply at the Offices of the Company, Ethelburga-house, 70 and 71, Bishopsgate-street, London, E.C.

OVERLAND ROUTE.

COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., *via* EGYPT.—From SOUTHAMPTON and MARSEILLES.—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and RECEIVE CARGO and PARCELS for GIBRALTAR, MALTA, EGYPT, ADEN, and BOMBAY, by their steamers leaving Southampton on the 4th, 12th, 20th, and 27th of every month. For CEYLON, MADRAS, CALCUTTA, the STRAITS, CHINA, and JAPAN (YOKOHAMA), by those of the 4th and 20th of each month; and for KING GEORGE'S SOUND, MELBOURNE, and SYDNEY, by the steamer leaving Southampton on the 20th of every month. The steamers leave Marseilles on the 5th, 13th, 20th and 28th of the Month.

For further particulars apply at the Company's Offices 122, Leadenhall-street, London, E.C., or Oriental-place Southampton.

N.B. The extra service between Suez and Bombay in correspondence with the steamers leaving Southampton on the 4th and 20th, and Marseilles on the 13th and 28th of the month, will terminate with the departures from Southampton on the 20th, and Marseilles on the 29th May.

OVERLAND ROUTE VIA MARSEILLES.

SERVICES MARITIMES DES MESSAGERIES IMPERIALES.

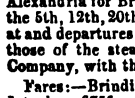
JAPAN AND CHINA NEW MAIL ROUTE VIA PANAMA AND SAN FRANCISCO.



THE PACIFIC MAIL STEAM SHIP COMPANY despatch their splendid side-wheel steamers from NEW YORK on the 1st, 11th, and 21st, and from PANAMA on the 9th, 19th, and 29th of every month for SAN FRANCISCO, calling at ACAPULCO, MANZANILLO, MAZATLAN, *en route* thence to YOKOHAMA and HONG KONG. Passengers from England may connect with this line at New York by any of the various steamers from Liverpool, Southampton, or Falmouth, to that port, or at Panama by the steamers of the Royal Mail Steam Packet Company leaving Southampton on the 2nd and 17th of every month.

The COLORADO, 4,000 tons, leaves SAN FRANCISCO with mails and passengers July 3rd, 1867; to be followed monthly by the other steamers of the line.

For particulars of Freight, through passage rates, &c &c., apply to H. STARR and Co., General European Agents, 145, Cheapside, London.

STEAM to INDIA, via the CAPE.—The UNION STEAMSHIP COMPANY (Limited) have entered into an arrangement with the Government for the extension of the Packet Service from Mauritius to Ceylon. Passengers can proceed from Southampton on the 8th of every Month to Point de Galle, where a junction is formed with steamers proceeding to India, China, Australia, &c. Rates of freight and passage very moderate.

Apply to FALCONER and MERCER, 23, Leadenhall-street, London; or THOMAS HILL, Southampton.

OPENING OF THE NEW CHINA STEAM ROUTE FROM LIVERPOOL.

VIA THE ISTHMUS OF PANAMA AND SAN FRANCISCO.

THE WEST INDIA and PACIFIC STEAMSHIP COMPANY (Limited) have made special arrangements with the PANAMA RAILWAY COMPANY and the PACIFIC MAIL STEAMSHIP COMPANY for the conveyance of Passengers, Specie, and Cargo between EUROPE, YOKOHAMA, NAGASAKI, SHANGHAI, and HONG KONG.

THE NEXT DEPARTURE WILL BE:—

From Liverpool	20th May.
Leaving San Francisco ...	3rd July.
Due at Yokohama	22nd July.
Due at Shanghai	27th July.
Due at Hong Kong ...	29th July.

The branch steamer to Shanghai calls at Nagasaki on both trips. It is expected that the communication will be monthly after these dates.

The Pacific Mail Company's steamers on the China station are large paddle-wheel vessels, of upwards of 3,000 tons register. The greatest attention has been given to insure the comfort and convenience of passengers by the vessels of all the connecting companies on this route.

Shippers will find this route cheaper and as expeditious as any mail service to the East.

RATES OF PASSAGE FROM LIVERPOOL.

To Yokohama	First Cabin, £110 10s.
To Hong Kong	,, £120 10s.
To Shanghai	,, £120 10s.

FREIGHT, FREE OF PRIMAGE.

Liverpool to Yokohama, Hong Kong, and Shanghai, £18 5s. per ton of 40 cubic feet.

The homeward rates of freight will be fixed by the Agent of the Pacific Mail Steamship Company at the above Ports.

ARTHUR B. FORWOOD, Managing Director.

OFFICES:—LIVERPOOL, The Temple, Dale-street; LONDON, 117, Leadenhall-street; HAVRE, J. M. Currie.

From Marseilles, June 12.—To Ceylon: Mr. J. Braybrooke, Mr. D. J. Henderson.

From Suez.—To Ceylon: Mr. J. S. Alston.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

We have advices from this port to the 1st April. The outward mails of January 26 were delivered on the 21st March, with London telegrams to the 16th February. His Excellency the French Minister has returned from Osaka. The *Guerriere* went down to fetch him, and returned on the 28th of March. His prolonged absence has naturally given rise to much conjecture. Before he went to Osaka, it was well known that he was opposed to the opening of the port, and was doing all he could to prevent, or at least to postpone it. It is now surmised that yielding to the inevitable, he has been consoling himself by selecting at the new port the best sites for his own residence, and for a concession for his compatriots. He had several interviews with the Shiogoon, who also received the Admiral and officers of the French ships, treating them with similar courtesy to that shown to our own Admiral and his officers by the princes of the Inland Sea.

The *Japan Herald* says:—The improvements promised by the December Convention are being fast proceeded with by the Japanese Government. The extension of the Bund to Benten is going on simultaneously with the filling in of the swamp at the end of the settlement nearest to Yoshida Bashi. The directions in which the filling in is being done are so numerous, that the earth boats are seen everywhere. They are not only on the canal, which has again been diverted from its ordinary course for them, but in the open harbour, from the hills on this side of the Kanagawa viaduct they are constantly passing in and out of that end of the creek, the long bridge that was closed against foreigners having been removed to facilitate their passage. Off Benten junks are daily arriving with hewn stone for the face of the Bund, and no fault can be found with the authorities for the want of energy.

We have seen a design prepared by Messrs. Whitfield and Dowson for the Japanese Custom-house. It is in European style and of a solid and imposing appearance. Should the Government adopt it or any other equally substantial and extensive, they will give proof that they have confidence in Yokohama's progress whatever foreigners think of it.

The *Japan Times* publishes the text of the edict lately issued, announcing the final abandonment of hostilities against Chosiu. It runs as follows:—"With reference to an Imperial order, directing that military proceedings on the part of the troops employed in the chastisement of Chosiu should be temporarily left in abeyance, at this time orders have been given that the troops are to be disbanded, on account of the national mourning for the Mikado. The above orders were issued at Kioto on the 27th February."

There is no doubt (says the *Times*) of the authenticity of this document, nor can we be in any way surprised at its publication. Throughout the war we held and freely expressed the opinion that Chiosiu would prove the victor. This is now officially acknowledged, as is in no way remarkable, especially when we consider the unwillingness manifested by the present Shiogoon, even before the death of his predecessor, to involve himself in a struggle with a prince whose powerful connections, geographical position, and known resources rendered the result of the contest hardly doubtful.

CHINA.

TIENTSIN.

Dates from this port are to the 26th March. The ice broke up on the 1st, and the first steamer arrived on the 6th, carrying cargoes chiefly for Chinese. On the subject of coals, &c., a correspondent writes:—

"In time I hope we shall have coals cheap enough, when the Government will permit machinery to work the mines, tramways among the mountains, and railways in the plains. All this I still hope to see before I leave China. Wensiang said to Mr. Hart, lately:—'Fifty years hence you will be trying as much to stop us as you are now trying to urge us on.' I have no doubt that there is some truth in this, but at present there is much need of information in the highest quarters; for instance, a great Mandarin of this district has been travelling to Newchwang, and on his return had an interview with the Emperor. The boy sat on his throne but opened not his mouth, while the Empress—which of them I don't know—was behind a screen and conversed with the Mandarin. Amongst other questions, she asked him if he was going by boat to Tientsin; mind, this was in mid-winter when the ice is generally some fourteen inches thick.

"I heard from a gentleman at Peking, who had it from a Mandarin said to have composed and presented it, that an address to Mr. Hart upon his leaving for England ran something to this effect in true Oriental style:—'That Mr. Hart was as necessary to the Empire as a ship is to a river or a ridge-pole to a house.' I believe Mr. Hart is greatly liked by them, and I think deservedly so."

Advices from Peking report that an extensive fire has occurred in the portion known as the Ta-sha-la and the Sien-yu-k'oh; about two hundred houses have been burnt. The neighbourhood is that in which the largest number of shops is situated, and nearly all the houses destroyed were occupied by tradesmen. Three theatres were also burnt down. The origin of the fire is not known. The Chinese complain about the unusual dryness of the weather. An epidemic of a peculiar description has been making much havoc among the inhabitants; the nature of the disease is that it brings forth two large swellings, one on each side of the neck, which produce great inflammation, and carry off the patient in from two to three days after the disease sets in.

There is a good demand at Tientsin for damasks, chintzes, velvets, long ells, Spanish stripes, lastings, figured and plain Orleans; but as yet the traders do not feel inclined to do anything in grey shirtings, t-cloths, white shirting, drills, spots, and brocades; and as holders of these goods are anxious to realise, rates have given way the last few days. Lead, tin plates, quicksilver, and window glass can be readily sold. Gallnuts, isinglass, tobacco leaf, and camphor are in good demand. There is a fair demand for opium at our quotations, holders selling readily.

CHEFOO.

Efforts are being made to establish a sanitarium at Chefoo, which is considered one of the most healthy spots on the coast. The cost of carrying out the present scheme is estimated at taels 6,000, of which taels 1,600 have been already subscribed. The building is calculated to accommodate 20 persons.

The following charters have been arranged at Chefoo since the Chinese New Year:—

Claro Babuyan, 10,000 piculs, to Swatow, 27 days, $3,750; *Aurora*, 5 500 piculs, to Swatow, 20 days, $2,100; *Johann Heinrich*, 4,000 piculs to Tientsin and thence to a southern port, 35 days, 70 cents per picul; *Abbotsford*, 12,500 piculs, to Newchwang and Swatow, 30 days, $6,000; *Nuuanu*, 4,000 piculs, to Hong Kong, 20 days, 40 cents per picul.

SHANGHAI.

The dates are down to the 9th April. The London mail of 11th Feb. arrived out on the 29th March; the French mail of 17th on the 8th April.

The following report on the great silk case is from the *Trade Report*:—The conclusion of the proceedings in the action at Shanghai by the Silk Guild against Messrs. Jardine, Matheson and Co., and the arrangement of a compromise, have been the leading events of the past fortnight. The settlement agreed to, which anticipated the delivery of a judgment in the case, had the effect of dividing the loss between Jardines and the Guild, and has been considered to show great liberality on the part of the English firm. The trial lasted eight days, and the evidence was enormously voluminous, so that it would quite impossible to reproduce it within the limits of this report. Moreover, its general effect is easily described, in a manner which will perhaps be more intelligible than a report which would occupy twenty or thirty of these columns. The brief outline of what was currently supposed at the time to be the framework of the case, which was given in the last number of this periodical, proved to be erroneous as the evidence proceeded. It was generally stated that a Chinese merchant or broker named Chequai had become heavily indebted for sundry transactions to Messrs. Jardine, that they bought 600 bales of silk through or of him, and then refused payment on the ground that he was indebted to them for the amount of their value. It turns out that this was a complete misrepresentation of the facts. Chequai was a Chinese merchant who did business on an enormous scale, partly, no doubt, on the strength of his well-known connection in business with Jardine's, and partly by the help of a native bank called the Newo Bank, in which he was a partner, and in which it was always generally believed, and in the course of the late trial admitted, that Jardine's were also partners. The purchase of the silk in dispute, however, was not made through Chequai so far as Jardine's were concerned. It was an ordinary business transaction directed from Hong Kong, and the managing partner in Shanghai instructed a public silk inspector, Mr. Robison, to buy the required quantity. Mr. Robison went to Chequai and bought them of him without inquiry whether the silk was Chequai's own, or whether he was acting as a broker, a circumstance about which, according to the custom of the trade, it did not apparently lie within Mr. Robison's province to inquire. Messrs. Jardine paid Chequai, according to their custom in such cases, by cheques on Newo Bank, that story of an old debt from Chequai to them being purely fictitious. The state of the account current at the time showed a comparatively trivial balance against the native merchant. It happened, however, that Chequai had made away with all the assets of the Newo Bank, of which he had—and this is the wonderful part of the story,—been allowed to take the entire management. Once in every few months a profit and loss account was laid by Chequai before one of the partners in Jardine's, but it is evident that this account was never checked or tested, and Chequai was thus at liberty to do what he pleased both with the funds in the bank, and the unlimited credit of the great firm on which it rested. Messrs. Jardines kept a running account at the bank for meeting cheques, and in the course of the month of December had paid into this account money enough to pay all the cheques they drew in payment for the silk. When the last two cheques however, for tls. 100,000 and tls. 75,000 respectively, were presented there were no funds to meet them. The cash in the bank had all disappeared.

The allegation which the silkmen who had actually found the 600 bales which Jardine's took over from Chequai endeavoured to establish was that the silk had already been bought from them, and that consequently the payment to Chequai was no payment to them. However, this theory broke down as the trial advanced, and it became clear that Chequai had been their agent, not Jardine's, consequently payment to him as their agent had been a valid payment for the silk. In the private negotiations, which went on *pari passu* with the trial, they partially admitted this, but contended that, even if it were granted, their claim was met by payment to Chequai; still even Chequai had not been paid the last tls. 175,000, as the bank was already insolvent when the cheques were drawn. In consideration of this Messrs. Jardine agreed to pay the tls. 175,000 over again, on condition that the Silk Guild handed over to them all Chequai's assets then in their possession, which amounted to about tls. 100,000, and this was the compromise arranged. Luckily for Messrs. Jardine, it does not appear that the Newo Bank was involved in any transactions which will bring further loss upon them, and no claims to any amount have been made since its failure.

Some regret has been expressed that the adjustment of the case by private agreement should have prevented the Chief Judge from delivering a judgment, which might have had the effect of settling many disputed points in connection with the responsibility of agents, and especially Chinese middlemen, in commercial transactions. In the *Supreme Court and Consular Gazette*, however, a paper published at Shanghai, and well known to be under the inspiration at least of Sir Edmund Hornby, an article has appeared since the trial, which may probably be taken to throw some light upon what this judgment would have been. In view of the unfounded stories that

Digitized by Google

were put in circulation, it is satisfactory to read in this, "We are glad, however, to be in a position to state that it [the judgment] would have relieved the English firm of all imputation of an intention or desire to act unfairly by the silkmen, or from any wish to save themselves the loss of a few thousand taels by the sacrifice of others."

Accounts from Hungchow state that the missionaries are thinking of flying to Ningpo. Our correspondent speaks of Nienfei, but we are not aware of any banditti being in that neighbourhood, and fancy the outbreak must be a local one.

The news with regard to the movements of the Nienfei is of an alarming nature. Roving bands have combined and are laying waste a considerable portion of country between the Yangtze and Yellow Rivers, and advices have arrived through a native source that the insurgents have succeeded in completely circumventing Li Footai and his army in the north, between the Provinces of Shangtung and Honan and near the Yellow River; and that he will either have to succumb from want of supplies, or to fight his way out of his present position. They have captured the walled town of Ta-Tung, about fifty miles above Nganking, and two miles inland. From this place regular communication under the supervision of the Foreign Customs has been kept up with the river steamers in the interests of the passenger trade, and this is now put an end to. The rebels are said to have captured a large number of junks, and are holding the canal from Ta-Tung to the river. The Customs officers left for safety.

Major Doyle, who is in command of one of the Imperial contingents, who had taken them some 400 miles into the interior, was deserted by the Chinese soldiers, his own body guard turning against him. Tseng-Kwo-Fan is expected shortly. The city (Nanking) is almost undefended, nearly the whole of the drilled men having been taken northwards; and although there are three parks of good artillery, in the event of an attack there are few but coolies to man them. It is stated that such a contingency is by no means remote, as the rebel forces are daily increasing in strength, and the Imperialists are almost powerless against them, The time is probably not far distant when the state of China will have retrograded to the same point at which it stood ere the Taiping rebels were expelled from Nanking; and the chief success which attended the old opposition will have proved to be but of short duration, Nanking, the great prize, having again slipped from the Imperial grasp.

The following items are from the *North China Herald*:—

About five-and-twenty British subjects, who have not obeyed the registration edict, have been summoned before the Supreme Court but no fine was imposed, on their promising to comply.

An application for a new trial in the case Rowbotham *v.* Wilkinson and Co. has refused.

An Englishman named Harris, belonging to the ship *Eunice Nicholas*, has been murdered by a Dane named Summers, in a Chinese brothel on the French Concession.

The new Gymnasium has been opened for exercise lately, and we congratulate its members on the change which they have been compelled to make. Their expulsion from the Main Guard has certainly caused them much expense, and necessitated an increase in the subscription, but the present quarters are so far more convenient and roomy than the old that few will regret the change.

A programme has been published of a volunteer rifle meeting, to be held on the 1st May, which shows that some interest is still felt in the corps, although a large majority of the members appear little enthusiastic themselves, the parades being usually lamentably meagre. The prizes are not so large as those competed for last November; they are, however, quite sufficient to stimulate competition and lend interest to the result. Seven, varying in value from 100 taels, presented by the merchants, to 20 and 30 taels with which to console the unfortunate, will be shot for on two consecutive days by members of the Rangers and Rifles, and a third day will be arranged for the Customs' Corps.

The new company which has been formed for the navigation of the Yangtsze have added the steamer *Rona* to their list, but have chartered the *Express* to their opponents the S.S.N. Company. The steamer *United Service* has been purchased under the auspices of the same firm for 25,000 taels, and will be worked on the Tientsin line.

The accounts laid before the shareholders in the North China Insurance Company fully justify the directors' congratulations on the steady increase in business which has marked its career. On a capital of Tls. 1,250,000, of which only a quarter of a million is paid up, it made a profit during the past year of Tls. 342,000, after having paid losses to the amount of Tls. 480,000. To avoid misapprehension, the report must be compared with that issued in November last. A balance was then shown to be in hand of Tls. 380,000, whereas there remains now only Tls. 342,000; but the claims paid during the last half comprise nearly all the losses sustained during the year; only Tls. 6,000 of which were included in the returns of the first half. At present, we believe, there are no pendencies, so that the amount now in hand represents nearly the actual profit realised out of the 855,000 taels received in premia. The business of the company has been nearly one-fourth greater during 1866 than during the previous year, only 622,000 taels having been received in premia during 1865. A large proportion of the 480,000 taels paid away represents losses sustained on the various ships that persisted in attempting the dangers of the Yangtsze—losses which, as it has been generally agreed to double the rate of premium hitherto charged, will, it may be hoped, not recur. Shipowners, moreover, will probably find the same difficulty in effecting insurance on their vessels at Lloyd's for the Yangtsze voyage, that shippers are now subjected to in respect of cargo; and a double check will thus be provided. The report and balance-sheet will be found on another page.

The *Shanghai Recorder*, of April 1, says:—The *Wachusett* came into port on Saturday last from a cruise up the Yangtsze; she stopped a few days at each of the other ports, and a week at Kewkiang, by the request of the Taoutai, on account of the near vicinity of the rebels who came within ten miles of the city, and after burning several villages above Kewkiang finally retired. We are glad to state that the *Wachusett* reports everything quiet at Kewkiang at the time of leaving, but we learn upon good authority that roving bands of Nienfei have combined and are laying waste a considerable portion of country between the Yangtsze and Yellow Rivers. The *Wachusett* towed the lightship, which had been wrongly placed near Chinkiang, to its proper position.

The *Consular Gazette* has the following news from Peking:—By a recent decree, Hsu-Chi-yu, one of the Ministers of the Yamen of Foreign Affairs, and author of a geography of the world, is appointed head of the T'ung Wen Kuan, or School of Languages and Foreign Knowledge, established under the wing of the Yamen. It has been rumoured that this post was to be given to Pin. A censor named Chang Shong-tsao has remonstrated against the Yamen's proposal to invite the licentiates of China to study astronomy and arithmetic on the ground that these sciences are the province of the Astronomical-office and the Board of Works, and that attention to them would be hurtful to letters in particular and morality in general. The Emperor overrules the censor's protest in a very decided tone. We shall give the decree on another occasion.

Mr. W. B. Preston, owner of the *General Sherman*, who was one of the unfortunate victims in the attack upon that vessel by the Koreans, and left a wife and family, had insured his life for $10,000; and the insurance offices only wait proof of his death before paying the amount to his widow.

A meeting of the French Gas Company was held on the 1st April, M. Morel in the chair. The chairman explained that the company were 16,000 taels in debt, but that of this sum 4,000 taels, due on consignments of stock from Europe, could stand over. It was thought necessary that some means of meeting the 12,000 taels should be at once devised. A shareholder proposed that a subscription list be sent round to the different shareholders. The chairman felt sure that not more than half the sum wanted would be obtained in this way, and proposed that a committee of five, three to be shareholders and two members of the board, be chosen to consider the best way of raising the necessary sum. This proposition was agreed to, and a committee, consisting of the Rev. Pere Aymeri, Dr. Galle, Messrs. Heinsen, Krayer, and Monnier, having consented to act, the meeting adjourned until the 10th.

HANKOW.

The *Hankow Times* gives the following account of Nienfei movements:—

A fortnight ago we described the Nienfei as retreating with all possible despatch across the borders of the Ganhwuy province, and expressed a hope that perhaps we might congratulate ourselves on being rid of the pests altogether. The result has unfortunately proved that we were a little premature in thus solacing ourselves upon our escape. At that very moment they

Digitized by Google

had just succeeded in burning Wusueh, a large town and Customs' station between this and Kiukiang, and soon after they showed themselves in such force opposite to the latter city that the Chinese authorities and people were thrown into a state of immense consternation, and the commander of the United States corvette *Wachusetts*, then on her way down the river, deemed it prudent to give the port the benefit of his protection for a few days. H.M.S. gunboat *Weasel* happened, fortunately, to be on the spot likewise.

Whilst opposite Kiukiang the Nienfei showed symptoms of an inclination to move along the bank of the Yangtsze downward towards Ganking; but they must have altered this intention, for they retraced their steps in this direction, laid siege to Hwank-chow-foo last week, burnt Yanglo on the 25th, and on the following day reached Shehkow, 14 miles from this, and their nearest point of approach at the beginning of last year. In the course of this sudden countermarch they are reported to have slain a mandarin of the high rank of Fantai, and to have put *hors de combat* no less than 2,000 of the regulars sent against them. Tseng, the Futai of this province, is also beleagured in the city of Hwang-chow-foo, and is reported to have been so closely pressed that he narrowly escaped capture whilst entering that city. What they propose to do next it is impossible to conjecture. Of course it is not probable that they will venture further this way, but their near approach is already having the usual effect of driving hosts of miserable refugees into our vicinity and stopping all local trade. H.M.'s gun-boat *Weazel* returned into port to-day.

The U.S. steamer *Wachusetts* visited Nanking a few days ago from Hankow, having Dr. Macgowan, the telegraph commissioner, on board. We learn that at Hankow Dr. Macgowan had communications with the authorities there on the subject of telegraphs, and also at Nanking, to inform them that the East India Telegraph is making arrangements to submerge a cable to connect Hong Kong and Shanghai in accordance with Imperial sanction. Dr. Macgowan, it is said, also notifies the mandarins that the shore end of his cable will be extended from Woosung, along the foreign road, to the company's office at Shanghai.

KIUKIANG.

Kiukiang letters speak of great depredations by rebels on the north bank of the Yangtsze, where they have captured a small market town, named Ta-tung, about fifty miles from Nganking. The *Wachusetts*, at the request of the Taotai, remained several days at Kiukiang, his Excellency being apparently under apprehension that the Nienfei might cross. There is great alarm through an extensive region on the north side of the river.

HONG KONG.

The dates are now down to the 15th April. The London mail of 26th February arrived out on 8th April.

H.M. gunboat *Havoc* reports that in consequence of information received, she proceeded up the Broadway and West River on the morning of the 8th. At 40 miles from the sea, off a creek leading to the town of Kongmun, the piratical junk of which she was in search was seen at anchor, but directly the gunboat hove in sight she made sail and tried to escape up the creek. Finding, however, that she would be overtaken, the crew ran her on shore and deserted her. A party was landed from the gunboat, but the pirates, about 20 in number, dispersed and escaped into the country. The junk was identified by the master of the fishing-boat *Kingho* No. 496, as the one that had robbed him on the 28th ult., and the four men taken by this gunboat on the 5th in Rocky Harbour are probably a part of her crew. The *Havoc* brought in the junk (which has a partial cargo on board) for adjudication.

Shortly after the *Parsee* left the Sandwich Islands it was discovered that the treasure room had been entered and some of the boxes broken open; on further inquiry it turned out that a plot had been hatched by some of the crew to murder the captain and officers and all not connected with the plot, after which they were to take possession of the treasure, scuttle the vessel and take to the boats. On making these discoveries strong measures were taken and all those connected with this diabolical conspiracy were put in irons, not, however, it is reported, before some blood had been spilt in the struggle. Most of the mutineers were afterwards released in order to work the ship, but three of the ringleaders were brought into port in irons.

Rumours are afloat that Nanking, the ancient capital of China, the city of the famous porcelain pagoda, Nanking once the rebel-ridden, is about to be opened to foreign trade As the event takes place under the provisions of the French Treaty, a French Consul will, of course, be the first appointed by foreign Powers. A Customs official will doubtless ere long be, if not already, appointed, and, in accordance with the usual march of events, a Consul or Vice-Consul will probably be deputed, on the part of the British Government, to exhibit to the eyes of the unsophisticated Nankingese the uniform of the Hong Kong police.

A letter appears in the *Daily Press* condemning the practice of engaging tonnage in the clipper ships for the new teas, thereby compelling purchases in a given time from the Chinese, whereas foreign merchants should be as free to hold offers as the Chinese always are.

Hong Kong has had an unusual quantity of public amusement since the departure of the last mail, the Opera Company having commenced the promised performances. These have been successful in the highest degree, no singers of equal ability and artistic experience having ever visited China previously. A troupe of Japanese jugglers has also been performing with great success.

H.M. surveying vessel *Rifleman* reports having been in search of and discovered the rock on which the S.S. *Corea* was lost.

A report is current that the U.S. gunboat *Ashuelot* has visited Tamsui (Formosa) and bombarded some place in the vicinity, in retaliation for the murder of the crew of the American ship *Rover*. We are unable, however, to give further particulars.

About two o'clock of the 1st an accident occurred at Scandal Point similar to that which took place about eighteen months ago, when some soldiers belonging to the 9th Regiment then stationed here were killed near Murray Barracks. Gangs of convicts have for some time been engaged in cutting away the hill at the Point, and they were thus employed as usual this forenoon, when a great portion of the earth gave way, and fell upon about a dozen of the convicts. Two were dug out dead, and taken to the Civil Hospital; six were removed in chairs to the hospital at the gaol, having, although seriously injured, recovered considerably from the application (external and internal) of spirits after they were got out from amongst the rubbish. Two or three were slightly bruised, but suffered more from fear than from their bodily injuries. It is expected that all those taken to gaol will recover. The man who was longest under the fallen earth, curiously enough, is among the latter; and though weak, seems by no means fatally injured.

Three gangs, in all thirty-six convicts, were working at the hill, but only the number above stated were under the embankment at the time; upon eight of these the slip directly fell, while two or three were at a safer distance, and got off consequently with comparatively little harm. When the earth fell, the other convicts appeared as if paralysed, and instead of at once endeavouring to rescue their fellow prisoners, stood vacantly looking at each other and the wreck caused by the miniature avalanche. The chain-gang guards did what little they could until assistance arrived from the barracks, in the shape of about twenty or thirty soldiers, who, turning up the earth in a remarkably short time, saved the six unfortunate Chinamen from what would very soon have been their grave.

The gunboat *Emilie*, launched some time ago by Messrs. Riach and Co., made a trial trip round the island on the 9th of April. It was a pleasant trip, the weather being lovely, and everything went off as smoothly as could be wished. Not a jar occurred in the working of the engines, and the most sanguine expectations of the builders as to the power and speed of the pretty little craft were fully realised. We understand that the *Emilie* has been sold to the Chinese authorities at Canton, and will be employed by the Chinese Government as a cruiser in the Canton waters in search of smuggling, coolie, and piratical junks.

There was a very good muster of the Hong Kong Rifle Association at the butts on the 11th of April, and the following are the scores obtained by the competitors for the various prizes:— The prizes in the first match were won by Mr. M. Moore and Mr. Cohen, scoring 42 and 37 points respectively. The Consolation prize was won by Mr. H. J. Holmes with a score of sixteen points; and the prize to be shot for with any rifle was won by Mr. Cohen with a score of 26 points; in this prize Mr. Moore made excellent shooting against the Whitworths with his long Enfield.

STRAITS SETTLEMENTS.

SINGAPORE.

Dates hence are to the 28th April. The English mail of the

Digitized by Google

11th March arrived out on the morning of the 12th April, and the French mail, with London letters to the 16th March, arrived on the morning of the 19th, with telegraphic dates to the 3rd April. By private steamer from Bombay telegrams to the 5th had been received.

The following summary of news is from the *Overland Straits Times*:—

Beyond the passing of the five local ordinances by the Legislative Council, on the first of April, little has transpired of political significance. The new Government will doubtless be anxious to feel its way a little bit before advancing upon wholesale reform—if, indeed, any such extreme is required. So far as we have gone everything has worked smoothly, and no inconvenience been suffered by the changes of office entailed by the new system. A considerable number of superior officers of the old Government have been retained on acting appointments, which in some cases will most probably be confirmed as permanent. Disturbances have broken out in the province of Klang, which borders Malacca in the Malayan Peninsula, and parties are warned in the *Government Gazette* against any species of participation. The precise nature of these disturbances does not appear, but they have undoubtedly a depressing effect upon the internal trade of the Peninsula, which at this point consists of the products of the tin mines. His Excellency the Governor proceeds to Malacca, and it is most probable that he will make some effort to put an end to this petty internecine strife. It is a question whether our position in respect to the neighbouring native States does not require us to follow the example of our Dutch neighbours, and support a resident in each of the most important of them, or, perhaps, have one colonial officer as a commissioner to visit each periodically. The result would not only be the security of British interests, but the extension and protection of trade generally.

A sort of hiatus has taken place in the prosecution of public works. The water supply, which was projected about two years and a half ago, proceeds but slowly to completion, and grave doubts begin to be expressed as to the ability of the structure to perform what is required of it. It was one of those undertakings which would have greatly benefited by a little discussion before it was entered upon, instead of being carried through the recommendation of a single officer. There has been some talk of the erection of a Government house, as the building now used for the Governor's residence is a private property not in every respect suited for the purpose. No site, however, for such an edifice should be hurriedly fixed upon, as there are many considerations to be taken into account before the Government should be committed to the expenditure of such a large sum of money as a creditable erection of this nature would require.

Admiral Sir Harry Keppel took his departure in H.M.'s *Salamis* for Hong Kong on the 15th April. He will visit Labuan and Sarawak on his way. The barracks at Tanglin, which have so many years remained empty, are now being got ready for the wing of the infantry regiment which is to be stationed here, and which may be expected to arrive in a few months. Sir William Hackett, Judge of Penang, who has been appointed Acting Chief Justice of Singapore during Sir Benson Maxwell's absence, arrived from Penang last week, and has taken his seat upon the Bench. The weather has been hot, but relieved by copious showers of rain.

LATEST TELEGRAMS.

BIRTHS.

BECKER—On the 9th April, at Beach-road, Singapore, Mrs. A. Becker, of a son.
BERG—On the — May, at Hamburg, the wife of Captain P. H. Berg, late of China, of a son.
HÖLLER—On the 20th May, at Elgin-terrace, Nottingham, the wife of Nils Höller, Esq., Shanghai, of a daughter.
LANESBOROUGH—On the 22nd May, at 72, Lower Leeson-street, Dublin, the Countess of Lancsborough, of a daughter.
MAGNIAC—On the 23rd May, at 10, Upper Brook-street, the wife of Charles Magniac, Esq., of a son.
NORTH—On the 18th May, at 16, Arlington-street, the Hon. Mrs. North, of a daughter.
PASS—On the 12th April, at Singapore, Mrs. S. C. Pass, of a daughter.
PUSTAU—On the 19th May, at 12, Palmaille, S.S. Altona, Holstein, Mrs. Wm. Pustau, of a daughter.
RICHARDSON—On the 6th April, at Swatow, Mrs. T. W. Richardson, of a son.
SMALE—On the 22nd May, the wife of J. Jackson Smale, Esq., of Lincoln's-inn, barrister-at-law, of a son.
SMITH—On the 21st April, at Sherwood Cottage, Tanglin, Singapore, the wife of Wm. Buchanan Smith, Esq., of a daughter.
ULLETT—On the 16th May, at Wascotes Hill, the wife of R. B. Ullett, of a daughter.
WEBB—On the 17th May, at Kippington Park, the wife of Edward Webb, Esq., of a son.

MARRIAGE.

FORBES—CLARKE.—On the 8th May, at Trinity Chapel, New York, by the Rev. John Murray Forbes, D.D., Frank B. Forbes, of Shanghai, China, to Isabel, daughter of William M. Clarke, Esq., of New York City.

DEATHS.

FIELD—On the 17th May, at his residence, Portswood, Hampshire, James Seward Field, for 35 years Commander in the Peninsular and Oriental Company's service, lately commanding the s.s. Poonah, second son of the late James Field, M.D., M.R.C.S., and nephew of the late Joshua Field, F.R.S.
HAMMER—On the 12th April, at Singapore, Mr. Hendrik Mouritz Hammer, aged 37 years.
LECRAS—On the 29th March, at Hong Kong, Francis Lecras, late carpenter of the ship Queen of the Age, aged 43 years.
ODOBERTIS—On the 20th April, at Singapore, Rev. Brother Odobertis, aged 32 years.
ROSS—On the 31st March, after a long and painful illness, Mary, the beloved wife of Alex. Ross, of Messrs. Ross, Thompson, and Co., Wanchai.
WILKINS—On the 4th April, at Hong Kong, George Wilkins, formerly proprietor of the Commercial Billiard Rooms, aged 58 years.
WILLGOSS—On the 10th April, at Yokohama, Japan, of typhoid fever, Mr. Henry Willgoss, of Bradnor Villa, Surbiton, Surrey, aged 41.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents, and is divided into decimal parts of ten.

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.
At Yokohama	6 months' sight.	4s. 3⅝d.	4s. 4⅛d. to 4s. 4⅜d.
„	4 ditto	4s. 3¼d.	4s. 4⅛d. to 4s. 4¼d.
At Shanghai	6 ditto	5s. 11¼d.	6s. 0d. to 6s. 0⅛d.
„	4 ditto	5s. 11d.	5s. 11⅛d. to 5s. 11⅜d
At Canton	6 ditto	4s. 5⅞d.	4s 6⅛d.
At Hong Kong	4 ditto	4s. 5⅞d.	4s. 6d.
At Macao			
At Singapore	4 ditto	4s. 4½d. to 4d. 5d.	4s. 5⅛d. to 4s. 5½d.
At Manila	6 ditto	4s. 3d.	4s. 4d.

At Shanghai, bills on India, Rs. 300 per 100 taels. At Hong Kong, Rs. 219 per $100. Bar Silver at Shanghai, tls. 111·3·0; at Hong Kong, 11 per cent. premium. Mexican dollars at Shanghai, tls. 74½ per 100; and exchange on Hong Kong, 27 discount. Hong Kong and Shanghai Bank shares new, 2 per cent.; old, 8 per cent. dis.; Gas Company, 5 per cent. prem.; Hong Kong and Whampoa Dock, 20 to 30 per cent. prem.; Steam Shares, 10 per cent. dis.; Union Dock Company, 30 per cent. dis.; China Traders' Insurance, 2 per cent. premium.

The following is from Sharp and Co.'s Circular:—

Gold.—The arrivals have been $320,000 worth, and the amount sent away $460,000, including the shipments per *Rangoon* on the 1st inst. and excluding those to leave on Monday; the purchases have been to a fair extent for this and the Calcutta steamers and at slightly advanced rates.

Silver.—In addition to large direct shipments south, Shanghai has supplied Hong Kong with a considerable quantity of Sycee, which has been eagerly purchaed at our quotation. The total receipts for the fortnight represent $1,490,000, and the exports $860,000, excluding about 15 lacs additional to be sent to India per *Emeu, Clan Alpine*, and *Thunder*.

Dollar Currency.—Amount inwards, $290,000; outwards, $460,000. The Mint is again at work coining Hong Kong Dollars from the Silver Ichiboos received from Japan. These have come in large quantities, and are turning out very well, although the weight for weight exchange arrangement of the treaty, for native and foreign coins "of the same description" appears more applicable to the old "Boos" than to the new, the former on assay giving as high as 997 silver and the latter as low as 875.

Exchange.—This market has at last taken a start with an advance of 2 per cent. in which however rupee bills have not participated. The total of amounts placed has not been large, excepting the Commissariat operations, by which the aggregate has been swelled. Six months' credits have again gone mostly into the hands of private buyers.

Discount and Mortgages.—Money is still difficult to obtain on mortgage, although rather a better feeling is observed; short loans are eight per cent.

Shares.—In these there has been but very little movement; rates are unchanged.

COMMERCIAL REPORT.

CHINA AND JAPAN EXPORTS.

TEA.—The following report is from the *Overland Trade Report*:—Owing to the unusual prolongation of the past tea season there is nothing heard as yet of the prospects for the next. While in other years the markets have generally been clean swept of old teas long before now, this year there have been settlements up to the present date, and small remaining stocks are still on hand at some of the ports. Practically, however, the season is of course over, and there will be nothing of interest under this head until the arrival of intelligence relating to the new crop. CANTON.—At length there are some settlements to report in the long neglected stock of country Congous. Early in the fortnight 3 chops were taken; these were soon followed by settlement of 9 others, and within the last few days 6 more have found buyers, making in all 18 chops, or 12,093 packages, and leaving a stock on the market of 14 chops or 8,319 packages. Prices of settlements have ranged from 18 to 24.5 taels, and classes may be quoted common to good medium. Country Greens: There are no further settlements to advise, and stocks remain 5,000 packages. Canton-made Teas: About 1,000 boxes new make Canton Congou have been settled at 24 taels; fresh musters are now coming freely forward, and various offers are pending, but nothing of importance has yet transpired. About 1,500 boxes Scented Caper (old season) have been taken, and 2,500 half-chests Pouchong have also been settled, the last-named being for the American market. Scented Orange Pekoes and Canton Greens have not attracted any attention whatever. The new Canton Greens and Scented are expected in about a fortnight. Sales, &c., are reported as follows:—Country Congous, 18 chops, at 18 to 24·5 taels; Country Greens, none; Scented Caper, 1,500 boxes, at 12 to 20 taels; Pouchong, 2,500 half-chests, at 20 to 22 taels; Tayshan Congou, new make, 1,000 boxes, at 24 taels. Stock 14 chops, or 8,319 packages Country Congous; 5,000 packages Country Greens.

FOOCHOW.—Two small chops 161 chests of good common Congou have been settled during the past fortnight, at 15.5 to 17 taels, and the Finke Senior has sailed for Australia, completing the export from Foochow for the season. The quantity of treasure, opium, and lead sent into the interior for the purchases of the new teas is considerably less than usual, particularly as regards the last named article. Several of the principal teamen propose to leave Foochow for the upper districts in the course of a few days.

SHANGHAI.—The business in Congous has been very limited, but prices have been well maintained. A small business also has been done in Green Teas, purchases being at lower rates and chiefly for England. Black Teas: Holders have been firm for prices, which at this late season few buyers have been willing to concede, and settlements have been very trifling in consequence. Green Teas: There has been very little inquiry for these, a few small settlements for the English market being the only business reported. With the exception of 3,000 half-chests held at Chinkiang, and about 1,000 half-chests here, nothing but common and undesirable tea is left in stock. The prices paid for this, as exhibited below, show a fall of nearly two taels, but a larger concession is required to enable buyers for England to enter the market with confidence.

HANKOW.—One small chop common Oopack had been sold at tls. 14, and two taken in barter at tls. 15.7.5, making, with a small shipment on native accounnt, a total export for the fortnight of 700 chests, and reducing the stock to 2,400 chests.

KIUKIANG.—There had been no settlements, and of Black Tea no shipments, but 700 packages Green Tea had gone forward to Shanghai. 3,000 packages Green Tea are still expected from the country.

CHINKIANG.—The native merchants have not yet shown themselves ready to meet foreign buyers, so that no transactions have taken place, and about 3,000 packages Green Tea remain in stock.

NINGPO.—There is little to report of the operations during the fortnight. The exports include 562 piculs Pingsuey. The teamen will shortly be setting out for the Foochow districts unless the disturbed state of the country delays their departure.

YOKOHAMA.—The transactions in the tea market have been but moderate; purchases have been made at rather easier rates, and lower prices may be looked for before any great business can be done. The stocks show a great reduction, owing, it is said, to the large quantity of common kinds which have been unsaleable here for some time, and consequently sent to Yedo for transmission to Nagasaki. It is also affirmed that there is only a small amount of tea in Yedo, consisting of good medium to fine kinds, consequently no great business is expected until after the new season commences, unless the teamen give way very considerably in their demands. The settlements for the fortnight are estimated at 1,200 piculs. Quotations and stocks are as follows: Good common, $15 to 20, 400 piculs; medium, $21 to 25, 800 piculs; good medium, $26 to 30, 900 piculs; fine, $31 to 34, 600 piculs; finest nominal, $35 to 40 none.

RAW SILK.—CANTON.—The market continues very quiet, and settlements for the fortnight have been on a very limited scale. In about three weeks to a month the new crop may be expected. The weather is now again favourable, and it is reported as probable that prices will rule considerably lower at the opening of the coming season. Settlements for the fortnight and stocks are as follows:—Tsatlee Reel, No. 1, 20 bales, $600; Loong-kong, No. 1, $560; Kowkong, 10 piculs, $430; Lacklow and Cumchuck, $520 to 530; Re-reeled Cumchuck, 240 boxes, $540 to 560; Seulam, 5 piculs, $380; Punjum, 200 piculs, $130 to 140; Pierced Cocoons, $90; Waste Silk, No. 2, 60 bales, $65. Stock 100 bales, No. 1, Loong-kong; 100 piculs, Kow-kong; 200 piculs, Lacklow and Cumchuck; 200 piculs, Seulam; 600 piculs, Punjum.

SHANGHAI.—The near approach of the New Season's crop, and a general desire on the part of holders to realise, added to adverse advices received from the home markets, have caused much lower prices to be accepted for the small settlements which go forward by this mail, about one-third of which are said to have been taken in barter, or shipped on native account, rendering correct quotations almost impossible. It is not probable that any more Silk will be brought down from the country this season.

YOKOHAMA.—Prospects of a small crop and of peace in Europe, and the continuance here of an exceptionally low rate of exchange, have maintained a steady demand for all sorts of silk. The settlements of the fortnight amount to nearly 600 piculs, and would have undoubtedly been larger had not the supply, chiefly in the finer grades, been far from adequate to the demand. Arrivals have been only 500 piculs, and the unsold stock is reduced to 350 piculs, consisting chiefly of silks rejected after inspection. The settlements are composed of about 400 piculs of Hank Silk, 120 of Oshio, 30 of Koshio, 30 of Echizan, and 20 of Nagahama. Prices have kept steady throughout the fortnight, and close slightly in advance of last quotations. The position of the market is as different as possible to what it was last year at this date; when the anticipation of a large crop in Europe—based on extraordinary exports of Silkworms' eggs and impending war on the Continent paralysing business here, and allowing a stock of 3,500 bales to accumulate—caused a dragging business to the end of the season. The season is likely to be sooner brought to its close this year, and opinions as

Digitized by Google

to the probable figure of the total export for 1866-67 vary, but not widely. Some say 12,500 bales, some 15,000. Quotations are at present as follows:—Mybash and Sinchu—best, $890 to 920 per picul; do. medium, $880 to 880 per picul; do. inferior, $740 to 820 per picul; Ida, inferior, $700 to 750 per picul; Ooshio, best, $820 to 860 per picul; do. medium, $750 to 800 per picul; do. inferior, $650 to 700 per picul; Koshio, best, nominal $780 to 800 per picul; do. medium, $720 to 760 per picul; do. inferior, $650 to 680 per picul; Echizan, best, nominal, $710 to 720 per picul; Sorts, medium, $670 to 700 per picul; do. inferior, $670 to 620 per picul.

DRUGS, &c.—No stock of Cassia Lignea being left on the market, the nominal quotation remains $19.50. Cassia Buds: Five piculs, very stalky, found buyers at $30, leaving 35 piculs of the same quality on the market. Cassia Oil: A sale of 12 piculs is reported at $172, at which price the remaining 5 piculs are likewise offered. Star Anniseed: As stocks of new accumulate dealers will most likely accept the rates offered, but at present the stocks, 500 piculs of new and 250 of old, are held firmly. The quotation is $25 for new and $23 for old. Star Anniseed Oil: The quotation has reached $625, at which two piculs have been bought, leaving 11 on the market, and owing to the speculative spirit observable in connexion with this article higher rates still are expected. China Galls: Dealers are unwilling to sell under $12.50, at which rate however there have been no transactions. Stock 220 piculs. Galangal: $1.50; no transactions, stock 2,000 piculs. China Roots: $3.50; no stock. Vermilion: $33.50 per 900 packages, $37.50 per 1,000.

CHINA AND JAPAN IMPORTS.

GENERAL IMPORT MARKETS.

AMOY.—Cotton Yarn: Sales of 35 bales common quality average No. 20 have been made at $63. Latest quotation, 16 to 24's at $67; stock, 75 bales. Grey Shirtings: Sales of 1,000 pieces 8¼ lbs. have been made at $3.80; latest quotation, $3.77; 7 lbs. $3.45; stock 2,000 pieces. White Shirtings: 68 reed are quoted at $4.30, with sales of 500 pieces at this price; 60's $3.55, 56's $3.40; stock 700 pieces. T-Cloths: 6 lbs. $2.80, 7 lbs. $3.05; no stock. Long Ells: Scarlet, $11, Assorted, $7 to 10; no stock. Spanish Stripes: Assorted, 90 cents to 1$ per yard; no stock. Quotations for other piece goods are:—T. R. Cambrics, $4.20 to 4.60; Dyed Figured Shirtings, $5.35; sales 250 pieces. White Brocades, $4.70; Coloured, $5.60. Coloured Chintz, $2.80 to 3.30; Camlets, $21 to 22; Lastings, $12.50, with sales of 175 pieces at $14. Metals: Tin, $23.50; Lead, $7 to 7.25; stock 100 pigs. Quicksilver, $72; Nail Rod Iron, $3.20 to 3.50.

NINGPO.—The receipts of the fortnight have amounted to 1,639 slabs of Tin, 476 pigs of Lead, 1,600 bundles of Nail Rod Iron, and 100 boxes of Tin Plates. 100 pigs of Lead have been settled at $7.80, and the general quotations are:—Tin, Malacca, $25 per picul; Tin, Canton, $25 per picul; Nail Rod Iron, $3.50 to 3.80 per picul; Flat Iron, $3.60 to 5.60 per picul; Lead, $7.30 per picul; Tin Plates, $5.20 to 5.30 per picul; Swedish Steel, $5.40 to 5.50 per picul.

CANTON.—Cotton Yarn Nos. 16 to 24 and 28 to 32 remain unchanged, but in Nos. 38 to 42 an advance of $12 has been established. In Metals, Nail Rod Iron shows an improvement of 10 cents, while Lead and Quicksilver remain much as last quoted. The settlements include 170 piculs, Nail Rod Iron at $3.60 to 3.80, 1,100 of common Lead at $6.90 to 6.95, 800 of W. B. mark at $7.15 to 7.20, and 200 flasks of Quicksilver at $70.50 to 71.50. 4,500 piculs of Lead and 500 flasks of Quicksilver remain in stock.

HANKOW.—For some days subsequent to the date of last report, a large business was transacted in the chief staples of British manufacture, but latterly the near approach of the Nienfei has very much unsettled trade, and operations have been on a small scale. The deliveries have not been equal to the arrivals, and now stocks of most goods are rather heavy. Grey Shirtings and T-Cloths continue in fair demand, but Camlets are less inquired for, and have declined in value. Grey Shirtings: Transactions from foreign hands have been to a large extent. Prices have ruled somewhat irregularly; sales of 8lb. 4oz. cloth being reported as low as taels 2.58, but the bulk of the business has been at taels 2.60 to 2.66 per piece, which is the closing quotation. 7 lbs. is inquired for at taels 2.35 to 2.40 per piece, but heavy make is not more wanted. White Shirtings: Supplies continue heavy, and the demand is unimportant. T-Cloths: 7 lbs. cloth is still in fair request, and prices are maintained for good make. 8 lbs. good quite neglected, and may be quoted lower. Drills: A few small sales at cheap prices have been made, but the demand is very small. Fancy Cottons and White Spots have declined in value, the present quotation being 2.90 to 3 taels per piece, at which there is an inquiry. White Brocades maintain their value. Dyed Spots and Brocades, as also Damasks, are quite out of favour. Camlets: The demand for these goods, previously noticed, has somewhat subsided, and prices have to be quoted about 2 mace lower. Lastings have been taken to a moderate extent at last quotations. Long Ells: Assorted colours are out of favour, but for scarlet the Szechuen dealers are in the market, and for H H. mark a slight improvement may be noticed. Spanish Stripes: Small sales have been made, chiefly at 0.71 taels per yard. Medium and Broad Cloth are only saleable in retail lots at lower prices. Figured Orleans are dull of sale at reduced quotations. Lead is unchanged in value, and as yet no purchases have been made for the tea country. Quicksilver: The market has been well supplied, and sales have been effected at cheaper rates; the present quotation is 52 to 52.20 taels per picul. Tin is in moderate demand, and a few small contracts have been made at 20 to 21.50 taels per picul,

YOKOHAMA.—Since the last fortnightly report the tone of the import market has somewhat improved, more especially as regards plain staples, and were it not for the continued depression in Boos transactions would have been on a very fair scale. Then, again, there can be but little doubt that the large payments which have had to be made during the last three months for sugar, rice, cotton, and arms, have not been without their effect upon the general import trade of the country. Grey Shirtings are rather higher, and holders, as a rule, are firm. Cotton Yarn is in fair demand at quoted rates, 16.24 being still most in request. White Shirtings: 66.72 reed. White Spots and Brocades are inquired for. Dyed Cottons are quite neglected. Some arrivals of Black Velvets have taken place, and prices are slightly weaker. Camlets keep dull and low in price. Metals are quiet. Rice has declined to $4.40 for Canton, and Sugar is easier at $13 for best Canton White. Cotton is in rather less demand, at $29 for best Shanghai, and $30 for Ningpo staple.

COALS.—Hong Kong: During the fortnight 1,780 tons of Australian have arrived; 1,510 tons for sale and the remainder for consumers. For English and Welsh, prices are unchanged. The above Australian realised $9 to $9½ per ton. Shanghai: Prices have advanced for all kinds, and there is a good demand at quotations. The arrivals have been 1,595 tons English, 1,450 tons Australian, and 720 tons Japan; total, 3,765 tons. The stock of English coals is quite exhausted. American Anthracites have fetched 13.5 taels per ton from godown. Australian coal has been sold "to arrive" at 9.7.5 taels per ton, and is now held for 10 taels per ton from ship. The quotations are:—English, taels 13 per ton; Cardiff, taels 17 do.; Welsh, taels 14 to 15 do.; American Anthracite, taels 12.5. do.; Sydney, taels 9.7.5 do.; Japan, taels 6.5 to 7 do.; Formosa, taels 5 do.

SHIP CHANDLERY.—Hong Kong: There is no change to notice in the quotations for beef and pork, and no transactions worth recording have taken place during the fortnight. The present quotation for flour in quarter sacks is $2.10 to 2.15. There are no barrels on the market. The Parsee's cargo was withdrawn after about 500 quarter sacks were settled at the above rates.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—From Newcastle, March 18, Hotspur; from London, Elizabeth Shaw (reported by telegram).

At NAGAZAKI.—From London, March 3, Chrysolite; 29, Kagosima.

At SHANGHAI.—From London, Lennox Castle (reported by telegram); from Newport, 25, Sea Mew; from Newcastle, April 2, John Banks.

At HONG KONG AND CANTON.—From London, April 4, Min; from Newcastle, 2, Alexander; from Hamburg, 6, Otto; from New York, 6, Malay.

At MANILA.—From London, March 19, Angela; from Barcelona, 12, Carmen; from Cardiff, April 1, Gentoo.

At SINGAPORE.—From London, March 24, Spirit of the Deep; April 4, Belle of Southesk; from New York, 7, A. J. Ingersoll (str.); from London, 4, Belle of Southesk (reported by telegram); 21, Lauderdale, from Liverpool, George and Henry; from Amsterdam, 9, Clio; from Glasgow, 1, Foam.

At PENANG.—None.

At BATAVIA.—From Liverpool, Amazon, Caroline; from Glasgow Finella.

At HONG KONG.—From Hamburg, April 6, Formosa; from New York (via Singapore), 13, Rover (str.).

DEPARTURES.

From YOKOHAMA.—None.

From NAGASAKI.—For London, March 2, Gazelle; 15, Roska; 16, Rifleman; 20, Elsabea.

From SHANGHAI.—For New York, April 3, Borealis.

From FOOCHOW.—None.

From HONG KONG and CANTON.—For London, April 6, Acacia.

From MACAO.—For Havana, April 3, J. A. U.; 5, Bella Gallega, Encarnation; 6, Ariosto; 7, Cervantes.

From MANILA.—For Liverpool, March 30, Silesia; for Cork, 23, Espana; for New York, 28, W. G. Russell; April 2, Helena.

From SINGAPORE.—For England, April 8, H.M.S. Princess Royal; 11, H.M.S. Scylla; for London, 18, John Stanton, Junr.; 22, Eastern Star; for Hamburg (via Rangoon), 13, Malabar.

VESSELS LOADING.

At YOKOHAMA.—For London, Lord Collingwood; for New York, Glenclune.

At SHANGHAI.—For London, Vanguard, Crawshay Bailey; for New York, Condor.

At HONG KONG and CANTON.—For London, Hugh Fortescue (full), Birch grove; for New York, Windward.

At MANILA.—For London, Angela, Dilkoosh, Her Majesty; for Havana, Maria y Vincenta.

At SINGAPORE.—For London, Mirella, Summer Cloud; for Liverpool, Mataura; for Bordeaux, Argonaut, Suzanne.

At BATAVIA.—For Channel (for orders), Verdandi; for Amsterdam, Herald of the Morning, Maria Catharina, Stad Leyden, Henriette, Jupiter, Elizabeth and Jacoba; for Rotterdam, Dahlkarlsa, Hendrika, Andromeda, Min. Fr. v. de Putte, Amazone.

FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London, Cotton and Tea, £3 to £3 10s.; Silk, £4 to £4 10s. per ton of 40 cubic feet. To New York, £2 10s. to £3.

At NAGASAKI.—There is no vessel on the berth either for London or New York. To Shanghai the rate is $3 to 4.00 per ton. To Hong Kong $4 00 per ton, nominal.

At SHANGHAI.—Rates to London have advanced to £3 per ton of 50 cubic feet, at which the Vanguard is fully engaged; the Crawshay Bailey has also been put on the berth for London. For New York, the Condor is loading at £2 10s. per ton of 40 cubic feet. There is very little doing in coast freights, though the available tonnage in port is small.

At FOOCHOW.—There is no vessel on the berth for London or United States.

At HONG KONG and CANTON.—Disengaged tonnage in harbour continues moderately small; vessels arriving have found ready employment, principally for the Japanese ports and Saigon. Homewards via Manila: There has been less inquiry, and the only settlements are the Monarch and the Lord Raglan at £2 17s. 6d. and £3 2s. 6d. per ton respectively. The Birchgrove and the Kosmos have been chartered for London direct at £2 10s. per ton of 50 feet, and it is probable the Belted Will will be laid on the berth at Whampoa.

According to the Circular of George Holmes, there are fifteen disengaged vessels in harbour (exclusive of Siamese) representing 9,051 tons

At MANILA.—The Dilkoosh has been fixed for London direct with

Digitized by Google

about 500 tons dry sugar at £3 per ton, taking hemp at £3 10s., and coffee at £3 15s., the latter per 18 cwt. The Angela has been chartered to proceed to London, taking 450 tons wet sugar at £2 5s. and £2 10s. per ton of 20 cwt. The ship Her Majesty is loading 625 tons dry sugar at £3. and 10 000 quintals tobacco at £3 5s. per 50 feet measurement.

At SINGAPORE.—The John Stanton Jr. has sailed for London, leaving the Summer Cloud and Mirella loading for same port. The latter vessel has advanced rates to £2 5s. per ton for dead weight and £2 10s. for light cargo. Light goods, however, are very scarce, and a reduction in the rate would be readily submitted to.

SHIPS' REPORTS.

HONG KONG.

The British ship Min, from London Nov. 27, reports having spoken the following vessels:—Sam Mendall, from Liverpool to Bombay, 20 days out; Jan. 27, the St. Juan, from Bordeaux to Calicut; March 9, Lennox Castle, from London to Shanghai, in the Manippa Straits, 98 days out.

The American steamer Rover reports that she had strong gale from N.E. and N.W. until 7th April and then moderate and light N.E. wind till arrival in port. On 7th April spoke British barque Alicia, from Saigon to Hong Kong, 1 day out, in lat. 9.15 N., long. 108.35 E. The Rover left New York on 10th December, 1866. Called at Pernambuco, Capetown, Mauritius, and Singapore. She is 9 days from Singapore, and 124 days from New York.

SINGAPORE.

The British ship Lauderdale, from London, spoke the following vessels:—

In Sunda Straits:—
Roslin Castle, Singapore to Liverpool.
John Milton, London to Hong Kong.
Venezuela.
Advance, Liverpool to Singapore.
Robert Rickners, Cronstadt to Amoor River.
Maiden Queen, Liverpool to Shanghai.
Medina, London to Japan.
In Gaspar Straits:—
City of Aberdeen, London to Shanghai. This vessel reports being in company with the ships Argonaut, London to Hong Kong, and the Hoang Ho, London to Shanghai.
John R. Worcester, Shields to Shanghai.
Off Gaspar Island:—
J. A. U. (Spanish ship), Macao to Havana.

COMMERCIAL POSTSCRIPT.

Oriental Bank shares are quoted £43 to £44; Union Bank, £40 to £41; Chartered India, Australia and China, £17½ to £18½; Chartered Mercantile of India and China, £30 to £32; London and County, £56 to £57; London Joint Stock, £42 to £43; China Steam Ship and Labuan Coal, £13 to £12 dis.; and P. and O. Steam, old and new, £48 to £51.

ARRIVALS NOT IN THE TABLES.—May 25, at London, from Maulmain, Ahkera; 24, at Plymouth, from Foochow, Tavistock; 27, from Colombo, Sanderson.

DEPARTURES.—May 23, from Liverpool for Shanghai, Dagmar; 24, Ocean Home.

SPOKEN.—Alblasserdam, Cardiff to Batavia, April 16, 1 N., 22 W. India, Shields to Batavia, April 4, 5 N., 25 W. Archos, Liverpool to Batavia, April 9, 4 S., 23 W.

THE DUKE OF EDINBURGH.—The Duke of Edinburgh will at once join his ship at Marseilles. He is expected to be absent about two years, and will proceed to Bombay and the chief ports of our Indian possessions. After visiting China and Japan he will go to Australia, and probably visit America on his return home to England.

IT has transpired (says a New York paper) that the Japanese Embassy, now at Washington, has come to buy ironclads; and also to complain of swindles perpetrated upon them two years ago by American citizens in the sale of war steamers at that time.

THE *Royalist*, screw, built by Messrs. Blackwood and Gordon for Sir James Brooke, Rajah of Sarawak, has left Port Glasgow for Borneo; she made a very successful run to Queenstown.

THE WILL OF H. MAGNIAC, ESQ.—The will of Mr. Hollingworth Magniac, of Coleworth, Bedfordshire, was proved on the 16th instant, and the personalty sworn under £400,000. The will bears date May 2nd, 1866. He has left legacies to his brother and sister, to his nephews and others of his family, and to friends and servants. To his sons, Herbert and Arthur, £15,000 each, and liberal provision for his daughters. His manor and lordship of Coleford, with his mansion and lands in the parishes of Sharnbrook, Odell, and Sondrop, are left to his son Charles.

CHINESE COOLIES.—The following letter from Martinique relates a new outrage of this class of emigrants on board ship:—"The French ship *Henri IV.*, of Marseilles, coming from Macao, in China, where she took 450 emigrants for Cuba on the 22nd December last, has arrived in our roadstead. It appears that these emigrants, among whom, in the first days of the voyage, some symptoms of insubordination were remarked, broke out one day in open revolt. They armed themselves with everything they could lay hands on, and attacked the officers and crew. These latter were obliged to use their weapons in self-defence, and it was not until after killing two of the mutineers that they succeeded in establishing order. Afterwards the captain, in order to intimidate the Chinese, had the leader of the revolt hanged at the mainmast. During the rest of the voyage the crew, revolver in hand, had to keep a sharp watch on the emigrants. The object of the captain in putting into our port is to get assistance sufficient to enable him to finish the voyage in safety. Some of the Chinese, it is said, avow that they themselves and many of their companions only went on board as emigrants with the intention of possessing themselves of the ship. They had intended to execute their project immediately on leaving Macao, but circumstances compelled them to postpone it for a time."

ETHNOLOGICAL SOCIETY.—The anniversary meeting was held last week in the society's rooms, 4, St. Martin's-place, Trafalgar-square. The reports of the council and of the treasurer showed a very prosperous condition both as to the increased number of members and the finances. The sale of the "Transactions" to the public it was stated had now become an important item. The annual address was delivered by John Crawfurd, Esq., F.R.S. The officers and council elected for the ensuing year are—John Crawfurd, Esq., F.R.S., president; Robert Dunn, Esq., Sir John Lubbock, Bart., Professor Busk, and General Balfour, vice-presidents; F. Hindmarsh, Esq., honorary treasurer; Thomas Wright, Esq., and D. W. Nash, Esq., honorary secretaries; L. J. Beale, Esq., honorary librarian; Lord Milton, W. Blackmore, Esq., Henry G. Bohn, Esq., Dr. A. Campbell, T. F. D. Croker, Esq., Sir W. A. Clavering, Bart., J. Dickinson, Esq., Sir Justin Shiel, Rev. F. W. Farrar, Dr. Beddoe, Dr. Harrington Tuke, Professor Huxley, Joseph Mayer, Esq., Sir R. I. Murchison, Sir Charles Nicholson, Bart., Sir Edward Ryan, Lord Strangford, John Thrupp, Esq., and Sir John Davis, Bart., council.

THE INDIAN TELEGRAPH AGAIN.—It is really too bad that the Indian telegraph should not be managed better than it is. Every one who is in the habit of receiving telegrams from India knows what hopeless riddles are sent to this country. Indeed, what with the blunders and delays on this line, it is found often more expeditious to send by the Russian route, although a portion of the distance has to be traversed by mules. But bad as the state of things is as regards private telegrams, it is intolerable when we get such a message as Mr. Reuter has just chosen to communicate to the papers. A mutiny has, we are told, broken out in a native regiment at "Great," but the mutineers were captured, and order was restored. Now, in the first place, where on the earth or under the earth is "Great?" Is it an Indian city, or village, or barrack; or is it an island that has no more to do with India than it has with Timbuctoo? As a native regiment is spoken of we presume it is within the continent of India. On that account it was the more important that we should know where, and not keep in suspense the tens of thousands of British families who have near relations and friends in India. We ought to know, too, what has caused the mutiny—whether it is a local, isolated trumpery dispute, or, like the apparently trivial disturbances of 1857, the prelude to a frightful insurrection; whether it involves a purely personal quarrel or one affecting religion or caste. We received such a shock ten years ago that we shall never again laugh at the slightest symptom of discontent; very probably we shall run into the other extreme and exaggerate it. Anyhow we ought not to be tormented with such telegrams as that disgracefully unintelligible message which was sent from Bombay last week.

THE CAPTIVES IN ABYSSINIA.—Intelligence has been received from the captives in Abyssinia up to the 2nd of April. They were still prisoners, and in chains, in the fort of Magdala. There had been no change in their treatment by King Theodorus, and no sign whatever that he intended to liberate them. In fact, they are now fully persuaded that nothing but force will secure their liberation, and are ready to take the risk which coercive measures would entail upon themselves. One of them writes:—"Her Majesty's Government are fully aware of our position, and it must now be clear to them that our release by conciliatory measures is quite out of the question. They must either resort to force or leave us to perish." Meanwhile, the country generally appears to be in a state of complete anarchy, and almost every province is in rebellion. The road from Magdala to Debra Tabor, where the King still resides, is unsafe for all travellers unless accompanied by a strong escort. Five more Europeans have recently been added to the number of the captives—viz., three Germans, Messrs. Staiger, Brandeis, and Schiller; Essler, an Hungarian, and Makeru, a Frenchman. These had volunteered to enter the King's service when the other captives were sent to Magdala, but getting tired of their position they devised a plan to escape. The evening before putting their plan into execution they were betrayed by Bardel, who had agreed to escape with them. They were, in consequence, immediately seized and chained hand and foot. They are at present confined in a dungeon at Debra Tabor.

ACCIDENT TO THE ATLANTIC CABLE.—The Atlantic telegraph cable laid last year has been silenced, temporarily only it is to be hoped, by the

Digitized by Google

shock of an iceberg. Mr. Stewart, the chairman of the Anglo-American Telegraph Company. writes as follows: "The uninterrupted state of telegraphic communication with America is evidenced by the fact that in the course of yesterday 91 messages passed, yielding £2 591 7s. In order, however, to mitigate as far as possible the effect of vague and exaggerated rumour I feel it my duty, as chairman of this company, to ask you to place the public in possession of the following facts, namely: On the 5th inst, it was reported that on the 4th inst., at 6.30 P.M., 'a large iceberg grounded off the harbour of Heart's Content, Newfoundland, about a mile and a half N.N.W. of Northern Point, and 200 yards east of the 1866 cable, in about 16 fathoms water. No danger with present wind.' On the 8th inst. it was reported that 'Iceberg has disappeared,' but in passing over the cable of 1866 it seems that some damage must have been done, for the signals through that cable became imperfect, and have now ceased. The cable of 1865, however, is uninjured, and there is no reason to doubt that the injury to the cable of 1866 will be repaired without delay, or any considerable expense. I need only add that the capacity of the cable of 1866 exceeds the requirements of the business, great as it is, between this country and America.—I am, Sir, your obedient servant, CHARLES E. STEWART, Chairman of the Anglo-American Telegraph Co." Mr. Willoughby Smith, who was sent specially to Valentia to report, confirms the previous tests fixing the injury at about 3¼ miles from the station at Heart's Content, or within 1½ or 2 miles of the land, and therefore in shallow water. Arrangements have been made between the Anglo-American Telegraph Company and the Telegraph Construction and Maintenance Company for the immediate repair of the accident, and a vessel fitted with all needful appliances, and carrying out a skilled staff, will be despatched from the Thames within ten days from this date. It is consequently expected that within three weeks the cable will again be in perfect working order.

THE BRAZILIAN NAVY.—An addition to the number of vessels forming the Imperial Brazil navy has just been made with two steam troop-ships from the Thames, the first completed of which, the *Orellana*, 626 tons, 260-horse power, made her trial trip successfully between Gravesend and the Nore Light. The *Orellana* is a paddle steamer of light draft of water, combined with great carrying power, and has a high rate of speed. Her forward accommodation for troops is excellent, there being fitted hammock room for 500 men, besides hospital and other necessary accommodation for a troop transport, with ample room in the hold below for storage of provisions, &c. The cabin accommodation aft for the officers accompanying the troops is also of a very liberal character, and the like provision for the officers and crew of the ship is of the same character. The duties of the *Orellana* as a troop-carrying vessel will differ very materially from those of the *Himalaya*, *Simoom*, *Tamar*, and *Orontes* of the British navy. The Brazilian vessel will but have to carry troops along the coasts of Brazil, or over the track of the great rivers, but the steam troop-ships of the British navy have duties extending over nearly every part of the globe. In any comparison, therefore, between the troop-ships of the two nations those of Brazil may be considered really large vessels for the service they may be employed upon. The trip was highly satisfactory in all respect.

SINGULAR CONDUCT OF A SHIP'S CREW.—The schooner *Howden*, Robinson master, and a crew of four men, from Malaga, with olive oil, arrived at Hull last week. The captain makes the following strange statement:—During the voyage something got into his eye, which was so inflamed and painful, that on arriving at Dungeness he went on shore for medical advice, leaving the mate of the vessel in charge. On his return he found the mate helplessly drunk, and the vessel ransacked of everything that was portable—a chronometer, compasses, his own gold watch and chain, clothes, bed-clothes, and some of the provisions, gone, as well as the whole of the crew, who had also taken away the ship's long-boat, papers, and bill of health. He immediately telegraphed along the coast where it was likely the men would land, and having procured a fresh crew, he found his way to Hull. Since this occurrence a vessel has arrived at Sandgate, which reports having seen the missing boat nearly full of water, and in it the dead body of a man, his face much disfigured as if by blows. The name of the boat was nearly erased, but it has been identified as that in which the runaways made off. As nothing has been heard of them it is thought they must have perished. The body is in the custody of the Coast-guard at Sandgate, and an inquest will be held on it.

RELEASE OF A CAPTURED STEAMER.—A telegram received from New York by the Atlantic cable announces that the Supreme Court at New Orleans had decreed that the British steamer *Sir William Peel*, captured by the United States' cruisers during the war with the South in 1863, shall be restored, with the cargo, to her owners. The steamer in question was built at Northfleet in 1855, and in 1863 became the property of Mr. T. A. Corry and Mr. R. Laycock, merchants, in Manchester, who despatched her from London to Liverpool, whence she sailed for Matamoras on the 4th of May, 1863, with an assorted cargo of merchandise. The cargo was owned by Messrs. A. and S. Henry and Co., merchants, and consigned to Messrs. Milmo and Co., at Matamoras, for sale. This steamer arrived out on the 13th of June, the cargo was landed except two casks containing iron rings and some railway axles, and a fresh cargo was being shipped—namely, about 900 bales of cotton, when she was captured by the United States' commissioned vessel of war *Seminole*, Captain Roland, commanding, who ordered the *Sir William Peel* to New Orleans for adjudication. It was clearly established that at the time of the capture she was lying at anchor in Mexican neutral waters.

LOCOMOTIVES FOR ROADS.—An interesting spectacle was afforded last week to a large number of persons who assembled on the grounds of Trinity College to witness the locomotion of a steam-carriage constructed by Mr. Daniel M'Dowell, late engineer of the Jamaica Railway, and adapted for travelling on ordinary highways. The carriage, which is capable of being worked to eight-horse power, and of travelling on a level road at the rate of twenty miles an hour, was driven at a rapid pace over the grounds, the inventor acting as driver, and Mr. Hingston, chief steward of the College, steering. Its performance evoked the admiration of the spectators, and eventually the Provost and several members of hi family seated themselves in the carriage, and were driven round the courts of the University. The carriage when travelling at its *maximum* speed—twenty miles an hour—can be brought to a standstill within twenty yards. Its entire weight, with all the tools and appliances is only two tons. The boiler is vertical, four feet high, by two in diameter, containing twenty-one vertical tubes of 100 lb. pressure per inch. The cylinder is three inches in diameter, by seven in height, and makes four strokes for each revolution of the driving wheels; so that the speed on the driving wheels is reduced at the rate of one to four. The driving wheels are four feet in diameter, and the steering wheel two.

GRAND BALL AT THE BRITISH EMBASSY IN PARIS.—The correspondent of *The Times* thus describes the entertainment given by Lord Cowley in honour of the Prince of Wales:—"The Emperor and Empress were present, the King and Queen of the Belgians, the Grand Duchess Marie of Russia, the Princess Eugenie of Leuchtenberg and the Duke of Leuchtenberg, Prince Oscar of Sweden, Prince Napoleon, Princess Mathilde, Princess Marie of Baden, Prince and Princess Lucien Murat, Prince Joachim Murat, Prince Achille Murat; all the Ambassadors and Plenipotentiaries in Paris, with their wives; all the French Ministers and great officers of State—an immense crowd of people covered with orders, and all ablaze with stars and diamonds and ribands of every colour. I had nearly forgotten to mention one of the most remarkable of the personages present—the little brother of the Tycoon, a mere child, who, with his hair done up in a wonderful cockscomb, made himself, in spite of the observation he excited, quite at home. The ball was the most brilliant that has come off as yet in Paris this season, and some idea of the magnitude of the preparations made for it may be gathered from the fact that among the 1,300 people assembled there were 60 detectives. Four or five of them, whose boast it is that they know nearly every conspirator in Europe, were constantly in the ballroom, where they appeared covered with decorations. Notwithstanding the multitudes present, there was comparatively little inconvenient crowding. The open space behind the Embassy and between its two projecting wings, with the fountain in the centre, was carpeted, roofed in, and converted into a large and brilliantly lighted hall, adorned with such a profusion of flowers as one rarely sees. The Emperor and Empress, as also the King and Queen of the Belgians, unlike all the other guests, came in at the back, through the garden, and the havoc which has consequently been wrought in the flower beds by the wheels of the carriages and the feet of the horses is pitiable. No one seeing the place to-day could imagine that yesterday it was, after that of the Elysee, the prettiest garden in Paris. The Imperial party arrived about 11 o'clock, and dancing immediately commenced. The first quadrille was composed of the Empress and the Prince of Wales; the Queen of the Belgians and the Duke of Edinburgh; Princess Eugenie, of Leuchtenberg, and Prince Joachim Murat, Lord Royston, and I forget who. In the second, the Empress and the Queen of the Belgians changed partners, Prince Oscar of Sweden was with Lady Feodore Wellesley and Lord Royston with Princess Eugenie, of Leuchtenberg. Neither the Emperor nor the King of the Belgians danced. The last dance was over at a quarter to five in the morning. It was a cotillon in which the Prince of Wales had Madame de Gallifet for his partner. The cotillon was led by the Marquis de Caux, Ecuyer de l'Empereur, and Lady Feodore Wellesly."

YELLOW FEVER AT MAURITIUS.—There has been a terrible outbreak of yellow fever at Mauritius. Letters, dated February 6, say that the disease has carried off its victims by thousands. The official returns from the 10th of February to the 28th gave the deaths at 2,061; in March, 6,433; and from the 1st of April to the 17th of April, 5,070; making a total number of 13,564. Happily a change in the temperature took place on the 14th of April, after heavy rains and strong breezes varying from the south to east, and since then there has been a decrease in the number of sick, which there is every reason to hope will continue. Quinine had advanced to the enormous price of £12 per ounce. The next mail from England was expected to bring a supply.

THE PECULIARITIES OF SOUTHAMPTON.—An investigation is now making for Parliamentary purposes into the wind and tidal peculiarities of the port of Southampton. The tide ebbs there in a south-easterly direction, and that at Spithead in a north-westerly one, and both tides meet to ebb through the west channel that divides the west coast of the Isle of Wight from the main land. The greater body of water from Spithead forces the Southampton tide back, and causes the singular phenomenon of a two hours' high water at that port; so that through this and other anomalies there are only three hours' ebb at Southampton. The prevailing wind at Southampton is evidently a south-west one, from the march of shingle and gravel on the northern shore between the Redbridge and Blechynden Railway stations, in a north-eastern direction. Nothing stops this march. The shingle and gravel travel over the elevations called hards and those made by sewers. Trituration is also going on amongst this shingle and gravel through the action of the wind and tide, so that after the lapse of time there will be formed a sandy beach.

THE AMERICAN IRONCLADS.—The *Patrie* says:—"We have reason to believe that Prussian agents have been despatched to New York with the view of purchasing the ironclad vessels built during the late war in the United States, but which since its conclusion have become in excess of the wants of that country. Among other vessels are mentioned the monitor *Onondaga* and the armoured frigate of 5,000 tons, the *Dunderberg*. The statement contained in a private despatch that the latter vessel had been purchased by France is erroneous."

THE REPORTED MUTINY IN INDIA.—A telegram from Agra states that the reported mutiny of native troops at Meerut is not true. The report was caused by the receipt of a letter by the collector stating that an outbreak would happen. On Sunday evening (the 19th) all the women and children were sent to Delhi, causing a great panic. The writer of the letter was said to be insane.

THE SEARCH FOR DR. LIVINGSTONE.—The construction of the steel boat to be used by the party about to be despatched to search the rivers and lakes in the interior of Africa for traces of Dr. Livingstone is being hurried forward at Chatham. A few days will now suffice for its completion, when it will be taken to pieces and despatched by the mail steamer leaving on the 9th proximo, which also takes out the exploring party. Mr. Young, one of the warrant officers attached to the Royal yacht, who formerly spent a considerable time with Dr. Livingstone in his African explorations, will have charge of the expedition.

THE MONT CENIS TUNNEL.—This great work is now more than half completed. The entire length of the tunnel will be seven miles 1,257 yards, and the distance completed at the close of March, 1867, was four

Digitized by Google

miles 345 yards. The advance effected in March was 148 yards, and if the present rate of progress could be maintained the tunnel would be completed by March, 1870.

SHIPBUILDING IN FRANCE.—Shipbuilding seems to be prosperous in France. At a recent meeting of the shareholders of the Company des Forges et Chantiers de la Mediterranee, which has not been in existence many years, the directors reported that in 1866 the company built nine large steamers for the Transports Maritimes Company, two gunboats for the Italian Government, and two steamers for the Viceroy of Egypt, one of them very rapid. It was announced, too, that the company has in course of execution orders to the amount of £1,600,000.

BARON LIEBIG, the celebrated chemist, was invited last week to a family dinner at the Tuileries. The Emperor, who takes great interest in the labours of this distinguished savant, conversed with him a long time, and congratulated him on his recent discoveries.

A CHURCH STRUCK BY LIGHTNING.—During a violent storm last week the lightning struck the church of La Salle, France. The electric fluid, having detached large pieces of the roof, penetrated into the edifice, and destroyed, by setting fire to them, a number of banners and ornaments on the altar. The sexton, who at the moment was tolling the bell, suffered no injury.

CONFEDERATION OF BRITISH AMERICA.—A supplement to the *Gazette* contains a Royal proclamation, which declares that after the 1st of July the British North American colonies shall be one dominion, with the name of Canada. Further, it names the senates for the different provinces.

WRECK OF THE "ROVER" OFF FORMOSA.

MURDER OF THE CAPTAIN, HIS WIFE, AND CREW.—ATTACK BY THE NATIVES ON THE BOATS OF H.M.S. "CORMORANT."

A correspondent has favoured us with the following letter relating to the above events. The concluding paragraph of it deserves the serious attention of all who are interested in ensuring the safety of commerce in the China seas. H.M.S. *Icarus* left Foochow on the 3rd April for the scene of the wreck.

(To the Editor of the *China Mail*.)

TAKAO, FORMOSA, March 30th, 1867.

SIR,—I regret to have to communicate to you the wreck off the south point of this island of the American barque *Rover*, on her voyage from Swatow to Newchwang, under circumstances which leave no doubt that her crew were foully murdered by the savage natives of that place.

The news was brought here by a Swatow Chinaman, who alone was fortunate enough to escape, and who arrived at Takow on the 22nd instant. His story was that the vessel left Swatow on the 9th instant, and struck on rocks (evidently the Vele Rete Rocks) on the 12th. She floated off, but in a sinking condition, and the master (Capt. Hand) determined to abandon her. The crew took to the boats, and were divided as follows:—The captain, his wife, one mate, and three Chinese, in one boat; the other mate and seven Chinese in the other. They pulled northwards, but during the night were parted. The first boat sighted land after seventeen hours pulling, and its occupants landed and sat down on the beach. After sitting about half an hour they were surprised by a discharge of firearms from the bush close by directed on their party. Without waiting to see the result of this volley the Chinaman fled and hid himself till night, when he crossed the hills and reached Leang-kiaou (a Chinese village), whence after a delay of six days he got passage to Takow in a sampan. On receiving this intelligence, Captain Broad, in command of H.M.S. *Cormorant*, which happened to be in port, at once decided upon proceeding down the coast, and if possible to ransom any of the crew who might have survived.

The *Cormorant* left Takao on the morning of the 25th, having on board Mr. Carroll, H.M.'s Acting Consul for Formosa, and Dr. Manson (of Takao) who joined the expedition as a volunteer. She first anchored at Leang-kiaou, where arrangements were made for sending a conciliatory message to the savages, with promises of reward for any lives saved. A Chinaman who understood the savage dialect was also persuaded, with great difficulty, and under promise of good payment, to act as interpreter. About 4 P.M. the ship anchored in the bay, at the extreme point of the island, where on the beach were to be seen the remains of the boat from which the unfortunate crew had landed.

Being desirous of giving the messenger from Leang-kiaou time to reach the savages, and so to avoid taking them by surprise, no one landed during the afternoon, or until nine o'clock on the morning of the 26th, when the whaler, the gig, and cutter were ordered to be prepared.

In the first were Capt. Broad, Mr. Consul Carroll, and the native interpreters; in the second, Lieut. Mathias and Dr. Lucas, the surgeon; and in the third, Lieut. Ryder and Dr. Manson. The two first pulled ashore to where the *Rover's* boat was lying, and the cutter lay on her oars at about 30 yards from the shore, with orders to keep a look out for any hostile movement. Everything however appeared quiet, no natives to be seen save on the hills about 300 yards from shore. A few buffaloes had also made their appearance on another part of the beach, with what object did not appear, and in charge of no one.

Lieut. Mathias was the first to jump ashore, and Capt. Broad was in the act of doing the same, when a sharp fire of musketry was opened upon the party from two points in the jungle at not 20 yards' distance. The abrupt nature of the sand-beach at this spot however prevented this first volley from taking effect on the whaler and gig.

The position of the foe being only indicated by the smoke from their muskets, and they themselves being quite hidden in the dense bush, Capt. Broad wisely determined not to risk the lives of his men in pursuit of an invisible enemy in a jungle where every advantage would have been on their side. The boats were therefore ordered off, the retreat being covered by the cutter, from which was kept up a fire which, from the cries of the savages, evidently told. Their bullets and arrows, however, now fell thickly round the boats, all of which were struck in several places, one ball passing right through both sides of the whaler only a few inches below the seat on which were sitting Capt. Broad and Mr. Carroll.

It is a cause for great congratulation, therefore, that the only casualty was a flesh wound received by one of the bluejackets in the cutter. In the same boat the stock of one of the Marines' rifles was shot through as he was in the act of firing it.

As no doubt now remained as to the sad fate of the *Rover's* crew, nothing could be done but to inflict some punishment upon the murderers. On returning to the ship therefore a fire of shell was opened upon the thickets out of which they now ventured. The effects were soon visible, large parties being seen so hurry up the hills in the rear of the position they had occupied. At the two points alone whence fire was opened there could not have been less than fifty men, whilst I feel convinced that others were stationed all along the bay, the buffaloes being only a decoy to entice the crew ashore.

To explain this I must state that the one and great object in life of a Formosan savage is to obtain heads, and I doubt not that they were greatly disappointed at not getting a few from the *Cormorant*. They fired not long ago into the boats of the *Swallow*, and I feel convinced that the crews of half the sailing vessels which have been lost and never heard of on their way northward from Hong Kong have perished at this spot. The very cunning of their ambuscade in the present instance proves that they are adepts, and the lives of the party are probably due to some accident, such as one excited man having fired his musket too soon. Had they waited two minutes longer not a man in the whaler and gig could have escaped, and even as it was their escape appears miraculous. masters of vessels leaving Hong Kong should be specially warned on no account to land at this spot, the more so now as the sight of a foreign made boat lying on the beach might induce them to do so.

It is much regretted that these savage tribes should be allowed to hold possession of this beautiful and valuable anchorage, situated as it is so conveniently for northward bound vessels in the North-east Monsoon, and it would be a great boon to commerce could they be cleared out and a settlement of Chinese encouraged in their place. The hills are fertile and undulating, and the soil appears rich enough amply to repay the labour of cultivation. The climate in the winter is healthy and invigorating, and the summer would be cooled by the breezes of the south-west. As a sanitarium for the worn-out inhabitants of Hong Kong it would be unequalled. The mission of the *Cormorant* was intended as one essentially of peace and mercy; but with the experience now gained, and with a force sufficiently strong, a single well organised attack would drive the savages from the coast, and a few years of Government protection would do the rest. I trust that the matter may be ere long taken up in the proper quarter and effectually carried out. The importance of the question affects not alone the English, the American, or any other nation, but touches all who are in any way connected with China, either its trade or its Government.

BANKS AND COMPANIES CONNECTED WITH THE FAR EAST.

Peninsular and Oriental Steam Navigation Company, 122, Leadenhall-street.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, MAY 24.

Much sensation has been created here by the announcement that Mr. L. W. C. Keuchenius, M.P., was "honourably" discharged by the Government from his duties as a member of the Council of the Netherlands Indies without his requesting to be discharged. In the royal decree his Majesty thanks him for his good services, and the right to ask for his pension is granted. Now it is customary here that functionaries are discharged only upon their own request; even when any one is discharged for ill conduct he is warned to ask for his dismissal. The Liberal papers suggest that this measure is taken by the Cabinet to punish Mr. Keuchenius for his well-known motion which he proposed in the Second Chamber, and which led to the dissolution of the Parliament. They call it an arbitrary act, which cannot be defended successfully by the Ministerialists. The Conservative papers, however, plead that it was necessary to dismiss Mr. Keuchenius because he solicited for the functions of Vice-President of the Council of the Netherlands Indies, and this being refused he wished that his position should be regulated, and asked, during a *tete-a-tete* with the Minister for the Colonial Department, for a free passage for him and his family to return to Batavia, whilst he would then be content when the pension due to him (8,000f.) should be granted. The Minister refused this request also; thereupon the discussion became more passionate, and the dismissal was gazetted. I give you the two versions, but I add that I do not believe one word of the rumours spread by the Conservative papers.

The *Arnhemsche Courant* states that Mr. Fabius, commander of the naval force in India, has asked for leave to return to the mother-country, and that this request will be granted. Next year he will be relieved by Mr. Andrea, now captain of marines and ex-M.P. for Leeuwardez, but who has not been long enough in the service to be appointed Rear-Admiral.

The last rinderpest returns show that the last measures have given good results. During the week ending the 11th only 17 cattle were attacked, against 185 and 362 in the two previous weeks.

In the month of June his Majesty will leave the Hague for his seat "*het Loo*," and after a stay of some weeks he will visit the Paris Exhibition. It is much regretted that the 45 chests containing produce of the Indian Archipelago, which were destined for that Exhibition, arrived too late for admission. Endeavours have been made since by some leading industrials for a special permission, in view of the great importance of these products.

COMMERCIAL.

COFFEE.—The result of the auction of the Dutch Trading Society of 74,580 bags Java and Padang was highly satisfactory, the total quantity being sold at ¼ to 2 cents above the valuation; for good ordinary 1¼ to 1½ cents higher. The directors of the society have announced that the coffee bought in the April auction will not come in the market before the June auction. Before the above-mentioned auction the transactions in first hands were as follows: 2,000 bags Java, 1,000 bags Macassar, and 1,600 bags Coro, imported by different ships at Amsterdam. To-morrow there will be a private auction of 3,400 bags Bali, Singapore, Padang, and Java Coffee, ex Lichtstraal, Maria, Adolfina, and Alblasserdam. The valuation is from 22 to 30 cents. To-day 1,250 bags Java, ex County of Argyle, were sold, but the price has not transpired.

SUGAR.—In anticipation of the Dutch Trading Society's auction held there this day the market was in a very good position, but the transactions were unimportant, because the majority of the importers prefer to wait upon the result of the auction, which was very favourable, the 64,931 baskets being sold at 1 f. above the valuation, or nearly the prices paid in the auction of March.

TEA.—For some lots of the Java of the late auctions a little advance was paid for export. The quotations are:—For good ord. China Congou, 90c., and ord., 80c.; good ord. Java, 70 to 75c., and ord. 65 to 68c.

RICE.—863 bales uncleaned Java, ex Henriette, were sold in the first hands. Cleaned sorts firm, with a few transactions. The quotations are:—For 1st Java table rice, 16f. to 18f.; 2nd do., 13f. to 14f.; white Java, 10f. to 11f.; ord., 8½f. to 9½f.; cargo, 7¾f. to 8f.; Rangoon, Bassein, and Necransie, floating cargoes, 7f. to 6¾f.

SPICES.—Little doing. Nutmegs: No. 1, 86c.; No. 2, 76c. Mace: D, 108c. Cloves: No. 2, 29c. Of Pepper, 1,200 bales Batavia, per Johanna Maria, were sold at 17c. Nutmegs are more in demand, and are not to be had at former prices.

TOBACCO.—On the 6th June 548 bales Java of different marks, 50 bales Japan, and 20 bales Aracan will be offered in auction at Amsterdam. The stock amounts to 3,863 bales Java.

CIGARS.—The 270 mille 2 do. Cortados (1863) Manila damaged have been sold from 10½f. to 24¾f. The auction of the 1,411 mille 2 do. Cortados (1862) Manila damaged has been postponed to the 24th instant, and will be followed by 280,000 ditto 2 do. Cortados and 170,000 2 do Habanas, 1866. (See "Latest.")

For COTTON there was more demand, and prices are a little higher; fair Bengal, 43c.; middling American, 66c.

HIDES.—1,709 Sourabaya Cow, of 3¾ kilo., per Comus, and 201 do. do., 3¾ kilo., per Dageraad, have been sold.

TIN (BANCA).—Very firm on the good news of the London market, and advanced prices have been paid; 1,000 slabs at 53¼f., 1,400 at 53½f., and 400 at 53¾f. were sold.

DRUGS.—Of the 585 kilos. Bourbon Vanille 70 kilos. were sold at 3f. to 6½f. per ½ kilo. Of the 65 kilos. Java, 7½ kilos. were sold at 3¾f. Of Gutta Percha per Joachim some lots have been sold very well. Cajaputh-Oil: A parcel ex Sparkenhoe was sold at former prices. Gum Damar: Firm at 41 to 42c.

RATTANS.—In the first hands were sold 1,500 bales ex Felicia, 1,860 ex Henriette, and 2,000 ex Peter Rohland.

KAPOK.—473 bales East Indian have been sold as follows:—1st sort, 53c. to 58c; 2nd, 45c. to 55c.

MONEY.—The demand was in general quiet. In the open market there was no great activity, but quotations were on the average sustained. The tendency, however, is to slightly easier terms, owing to the general increase of the capital.

DISCOUNT.—At the Bank, since 12th March: For bills, 3 per cent.; for acceptances, 3½ per cent.; in the open market, from 3½ to 4 per cent.

The market for Stocks and Shares showed since our last report great buoyancy, and in general the prices were well supported. The operations are of a character which gives the right to suppose that a further improvement will be sustained.

SHIPPING INTELLIGENCE.

ARRIVALS.—Hellevoet, May 15, Singapore, from Tjilatjap; Texel, 20, Maria Regina; Christina, Charlotte, all from Banjoewangie; 21, Christina Maria, from Batavia; Catherine, Estaffette, all from Banjoewangie; 23, A. R. Falek, from Batavia.

DEPARTURES.—Texel, May 14, Anna Maria Wilhelmina, for Batavia; Brouwershaven, 16, Hollandstrouw, for Batavia; Hellevoet, 16, Rotterdam, for Singapore, via Cardiff; Texel, 19, Gesiena Maria, for Java, via Newcastle; Brouwershaven, 20, Jan van Schaffebrar, for Melbourne.

PASSENGERS INWARD.—From Java, per Christina Maria, Mr. P. W. de Bok and family; per Charlotte, Miss H. Blannpot; per Marie, Mr. Theepass and family, Mr. de Bruin and family, Mrs. de Hoog and daughter, Mr. Schrok, and eight soldiers.

PASSENGERS OUTWARD.—For Batavia, per Madura, Mrs. Nelissen and family and A. Bettink.

RUSSIA, GERMANY, &c.

[FROM OUR OWN CORRESPONDENT.]

HAMBURG, MAY 23.

The Burgherschaft, or legislative body of this city, has passed, almost unanimously (136 votes to 1), the constitution of North Germany and the law by which Hamburg becomes a component state of the new North German Confederation. Her exceptional position as a free port will be continued till such time as she herself expresses the wish to be incorporated with the Zolverein, for which privilege she is to pay an annual sum in lieu of duties, the precise amount of which, however, has not yet been finally settled. But it will be worth while for Hamburg to pay any sum to retain as hitherto her free intercourse with all parts of the world, under which system she has become so prosperous and wealthy.

The *Siberian Messenger* announces that the old line of telegraph on the Amoor is now completed and open for public traffic from Nicolayefsk to the part of Novgorod in the Bay of Possiet. The line of the Amoor is 1,884 wersts in length (upwards of 1,200 miles), and is divided into two nearly equal parts; the northern one extends from Chabarofka to Nicolayefsk, with a branch from Sophisk to De Castries Bay, and a total length of 990 wersts. This is intended to be the general route to form a junction between the Siberian system and the Russian and American telegraph in the event of the latter being ultimately carried out, as there are indications that the plan has not yet been altogether abandoned. The southern line traverses a distance of 894 wersts, and connects Chabarofka with the new port of Novgorod, the most southern point of the most recently acquired territory on the Pacific. Over the whole of this extensive line there is but a sparse population at present, and a great want of useful roads, so that there are only forty-eight stations, of which twelve are for the reception of telegrams, seventeen for controlling officers, and nineteen for supervision. The sum allowed for the construction of the Amoor line was 750,000 roubles, but in practice it was found that the work could be done for much less than the estimates, so that only 500,000 roubles have been spent. According to instructions received from the Imperial Government at St. Petersburg, the remaining surplus of 250,000 roubles is to be expended in completing the works by building more stations, making new bridges, and otherwise generally improving the roads and other means of communication in the immediate vicinity of the telegraph line.

Official intelligence has now been received that the ratifications of the treaty concluded on the 21st of November, 1864, between China and Belgium, were exchanged with all the usual formalities at Shanghai on the 1st December last. The stipulations of this treaty are nearly the same as those in the treaty between Denmark and China, and the trade regulations and tariff of duties are almost identical with those stipulated in the British treaty with China.

The local newspapers of this city contain a list of a number of valuable presents recently made to the Hamburg Zoological Gardens, among which is a royal Bengal tiger from Mr. Heinrich Reinhold, of Calcutta, and a makak (*Macacos cynamolgos*) from Dr. C. Kruger, in Java.

By royal patent of the 13th inst., dated Stockholm, the King of Sweden and Norway has appointed Mr. C. Kruger to be his Majesty's Vice-Consul at Amoy, and Mr. H. Dirks in the same capacity at Swatow, both under the jurisdiction of the Swedish and Norwegian Consulate General at Shanghai.

COMMERCIAL.

COFFEE.—The improvement in this market, both with regard to the manded and the prices paid, is very striking, and continues unabated. Sales of the week 32,000 bags.

SUGAR.—The raw market remains quiet and no alteration in values. A fair demand has sprung up for ord. qualities of refined, and 15,000 loaves were taken at previous quotations.

RICE.—Market quiet, but prices have a tendency to rise, as the stocks are getting low.

SPICES.—The demand for Cassia Lignea still continues, and former prices are easily obtained. There is more inquiry for pepper, but at previous quotations.

SPELTER.—At the end of last week 2,000 centners, special marks, were sold at 13 marks 12 sch. bco., since which an improved demand set in, and 10,000 centners changed hands at 14 mks. bco. on the average, which may be considered the present value.

DISCOUNT.—The money market is easy, and discount has fallen to 2 per cent. for good paper.

SHIPPING INTELLIGENCE.

Sailed from Cuxhaven May 18, Freya, to Singapore.

LONDON, MONDAY, MAY 27, 1867.

THE FAILURES IN THE CHINA TRADE.

WHILE our home trade has been slowly but steadily recovering from the effects of the panic which last year swept like a tornado over the mercantile world, and while foreign and colonial commerce generally has shown a like improving tendency, a gloom has still hung over the China trade, gradually but surely undermining confidence and destroying credit. This feeling of insecurity has undoubtedly been due in great measure to the unsatisfactory condition of the firm of DENT and Co., who were known to have sustained heavy losses, and whose downfall would, it was felt, be a severe blow to the trade generally. Even after the return of their drafts on their London agents, hopes were entertained that with time and forbearance their difficulties might be tided over; but at last the impending crash came, and even those who had most confidently expected it, stood aghast at the frightful ruin it disclosed. The announcement that a firm which had for years rejoiced in such unimpeachable credit, transacted such an immense business, and possessed such vast resources as DENT and Co., could offer no better terms than half-a-crown in the pound, payable in two and a half years; and (still more extraordinary) that such an offer should be meekly accepted by even a portion of their creditors, was received with mingled surprise and incredulity. There is however no doubt about the fact, and unpalatable as it may be we must accept, and make the best of it. Indeed, in the minds of some persons the first feeling of dismay has already given way to a sense of relief. It is felt that while a small firm in difficulties may struggle on for a time without causing any wide-spread injury to trade, a colossal house such as DENT and Co., when once hopelessly involved, has the pernicious effect of an upas tree—useless in itself, yet exercising a deadly influence on all around it; so that its dissolution may act somewhat after the fashion of a severe thunderstorm, seeming, while it lasts, to shake the very foundations of the earth, but leaving behind it a clear, calm, and serene atmosphere, with the prospect of a long continuance of fair weather. So let us hope that out of evil may come forth good. As a warning to others this disaster will have its use. Reckless speculators in the China trade have had many serious warnings of late; let them take heed that they do not disregard this, the greatest of all.

It hardly comes within our province to attempt any close investigation into the causes by which this disaster has been brought about; still, the various attempts that have been made to account for it cannot be allowed to pass entirely without comment, for the affairs of DENT and Co. are now quite as much public property as those of OVEREND, GURNEY, and Co. Indeed the analogy is greater than would at first sight be supposed, for owing to its high reputation for integrity and solvency, the house of DENT and Co. has for many years been accustomed to receive on deposit the savings or spare cash of numbers of persons resident in China; and these sums in the aggregate must have amounted to something considerable. The announcement published by *The Times* on the 9th inst. was coupled with a statement that the difficulties of the firm arose from heavy losses sustained by Mr. JOHN DENT, through his connection with the Blakely Ordnance Company. On the following day a paragraph appeared contradicting this, and asserting that they were caused by "losses through frauds to a large amount committed at Shanghai by one of their clerks." This was followed up by a letter from Captain BLAKELY denying that Mr. DENT had incurred any loss through that company. The original company, Captain BLAKELY says, consisted solely of Mr. DENT and himself, and Mr. DENT profited by it to the extent of £67,000. In 1865 Mr. DENT wished to sell the concern, in order to raise money to retrieve losses *which had already occurred in China*; a "limited" company was got up to take over the property, payment was taken in bills, bonds, or shares; Mr. DENT's portion of these, amounting to £115,000, was discounted or sold, and with the money thus obtained he sailed to the rescue of his firm. The new "limited" company, like most of its class, proved but a bubble; the bills were dishonoured, and Captain BLAKELY, having endorsed them jointly with Mr. DENT, had to take them up. Such is the version of the affair given by Captain BLAKELY, who concludes his letter by expressing the deepest sympathy for Mr. DENT. In reply to this statement, Mr. CHOMLEY, the partner now in London, publishes a letter distinctly denying that any such sum was ever received by the firm from Mr. DENT, and further asserting that, although Mr. DENT had put £30,000 into the original company, he had never received a penny out of it, and that instead of taking £115,000 as his share of the purchase money, he got no more than £5,000.

Here the matter must rest, we suppose, until Mr. DENT himself has an opportunity of throwing some light upon it. There is a very general feeling that it was hardly fair on the part of Captain BLAKELY to write the letter above quoted, or of *The Times* to print it, during Mr. DENT's absence; and for the honour of all concerned we trust that a complete explanation will be forthcoming, such vague and contradictory statements as these being in the highest degree discreditable. In the meantime it is evident that neither Mr. DENT's private losses, nor the peculations of a clerk, could alone suffice to account for such a complete wreck. These, combined with heavy losses on tea shipments, have doubtless helped; but there is little doubt that the chief cause may be traced to a long course of reckless expenditure and mismanagement at Shanghai during Mr. DENT's absence from China. Be the causes what they may, it is sad, very sad, to have to record such an ignoble ending as they have led to. Total bankruptcy, utter annihilation, would have seemed more consistent with the character of the house than such a composition as that offered. How it will be received in China we have yet to learn.

THE CHINA DINNER.

THE third dinner has been successfully carried through at Willis's-rooms. The chairman on this occasion was Lord LONGFORD, who was for a short time in China as General PAKENHAM in the commissariat department of the army. There is always a difficulty in finding a suitable and willing president, but we trust that next year a gentleman representing the mercantile interests of China and Japan will be found to fill the post. Our readers are aware that an attempt has been made to form a nucleus for the formation of a CHINA CLUB, but nothing further can be attempted at present than to keep the matter in view. A club for gentlemen who have been resident in China and Japan would be a very acceptable, and we believe successful undertaking, if it could be organised without the usual lavish expenditure incident to these undertakings. We know that it would be highly appreciated by a large number of gentlemen returning from the Far East, who now feel very much the want of a place of meeting in London. The company present on this occasion comprised the following noblemen and gentlemen; several others had also entered their names, but were prevented from attending:—

The Earl of Longford, Lord Grosvenor, Lord John Hay, Sir John Davis, Sir W. T. Power, Sir Charles Straubenzie, Admiral Sir M. Seymour, Hon. N. G. Dixon, Rev. H. Huleatt, General Balfour, Lieut.-Col. Dunne, Major Anson, Major Edwards, Dr. Irvine, Messrs. Ashton, Antrobus, Angier, Batchelor, Barned, Campbell, Cresswell, Cull, Elles, Ewing, Gray, Holliday, Hallam, Halton, Hudson, Hope, Harrison, Johnstone, Lamond, Lancaster, J. J. Mackenzie, Martin, Mouncey, D. W. Mackenzie, Macandrew, Ormiston, Pereira, Porter, Rickards, Robertson, Skinner, Sassoon, Stewart, Stuart, Alex. Smith, Arthur Smith, W. H. Smith, Thorburne, Walkinshaw, Wise, Waller, Whatmore, Walker.

On the completion of the dinner the usual loyal toasts were proposed and drunk, followed by the toast of

"The Army, Navy, and Volunteers."

The Army was responded to by General Sir Charles Straubenzie, who at one time commanded the garrison at Hong Kong; the Navy by our old and highly esteemed friend Admiral Sir Michael Seymour, who said it was with much pleasure he again met the residents of China—that station

Digitized by Google

which had always been to him the most eventful in a professional view, and the most agreeable in a social view. Mr. Antrobus responded for the Volunteers of China, and in a very neat speech gave an idea of the value of the services rendered on many occasions by the Shanghai corps. He had hoped to have exhibited on the table the "China Challenge Cup," which had arrived in this country, but was detained at Southampton owing to the necessary forms not being passed through the Customs; a duty exception having been promised by Government.

The next toast, also from the chair, was "China and Japan," responded to by Sir John Davis with his usual ability. He was glad to again have the opportunity of meeting those connected with a country in which he took so great an interest. He was happy to say that the Chinese were slowly yielding to Western influences, and he regarded the establishment of the College at Peking as a very important stride. He complimented the Japanese on being of a less subtle character, and that although they resisted our proposals for trade and residence at first, they had finally succumbed with more credit and grace than the Chinese.

The next toast was that of success to the "China Club," proposed by Mr. Montgomery Martin, who made some useful and interesting comparisons between our career in India and China. He believed that we had at present but scratched at the outer crust of that great empire; he hoped that the members of the "China Club" would be instrumental in promoting our interests there. Lord John Hay briefly responded.

The next toast was "The Commerce of China and Japan," by Mr. A. R. Johnston, who regretted that the old faces of his day in China were disappearing, and that he himself was constrained to feel old in consequence. China was so interesting and so important a country that no one could forget their connection with it.

The response was given by Mr. J. J. Mackenzie, who deplored the present condition of the China trade, but trusted that it would recover itself, and that the merchants would again see a prosperous state of trade.

The health of the chairman having been proposed by Admiral Seymour, the visitors rose at 10.30 and entered upon a general conversation until twelve.

THE PROPOSED TELEGRAPHS IN CHINA.

The East India Telegraph Company of New York, which proposes to lay a telegraph cable from Hong Kong to Shanghai, touching at the intermediate open ports, has commenced sending out materials, and has desired its agent in London—Mr. F. C. G. Ritso—to enter into a contract for the manufacture, laying, and guaranteeing for a certain period, of a submarine cable. Mr. Seward, the Secretary of State, and Mr. Welles, Secretary of the Navy, have instructed the American Minister at Peking and the Admiral in command of the China Station to render every assistance in their power to this enterprise. The company is not intended to be purely American; it is anxious to be international, and arrangements are now being entered into to give to parties in England a share in its control. It is to be hoped it will receive the support of our China houses, and that English and American interests in China will be equally promoted by these means.

IN reference to a notice recently issued from the Post-office relative to additional mail services to Aspinwall, we understand that arrangements for the transmission of correspondence to China and Japan, *via* San Francisco, have not as yet been completed.

China and Japan; a Complete Guide to the Open Ports of those Countries, together with Peking, Yeddo, Hong Kong, and Macao, with 56 maps and plans. By W. F MAYERS, F.R.G.S., H.M.'s Consular Service; N. B. DENNYS, late H.M.'s Consular Service; and CHARLES KING, Lieut. Royal Marine Artillery. Edited by N. B. DENNYS. In 1 vol. 8vo, 600 pages. London, Trubner and Co.; and Hong Kong, Shortrede and Co.—A glance at this volume suffices to show that no pains have been spared by its authors to make it not only a complete guide-book for the use of persons actually visiting the various treaty ports of China and Japan, but a really useful work of reference, such as cannot fail to be acceptable to all who take any genuine interest in either of those countries. And although written in a very simple, unpretending style, it is moreover essentially a *readable* book; dry dissertations being avoided, and such technical and statistical information as are necessary to make it complete being generally given in a tabular form. Each of the ports or places treated of (twenty-seven in number) has a separate section of the book appropriated to it, commencing in most cases with a general description of its size, appearance, geographical position, and approach or mode of access. A slight historical sketch of its origin and development follows; then a detailed account of its present condition, plan, institutions, chief buildings and Government. This is succeeded by observations on the trade, currency, and population, with the needful statistics; notes on climate, hygiene, food, clothing, &c.; and much other information of a varied but always useful nature. The descriptive and historical parts are very interesting, and, being interspersed with apt quotations from the best writers on China and Japan, tend to make the book, as we have already said, quite a readable one. On the whole, therefore, it may be considered to fulfil the purpose for which it is put forth, and to supply the want which undoubtedly existed of a thoroughly practical handbook of information regarding China and Japan. But the volume is by no means faultless. In the first place, it is a pity it was not printed in England, for, although as a specimen of Hong Kong typography it is not otherwise than creditable to Messrs. Shortrede's establishment, its appearance is marred by a certain want of finish, and the binding is by no means so good as it should be. Of the numerous maps and plans it contains, some (especially those of Hong Kong and Shanghai) are carefully and elaborately drawn, but many of the others are very sketchy; too meagre, in fact, to be of any use at all. In those of Nagasaki there are several errors; "Tokits," for instance, is printed "Gokito;" "Takaboko" becomes "Gakaboko;" and the "Governor's Road" is strangely transformed into the "Governor's *Pond*." There are errors in the letterpress too. "Mogi Bay," which is correctly printed on the map, becomes "Mogibay" in the description. Nor are these misprints confined to names of places, the occasional misspelling of which is in some degree excusable, but they unfortunately extend beyond this, and we need look no further than the third page to find a simple English word absurdly misspelt. Again, "Tientsin" and "Yang tz' Kiang" are each spelt in two different ways on the same page. And here and there we come upon passages written in such a slipshod style as to indicate either undue haste in composition, or the absence of any careful revision of the proofs; probably both. Such defects as these do not in any serious degree militate against the practical utility of the book, but care should still be taken to correct them in the future editions which will doubtless be called for.

General Observations on the Port and Trade of Chefoo, and on Trade in the North of China.—This is a well-written pamphlet of about a dozen pages, issued by Mr. J. P. Watson, of 47, Lime-street, with the view of drawing attention to the resources of Chefoo and the surrounding district. The writer gives a concise *resume* of the history of the port, and an interesting account of its trade. He points out that the one thing needed to place the ports in the Gulf of Pecheli on a most satisfactory footing is the establishment of a direct home trade; and that of the three ports Chefoo offers by far the greatest advantages for this purpose, being the only one that is not closed by ice during the winter. The navigation is easy, the anchorage safe, and it is even now a sort of central depôt for the trade of the gulf. For some time the rising tendency of the trade was checked by the prohibition contained in the treaty of Tientsin regarding the export of certain descriptions of native produce in European vessels; but since this restriction was removed, in 1861, the entire carrying trade between Chefoo and the southern ports has fallen into the hands of Europeans, and the increasing use of steamers bids fair to add another element to the prosperity of the port. Chefoo, however, with the neighbouring port of Tientsin, languishes for want of direct shipments from home. The same was the case a few years back with Nagasaki and Yokohama; they were dependent for supplies of imports on those China ports that became from time to time over-stocked, and that branch of trade was consequently very speculative, subject to violent fluctuations, and altogether in an unsatisfactory state; whereas the direct home trade now established has placed them in a greatly improved position. There seems to be no sufficient reason why a similar result should not be practicable with regard to Chefoo.

In our summary of new publications last month we omitted to notice the appearance of *Judy*, a three-halfpenny imitation of *Punch*, which was very poor from the first, and seems to get worse every week. We have now to record the appearance of another humorous weekly publication called *The Tomahawk, a Saturday journal of Satire*. This is far more presentable, and the first two numbers contain some very clever sketches. It is illustrated by a single cartoon only, and is well printed on toned paper, the price being threepence. The chilling blast that had such a depressing effect on the Derby appears to have proved fatal to our juvenile contemporary, the *Little Times*, that literary bantling not having been seen or heard of since the 22nd. The public seems to bear its loss with resignation.

The following is a summary of the miscellaneous works

Digitized by Google

published during the fortnight; they are not very numerous.—

In Literature, Science, and Art, Mr. Murray publishes in one volume his *Handbooks to the Cathedrals of England*, this one comprising the western division. The literature of Reform has received an addition in the *Questions for the Consideration of a Reformed Parliament*, a series of essays by various writers, well worth the attention of members of both Houses. Professor Morley has issued a new volume of his *English Writers*, from Chaucer to Dunbar. Professor Leone Levi has collected into one volume his papers on *The Wages and Earnings of the Working Classes*, with facts illustrative of their economical condition, which originally appeared, we believe, in the *Daily Telegraph*. A work on the *Social and Political Dependence of Women*, also just published, by an anonymous writer, forms a sort of accompaniment to the preceding book.

In History and Biography we find a volume of papers read at the London Congress of the Archæological Institute of Great Britain and Ireland, published under the title of *Old London*, in which, however, we miss Mr. Dixon's very curious and interesting paper on the Tower; a *History of the Machine-Wrought Hosiery and Lace Manufactures* is given us by Mr. William Felkin, who seems well acquainted with the subject. Mr. Dyer edits a very interesting book on *Pompeii, its History, Remains, and Antiquities*, with an account of the destruction of the city, and a full account of the remains and the recent excavations, with an itinerary for visitors; it has nearly three hundred woodcuts. Mr. Hew Scott's *Fasti Ecclesiæ Scoticanæ* is a voluminous work on the succession of ministers in the parish churches of Scotland, from the Reformation of 1560 till the present time; the first part contains the synod of Lothian and Tweedale. A portion of the second part of Professor Stephens's work on the *Runic Monuments* is issued at the request of several archæologists before the rest of the volume; it contains an account of the Ruthwell Cross, Northumbria, &c., &c., from a South English transcript of the tenth century, with translations, comments, &c. The *Life of the late Professor of Geography in the University of Berlin, Carl Ritter*, is given us by Mr. Gage; and Sir Adolphus Slade writes an account of *Turkey and the Crimean War*, a narrative of historical events.

In Fiction, Mr. Charles Clarke republishes, in a complete form, his novel of *The Flying Scud*, in 2 vols., founded on the play of that name by Mr. Boucicault; Mr. F. W. Robinson gives us a new one, called *No Man's Friend*, 3 vols.; and Miss Hesba Stretton, who was first brought into notice in Dickens's Christmas number of "All the Year Round," publishes another novel, *Paul's Courtship*, 3 vols.

CHARTERED MERCANTILE BANK OF INDIA, LONDON, AND CHINA.

The ninth annual general meeting of shareholders was held on the 21st inst., at the banking-house, Broad-street; Mr. G. G. NICOL, the chairman, presiding. The report of the directors having been taken as read,

The CHAIRMAN proceeded to move its adoption. He supposed some disappointment was felt in respect of accounts, but he thought that, considering the trying period they had passed, and the circumstances existing during the past two years—two years such as probably never before were experienced—they would consider it was rather a matter of congratulation that so little comparative injury had been done to the bank. When he last addressed them he was in hopes—and at the time they had a well-founded expectation—that things would turn out well and favourably; but the failures of the Commercial, the Agra, and more particularly the banks in Bombay, which were the origin and root of the mischief, then took place, and caused affairs to assume a threatening aspect. They considered it advisable, and in the interests of the bank, that they should pursue a cautious policy, and instead of carrying on their usual business on the usual scale, they deemed it prudent to curtail at every point. The consequence was that their business had been greatly reduced during the year, and therefore the same means of earning profits had not occurred. No doubt as events progressed, if they had been a little less conservative and a little less restrictive, they might have made more profits, but having regard to the threatening affairs which existed ten months ago, he thought the shareholders would concur in the propriety of the course pursued by the board. They might have made a little profit, but the hazard would have been very great. With respect to the accounts, they would see, as a proof of the curtailment of their business, that their liabilities, which were the measure of their business, had been reduced upwards of three millions as compared with the same statement of the preceding year. That would show they strictly carried out a policy of caution and care. At the same time, as a further proof of their watchfulness, the shareholders would observe that the same accounts showed cash in hand, bullion at the bankers, and Government securities to amount to within a trifle of the actual deposits and issues, proving incontestably that the directors took every precaution to preserve the company against emergency, and to fortify it at every point. He thought no bank would have stood the crisis as they had done, and he believed it would be gratifying to the shareholders to know that at no time were the board not able to meet any emergency that could have happened, and that the bank never stood so high as during the trying period of last year, both in the East and in London. They attributed these results to their cautious and conservative policy. They had unfortunately, through the force of circumstances, been obliged to trench upon their reserve fund, but they had nothing to withhold from the shareholders, and they desired to be frank, explicit, and straightforward, and to lay before them their actual position. (Hear, hear.) They therefore considered it expedient to alter the usual form of the account, and they had credited the profit for the year; and on the other side they had debited it with the losses they had written off. The amount of the loss was large —£134,000; but fully three-fourths of it belonged to the year 1865. It might be asked why that had not been written off before. In writing off the statement of losses in Bombay in the previous year they wrote off every shilling which came under their notice at the time; but then followed the crisis, and a great collapse took place in Bombay, bank after bank failing, and in the end they found that securities they had considered good were greatly depreciated, and the debtors whom they previously believed to be sound failed. They therefore had to add a considerable sum to the losses of last year. As he had already said, that loss belonged to 1865, and their present manager was not to blame for it. Their profit, which was £102,221 3s. 2d., was not a large amount; but if they remembered that it was almost impossible to make profit out of exchanges, which they were aware was the only business they now carried on, they would consider it a matter of congratulation that the profit was so large. For nine months in the year the exchanges in India were actually below par. When he addressed them last year, the board were in hopes that the exchanges, following the usual course, would be favourable nine months of the year, but the reverse had been the case, and any profit had been out of the question. During the past two years they had entirely confined their business to exchanges, that being the most legitimate business for a bank like theirs, and they must consider £102,000 made out of such unfavourable elements to be not unsatisfactory. They had been very luckless to have trenched upon their reserve fund, but it would be only for a very short time, and their first duty and consideration would be to bring it back to its proper figure. They were very sanguine in the matter, and before long they hoped to be able to return what they had drawn from that source. He really thought, now that the evils from which they had suffered were at an end, and the banking system of India divested of its dangerous elements, and as all reckless competition had ceased, that the position before them was one of safety as well as profit. They were now in a position to benefit by their experience, which had been severe, and after a time they should be in as prosperous a condition as they had ever been in. Mr. Robertson, their chief manager, had just returned from an inspection of the branches, and his report was satisfactory in every respect, both as regarded the business of the branches and the staff. They expected to derive great advantages from Mr. Robertson's visit, and one of the first measures they should take in consequence would be to organise a more efficient inspection of their branches than they had hitherto had. In that respect they had been a little to blame. Within the past two years their managers when trained had been seduced from them, but that state of things was now at an end, and they had decided upon having two inspectors going over their branches in India, China, and Japan.

Mr. G. BROWN called the attention of the chairman to the item of "landed and house property at head offices and branches," which stood at £206,487. He considered the sum was exceedingly large when compared with the accounts of the Oriental and other concerns, and wished to know how it had been created. He thought the accounts were not quite so explicit as they could have wished, and complained that the results of the working of the various branches were not given separately, with the view of showing the good from the bad. No bank had better credit in India and China than theirs, and it was highly desirable to place the fullest details before the public.

Mr. BUTLER-JOHNSTONE asked if every item of loss was provided for. He had the greatest confidence in the chairman and the board of directors, and had induced a large number of his friends to go into the bank, but he wanted to see all the details in the accounts.

The CHAIRMAN, in reply, said the directors were opposed to invest ments in buildings, but in a bank like theirs it was indispensably necessary that their staff at all points should be comfortably and well housed. No doubt the amount referred to by Mr. Brown was heavy, but the greater portion of it arose from the building in which they were now assembled. They found their old bank inconvenient in many ways, and they purchased the new premises, which they considered a good investment. At the same time they should be only too glad to wipe the item from their books, and whenever they could effect a sale on advantageous terms they should be happy to dispose of the greater part of them. The new building in London was freehold, and it had cost them £115,000. They reckoned that when they let the upper floors they should occupy the ground-floor at a moderate rental. It was, and had always been, the desire of the directors to give the shareholders the fullest information, but there were many points, considering that their meeting was public, on which it would not be well to be too explicit. They had written off more than they were required to do. Before closing the accounts they received intelligence from Bombay that they had over estimated the amount by £20,000, but they considered it was better to let it stand. In writing off £134,000 they considered, as far as they could see at present, they had made full provision.

A SHAREHOLDER asked the chairman what was the percentage of the costs of the establishment on the capital.

The CHAIRMAN replied it was about 15 per cent., and he believed it was impossible for an Indian bank to be carried on successfully and with an able staff for less. The board had no desire but to meet the wishes of the shareholders in every way. They saw nothing objectionable in Mr. Brown's suggestion, and all he could say was, they should give the matter their best consideration before the next meeting.

Mr. BROWN said there was an opinion generally entertained on the part of the shareholders that it would be advisable to meet the directors every six instead of twelve months. (Hear, hear.) At present they were a whole year without receiving any intelligence of their property.

The CHAIRMAN said the question introduced by Mr. Brown, although it had never been mooted before by the shareholders, had been under the consideration of the directors. Speaking for himself, he could say the directors could not meet the shareholders too often. (Hear, hear) But at the same time they should require to know whether it was the general wish of the shareholders that they should meet half-yearly. They declared a dividend twice a year, and therefore the object of a half-yearly meeting would be to give a statement of the affairs.

The CHAIRMAN then asked for a show of hands, which resulted in a unanimous approval of the suggestion of Mr. Brown, and a resolution was subsequently drawn up by that gentleman, fixing the holding of the half-yearly meeting on the third Tuesday of the month of November in each year.

In answer to Mr. BUTLER-JOHNSTONE,

The CHAIRMAN repeated a statement made by him at an early stage of the proceedings, namely, that his conviction was that everything in the shape of loss was provided for. The accounts had been most rigidly audited, and everything they were likely to lose had been written off. The directors were the largest shareholders, and surely it was not to be sup-

Digitized by Google

posed they would trifle with their own property. Indeed he might state, without committing a breach of confidence, that the directors had increased their holdings within the last two or three days. (Cheers.) With respect to their prospects during this year, although the exchanges up to the present time had been unfavourable, and since the 1st of January below par, yet the profits they had realised for the first three months were very satisfactory, and much more than they could have expected, and as exchanges were becoming favourable, there was every reason to expect the half-year would at least be a tolerably good one.

Messrs. G. G. Nicol (the chairman) and J. M. Robertson (the retiring directors) were re elected. Messrs. J. Smith and J. J. Mackenzie were elected auditors at a salary of 100 guineas a year, and Messrs. Coleman, Turquand, Young, and Co. were appointed to audit the accounts in conjunction with those gentlemen. A cordial vote of thanks was accorded to the chairman and directors.

Mr. ROBERTSON, the chief manager, having been called upon to address the meeting, stated that his visit to the branches was necessarily brief. He had looked into the position, security, cash, and current business in each establishment, and found everything thoroughly satisfactory; and the bank at all points was in the hands of efficient, able men, who understood their business. He thought there was every prospect of a good year's business. There was much less competition now than before, and business was on a sounder footing. He had found that the four months' usance system was becoming generally adopted, and those merchants who had opposed it seemed ready to acknowledge its advantages.

Naval and Military.

The *Army and Navy Gazette* states that Captain Leopold Heath, C.B., and not Captain Nolloth, will succeed Commodore C. F. Hillyar, on the promotion of the latter to flag rank on the East India station. Captain Heath is deficient in sea time, and will therefore willingly resign the desirable and lucrative post of Vice-President of the Ordnance Select Committee in order to secure so desirable an object. It is rumoured that Captain Sir W. S. Wiseman, who made room for Captain Heath four years ago, at the request of the then Board of Admiralty, for the purpose of proceeding to New Zealand, where his presence, from the fact of his having acted in concert with Sir George Grey previously at the Cape of Good Hope, was calculated to produce beneficial effects, will again resume his old office. The appointment would, we believe, be popular both within and without doors, as the naval element will not be sufficiently represented in the committee on the retirement of Captain Heath.

Vice Admiral James John Stopford has retired, owing to his impaired health, from the Active List of flag-officers, consequently Captain Codd, now superintendent of the Victualling Yard and Hospital at Plymouth will have to resign his appointment and to accept the rank of tetired Rear-Admiral, owing to his being above sixty years of age. Commodore C. F. Hillyar will be promoted to the Active List of rear-admirals and will, as above stated be succeeded by Captain Heath, C.B. By the retirement of Vice-Admiral J. J. Stopford, and the consequent promotions from the Captain's List, two good service pensions have fallen to the disposal of the First Lord of the Admiralty.

Lieut.-General Sir Robert Douglas, Bart., commanding at the Cape of Good Hope, has appointed his Aide-de-Camp, Lieutenant C. H. Boyleau, 61st Foot, to be Assistant-Military Secretary, in succession to Lieutenant-Colonel J. C. Gawler, 73rd Foot, who has joined his regiment in China on promotion. Lieuteuant Charles E. Lang, 11th Foot, will succeed Lieutenant Boyleau as Aide-de-Camp to General Douglas.

His Italian Majesty's ship Eurydice, 24 guns, Capt. Cavalier Bertelli, arrived at Spithead from Genoa and Gibraltar, and on anchoring exchanged the customary salutes with the Port Admiral's ship at Portsmouth and the garrison saluting battery. Unfortunately, in firing the salutes from the Italian frigate a very serious accident occurred, two of her men in reloading one of the guns being blown into the water out of the gun by a premature explosion of the charge on being rammed home in the gun, supposed to have been caused by the vent of the gun not being "served" properly—*i.e.*, the external air kept from the chamber of the gun by pressure of the thumb of the man on the touchhole of the piece whose duty it was to attend to that part of the gun's loading. One of the poor fellows had his hand blown off, and the other had his arm severely fractured.

The Lords of the Admiralty have determined on erecting fortifications on St. Catharine's Island, near Tenby, and tenders have already been received. The island commands an important point of the Bristol Channel, and the new works will be a valuable addition to the range of fortifications around Milford and Pembroke.

Her Majesty's steam transport Euphrates, which was built by Messrs. Laird Brothers, of Birkenhead, and was floated on the 24th of November last, has received her rigging and completed her fittings. Last week she finally left the New Alfred Dock, Birkenhead, and was formally handed over to Government. Capt. Montagu Dunn assumed the command. Mr. E. J. Reed, Chief Constructor of the Navy, and Mr. Luke, one of the Admiralty Inspectors, were present. She is a very fine vessel, and is the first of the five transports destined for the Indian relief troops service, *via* Suez. Her length is 365 ft., breadth 49 ft., maximum draught of water 21 ft., and tonnage 4173. Her engines, which are of 700 horse power nominal, were also constructed by Messrs. Laird, who have, in fact, built and completed the ship throughout at their own works. The cylinders are 94 in. diameter, with 4 ft. 6 in. stroke. Her accommodation is for 1,450 persons—1,250 military and 200 crew. After her trial at Portsmouth she will proceed to Bombay to commence, in August, the new system of relief.

The launch of the unarmed screw sloop Danäe, 4 guns, 350-horse power, constructed from the designs of Mr. E. J. Reed, the Chief Constructor of the Navy, has been successfully accomplished from No. 2 building-slip of Portsmouth Dockyard.

A trial of the engines of Her Majesty's armour-plated ship Northumberland took place at the measured mile outside Plymouth breakwater last week. This ship belongs to the same class as the Agincourt and Minotaur. She was built of iron by the Millwall Company, and was launched in April, 1866. Her length is 400 ft., breadth 59 ft., and tonnage 6,621 tons. Her lower masts only were in; there were 320 tons of coal on board, no stores; draught of water forward, 23 ft.; aft, 24 ft. 1 in. The trial took place under the superintendence of Captain George C. Willes, C.B., of the guardship of Steam Reserve Indus, and Mr. William A. Dinnen, chief-inspector of machinery afloat, and several other Government officers. The engines, from the manufactory of Messrs. John Penn and Sons, are what are termed direct-acting trunk, diameter of cylinders 112 in., of trunk 41 in., thus producing an effective diameter of 104¼ in.; length of stroke, 4 ft. 4 in. There are ten boilers and 40 furnaces; the fire-grates are 3 ft. 1 in. by 7 ft. 9 in.; number of brass tubes, 4,800; diameter, 2¾ in.; length, 6 ft. 8 in. The screw propeller has four blades —diameter, 23 ft. 9 in.; mean pitch, 23 ft. 4 in.; length, 1 ft. 11¼ in.; immersion of upper edge, 1 ft. Six runs at the measured mile, under full boiler power, gave a true mean speed of 15·459. She then made four runs under half-boiler power, showing a true mean speed of 13·079. The engines were under way for six and a-half hours, and during the whole of this time worked most satisfactorily.

The *Army and Navy Gazette* has the following from Hong Kong. We hope the informant will not blush now at the reproduction:—"Some months ago, in allusion to the insalubrity of Hong Kong, statements were made of the condition of the 2nd battalion 20th Regiment, at that station, which we have now the best reason for saying were so exaggerated as to be very nearly the reverse of the truth. It was represented that the battalion would 'be incapable of a five miles march, and might be practically struck off the efficient strength of the army.' On the best authority, under date Hong Kong, 28th of February, we learn that the 2nd battalion 20th Regiment, since its arrival at Hong Kong in May, 186,k had lost by death only seven men, from causes attributable to climate, three from other causes, and that thirteen men were invalided out of a strength of 756 non-commissioned officers and men. A mild type of fever was prevalent at the period of change of temperature in the autumn. At the end of February the battalion had only twenty men in hospital, from causes with which the climate was at all connected, and was in as efficient a state for service anywhere as any battalion in the army."

The following circular, under date "Admiralty, May 15, 1867," has just been posted at the several Royal dockyards in the kingdom:—"Sir —I am commanded by my Lords Commissioners of the Admiralty to acquaint you that they desire to draw the attention of commanders-in-chief and senior officers to a custom which appears to be somewhat prevalent in the fleet, of officers wearing whiskers of such inordinate size and length as to resemble beards, which latter are prohibited by the printed instructions. The regulations of the naval service require that any such irregular habit should be prevented, and that officers should be permitted only to wear the same length of whiskers as the seamen under their divisional superintendence.—I am, sir, &c., HENRY G. LENNOX."

Monetary and Commercial.

The biddings for £250,000 in bills on India took place on the 16th at the Bank of England. The amounts allotted were—to Calcutta, £157,500; to Madras, £3,500; and to Bombay, £80,000. The minimum price was fixed as before at 1s. 11¼d. on all the Presidencies. Tenders on Calcutta and Madras at and above the minimum will receive in full; those on Bombay at the minimum about 34 per cent., those above in full. A further falling off is thus indicated in the demand for means of remittance to the East.

The following correspondence has appeared in *The Times* regarding Messrs. Dent and Co. and the Blakely Ordnance Company, to which we have alluded in another column:—

"Sir,—As you have alluded to the report so industriously circulated in the City, that Messrs. Dent and Co. failed in consequence of losses incurred by Mr. John Dent in connection with the Blakely Ordnance Company, I shall be greatly obliged if you will allow me to state how untrue this is.

"Mr. John Dent did not lose one penny in the Blakely Ordnance Company. He gained no less than £67,000 by his partnership in that firm, which consisted only of himself and me. If the Blakely Ordnance Company (Limited) be meant, there is equally little foundation for the rumour, for this company did not come into existence till June, 1865, a year later than the losses occurred in China which eventually caused the stoppage of the house; and the limited company was formed actually in consequence of those losses, and to enable Mr. John Dent to retrieve them. Until then the old Ordnance Company (Mr. Dent and myself) had had a run of uninterrupted prosperity, and in 1864 and 1865 was making cannon worth a quarter of a million a year, of which 20 per cent. was profit. All this prosperity was sacrificed in the endeavour to save Messrs. Dent and Co. On the news of their losses reaching Mr. John Dent, he persuaded me to sell our business to a limited company, and he refused to allow the highly respectable firm of Cazenove to bring it out, because they would not guarantee the placing of as many shares as he required to furnish him with a large sum of ready money to take to China. We contracted with another party, and the consequence was that in two months three-fourths of the shares in this company were in the hands of dummies. Before we discovered this, however, we had handed over our valuable property to the bubble company, receiving in exchange its bills, bonds, and shares. Mr. Dent's portion was £115,000. He discounted or sold these, and in August, 1865, sailed for China with the proceeds, and lent them all to Messrs. Dent and Co.

"Of course, the Blakely Ordnance Company (Limited) dishonoured the bills; but although they were endorsed and drawn by Mr. John Dent and myself jointly, he has been unable, in consequence of the difficulties of Messrs. Dent and Co., to help me in taking them up. Neither Mr. John Dent nor Messrs. Dent and Co. have refunded one shilling of the £115,000 they had out of the proceeds of the sale of the Blakely Ordnance Company, unless £18,000 sent to me on another account be reckoned.

"A large portion of this sum, which all goes towards the dividend to the creditors of Messrs. Dent and Co., comes directly out of my pocket,

Digitized by Google

for I had to take up as many of the dishonoured bills as I could, even although Mr. Dent had had the money. I ask these creditors, therefore, before repeating that Messrs. Dent and Co. lost by Mr. John Dent, and he by me, to inquire fully into the circumstances, and they will find that I have lost as much as any four of them through Messrs. Dent and Co. They will further join with me in the deepest sympathy for Mr. John Dent, and the conviction that he least of all concerned is to blame for our misfortune.—I am, Sir, yours obediently, "T. A. BLAKELY.

"May 11."

"London, May 14.

"Sir,—With reference to the letter of Captain Blakely which appeared in this day's Money Article of *The Times*, I think it right, as a partner of Dent and Co., resident in China during the whole period referred to by Captain Blakely, to say that no sum in any form was remitted or handed by Mr. John Dent to the firm during the time in question. I am assured that Mr. John Dent never received one penny from the Blakely Ordnance Company, in which he placed £30,000 cash, and that of the £115,000 stated to have been received as his share of the purchase money paid by the Blakely Ordnance Company (Limited) not more than £5,000 cash was received by him.—I am, Sir, your most obedient servant,

"FRANCIS CHOMLEY."

The return of the Bank of England for the week ending Wednesday, May 22, compared with that for the previous week, shows the following changes :—

Circulation issue	£33,532,965	Increase	£440,310
Circulation active	22.771,450	Decrease	413,055
Public deposits	8,584,864	Increase	1,050,652
Other deposits	17,185,452	Decrease	327,871
Government securities in banking department	12,886,314	No change.	
Other securities in banking department	19,122,822	Decrease	136,184
Coin and bullion in both departments	19,664,068	Increase	418,791
Seven day and other bills	429,571	Decrease	29,531
The Rest	3,148,367	Increase	2,412
Notes in reserve	10,761,515	Increase	853,365
Total reserve (notes and coin) in banking department	11,892,618	Increase	831,846

The changes are extraordinarily favourable. The absence of any important demand for money is shown in the fact that, while more than a million of Government deposits was paid into the Bank during the week, there was actually a decrease of £136,184 in the advances on mercantile securities. The amount of notes in circulation has consequently been diminished to the extent of £413,055, and the important addition of £831,846 has been made to the reserve. During the week the Bank received in imported gold only £120,000, and, as the increase in the coin and bullion above shown is £418,791, a strong reflux from the internal circulation is indicated.

Mr. Robertson, the Chief manager of the Chartered Mercantile Bank of India, London, and China, has returned from his tour of inspection of the branches in India, China, and Japan.

The annual meeting of the Chartered Mercantile Bank was held at the bank's premises on the 21st inst., and the report noticed in our last issue was unanimously adopted. The explanations afforded by the directors were full, and have imparted confidence. There has been a demand for the shares at advanced rates. A report of the meeting will be found in another column.

The palmy days of the P. and O. Company are at an end for the present. The revulsion in the trade of India and China during the past year has made an important difference to the company's earnings, to which has also to be added the competition of the Messageries Imperiales, which has deprived them of large sums in freight and passage money. The directors have acted wisely in avowing their inability to announce the interim dividend which has been customary, with few exceptions, for 25 years. This circumstance will, of course, have an important bearing on the tenders about to be sent in for the new postal service to India and China. Government must be prepared to pay a higher rate than hitherto, and considering the large surplus already realised from the postal service, and the saving soon to be effected by the stoppage of the subsidy to the Cunard line, they can certainly afford it. It is now perfectly demonstrated that a line of steamers cannot run from Suez to India and China without a liberal subsidy. The shares of the company have fallen to par.

The directors of the Messageries Imperiales Company, at the annual meeting of the 31st of May, will propose that the dividend for 1866 shall be 50f. Of this sum 20f. have been paid.

For some time the position of Messrs. Robert Smith and Co. has been questioned. Indeed, since the arrangement made last year with their creditors there has been a want of confidence in the firm. This, coupled with the continued depression in the China trade, including losses on both imports and exports, has been more than they can surmount; arrangements have consequently been made for winding up the business of the firm as speedily as possible, under inspection. The house here and in China (Smith, Kennedy, and Co.) has, since its establishment, enjoyed a very high reputation.

The failure has been announced of Messrs. Fraser, Trenholm and Co., Liverpool, who formerly acted as agents for the Confederate Government. The liabilities are about £1,000,000 and the estimated deficiency £160,000. The difficulty has arisen from losses in cotton, and also from a lock-up of capital in steamships, which are a subject of litigation with the United States Government.

Annexed are some practical suggestions with regard to the accounts of joint-stock banks :—

Sir,—The period is advancing when the usual half-yearly balance-sheets of the joint-stock banks will be in the course of publication, audited or not. These documents are issued in a form at the discretion of the several boards of directors irrespective of uniformity. There cannot be any reason why joint-stock banks should not issue a uniform balance-sheet, and that monthly instead of half-yearly, involving, as some of them do, an amount of transactions nearly approaching the Bank of England, and exercising in the aggregate a vast influence in the monetary and commercial world. At present the public, or their shareholders, are in utter ignorance of their transactions until the half-yearly statements are published. There is one very important item which never appears in any of the balance-sheets—viz., the amount of overdue bills.

"The subjoined form of balance-sheet is respectfully submitted for consideration, with the suggestion that it should be published in the *London Gazette* monthly. The time has passed for deception or concealment in accounts, whether railways, banks, assurance, or other trading companies, which, after what has so recently transpired, should in every instance be independently authenticated in every material particular, without any Government interference or authority.

"Mr. Richard Moon, at the late half-yearly meeting of the London and North-Western shareholders, stated, unquestionably speaking from considerable experience, 'My belief is that the auditorship of a company is the most important business in a company. I am certain that none of the disasters which have come upon the different companies around you would have happened if the auditors had done their duty. But you must bear this in mind, that it requires auditors to be strong-minded men—not easily persuaded, driven, or cajoled.'

"Never were truer words uttered by a chairman.—I am, Sir, your obedient servant, "J. G."

The eighteenth ordinary general meeting of the British India Steam Navigation Company will be held at the company's offices, No. 3, East India-avenue, Leadenhall-street, on Wednesday, 29th inst., at one o'clock.

A petition for the winding up of the National Provincial Marine Insurance Company (Limited) is to be heard before the Master of the Rolls on the 1st of June.

The loan of £1,000,000, in an 8 per cent. stock, at the price of 80, proposed by the Greek Government, is now being offered for subscription, among the various Greek communities of the principal trading cities of Europe and elsewhere. Little progress, however, has been made except at Alexandria, where £120,000 has been taken. In London the leading Greek merchants have adopted the honourable course consistent with their established character, and intimated to their Government that they cannot consent to favour any loan until a satisfactory settlement shall have been made with the English bondholders.

A large meeting of the creditors of the London, Bombay, and Mediterranean Bank, which was ordered to be wound up last year, was held on the 24th, to receive a report and statement of accounts from the official liquidators, Sir Thomas Parkyns, Bart., and Mr. James Cooper (of the firm of Johnstone, Cooper, Wintle, and Evans), as to the complicated questions arising out of the amalgamation between this bank, the Continental Banking Corporation, and the London and Mediterranean Bank. After a lengthy discussion as to the course to be pursued, to avoid the evil consequences likely to ensue from the continuance of the three separate liquidations, a committee was appointed to concert steps for some combined scheme of liquidation.

The amount of bullion by the P. and O. Company's steamer *Syria*, from Southampton, on the 20th inst., was—In gold, to

HANKOW.—The Imports for the month of February were as follows:—Opium, 297 chests; sandalwood, 264 piculs; Sapanwood, 1,958; Seaweed, 1,800; Brown Sugar, 6,904; White do., 3,167; Cotton, 16,714; Cuttlefish, 842; Iron, 617; Quicksilver, 56; Grey and White Shirtings, 95,147 pieces: T-Cloths, 10,109; Drills, 2,052; Chintzes, 2,850; Brocades, 5,000; Long Ells, 4,480; Camlets, 3,449; Orleans Cloth, 3,230; Lastings, 320; Damasks, 1,700; Spanish Stripes, 642; Cloth, 276; Treasure, taels 13,750. The Exports were:—Black Tea, 844 piculs; Green do., 3,492; Silk, 34; Rhubarb, 198; Hemp, 2,626; White Wax, 280; Oil, 10,593; Tallow, 4,313; Safflower, 243; Tobacco, 1,071; Varnish, 502; Steel, 570; Fungus, 527; Gall Nuts, 430; Copper Cash, 193; Treasure, taels 294,230. The duties collected during the month amounted to taels 21,048.

KIUKIANG.—The imports during February have been:—Opium, 204 chests; Lead, 290 piculs; Tin, 123: Sandalwood, 340; Seaweed, 2,265; Sugar, 2,691; Black Pepper, 142; Cotton, 1,749; Salt Fish, 237; Grey Shirtings, 6,830 pices; White do., 400; T-cloths, 3,380; Chintzes, 118; Velveteens, 252; Long Ells, 547; Lastings, 115; Spanish Stripes, 306; Medium Cloths, 36; Camlets, 692; Lustres, 57; Cotton Handkerchiefs, 400 dozens. Exports: Grass Cloth, 366 piculs; Hemp, 197; Paper, 1,797; Vegetable Tallow, 380; Tobacco, 747; Black Tea, 482; Green do., 2,555; China Root, 366. The duties have amounted to tls. 10,362 during the month of February.

CHINKIANG.—Imports for the month of February:—Cotton Piece Goods, 1,360 pieces; Woollen Piece Goods, 464; Malwa Opium, 281 piculs; Patana do., 13; Sandalwood, 503; Sugar, 2,341; Pea Oil, 1,075; Wood Oil, 4,262; Vegetable Tallow, 1,480; Hemp, 568; Tobacco, 108; Treasure, tls. 34,600. Exports: Raw Cotton, 265 piculs; Silk Piece Goods, 24; Treasure, tls. 153,226. Total of duties collected during February, tls. 746.

CHEFOO.—During the month of February thirteen vessels arrived and fourteen were cleared. The Imports received during the month were as follows:—Opium, 64 piculs; Paper, 3,409; Seaweed, 12; Sugar, 7,773; Matches, 300 gross; needles, 310,000 number. Exports: Bean Cake, 73,116 piculs; Peas, 7,067; Cotton, 108; Dates, 565; Vermicelli, 1,530; Wheat and other Grain, 342. Total amount of duties, tls. 8,386.

EXPORTS TO THE FAR EAST.

The quantities and value of the Cotton Goods shipped from the ports of London, Liverpool, Southampton and the Clyde, to China, Japan, Singapore, Batavia, Manila, and Ceylon during the month and five months ended 16th May of the years 1865, 1866, and 1867 are given in Mr. Sam Mendel's monthly export tables as follows :—

TO HONG KONG AND WHAMPOA.—For month ended 16th May, 1867: Plain Cottons, 3,194,725; Coloured Cottons, 216,775; Printed Cottons, 40,440 yards; Cotton Yarn, 441,650 lbs.; total value of Cotton Goods, £104,997. For the five months ended 16th May, 1867: Plain Cottons, 13,245,895; Coloured Cottons, 634,682; Printed Cottons, 246,518 yards; Cotton Yarn, 1,547,038 lbs.; total value of Cotton Goods, £406,469. For the five months ended 16th May, 1866: Plain Cottons, 17,500,861; Coloured Cottons, 2,129,688; Printed Cottons, 296,200 yards; Cotton Yarn, 1,917,758 lbs.; total value of Cotton Goods, £625,281. For the five months ended 16th May, 1865: Plain Cottons, 8,801,954; Coloured Cottons. 1,821,791; Printed Cottons, 117,826 yards; Cotton Yarn, 873,820 lbs.; total value of Cotton Goods, £837,880. Decrease in value for 1867 against 1866, £288,812.

TO SHANGHAI.—For the month ended 16th May, 1867: Plain Cottons, 6,121,130; Coloured Cottons, 511,120; Printed Cottons, 71,285 yards; total value of Cotton Goods, £115,597. For the five months ended 16th May, 1867: Plain Cottons, 31,277,670; Coloured Cottons, 5,316,197; Printed Cottons, 2,073,369 yards; Cotton Yarn, 103,132 lbs.; total value of Cotton Goods, £804,013. Decrease in value for 1867 against 1866, £470,806. For the month ended 16th May, 1866: Plain Cottons, 43,978,964; Coloured Cottons, 5,342,575; Printed Cottons, 1,591,590 yards; Cotton Yarn, 8,000 lbs.; total value of Cotton Goods, £1,274,319. For the five months ended 16th May, 1865: Plain Cottons, 26,883,448; Coloured Cottons, 1,806,536; Printed Cottons, 901,131 yards; Cotton Yarn, 68,580 lbs.; total value of Cotton Goods, £696,965.

TO JAPAN.—For the month ended 16th May, 1867: Plain Cottons, 1,003,670; Coloured Cottons, 967,836; Printed Cottons, 136,100 yards; Cotton Yarn, 211,200 lbs.; total value of Cotton Goods, £80,366. For the five months ended 16th May, 1867: Plain Cottons, 7,339,015; Coloured Cottons, 2,085,585; Printed Cottons, 441,730 yards; Cotton Yarn, 946,900 lbs.; total value of Cotton Goods, £298,716. Decrease in value for 1867 against 1866, £145,984. For the five months ended 16th May, 1866: Plain Cottons, 13,008,636; Coloured Cottons, 998,794; Printed Cottons, 1,319,936 yards; Cotton Yarn, 793,800 lbs.; total value of Cotton Goods, £444,700. For the five months ended 16th May, 1865: Plain Cottons, 4,215,722; Coloured Cottons, 646,640; Printed Cottons, 403,352 yards; Cotton Yarn, 72,100 lbs.; total value of Cotton Goods, £142,750.

Digitized by Google

To SINGAPORE AND PENANG.—For the month ended 16th May 1867: Plain Cottons, 2,602,176; Coloured Cottons, 376,019; Printed Cottons, 209,168 yards; Cotton Yarn, 68,751 lbs. For the five months ended 16th May, 1867: Plain Cottons, 23,502,417; Coloured Cottons, 4,425,127; Printed Cottons, 1,581,797 yards; Cotton Yarn, 851,881 lbs.; total value of Cotton Goods, £695,903. Decrease in value for 1867 against 1866, £45,608. For the five months ended 16th May, 1866: Plain Cottons, 22,504,446; Coloured Cottons, 3,170,374; Printed Cottons, 1,804,098 yards; Cotton Yarn, 544,020 lbs.; total value of Cotton Goods, £741,511. For the five months ended 16th May, 1865: Plain Cottons, 13,839,110; Coloured Cottons, 1,699,921; Printed Cottons, 819,483 yards; Cotton Yarn, 549,301 lbs.; total value of Cotton Goods, £418,546.

To BATAVIA.—For the month ended 16th May, 1867: Plain Cottons, 1,999,913; Coloured Cottons, 3,264,199; Printed Cottons, 2,654,117 yards; Cotton Yarn, 98,185 lbs.; total value of Cotton Goods, £181,145. For the five months ended 16th May, 1867: Plain Cottons, 9,184,345; Coloured Cottons, 7,724,725; Printed Cottons, 8,117,209 yards; Cotton Yarn, 305,755 lbs.; total value of Cotton Goods, £598,351. Increase in value for 1867 against 1866, £26,425. For the five months ended 16th May, 1866: Plain Cottons, 14,028,270; Coloured Cottons, 4,656,679; Printed Cottons, 3,161,210 yards; Cotton Yarn, 214,505 lbs.; total value of Cotton Goods, £571,926. For the five months ended 16th May, 1865: Plain Cottons 3,006,653; Coloured Cottons, 1,811,365; Printed Cottons, 2,217,570 yards; Cotton yarn, 110,100 lbs.; total value of Cotton Goods, £194,202.

To MANILA.—For the month ended 16th May, 1867: Plain Cottons, 2,318,167; Coloured Cottons, 2,851,029; Printed Cottons, 61,992 yards; Cotton Yarn, 22,210 lbs.; total value of Cotton Goods, £126,012. For the five months ended 16th May, 1867: Plain Cottons, 7,258,943; Coloured Cottons, 7,511,441; Printed Cottons, 577,224 yards; Cotton Yarn, 66,226 lbs.; total value of Cotton Goods, £386,337. Increase in value for 1867 against 1866, £222,557. For the five months ended 16th May, 1866: Plain Cottons, 2,577,540; Coloured Cottons, 3,225,386; Printed Cottons, 39,120 yards; Cotton Yarn, 15,700 lbs.; total value of Cotton Goods, £163,780. For the five months ended 16th, 1865: Plain Cottons, 3,387,918; Coloured Cottons, 3,476,943; Printed Cottons, 550,115 yards; Cotton Yarn, 36,050 lbs.; total value of Cotton Goods, £194,051.

To CEYLON.—For the month ended 16th May, 1867: Plain Cottons, 1,788,196; Coloured Cottons, 111,620; Printed Cottons, 278,374 yards; Cotton Yarn, 11,000 lbs.; total value of Cotton Goods, £46,109. For the five months ended 16th May, 1867: Plain Cottons, 9,432,035; Coloured Cottons, 810,174; Printed Cottons, 1,455,402 yards; Cotton Yarn, 53,500 lbs.; total value of Cotton Goods, £269,649. Decrease in value for 1867 against 1866, £1,434. For the five months ended 16th May, 1866: Plain Cottons, 6,079,965; Coloured Cottons, 856,639; Printed Cottons, 2,037,764 yards; Cotton Yarn, 170,003 lbs.; total value of Cotton Goods, £271,083. For the five months ended 16th May, 1865: Plain Cottons, 2,366,354; Coloured Cottons, 773,110; Printed Cottons, 404,132 yards; Cotton Yarn, 63,149 lbs.; total value of Cotton Goods, £111,729.

ARTICLES OF IMPORT.

TEA.—Our market still remains without general activity, but on the whole a moderate amount of business has been done, and prices have ruled very steadily, the arrivals having been small, whilst Deliveries for home consumption and export continue on a good scale. Congous: A parcel of 246 boxes "new-make Canton," imported per overland mail as new season '67-68, sold at 2s. 7¾d. to 2s. 8d. This price cannot be accepted as a criterion for the bulk of new teas, as the dealers simply gave a fancy price to have a few boxes new season. The broken-leaf kinds remain very firm at former rates. Fair to good common show no change. Fair to good flavoury kinds have sold at about former prices. Good to fine Kaisows have been realised to some extent at full prices, also good to fine Pak Lins. Common to fair black-leaf kinds have sold steadily at former prices. Fair to good medium kinds show no alteration. Fine to finest have sold in small parcels at full prices. Some sales of new-make Canton from recent arrivals have been made at full prices. Oolongs have been in fair request at fully former prices. In Souchongs there is no material alteration to notice. Some further sales of Flowery Pekoe, of old import, have been made without reserve at about former prices. Some considerable sales of Scented Caper have been made at fully former prices. In Scented Orange Pekoes the sales made show no variation in price, though they have met with rather more inquiry. Uncoloured Japans remain without change. Green Teas: There has been a fair business doing, and prices for all the finer kinds are steadily supported, whilst the commoner kinds still remain comparatively difficult of sale. Canton Gunpowders and Young Hysons have been sold at fully previous prices. Another report says an invoice of 4,000 packages first crop Kaisows, ex Flying Spur, sold, after more competition than has been witnessed for some months past, at from 1s. 11d. to 2s. 5d. per lb. The last day or two attention has again been given to Scented Teas, especially Capers, the Dilpussund from Canton bringing 10,000 boxes, about half of which have already been sold at full prices. The prospects for New Season's Teas continue good, provided they are bought to show a margin on the present standard of prices ruling here, which for fine Congous show no material change since the opening of the year, and if the export from China season 1867-68 is somewhat on a scale with the monthly requirements, we shall have a steady market throughout.

SILK.—The silk market has been active during the past fortnight, and prices of all descriptions have experienced some improvement. Accounts of the European crop have gradually become less favourable, but till within the last day or two few would believe in a really bad result; now however, complaints are so general and so alarming, that all are of opinion that the crop of 1867 will be a sad failure; hence there is a large speculative business doing, and prices have a decided upward tendency. Deliveries from 1st to 23rd inclusive: China, 1,736 bales; Japan, 497 bales; total, 2,233 bales. The following are the current quotations:—

COTTON.—Chiefly owing to the distrust occasioned in commercial circles by the recent large failures at Liverpool, transactions in this market have been much curtailed, and prices generally exhibit a decline of ¼d. per lb., both on the spot and for arrival. The total sales since our last report have been 6,985 bales on the spot, and 6,350 to arrive. On the spot 10 bales China, of fair quality, realised 10½d. per lb., and afloat 700 bales Dhollerah 8⅝d. to 9d. per lb. Deliveries from 1st January to 23rd May of China and Japan 1,964 bales; total of all descriptions, 67,531; stock of China and Japan 23rd inst., 538; of all descriptions, 44,584 bales. The sales in Liverpool have reached 69,510 bales, of which the trade have taken 47,990 bales, speculators and exporters 21,520 bales. Imports this week 23,875 bales; this year 1,361,858 bales. Actual export this week 28,415 bales; this year 262,662 bales. Middling Orleans is quoted at 11¼d., and fair Dhollerah at 9¼d. per lb.

COFFEE.—Since our last report an active demand has prevailed, and the colory sorts of Plantation Ceylon, of which there was a good supply, sold with competition at an advance of about 1s. per cwt. Native Ceylon was quiet in the early part, but the favourable results of the Dutch sale created more firmness, and about 2,000 bags have changed hands privately at an advance in some cases of 6d. per cwt. Of Plantation at public auction 1,794 casks, 145 barrels, and 800 bags were placed as follows:—triage, 39s. 6d. to 65s.; fine ordinary small to fine fine ordinary, 72s. to 76s.; low low middling and middling, 77s. 6d. to 82s.; good and fine middling, 83s. to 89s.; fine, 90s. to 93s.; peaberry, 86s. to 93s. The following quantities of Native also found buyers:—43 casks small, 58s.; good ordinary, 63s.; fine ordinary, 65s. 6d.; 92 tierces good small, 60s.; good ordinary, 63s.; fine ordinary, 68s. 6d.; 41 barrels good ordinary, 63s. 6d.; fine ordinary, 68s.; and 3,778 bags ordinary, 54s. to 54s. 6d.; small, 57s. to 61s.; good ordinary, 63s. to 64s. 6d.; fine bold, 70s. to 71s. 6d.; garblings, 37s. to 48s. 6d.; low, 13s. 6d.

CORAL.—A portion of 53 cases Singapore realised—for white 20s., and for red 10s. to 15s. per case.

DRUGS.—Anniseeds: 88 boxes China Star were bought in at £6 10s. Camphor: Prices are maintained at the previous advance, and 125 tubs Japan realised at auction, £6 16s. 3d. per cwt. No offers of China. Cardamoms; 31 bags Ceylon sold, slightly mouldy, at 2s. 8d., sound, at 2s. 9d. Galls: Private business to some extent is being done in China at 60s., and 200 boxes at auction were bought in at 63s. per cwt.

GUMS.—Benjamin: At auction 20 cases sea-damaged Siam, ex wreck of the City of Delhi, sold without reserve, 1 case at £16 the remainder block at £5 15s. to £8 15s.; also 4 bags at £4. Damar: 30 cases Singapore sold at 67s. 6d., and 124 boxes Batavian were bought in at 80s. to 82s. 6d.

HORNS.—The sales have comprised 3,370 Horns (5 tons) Siam Buffalo, averaging 670 to the ton, at 45s., and 2,809 horns (2 tons) Ceylon Deer at 66s. 6d. per cwt.

JAPAN WAX.—At auction 33 boxes ordinary mixed saucers sold at 61s.

MANILA HEMP.—On the spot 150 bales Albay realised £50, and afloat 500 bales Sorsagon, February sailing, £48 per ton.

MOTHER O'PEARL SHELLS.—At the public sales of the past week a good supply of Manila was brought forward, which met with a limited demand, and sold at a considerable decline. Of 226 cases offered only 50 found buyers at £9 to £9 5s. for good bold, the remainder being bought in at £10 to £11 for good to fine bold.

MALACCA CANES.—Of 50,000 canes offered about one-half sold at 1⅞d. to 3¾d. each.

PLUMBAGO.—The market is without change; 89 barrels medium Ceylon lump sold at 19s. 6d. to 20s.; and 400 barrels dust realised, medium 8s. 9d. to 9s., low medium 7s. 9d., ordinary dull 6s. 9d. per cwt.

PEPPER.—The demand for Black has been very limited, and only about 500 bags have been sold at steady prices; 1,936 bags Penang at auction were held firmly and bought in at 2 15-16d., the damaged only selling at 2⅞d. to 2⅞d.; 308 bags fair Singapore White were disposed of rather easier at 5½d. to 5⅝d.

RICE.—Holders having accepted rather easier prices, the business on the spot has been of fair extent—viz., 10,000 bags soft grain, Nakrenzie at 11s. 6d. to 11s. 9d., Rangoon at 12s. 3d., 700 bags White Bengal at 18s., and a few Ballam at 14s. to 14s. 6d. For arrival, a cargo of 1,100 tons Nakranzie has been sold for the Continent at 10s. 4½d., and 100 tons Bengal at 16s. 3d. landed here. At auction, 1,400 bags of the latter were withdrawn, but 1,000 bags have since been sold at 18s. 6d.

SUGAR.—Since our last report the demand, though not particularly strong, has been steady, and transactions of fair amount have been concluded at former prices. The only sale of East India reported is 1,000 bags unclayed Manila at 24s. to 24s. 6d.

SHELLS.—Of 332 cases Singapore about one third sold as follows:—Nautilus 30s. to 32s., Clams 19s. to 21s., Trocas 18s., Murex 34s., Mussels 10s., Cones 50s., Melons 34s., Strawberry Cockles 29s. to 30s., May Blossoms, 50s., Helmets 15s. to 18s., and Nagah at 10s. per case.

TORTOISESHELL.—A good supply has been brought forward at the public sales of the past week, for which a fair demand was exhibited, and the greater portion found buyers at fully previous rates. The following sales are reported:—29 cases (574 lbs.) Singapore, good at 14s. to 16s., common to medium, 9s. 6d. to 13s.; very common, 7s. to 9s.; 1 case (51 lbs.) Penang at 10s.; and 4 cases (591 lbs.) Manila at 21s.

VEGETABLE WAX.—At auction 9 casks good fair Singapore sold at 43s.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £5 15s. to nail rod, £7. 12s. 6d. to £8; hoops, £8. 12s. 6d. to £9; sheets, single, £9. 15s. to £10; Staffordshire bars, £7. 12s. 6d. to £8 10s.; rails, £6 to £6. 5s.

Digitized by Google

STEEL.—Swedish keg, £16.

COPPER.—Sheet and Sheathing, £84 to £89 per ton; yellow metal, 7¼d. to 7½d. per lb.

TIN.—£89 for block; £90 for common bars. Tin plates, best charcoal I.C., 30s. to 31s. 6d.

LEAD, &c.—English pig, W.B., £22; shot, patent, £23; sheet, £21; spelter, £21 to £21. 5s.; zinc, English sheet, £26 10s. to £27; quicksilver, £6 17s.

The following is from the Circular of Messrs. French and Smith:—Since our Monthly Circular, dated 4th inst., we have had an improved demand for metals generally. Iron is firm at quotations, and good inquiry for bars and nail rods for the East. Copper also is improved. Tin is very firm, with an active demand for consumption and export. Tin plates steady. Lead also steady. Spelter a shade easier.

FREIGHTS AND CHARTERS.

There has been but little alteration in outward freights to the Eastern ports since our last issue; the berths to those ports are well supplied with tonnage. Coal freights from the northern outports remain firm.

Current rates of freight for vessels on the berth:—To Yokohama: 20s. to 30s. weight, 50s. meast. To Nagasaki: 50s. weight or meast. To Shanghai: 40s. weight, 45s. meast. To Amoy: 45s. weight or meast. To Foo-chow-Foo: 45s. weight or meast. To Hong Kong: 35s. weight, 40s. meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Manila: 40s. weight, 85s. meast. To Ceylon: 25s. to 30s. weight, 35s. meast.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Hong Kong: £46. For Singapore: £40. For Shanghai: £56. For Saigon: £50. For Yokohama: £52. For Batavia: £35. From Newport, Cardiff, or Swansea, per ton.—For Hong Kong, £2 2s. For Singapore: £1 18s. For Shanghai: £2 12s. 6d. For Saigon: £2 8s. For Yokohama: £2 10s. Batavia: £1 15s. Coke.

The Admiralty have invited tenders for the conveyance of 16 tons meast., platforms, &c., including 4 ft. combustibles, 1 ton accoutrements, and 1 ton medical stores, from the Thames to Colombo; and of 9 tons naval masts, 44 tons naval timber materials, 50 tons heavy and 60 tons meast. naval common stores, 28 tons sails, 10 tons cordage, 19 tons iron cables, and 8 anchors, to Hong Kong. The Chetah is likely to be engaged for Hong Kong.

CASUALTIES.

Intelligence received from the master, v.d. Straten, of the Johannes Anthonius, from Rotterdam to Batavia, spoken April 8, in lat. 7 N., lon. 25 W., states that outside the channel the vessel had encountered a severe gale, during which she was thrown on her beam ends, lost much deck gear, and more water than usual had been found by the pumps.

The Englishman, Brown, which sailed from Newport, May 2, for Hong Kong, arrived at Falmouth May 19, leaky, and with crew refusing duty.

The Navigator, Bockelman, from Liverpool to Batavia, which put in at Lisbon, March 18, with foremast head gone, &c., has been discharged, surveyed, a few sheets of copper found to be torn and bulged, and some of the wooden sheathing damaged. She will have to be examined again before heaving down.

The Sea Flower, Talbot, from Sunderland to Shanghai, arrived at Rio de Janeiro April 21, with damage.

The Hortensia, Ellefsen, which sailed from Cardiff, May 9, for Hong Kong, arrived at Queenstown, May 21, reported leaky.

MISCELLANEOUS.

At ASCENSION.—April 23, Laura and Adele, from Java, and sailed 29th for Amsterdam.

Off ASCENSION.—April 11, Liberia, from Singapore, for the Black Sea (?); 12, Deucalion, from Shanghai, for New York; 13, Oceanus, from Sourabaya, for Amsterdam; 21, 1st d. p., No. 0613, from Java, for Rotterdam; 23, China, from Sourabaya, for Amsterdam; 25, Samarang, from Sourabaya, for Dordt; 27, Nieuwland, from Batavia, for Prussia; —, County of Bute, from Batavia, for Rotterdam.

At ST. HELENA.—March 31, Chas Sze, Shewan, from Yokohama, and sailed April 1 for New York; April 1, Doelwyk, Hoefman, from Batavia, and sailed 2 for Amsterdam; 3, Harkaway, Hitchens, from Java, and sailed 5 for Amsterdam; 4, Cecilia, Svendsen, from Sourabaya, and sailed 5 for Falmouth; 5, Kronprinsen, Bothen, from Batavia, and sailed 9 for Falmouth; 6, J. Fraser, Norton, from Banjoewangie, and sailed 8 for Amsterdam; 7, Bantam, Claasen, from Sourabaya, and sailed 8 for Belle Isle; 11, Nelson, Cobb, from Ceylon, sailed for London; 12, Gebroeders, v. d Beek, Walig, from Banjoewangie, detained by illness of master; 18, Eastern Queen, Milburn, from Nagasaki, and sailed for London; Padang Packet, Huidecoper, from Padang, and sailed for Amsterdam; 19, Esperanza, Onate, from Macao; 20, Reina de los Angelos, Kulmel, from Macao; 21, Sea Sprite, Hatfield, from Colombo, and sailed 22, for London; 22, Lichstraal, Wierikx, from Banjoewangie, and sailed for Rotterdam; Lady Ann, Gilles, from Colombo, and sailed for London; San Luiz, Carranza, from Manila, and sailed 23 for Cadiz; 23, John Rennie, Gaggs, from Singapore, and sailed 24 for London; Taffarette, Bourgeois, from Hong Kong, and sailed 25 for Havre; 24, Libra, Dirksen, from Tjilatjap, and sailed 25 for Rotterdam; 26, Mina, Achutegui, from Macao; Liberator, Robertson, from Colombo; Anna and Sophia, Hoekstra, from Batavia.

Off ST. HELENA.—April 13, Hesperia, from Ceylon; 21, Webfoot, Sturrock, from Java for Amsterdam.

At Table Bay, April 8, Xulla, Ward, from Padang for New York; 12, Akbar, Pizzey, from Colombo, and sailed 17 for London.

Off Cape of Good Hope, March 21, Jacques Sternum, (?) (Dutch barque), from Batavia for Rotterdam, April 12, Sea Serpent, from Canton, for London.

At Algoa Bay, April 10, Auguste & Meline, v. Harten, sailed for Galle.

At Mauritius, April 8, Cutty Sark, Orr, from Saigon; 13, Bride, Gibson, sailed for Singapore; 16, Belsize, Rundle, sailed for Galle.

The P. and O. Company's steamers *Bungalore* and *Columbian* are appointed to leave Southampton for Alexandria in June. They will continue on this line for some time, as also the new steamer *Sumatra*, lately launched from the yard of Messrs. Denny, of Dumbarton. The steamer *Nemesis*, formerly running between Suez and Calcutta, has been sold out of the service.

REPORT.

For presentation to the Second Ordinary Meeting of the Shareholders to be held at the Offices of the Company, on Tuesday, the 2nd April, 1867, at 2.30 o'clock P.M. precisely.

The Directors have much pleasure in laying before the Shareholders the usual statement of the transactions of the Company during the half year ending 31st December, 1866, with a Balance Sheet as on that date, showing a surplus of Shanghai Taels **342,718.40**, over and above the paid up Capital of Taels **250,000**.

The Directors feel that the Shareholders cannot fail to be gratified with the continued prosperity of the Company as shown by this result, as well as with the large amount of Premia received during the year 1866 ..... Taels **855,474.30**
as compared with 1865 ..... " **622,575.42**

This yearly increase, which has always been a prominent feature in the business of the Office, and characterises the present report in so very marked a degree, is the best proof of its growing popularity, and the confidence and support which it enjoys among the mercantile community in China, London, and other places where it has Agencies.

Unfortunately the past year has also been attended by a succession of unprecedentedly heavy marine disasters (particularly in the East India and China trades), which has rendered it a most unremunerative one to underwriters in all parts of the world, and, as the losses mentioned in the accounts embrace *nearly* all those known to exist on Policies underwritten in 1866, it is gratifying, in the face of such exceptional circumstances, and after paying claims to the amount of Taels **483,985.52**, to be able to point to the above result.

The Balances at the Debit of the various agents have all been duly remitted since the 1st of January, 1867, excepting the sum of Tls. **264,419.24** which is kept in London *deposited in Banks or against Bank Bills as security in the name of the Company*, as a reserve to meet claims which may arise upon any out of the large number of Policies made payable there. For a similar reason a Balance is kept in the hands of the Hong Kong Agent.

In accordance with the provisions of the Deed of Settlement the term of office of the Directors,

Messrs. DAVID REID.
W. J. BRYANS.
E. F. DUNCANSON.
Messrs. F. H. BELL.
W. LEMANN.

expires this day, but they all offer themselves for re-election, for which they are eligible.

The Auditors, Messrs. Rowley Miller and George Mackay, likewise retire by rotation and offer themselves for re-election.

By order of the Court of Directors,

JOHN S. MACKINTOSH, Secretary.

BALANCE-SHEET—31ST DECEMBER, 1866.

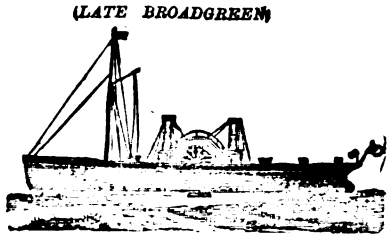
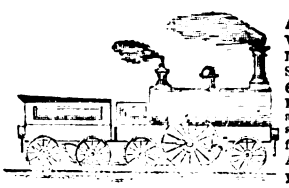
GEORGE RICHARDSON & CO.

Central Chambers, 17 South Castle-st.

LIVERPOOL.

(*LATE BROADGREEN*)





An immense variety of Vertical, Horizontal, Locomotive and Marine Steam Engines from 6s 6d to £5 each. Metallic Model Screw and Paddle Steamers and Sailing Yachts from 5s to £30 each. All thoroughly tested previous to dispatch.

TESTIMONIALS.

From LORD BROUGHAM.

I think very highly of your Telescope as a powerful Instrument, and am quite astonished at the very moderate price you have put upon it.

From D. CRIGHTON, Esq., FORFAR, N.B.,

I have thoroughly tested your £2 2s. Od. Model Steam Engine, with which my boys are highly delighted; the material and workmanship are excellent, and being quite safe, I don't know of a more useful and instructive mechanical gift for young lads.

From the Hon. F. G. WYNNE.

The Hon. F. G. Wynne is highly pleased with the 17s 6d Vertical Engine, it is remarkable cheap, and well worth its price. He gives Mr Richardson great credit for it.

From A. COURT, Esq., Her Majesty's Ship Cumberland.—

Your Telescope and Microscope are both admirable and wonderfully cheap.

TELESCOPES.

The Lord Brougham Telescope.—This splendid Telescope will distinguish the time by a church clock five miles, a flagstaff ten miles, windows ten miles off, landscapes thirty miles off, and will find the satellites of Jupiter and the phases of Venus, &c. This extraordinary cheap and powerful glass is of the best make, and possesses Achromatic Lenses, and is equal to a Telescope that costs £5. No Schoolboy or Tourist should be without one. Price 7s 6d, will be sent free by Rail, or post, for 8s 6d

THE NEW MICROSCOPE.

This highly finished Microscope is warranted to show the animalcule in water, eels in paste, &c., magnifying several hundred times. The Microscope is mounted on a brass stand, and has a compound body with Achromatic Lenses, Test Objects, Forceps, and spare glasses for mounting objects, &c. &c. The whole contained in a highly polished mahogany case, price 7s 6d, or will be sent carriage free (by Rail) for 8s 6d.

ILLUSTRATED CATALOGUE.

G. RICHARDSON & Co. have published a Catalogue of 80 pages, illustrated with 8 full page engravings of Steam Engines, 8 Lithographed Drawings, beautifully printed in colours, of Screw & Paddle Steamers & Sailing Yachts, and 12 Views of Magic Lanterns and Slides describing upwards of 1500 Slides embracing every subject, also full particulars of Microscopes, Telescopes, &c., &c. G. R. & Co. earnestly invite every one to procure a copy, as it gives an extended view of the various articles which cannot be put into an advertisement. It will be sent free on receipt of ONE Stamp for postage.

CHARTERED MERCANTILE BANK OF INDIA, LONDON, AND CHINA.

(INCORPORATED BY ROYAL CHARTER.)

CAPITAL PAID UP, £750,000. RESERVE FUND, £145,902. 14s. 8d.

NINTH ANNUAL REPORT OF THE COURT OF DIRECTORS TO THE SHAREHOLDERS.

The Directors now submit to the shareholders the audited balance-sheet, profit and loss and reserve fund accounts, for the year ending 31st December last.

From these it will be seen that the profit amounts to £102,221 3s. 2d., to which has to be added £2,713 14s. 2d., brought forward from the previous year, making a total of £104,934 17s. 4d.

A sum of £75,000 has been paid in two half-yearly dividends of 5 per cent. each.

The shareholders will probably have anticipated from the disastrous events of 1866 that the results of the Bank's operations for that year have been unsatisfactory. Looking forward to the possibility of continued danger, the Directors considered it their duty to curtail as much as possible their business at all points, and it will be seen from the accounts that this policy has been strictly carried out, though at the cost of a very material reduction of the usual profits of the Bank.

In the report of last year it was stated that losses of an exceptional character had been incurred at Bombay in 1865. Full provision was made for them on closing the accounts for the year, in accordance with the report received from the branch, but the amount proved to be insufficient, and this added to losses incurred in 1866—though these have been comparatively small—has necessitated a heavy sum being withdrawn from the reserve fund, which now stands at £145,902 14s. 8d.

The Directors, however, express the confident opinion that all further danger having now passed away, a prosperous future may be fairly reckoned on, more especially as the previous excessive banking competition is much reduced, and the great laxity consequent thereon no longer exists.

Since the date of the last report Mr. Robertson, the chief manager, has personally inspected every branch in India, China, and Japan, and the Directors are gratified in being able to state that the result of his inspection has been perfectly satisfactory.

The Directors retiring on this occasion are Mr. George Garden Nicol and Mr. James Murray Robertson, who, being eligible, offer themselves for re-election, and the Court recommends them accordingly.

The shareholders will have to appoint auditors for the current year.

65, Old Broad-street, 4th May, 1867.

GEO. G. NICOL, Chairman.

From Galle to Singapore: Mr. Bird.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The present mail brings advices from this port to the 17th April. The outward mail of February 11 arrived out on the 5th April, and that of February 16, conveying also London telegrams to the 7th March, was delivered in Yokohama on the 13th April. The Pacific Mail Company's steamer *Hermann* arrived on the previous day, and having left San Francisco on the 2nd March, brought Atlantic Cable telegrams to the 1st. The *Colorado* was expected between the 20th and 24th. The *Hermann* is to be stationed at Yokohama as a spare or relief ship, to be availed of in case of accident to any one of the regular line, and when not so required, to be used as a receiving vessel for the imports and exports by the *Colorado* and her sister ships, so as to facilitate their loading and unloading, and diminish, as far as possible, the delay at Yokohama. The *Hermann* is a very old ship, having been built at least twenty years.

On the 11th April H.M.S. *Argus* left for the Inland Sea with Messrs. Mitford, Satow, and Aston, of H.M.'s Legation, together with Captain Daunt, of the 9th Regiment, who will be in command of the Legation Guard, and Captain Applin in command of the escort. It also conveys a portion of the Guard (which has been increased to 40 men) and the Mounted Escort, with their horses, to prepare for the arrival of H.B.M.'s Envoy Extraordinary and Minister Plenipotentiary. H.M.S. *Basilisk* left on the 15th April with Sir Harry Parkes, accompanied by Lady Parkes and one of his children, Mr. Locock, Dr. Willis, and Mr. Wilkinson, of the Legation, and Lieutenant Bradshaw, of the Legation Guard.

H.N.M.S. *Watergens* left shortly after the *Basilisk*, having on board H.E.D. de Graeff van Polsbroek, H.N.M. Diplomatic Agent and Consul-General; and the English and Dutch representatives will be joined later on by the American Minister, who waits the arrival of the *Colorado's* mail before he leaves in the *Wyoming* for Osaka—and by the French Minister. The object with which this visit is made is principally business; and that business includes, amongst various matters connected with the fulfilment of the stipulations of the treaties—the opening on the 1st of January, 1868, of Osaka, Hiogo, Yeddo and another port on the west coast of Japan.

H. E. M. Leon Roches convoked the French residents on the 6th April, and informed them that H.M. the Tycoon of Japan, having spontaneously declared his intention of fulfilling the treaties and conventions to their fullest extent, had invited the diplomatic agents to meet him at Osaka; and that the object of the conferences proposed to be held there would be, not to discuss the treaties, but to agree on the best mode for putting them in execution. Desirous of ascertaining the opinions of the French residents, M. Leon Roches requested them to submit to

Digitized by Google

him, before his departure for Osaka, a report expressing such conclusions as they should have arrived at, after freely deliberating among themselves. Several meetings, we hear, accordingly took place; but, as they were of a strictly private character between the French residents, we are not enabled to give any authentic report of their result.

It appears that Choshiu and another Daimio, Higno or Hosokawa, have disagreed, and that a collision between them is not improbable. The latter holds as prisoners some of Choshiu's men, whom he has refused to give up on the strength of the proclamation of peace which was issued at Kioto on the 27th February. Higno requires a special order from the Mikado, for which there seems to be some reason to think that Choshiu will not wait. This report may or may not be true; the only thing which throws any doubt upon its authenticity is the fact that it was brought up to Yedo by an envoy from Osaka, the bearer of a message from the Shiogoon, requesting postponement of the Ministers' visit.

A most infamous trick, or attempt at a swindle, has been perpetrated by some scoundrel, who has, unfortunately, not been brought to justice. The Japanese silkmen report that some European, representing himself as lately arrived and residing at the United Club, and giving references to several first-class houses and banks, went the round of the principal silk shops and made purchases of some 200 bales of silk at higher than ruling prices. The silk was to be delivered at a certain godown, and thither the anxious sellers repaired at the time fixed, to find that the purchaser was unknown to the people residing there, and that they had either been made the object of a practical joke, or that a deliberate attempt at swindling had been only frustrated by some disarrangement of detail. A heavy fine and deportation would be fitting reward for an act calculated to shake so materially the confidence which at present exists between the native dealers and their foreign customers.

We are glad, says the *Japan Times*, to be able to record an improvement in our commercial and social economy. We have long suffered considerably from an unavoidable delay in the delivery of the mails. We learnt a few days ago, with great satisfaction, that orders have come out from St. Martin's-le-Grand to establish in Yokohama a regular branch Post-office. However efficiently the work may have been done hitherto under the circumstances, and we willingly bear witness to the fact that it could not have been done better, it stands to reason that, in a properly arranged office, with an efficient staff of people, the sorting and delivery of the mails will be accomplished in very much less time than hitherto when it has to be done in a small room where there is hardly room for one man to move if there are three boxes of letters, and where, consequently, additional aid has really been found an impediment.

The following is a copy of the recent notification circulated by orders of H.E. the Governor of Kanagawa respecting the coolies appearing in the streets of the settlement properly clothed. In speaking of this ordinance to a member of a foreign legation the Governor remarked that although the Japanese authorities would do all in their power to see it carried out, yet that it lay mainly with the foreigners themselves, and they should refuse to employ any coolies who were not properly clad. There are nuisances quite as objectionable that are not confined to the coolie class that have to be got rid of before decency is satisfied. Notification: "Those who come from divers places to Yokohama and make their living as porters, carters, labourers, coolies, and boatmen, are in the habit, especially in the summer, of plying their calling in a state bordering on nudity. This is very reprehensible, and in future no one who does not wear a shirt or tunic properly closed by a girdle will be allowed to remain in Yokohama. The coolie masters are to give liberal assistance for the suppression of such people. This notification is to be marked with the hour at which it is seen, and having quickly gone the round is to be returned to this office."

Captain Hatfield, of the American schooner *Swallow*, came by an untimely death on the 4th April, as his ship was going out of the port. He was himself sounding, and part of the rigging against which he was leaning having been previously damaged by coming into collision with the *Lord Collingwood*, it is supposed to have given way, and he was thus precipitated into the water. He was never seen to rise, and as the accident happened late in the evening, the crew were quite uncertain of the precise spot where he went down. The body has not been recovered.

Mr. Edward Clarke, who has from the first held the position of Consul to H.M.F.M. the King of Portugal, and in this capacity was successful in getting a treaty for that country with Japan, has left for England *via* San Francisco. Being called home by urgent private affairs, he has no intention of again returning to the East. He takes with him the respect of the whole community, and their best wishes for his health and happiness in the old country. Mr. Loureiro succeeds him as Consul for Portugal.

A great improvement may be looked forward to shortly in the manners and customs of the Japanese coolies in the settlement and neighbourhood. The Governor of Kanagawa is about to issue an order that the coolies shall not appear in the streets in the tight fitting dress provided by nature solely, but that they shall be properly clad; and that all Japanese shall avoid such of their national peculiarities as are offensive to public decency.

After two ineffectual attempts to get a meeting for the purpose of setting afoot a scheme for the erection of a theatre and establishing an amateur theatrical corps, a third effort proved so far successful as to secure the appointment of a provisional committee, composed of gentlemen in whom the public will have every confidence. Immediately on appointment the members set to work and drew up a prospectus. The proposal of the committee is that a piece of unoccupied land adjoining the Racquet Court, which can be had for $30 per mensem, shall be taken, and upon it an insurable building, the design for which has been gratuitously furnished by Messrs. Whitfield and Dowson, shall be erected. This building is so arranged as to have a stage 20 feet in width, with a depth of 27 feet, with dressing rooms of sufficient number and capacity for ordinary dramatic performances. The audience portion would consist of a pit to hold 162, orchestra stalls to hold 48, dress circle seats 64, dress circle chairs 30, stage boxes 16, gallery about 70, total 390. The estimated cost of this building is $6,500, and the committee propose to raise that sum and an additional $1,500 to provide for furniture, scenery, and contingencies, in all $8,000, by the sale of 320 shares at $25 each, half payable at once. The committee believe that by this means the sum required may easily be raised; as, although of course the more shares any one individual takes, the simpler and easier their task, it is within the means of almost every individual in the settlement to take one or two shares, and so to effect by numbers what would probably not be easily compassed by a few.

NAGASAKI.

The following is from Messrs. Alt and Co.'s market report:—

Since the date of our last report the English mails of the 10th and 26th January, and 11th February, and the French mail of 17th Feb. have reached us.

IMPORTS.—The rapid depreciation in the value of ichibous during the past month has had a most disastrous effect upon our import market, and but for this a fair business would be done. Goods for summer consumption show some improvement. Lawns are now coming into demand. Velvets still continue to be inquired for at quotations, and stocks are nil. Turkey Red Cambrics and Prints of good pattern are saleable. White Shirtings: An increased demand has sprung up. Lustres continue in demand. Stocks of Taffechellas, Camlets, and Grey Shirtings are generally diminishing. Long Ells, especially Scarlet, are much inquired for, and stocks are low.

METALS.—Nail Rod Iron is in demand at quotations, especially small sized. Hoop Iron is also in demand. Lead is beginning to be inquired for at quotations, which show a slight advance over those of last month. Pig Iron: No stocks. English Coal: None in the place.

EXPORTS.—Supplies of produce have come forward rather more slowly, and for some staples an improvement in prices has been observable. Vegetable Wax has advanced rapidly, the few desirable parcels offering being held for extreme rates. Tobacco and Camphor are likewise scarce, and the better qualities realise full prices. Galls are scarce, but quotations are unchanged. Tea continues to attract a fair amount of attention, but supplies are fully equal to the demand, and we do not quote any change in values. Of Silk we have nothing to report.

EXCHANGE.—On London, 6 months' bills, 4s. 3d. to 4s. 4d. per dollar. On Shanghai, 10 days' sight, 2 per cent. prem. On Hong Kong, par, nominal. Ichibous, 328 to 332 per $100.

FREIGHTS.—To London, nothing loading. To New York, no vessels on the berth. To Shanghai the rate is $3 to $4 per ton. To Hong Kong, $4 per ton nominal.

CHINA.

PEKING.

The Peking races, including the fourth Peking Derby, have been brought to a successful close. We subjoin a brief notice of the principal events. The first day was inaugurated with a three-quarter mile race for the Maiden Plate for ponies that have never run previously in China, which was won by Sir Eric Farquhar's Curio, beating The Federal's Monitor and Mr. Murray's Felix Holt. The remaining first day's races were:—The Chal-

Digitized by Google

lenge Cup, presented by R. Hart, Esq., and the gentlemen of the Imperial Maritime Customs—1½ mile; won by Mr. Bismarck's Sadowa. The Celestial Plate, for ponies owned and ridden by student interpreters only—1 mile; by Mr Porter's Shillelagh. The Tientsin Cup, presented by gentlemen of the Tientsin community—1½ mile; by Mr. Murray's Robinson Crusoe.

On the second day the following events were decided:—The Steeplechase won, by Mr. Porter's Shillelagh, the Hack Race, by Mr. Bismarck's Kitzelpelle; the Trial Stakes, for all winners, and for second ponies in Challenge Cup, Tientsin Cup, and Minister's Cup, by Mr. Bismarck's Sadowa; the Consolation Stakes, half-a-mile, for beaten ponies and those that had not run in the Trial Stakes, by Mr. Man's Claymore; the Minister's Cup, presented by the Foreign Legations at Peking, two miles, winners of the Challenge Cup or Tientsin Cup 5 lbs. extra, of both 7 lbs., by Mr. Bismarck's Sadowa; and the Peking Derby, for which seven started, the course being one mile; eventually, after a smart race, the winner was declared to be Sir E. Farquhar's Curio, Mr. Bismarck's Sadowa running second, and Mr. Man's Claymore third; betting 5 to 4 on Sadowa, 2 to 1 against Curio, and 3 to 1 against Shillelagh. Sadowa, in consequence of his previous victories, was the favourite in this race.

TIENTSIN.

Sir Rutherford Alcock was expected to leave Peking in May, on a visit to Shanghai and Canton. He would possibly call at Foochow *en route*.

The Tartar cavalry which have been drilled at Tientsin by Major Brown, have been ordered up to the capital, being reported efficient; and that officer is about to take a new batch of recruits in hand. They are armed and accoutred on the European model, and present a very respectable appearance.

NEWCHWANG.

The detachment of marines from the *Pelorus* has left the port. The conduct of the men was excellent, and does great credit to the officer in charge.

A lightship is soon expected to make its appearance; and other steps are also, it is said, to be taken to facilitate navigation. Some thirty or forty ships have already arrived, and trade is altogether more prosperous than it has been for some year. Piece goods, for which during 1865 and 1866 there was no demand, are now in considerable request. For certain descriptions, however, the stagnation existing in the Corea has proved most unfavourable. The heavy shirtings which formerly were bought for the South-Eastern frontier, are now accumlated in warehouses.

SHANGHAI.

The dates are down to the 23rd April. The P. and O. mail of 26th Feb. arrived out on the 13th April. Telegrams via Kiachta from London had been received up to 19th March.

The trial of Sommer for the murder of Harris, under the circumstances mentioned in our last issue, took place before Mr. Whittall, the Danish consul, on May 11. The prisoner was found "Guilty," but under circumstances of provocation. He will accordingly be sent off in irons to Denmark when an opportunity offers, there to be dealt with according to law.

It has been determined to keep the club open on its present footing until the 30th June next. A general meeting of shareholders will be called in a few days to receive the report of the special committee.

Among the papers read at the meeting of the Royal Asiatic Society held on the 18th April was one by Dr. Macgowan, Commissioner of the East India Telegraph Company, giving, amongst other interesting information, some statistical notes on the steamers sold to Japanese daimios, with remarks on the condition of that empire. After the conclusion of the paper, information having been requested by Dr. Macgowan respecting the prospect of telegraphs in China and Japan, he remarked that with regard to Japan he found the Government of Yedo well disposed towards the enterprise, which but for the death of the Mikado would probably by this time have arranged for the construction of a line between Yokohama and Yedo. He believes that the time is not distant when Japan will be connected by telegraph with the Russo-American line at the Amoor, and he thinks it not unlikely that Shanghai may, by means of a cable to Japan, find its readiest channel of communication with America to Europe.

The Hamburg barque *Atalante*, bound from Ningpo to Newchwang, was totally lost near the Miatou Islands, to the northward of Chefoo, in the gale of the 1st and 2nd April. The captain and crew with the greatest difficulty escaped with their lives.

The following is from the *North China Herald*:—

The movements of the Nienfei on the north bank of the Yangtze have lately attracted some attention, and a political importance has been lent them which they do not seem to merit. They are in every sense of the word banditti, numerous and formidable no doubt, but having no professed creed or object beyond plunder. The truism has been repeated, *usque ad nauseam*, that insurrection of some kind is the nominal condition of China; and distress, however caused, in any district always aggravates the evil. The sufferers seek by brigandage the supplies of which they have been deprived by floods, failure of the crops, or other causes, and go to swell the roving bands of banditti who form ready nuclei round which the disaffected cluster. The hordes now devastating the banks of the Yangtsze owe their present strength to a similar cause. Under the same influence which raised the level of that river to an almost unprecedented height the Hwang-hu last year burst its banks and flooded an immense tract of country in Kiang-nan, causing wide-spread ruin and distress. And here at once arose a fertile recruiting ground for the Nienfei who were already prowling through Honan and Shantung. While some of the wretched inhabitants sought relief at the hands of Government and private charity in Nanking, others betook themselves to plunder, joining for the purpose the ranks of the neighbouring banditti. Reports have from time to time reached us of operations by the Imperialists against these insurgent bands, with varying success First, Tsen-kwo-fan was in the field against them, in Shantung. then Li-hung-Chang joined in the campaign, and utter annihilation was the least fate threatened them. In fact several successes, and eventually their extinction were reported; the fact being apparently that, finding themselves overmatched, they had crossed to Honan, in which and the adjacent provinces they have since been roaming. Li is still in the field against them, but has a difficult enemy to deal with. So long as the Mahrattas confined themselves to sudden dashes with their active irregular cavalry they set us comparatively at defiance, but when they were ill-advised enough to risk a pitched battle, superior arms and discipline told their true tale. So it is with the Nienfei; inferior in arms and equipment to the Imperialists, they evade the latter by the rapidity of their movements, and occasionally even inflict on them severe losses by sudden and unexpected swoops. In their ability, however, to withstand in pitched battle the army that Li has in the field we utterly disbelieve. As we remarked before, they are banditti, active and formidable, but banditti only. Judging from the reports which reach us of their doings, the Taipings were angels of light by comparison. They had, at least, some respect for custom and reputation; they held out religion and dominion as a motive for their acts. The Nienfei aspire to nothing but plunder, and in its pursuit every conceivable enormity is perpetrated. Their numbers, too, are supported by the cruel course they pursue. They burn the villages they have sacked; kill the women, the old men and children whom they capture; and offer the ablebodied survivors the choice of carrying a spear or falling by the sword. When their houses and property are destroyed, and their relations butchered, there is small temptation to the latter to desert their ranks, for the pleasure of returning to shiver and lament over a blackened and desolate hearth.

On the 18th April, before C. W. Goodwin, Esq., re S. Clifton, a meeting was held to declare a first dividend out of the bankrupt's estate. Several creditors attended to prove. Mr. Lawrance appeared for Messrs. Rangel, Woollett, and Co., who claimed £208 6s. 1d. on a balance of account for goods supplied. An affidavit had come out to this effect. The bankrupt deposed that the goods were sent out to him to do the best he could with, and that he had remitted what they fetched, with the exception of 162.49 taels, the price of twenty cases of brandy. The claim was allowed to the extent of 162.69 taels. A question was raised as to a fire policy on Mr. Clifton's property held by Messrs. Marsh and Co. as security for a bill of sale for $10,000. It appeared the late official assignee had paid Messrs. Marsh's claim of 4120 taels in full and obtained the policy. The claim was to have been disputed. The point, however, was deferred until the next meeting. A dividend of forty-five per cent. was agreed to, requiring 7845.71 taels to meet it. A cricket match has been played at Shanghai between the First Eleven and Twenty-two, which resulted in a complete victory for the latter, who beat their opponents by seventy-four runs.

At the Supreme Court, on the 15th April, before Sir E

Digitized by Google

Formby, in the case of Rowbotham *v.* Wilkinson and Co., Mr. Lawrance appeared for Messrs. Wilkinson and Co., to apply for leave to appeal to the Privy Council.—Mr. Robinson, in showing cause against the rule, argued that the sections of the Order in Council bearing upon the question left a discretionary power with the Court of granting the appeal. The Chief Judge stated that sec. 139 of the Order in Council left him no option, and he could not, therefore, refuse to grant the appeal; but, before doing so, the damages (8,000 taels) and the costs ($641), with $2,500 as required under sec. 135, must be paid into Court. The Chief Judge, taking into consideration Mr. Rowbotham's circumstances out here, mentioned that if 8,000 taels, with taxed costs ($641), were paid to him (Mr. Rowbotham), he would consent to take such security as Mr. Rowbotham might be satisfied with for the balance of the damages to be awarded and the costs of the appeal, otherwise the amount named above must be paid into Court.

The case of Bavier and Co. *v.* Hooper and Clark was an appeal from the decision of H.B.M.'s Court at Kanagawa, where the petitioners sought to recover from the defendants $10,502,28, the value of twenty-three bales of waste silk and nine bales of pressed cocoons, the property of the plaintiffs, stored in defendants' godown, which was destroyed in the great fire at Yokohama last year. In the Court below judgment had been given for the defendant, with costs. The Court delivered judgment as follows:—"Notwithstanding the ability with which this case has been argued by the counsel for the appellants, I see no sufficient reason to disturb the verdict given by the Provincial Court at Yokohama. The Court below was not satisfied with the proof offered for the purpose of establishing a contract for the insurance of silk. Whether such a contract existed or not was eminently a question for the jury, and in view of the fact that the Consul was assisted by two assessors, themselves merchants and accustomed to business, I think I should be incurring a great risk by assuming that they had decided not only against the evidence offered, but against the known usage of trade in such matters. I cannot say that on the evidence I am dissatisfied with the finding of the court below. The whole case was before them. There were two competent experienced mercantile assessors, and there was no want of talent shown by either party in respectively bringing forward their points and demonstrating the working of each other's case, and I think I am fairly meeting the justice of the case by dismissing the appeal, leaving both parties to pay their own costs of this appeal. I am aware this is an unusual course, but I think the appeal was a *bona fide* one, and that the appellants were entitled to take the opinion of the Court above.

A meeting of shareholders of the China Fire Insurance Company was held on the 10th April, Mr. Tyson in the chair.

The Chairman said, in laying the accounts before the shareholders, the directors regretted very much to have to announce so heavy a loss. In view, however, of the fact that this loss must be looked on as an exceptional case, he thought the accounts had much in them that was satisfactory. They showed an increase in the business of the company over the previous year, of 22,000 taels, and over the first year of 55,000 taels. A balance had been transferred to the reserve fund of 91,000 taels, but 20,000 taels had been paid away as dividends; the actual loss on the year's working therefore amounted only to about 70,000 taels.

After a remark by Mr. Carter about the arrangement existing with the Hong Kong Fire Insurance Company, it was proposed by Mr. Duncanson, seconded by Mr. J. Braud, and carried, that the accounts presented by the directors be passed.

Mr. Lemann then said he was sure no one wished that the gentlemen at the board should devote so much time to the interests of the company without any remuneration. He would propose therefore—

"That remuneration at the rate of tls. 5 per meeting be allowed to each Director for each board meeting attended by him during the year 1867, and that the resolution have a retrospective effect for 1866."

Mr. Carter thought as they had passed the accounts for 1866 they could not pass a resolution affecting the balance these showed.

The resolution, however, having been seconded was carried.

Some further discussion then ensued in reference to the relationship existing between the China Fire and Hong Kong Insurance Companies with reference to their working in unison, &c., in the course of which the Chairman stated, in reply to Mr. Carter, that the Hong Kong Company had contributed 348 taels in the shape of premia to the China Fire, and that the latter had contributed 1,094 taels to the Hong Kong Company in the course of the year.

It was eventually decided to leave this matter in the hands of the directors.

Mr. Maccal next proposed—

"That the board of directors as at present constituted be re-elected for the ensuing year."

This was seconded by Mr. Overweg and carried.

Mr. Lemann thought the meeting ought not to separate without making some allusion to the loss of 193,000 taels which had been experienced in Japan. He thought the case amounted to this, that an experiment had been tried and had succeeded badly. Ever since Japan had been opened we had heard of nothing but a succession of fires. In China the destruction of a foreign hong by fire was almost unheard of, and even among native houses the fires are very small. It might be said that Yokohama had been so reconstructed that the danger in future would be infinitely less than it had previously been. It had been urged, too, that one cause of the great destruction at the last fire was that a strong wind was blowing. But this appeared to be a usual thing at Yokohama; strong winds were always blowing. At present the company took $50,000 on a risk, and he though this was too much to take on one risk. The amount to be earned seemed to be incommensurate with the risk to be run. He thought £5,000 quite sufficient to be taken on one risk. He did not wish to propose a resolution on this subject, but merely called attention to it.

The Chairman said the previous limit had been $80,000, and this had been reduced by the directors to $50,000 after the recent fire. If the shareholders thought the limit ought to be still further reduced it could be done.

Mr. Overweg thought there was no need to reduce the limit. It would be better to raise the premium.

The Chairman said this could not be done except in concert with the other companies. This company must either refuse risks or conform to their rates. The several companies had at present agreed in concert to double the previously existing rate.

Mr. Kidner pointed out that the difference between Japan and China existed not only in the risk of fire, but in the amount saved. In China they could generally reckon on a quarter of the value of a house as salvage, in the shape of bricks, &c. In Japan nothing was left.

In answer to a question by Mr. Groom,

The Chairman said the salvage from the Yokohama fire had only amounted to 1 per cent.; they had fortunately only had one fire of any consequence in Shanghai, the total value of that property was 17,500 tls., of which 3,400 tls. had been saved.

Mr. Maitland thought they were going into questions of detail which were within the province of the directors.

After some further discussion,

Mr. Overweg proposed and Mr. O. Booth seconded:—

"That this Company do not take any risks on buildings and their contents at Yokohoma."

Mr. Carter proposed as an amendment to this and Mr. Probst seconded:—

"That the risk on any one building or in any one compound be reduced to 50,000 dols. on a first-class risk, and to 30,000 dols. on a second-class risk, and that the China Fire Insurance Company join with the London offices in arranging suitable rates of premium."

This was carried, and with a vote of thanks to the directors who had acted during the past year and to the present chairman, the meeting separated.

HANKOW.

A correspondent of the *North China Herald* writes:—Having just passed up the river I am able from personal observation to show the value of the absurd rumours that have been set abroad regarding the proceedings and strength of the Nienfei. First, then, Wu-hu still flies the Imperial flag, and I saw some hundreds of Mandarin soldiers going through their usual exercise with their spears as I passed. At Tatung not a vestige or sign of disorder, nor the smallest effect of any Nienfei raid can be observed. The Customs' cruiser is still peaceably at anchor; and the tidewaiters in charge not only affirm that no Nienfei have been heard of thus far, but wonder at so many enquiries being made about them. The *Plymouth Rock* people say that when they last arrived in Shanghai from hence they were boarded before they got to the wharf by people wanting to know if Nanking were taken, and all sorts of nonsense. Nanking has been perfectly undisturbed by either local or other

Digitized by Google

banditti, and the same may be honestly said of both banks of the Yang ze as far up as Oliphant's Island, some seven miles below Kiukiang. From enquiries made at the latter port I gathered that some parties of Nienfei, mostly horsemen, have been wandering about on the left bank above Kiukiang and below Cock's Head, creating, of course, great excitement and terror among the inhabitants. Wusieh, a town about thirty miles above Kiukiang, was visited last month by a number of banditti, about 300 or 400 strong, who plundered and alarmed the country people all around; and frightened the foreign tidewaiters in charge there to Kiukiang. The robbers, however, only remained four days, and the people then went back, as well as the tidewaiters, to find that little damage had been done to the houses, but that everything portable had been stolen. When I passed Hunter Island, about fourteen miles above Kiukiang, I personally saw about 300 refugees going back to the mainland. There were no refugees on Collinson Island; neither did I observe any signs of disquietude as far as Grovenor Island. I think it is evident from this that the strength and proceedings of the Nienfei have been grossly exaggerated, and go on to tell you one of the ill effects the excitement that has been got up about them is producing. The rowdy element is again on the *qui vive*. Foreigners have been attempting to run arms to the rebels, but have not, I believe, met with much success. The *Hankow Times* alluded to this last week, and mentioned the proximity of the Nienfei to this port, where, however, they do not excite the slightest apprehension. They are believed to have about ten foreigners with them. Li-hung-chang has not been surrounded or attacked, and is making arrangements with Kwo's contingent to attack the main body of insurgents, believed to be about 2,500 strong.

Tsen-kwo-fan arrived at Nanking on the 10th April, and resumed charge of the viceroyalty. In consequence of Lihung-chang's temporary appointment to the two Hoo, his brother, the present Futai of those provinces, exchanges with the acting Futai of Kiangsu, to prevent the two brothers holding high office in the same province. Ting-jih-cheng, as had been reported, is promoted to the rank of Fantai, with no very remote prospect, if rumour may be credited, of the Futaiship of this province. Not the slightest apprehension is entertained of the Nienfei, who have never approached within 200 miles of the city.

HONG KONG.

Dates are to the 28th April. The P. and O. mail of March 11 arrived out on the 19th April. The principal item of excitement was the action in reference to goods consigned to Messrs. Lyall, Still, and Co., the documents for which had been handed over to the banks. The following is a report of the hearing of the case before Judge Smale :—

The Comptoir d'Escompte and the Chartered Bank *v.* Alexander Rodger, Charles Carnie, and R. J. Gilman.

Mr. Pollard, instructed by Mr. Caldwell, appeared for the plantiffs, and the Attorney-General, instructed by Mr. Hazeland, appeared for the defendants.

In this case, the hearing of which was begun on Thursday afternoon and adjourned until Saturday morning, an application was made by the Attorney-General, on behalf of the defendants, to set aside a writ of Foreign Attachment that had recently been issued at the suit of the plaintiffs, and under which the ship *Min*, the property of the defendants, had been attached under the provisions of the Foreign Attachment Ordinance of this colony, No. 2, of 1855. The plaintiffs claim to be entitled to some goods on board the *Min*, under bills of lading which had been handed to them by Messrs. Lyall, Still, and Co., the consignees. On the arrival of the ship here the captain was served with a notice of "Stoppage in Transitu" on behalf of unpaid vendors in England, and instead of giving the goods in question to the plaintiffs as holders of the bills of lading, he handed them over to some firms who represented the vendors here, and who had respectively given indemnity. Under these circumstances the plaintiffs issued the writ of Foreign Attachment that the defendants now sought to have set aside.

The Attorney-General contended that this was not a case in which the writ should be allowed to issue on the ground that the "cause of action" had not arisen in this colony within the meaning of the ordinance, and cited a large number of cases in support of his argument. The bill of lading was the only proof plaintiff could produce as to their title, and this was executed, signed, and delivered in England.

Mr. Pollard, on the other hand, took a preliminary objection to the defendants being allowed to appear at all in the present stage of the case, and further insisted that the cause of action had arisen within the island of Hong Kong, and that his clients had a perfect right to proceed by Foreign Attachment against the owners of the ship for non-delivery of the goods to them as holders of the bills of lading, and therefore the lawful owners of the goods.

At the conclusion of the arguments on both side, his lordship remarked that this was a case that presented to his mind great difficulties, and as his opinion would be a precedent in future has to the meaning of section 20 of ordinance 2 of 1855, he would like time to consider the very full and lengthened arguments he had heard on both sides.—*Press.*

A telegram has been received in London announcing that the *Min* has been released by the Admiralty Court.

From Swatow we learn that on the 21st April Henry Pantlin, tidewaiter, aged 33, shot himself dead with a revolver. On the 22nd H.M. Acting Consul, acting as Coroner, held an inquest on his body. A verdict was returned of accidental death. He seems to have been playing with his pistol, holding the upper part of the barrel towards and the guard away from him, while he held back the hammer with his right thumb and turned the chambers with his left hand.

Tseang, the Governor or Futai at Canton, brings charges against the Chinese officer in charge of the Customs at Swatow for extorting illegal fees from native Hongs, chartering foreign vessels, and levying an export tax on Chinese coolies, whether for exportation to Macao or the Straits, and has to answer the accusation at Canton, whither he goes as soon as an officer arrives to replace him.

The *Gazette* announces :—With reference to Government Notification No. 40 of the 5th ultimo, it is hereby made known that his Excellency Sir Richard Graves MacDonnell, C.B., Governor and Commander-in-Chief, has granted to Ng-Yu, of Fuk-Lung Shop, No. 77, Jervois-street, the exclusive privilege of preparing and selling prepared opium within the colony of Hong Kong and the waters thereof for the period of one year from the 1st of May, 1867.

The following letter on the subject of the Mint is referred to in another column, and the statement that it would close is considered as premature :—

"Although the seigniorage has been reduced to 1 per cent., the Mint has done nothing for months, except to manufacture a few insignificant batches of coins for the Government. Long ago the staff was partly disbanded, the clerks were either drafted to other departments, enlarged on half-pay, or dismissed altogether; and even the Chinese workmen were put upon subsistence money, and instructed to call once a month. In April two or three small consignments of Ichibous were converted into dollars, but the bankers found this less to their advantage than to have their Ichibous made into rupees in India. The present month (June), or, at latest, July, will see the doors of the Mint closed for the last time, unless something should occur which no one can foresee to bring a guarantee of success. All the mechanical difficulties which attend the commencement of such an establishment have been successfully overcome, and a reasonably good dollar has been produced. This dollar everyone is willing to use, but no one will pay the cost of its production. The rage for clean dollars, upon which Sir Hercules Robinson calculated so much, has passed away, and there is no hope of its recurrence. The Government cannot recoup the cost of production by reducing the purity of the coin, for, if that were done, no one would receive the dollar beyond the narrow limits of Hong Kong. Admitting that a clean, well-made coin has been produced, which is much more convenient than clumsy lumps of Sycee or unrecognised chopped Mexicans, this question is still unanswered—*who is to pay for it?* It is found that the Chinese are able either to counterfeit or debase any coin, however well made. They have done so with the new dollars, which have therefore begun to be chopped. Not half of the dollars made remain in circulation. Bankers and others have found themselves able to lay down these dollars in India at a slight advantage over bills, and a large proportion of the new coins have been there converted into rupees."

The following address to Dr. Legge has been signed by about 240 members of the community. It is to be forwarded to him by the present mail, with the sum of £500 sterling. A testimonial from the Chinese community, consisting of a tablet of engraved silver, value $600, will follow.

"Reverend Sir,—We desire, as residents of the colony which has for nearly a quarter of a century been the place of your abode and the scene of your disinterested and meritorious labours, to pay you this slight tribute of respect on the occasion of your departure homewards. As one of the most eminent Chinese linguists and scholars, we can only do homage to your talents and success; as a member of society we beg to assure you of our affection and esteem; while as a worthy example of virtue and morality we are proud of one who has so constantly and so prominently vindicated the claims of Western learning, civilisation, and religion, in the face of an Oriental and a heathen population. That the result of your long work of love may be permanent is our wish and hope, as doubtless it is your own; but however this shall be, it must be a satisfactory reflection to all that met with the commendation of your fellow men, and the testimony of your the admirable life you have spent among ourselves and our predecessors has own approving conscience. It is the ardent desire of one and all of us that your homeward voyage may be pleasant, that your meeting with family and friends may be all that even yourself could wish, and that your future days may be, under the blessings of the Almighty, a happy repetition of the honorable and useful career which has distinguished you

in Hong Kong. From a feeling that some memorial of us should fitly remain in your possession and in that of your family hereafter—something more substantial and durable than words on paper, however sincerely expressed and truthfully applied—we venture to request your acceptance of the accompanying testimonial, which, though inadequate to express their sentiments, is at least the hearty and respectful presentment of those who offer it.—We have the honor, Rev. Sir, to be, &c."

(FROM OUR OWN CORRESPONDENT.)

Hong Kong, April 25, 1867.

After so many mails for which the burden of every one's song (or letters) has been nothing but commercial disaster it is time that political matters should have their turn, and news, indeed, of very serious import in this respect will be carried by the present steamer. The attempts of the Chinese Government to cope with the vast hosts of brigands in the North-west Provinces have broken down more flagrantly than ever, and intelligence of defeat reaches us from several quarters simultaneously. Everybody who knows anything of Chinese affairs of the moment knows that the provinces lying between the Yang-tze and Peking have been devasted for ten years past by wandering bands of brigands, originally consisting of the peasantry driven from their homes by the Taiping rebels, and who took to plunder for a living, but whose numbers are continually increased by the addition of similar reinforcements, at first unwilling victims, and eventually participators in the profession of rapine, and that not one of the Imperial generals hitherto commissioned to subdue them have succeeded in coping with so mobile an organisation. Sweeping over the central plains in mounted hosts, twenty, thirty, or fifty thousand strong, the Nien Fei perpetually elude all attempts at pursuit, and take city after city, only to be abandoned when pillaged and burnt, the able-bodied inhabitants compelled to join the army of plunderers, the weak and aged butchered or left to die of famine or exposure. We now hear that not only has one section of this banditti insurrection worsted and even endangered the safety of the redoubtable Li Hung-chang, in the province of Honan, and another ravaged the banks of the Yang-tze in sight of one of the treaty ports, but, actually, that Hankow is once more in danger of capture by a third division, a determined attack by whom the great trading emporium has no adequate means to resist.

Were it not that the Nien Fei are so thoroughly destitute of political coherency, and even of all aim beyond the continuance of their system of plunder as a means of livelihood, there are many persons in China who would not regret their gaining an ascendancy such as that which was so long exercised by the Taipings, and this on the grounds that it is well neither for the Chinese Government nor for ourselves that tranquillity be too soon restored throughout the Empire. It is but too evident that the moment urgent pressure is removed from the mandarin system its natural tendency is to revert to its most intolerant form of ancient conservatism, and that the necessity for pliancy before European demands and advice was too abruptly interrupted by the downfall of the Taiping Empire. One of the very latest *Peking Gazettes* contains the decided protest of one of the spokesmen of the all powerful class against the very mild proposition recently put forth with reference to establishing a college for the study of European astronomy and arithmetic at Peking.

That designs of some ambitious nature are entertained by the French Government with respect to China is made plainly evident by the despatch of a diplomatist such as the Comte de Lallemande, who has just passed through this place on his way to Peking. The new envoy brings with him, it is reoprted, an Ambassador's commission, and is sent to China on the understanding that he is to forego the honours of European diplomacy for a year; but that *en revanche* he is to assert a foremost place in the European representation at Peking, and is to claim for France the leading voice in the approaching revision of the treaties, the ten years' duration of which expires in 1868. This is a matter which has been freely discussed in Hong Kong, and some curiosity is entertained as to the actual intentions of the Emperor in seeking to render the influence of France more prominent than it has hitherto been in this part of the world. With the exception of that convenient subject, so cleverly manufactured by the ubiquitous missionaries—the protection of native Christians—France has literally no interests in China beyond the secondary one of obtaining through English and German merchants the silk she requires for Lyons; but with a government which knows its own mind and a people which, on the whole, trusts its government, the Emperor may see his way to operations in the land of Sycee and silk, which will find occupation for many unquiet spirits and seriously astonish the philosophic gentlemen who think that the safety of English interests in the East is as nothing compared with the necessity of extending the franchise to ratcatchers and glass-blowers' workmen.

Commercially, the news by this mail is as bad as ever, and a recent failure which, however, has not been publicly discussed, has carried ruin even to the mercantile community of Manila. Much interest has been taken in the proceedings instituted by the Comptoir d'Escompte against the British ship *Min*, the cargo of which, notwithstanding a lien upon it in favour of the bank, was delivered to the order of a firm in difficulties. The *Min* has been seized under Admiralty process, thereby throwing out the arrangements made for the shipment of consignments of the new season's teas from Canton, some chops of which have at length been settled at about 23 taels, after long hesitation. The holders of country teas are beginning to find for the first time in their experience that competition is no longer the order of the day with their foreign customers, and it is gratifying to observe that some of the best among the native brokers are actually siding with the foreign mercantile community in the endeavour to break down the system of perpetually enhancing prices. From the north the commercial news is discouraging, as the disturbed state of the interior renders all operations precarious.

Quotations: Bank bills, at 6 months, 4s. 5½d.; do., at 4 months, 4s. 5d. T-Cloths, 8¼ lbs., $3.40; do., 7 lbs., $2.40 to $2.70.

STRAITS SETTLEMENTS.

SINGAPORE.

We understand that Colonel Macpherson has accepted the appointment of Colonial Secretary at Singapore. The appointment has not been announced in the *London Gazette*. It is considered to be an error to have selected one of the officers of the old Government for the post of Colonial Secretary, as so much must be left to him in inaugurating the new order of things under Colonial-office rules and regulations. Mr. J. D. Vaughan, who has held the post of magistrate and assistant resident councillor, returned to England by last mail on leave. Mr. Vaughan is quite an old servant of Singapore, and has on many occasions rendered many public services in addition to the efficient discharge of his official duties.

LATEST TELEGRAMS.

(Received June 6.)

SHANGHAI, May 7.

Advices received here from Japan announce that four ports will be open to foreign commerce in January next.

SHANGHAI, May 7.

Silk season closed; export to date, 41,600 bales.
Exchange on London, 6s. 1¼d.
Freights: Tea, £3 10s.

HONG KONG, May 13.

Grey Shirtings, 6¼ catty, $3.55.
Tea: Nothing doing; total export, 117,000,000 lbs.

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.
At Yokohama	6 months' sight.	4s. 4½d. to 4s. 5d.	4s. 5¼d. to 4s 5½d.
"	4 ditto	4s. 4d. to 4s. 4½d.	4s. 4½d. to 4s. 4¾d.

MARRIAGES.

CAW—ROBERTSON.—On the 23rd April, at St. John's Cathedral, Hong Kong, by the Rev. John Wilson, R.N., acting Colonial Chaplain, Thomas Caw, Esq., of Manila, to Orianna Pond, only daughter of the Rev. Edward Robertson, of Tibbermuir, Perthshire.

MILLER—MITCHELL.—On the 9th April, at the British Legation, Yeddo, in the presence of his Excellency Sir Harry S. Parkes, K.C.B., H.B.M.'s Minister Plenipotentiary and Envoy Extraordinary for Japan, by the Rev. M. Buckworth Bailey British Consular and Military Chaplain at Yokohama, Thomas Wilson Miller, of Yokohama, Japan, to Agnes, second daughter of the late William Mitchell, Esq., of Cupar Fife, N.B.

DEATHS.

BERNARD—On the 25th May, at 2, Brooklyn Villas, Cheltenham, of whooping cough, John, eldest son of Dr. Bernard, R.N., Deputy Inspector-General, Hong Kong.

CLIFTON—On the 24th March, at Canterbury, Frances Madeline, second daughter of Samuel Clifton, Esq., of Shanghai.

CONSTANTINOPLE—On the 21st April, at the Government Civil Hospital, Hong Kong, Athenasius Constantinople, aged 45.

THIN—On the 22nd April, at Shanghai, Robert Thin, M.D., aged 28.

WHITE—On the 23rd April, at the Civil Hospital, Hong Kong, W. W. White, Esq.

WILLGOSS—On the 10th April, at Yokohama, of typhus fever, Henry Willgoss, Esq., of the firm of Hughes, Willgoss, and Co., Yokohama.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—From London, April 5, Eliza Shaw; 12, Chrysolite (via Nagasaki); from Sunderland, 5, Amadine; from Marseilles, 6, Raphael.

At SHANGHAI.—From London, April 9, Lennox Castle; from Cardiff, 16, Helena Dormer; from New York, 12, Louisa Canevaro.

At HONG KONG.—From London, April 18, Argonaut, John Milton (reported by telegram).

At MANILA.—None.

At SINGAPORE.—From Liverpool, St. Ajax (reported by telegram).

DEPARTURES.

From YOKOHAMA.—None.

From SHANGHAI.—For London, April 16, Vanguard.

From HONG KONG.—None.

From MANILA.—For London, April 9, Geffard; 17, Her Majesty, Angela; for Pernambuco, 17, Europa.

VESSELS LOADING.

At YOKOHAMA.—For London, Lord Collingwood; for New York, Glenclune, Havelock.

At SHANGHAI.—For London, Crawshay Bailey; for New York, Condor.

At HONG KONG and CANTON.—For London, Hugh Fortescue (full), Birchgrove; for New York, Windward.

At MANILA.—For London, Dilkoosh; for Havana, Maria y Vicenta, San Julian.

FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London, Cotton and Tea, £3 to £3 10s. per ton; Silk, £4 to £4 10s. per ton of 50 cubic feet. To New York, £2 10s. to £3 per ton of 40 cubic feet.

AT SHANGHAI.—There is no alteration to report; the rate to London is £3, and to New York, £2 10s. per ton.

At HONG KONG AND CANTON.—To London, £2 10s. per ton of 50 cubic feet.

At MANILLA.—Tonnage is scarce, but there being no available disengaged vessel in port, there are no settlements to note. Last rates were £3 per ton for dry sugar, and £3 10s. per ton for hemp, to London direct.

THE COMING TEA SEASON.

The following extract from a London letter regarding the prospects of the coming tea season has appeared in the China papers.

In trying to form some conclusion as to limits at which new teas ought to be bought during the coming season, the following few suggestions may be useful, and in writing of tea Congou is intended, other kinds are somewhat more fanciful. That for the past four years as a rule, the importation of tea (with the exception of about four months at the end of 1865, when large profits were realised, not because tea was bought over cheap in China but because it obtained unjustifiably high prices here, which only led to loss and disappointment) has shown no profit, but on the aggregate very heavy losses.

That to make up the losses, the few next coming seasons ought to be profitable ones.

That they can only be profitable by buying cheap; that it must be remembered it is always optional to buy, but on arrival here, tea must be sold, whatever circumstances may be occurring.

That many circumstances point more than ever to a quick realisation on arrival.

1st. A four months' usance (if carried out).

2nd. A growing idea and a correct one, that in the majority of instances sales on arrival are the best, both on account of the freshness of the tea and also of the disposition of buyers.

That the trade as a rule will *not* buy to hold stock; that the article is not adapted for speculation, second-hand parcels always being largely in disfavour.

That the trade from heavy losses sustained have not the same capital, and from the result of the late severe panic are unable to command the same monetary facilities as of late years. It follows that great attention ought to be paid, so that shipments may be something in accordance with our requirements; our probable deliveries for this year, if prices continue moderate, will be 11½ million pounds per month, or 138 million pounds per annum; this estimate contemplates an increase over last year of 5 million pounds. An export of 125 million pounds for season 1866-67 from China, and 5 million pounds from India would reduce our stocks in round numbers 8 million pounds, a small but wholesome reduction.

That everything points to moderate prices here and the desirability of allowing stocks to accumulate in China until the quality is fully tested and opening value moderate; that the opening price must greatly depend upon the quality of the tea for the season.

That tea, coming as it does from one country, where the shipping ports are within a few days' communication of each other, with the exception of a limited quantity from India, and being an article upon which good judgment will be brought to bear, ought always to be shipped at a profit.

Thus it would seem that the following may be considered under all circumstances fair limits to give to lay down Kaisow Congou from Foochow, if quality of season is fine:—

	To cost in London.
Finest and choice very good small even leaf strong full Pekoe, Souchong Kaisow ...	1s. 10d. to 2s. 0d.
Fine to even good leaf true Kaisow flavour ...	1s. 6d. to 1s. 9d.
On fine ra burnt to Kaisow flavour	1s. 3d. to 1s. 6d.
Medium red leaf to pref. strong to burnt kinds...	10d. to 1s. 2d.
Common to medium red course to strong ...	8d. to 10d.
Dust and siftings clean to broken leaf, but leafy	5½d. to 7½d.

Hankow or Moning kinds.

	To cost in London.
Finest and choice small even closely twisted leaf, strong and full Pekoe flavour	1s. 8d. to 1s. 10d.
Fine to even gray and blackish leaf, strong Pekoe flavour	1s. 4d. to 1s. 7d.
On fine good leaf strong red course to strong and full...	10d. to 1s. 1d.
Skin leaf kinds, fair to good leaf, clean to strong and old	8½d. to 9½d.

COMMERCIAL POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—June 6, off the Wight, from Manilla, Anna; 8, off Plymouth, from Banjoewangie, Oceanus; 4, at Texel, from Batavia, Jolar; 5, from Passaroeang, Vice-Admiral May; 6 at Brouwershaven, from Banjoewangie, Harkaway; at Cuxhaven, from Singapore, Carlota; 9, in the Downs, from Colombo, Akbar; 8, at London, from Colombo, Frances.

DEPARTURES.—June 8, from London for Shanghai, Cora Linn; for Cardiff and Shanghai, Sir Ralph Ambercrombie, Gloriosa; 5, from Cardiff for Singapore, Rotterdam, Graafstroom; for Ceylon, Marguerite d'Anjou; from Queenstown for Hong Kong, Hortensia.

LAID ON.—At Glasgow, for Batavia and Sourabaya, Bristow.

SPOKEN.—Robin Hood, Foochow to New York, April 15, 34 S., 28 E.; Frances (barque), Colombo to London, 62 days out, May 11, 4 N., 23 W.; Almonde, Liverpool to Batavia, April 16, 1 N., 22 W.; Ann, Colombo to London, May 23, 30 N., 37 W.; Karel August, Batavia to Rotterdam, March 27, 31 S., 38 E.; Corneille David, Newcastle to Singapore, May 8, 31 N., 39 W.

At St. HELENA.—April 30, A. Lloret, from Zebu, and sailed, May 1, for Cadiz; 2, Indiana, from Sourabaya, and sailed, 3, for Channel; 4, Victoria, from Macao for Havannah, Amersham, from Penang for London; 7, Kennington, from Batavia for Amsterdam.

RAILWAYS IN CHINA.—*The Times'* correspondent, writing of the refusal of the Chinese Government to permit the construction of railways, says:—"Unfortunately, Sir Rutherford Alcock seems rather disposed to sit down quietly under Prince Kung's refusal than to continue the agitation of the question; and, in communicating this refusal to the local railway committee, he addresses himself rather to support Prince Kung's refusal than to assure his compatriots that he will not relax one jot his efforts to gain an object so conducive to the interests of commerce and progress. The great source of danger the Chinese Government sees in the introduction of railways is without doubt the probable excitement among the vast population that depends on boat carriage as a means of livelihood, and to soothe this apprehension should be one of the chief tasks of a foreign Minister. It should be explained to Prince Kung that the dread of 'trouble' among the 'several millions of coolies and boatmen employed in the carrying trade' is grossly exaggerated, and that those little railways which he objects to as useless to demonstrate an advantage already admitted would be immensely useful in demonstrating to this class gradually that the supersession of boats does not mean starvation to the boatmen. It is to the common people that it is necessary to recommend railways by experimental proof, not to a Government which already professes to admire them. In the specious, but shallow, style of reasoning in which the Chinese are adepts, Prince Kung says:—'The opening of a single line in one place would not improve the means of communication elsewhere, whereas, were lines to be made in all the provinces, it is much to be feared that increased difficulties would present themselves.' But it is to avert the difficulties that foreigners want to begin by constructing a single line in one place. And it would be desirable that Sir Rutherford Alcock should insist on the facts, instead of informing the railway committee, as he does, that 'under these circumstances he thinks it will be apparent to them that nothing further can be done at present to advance the object in view by Her Majesty's Minister here.' On the contrary, a vast deal can be done by constant agitation of the question; and it is worth the while of the people in England to join their countrymen in the Far East in working for so great an object."

THE CHINA DIRECTORY.—A San Francisco paper has the following amusing notice of the *China Directory for* 1867. It is a good specimen of the semi-facetious, semi-didactic style of puffing:—"After all, there is a great sameness in human life. Not only do we find ourselves doing the same thing to-day that we did a year ago, but when we get to the other side of the world, among the 'anthropophagi, and men whose heads do grow beneath their shoulders,' we find that they have counting-houses and banks, and live in streets, and need directories. Surely there is a change in the world since we read in the geography so long ago that the Chinese lived in an inaccessible country, and called the English *red-devils*, and eat young puppies in the market-place, washing them down with inexhaustible cups of tea. China as it once was to our imagination exists no more. The China of to-day is open to every one of us, is familiar with steamboats, and Englishmen, and Americans, and other outlandish creatures who swarm in such numbers that the *China Directory* has become a necessity for Canton, Foochow, and Shanghai.

Digitized by Google

The present is the eighth annual issue of the *Directory*, and the manner of its arrangement and classification is thoroughly satisfactory. One gets in these pages an amount of positive information about the European residents in China not elsewhere to be had. The commercial houses of Hong Kong, Amoy, Canton, of all the Chinese sea and river ports; the Chinese Customs' tariff; the alphabetical list of all the foreigners resident in China; the Chinese Calendar, collated with the English; the list of foreign Ministers at Peking; the time-table of the P. and O. Steam Navigation Company for 1867; all these are of solid and permanent value to the many Californians, whose eyes are now turned towards China. Merely to run over the Index of Trades and Professions, in Shanghai, gives an impression of the growth of the European community in that remote land. We think that we should feel at home in a city that boasts of professors of music and milliners, attorneys and soda-water makers. Side by side with these, however, we meet with a name that takes us back to the 'Arabian Nights' and the Fire Worshippers: Mr. Dhurumsey Poonjabhoy may be found at No. 2 Szechuen Road. Besides the mass of information concerning China, the *Directory* contains similar statistics with regard to Japan, Manila, and Bangkok. Such a book as this, with its record of business facts, is the most eloquent witness to the reality of our relations with these ancient and long-secluded empires. Where the stranger from America or Europe has established himself in the peaceful pursuits of business life, the ideas of the European society and civilisation have taken root, to spread more and more widely in the future. Henceforth we shall learn to know these Orientals, and they will know us. We shall have much to teach them, and also, if we are frank enough to confess it, much to learn. It is not now, as it once was, with the European in the East; he has not, it is true, learned to dispense with the argument of force, but he has learned to look upon the Asiatic as a man, not less accessible to reason, or more averse from justice and virtue than himself."

THE SAN FRANCISCO, JAPAN, AND CHINA LINE.—The *Great Republic*, intended for the new line of steamships between San Francisco and China, now worked solely by the *Colorado*, has had a trial trip of 150 miles out from New York and back. She is stated to have given every satisfaction, a though the weather throughout the trip was extremely rough, the wind at times rising to a complete gale. The following are the particulars of her measurement:—Length between perpendiculars, 360 feet; length over all, 373 feet; breadth of beam, 49 feet 10 inches; depth of hold, 31 feet 6 inches. She has three complete decks and an orlop deck; she is barque rigged, having fore and mainsail and topsails and topgallant sails. Her means of propulsion further consist of a beam engine 105 inches in diameter, cylinder 12 feet stroke with surface condensers. She is 3,886 tons Government measurement, 5,000 tons carpenter's measurement. The *Great Republic* was built by Henry Steers, the well-known New York shipbuilder, under the superintendence of Mr. W. Vanderbilt.

JAPANESE MUSIC.—The following is derived from the *Orchestra*:—"Mr. Marquis Chisholm, who has visited Japan, and even given pianoforte recitals of national music at Yokohama, gives some details of musical art there. The Japanese have very indifferent instruments, the best of which is the 'cotto,' a kind of dulcimerharp of thirteen strings. Each string has a movable bridge, by shifting which the note is raised or flattened in tuning. An idea of the scale of the 'cotto' can be formed by touching in succession the following notes on the pianoforte, beginning on A, the first ledger line above the treble clef, and descending A, G, E flat, D, B flat, A, G, E flat, D, B flat, A, G, and ascending again to D the 5th above. Numerous and fascinating are the quaint melodies derived from this scale in the hands of a good player. The 'cotto' is a difficult and expensive instrument, and is only fingered by ladies moving in the upper circles of Japanese society. It is placed flat on the floor, and the player, sitting in the usual Japanese attitudes, bends over it, and pulls the strings much in the same manner as our own harp players, but with this exception that the 'cotto' player incases her fingers in thimbles which terminate with a little projecting piece of ivory in size and form like a finger nail, with the aid of which she manipulates her instrument without giving the least fatigue or pain to the fingers. The cheap and popular musical instrument of Japan is the 'saamsing,' a three-stringed guitar. It is not arbitrarily tuned in one fixed manner, as are the stringed instruments of the West; sometimes the tonic, the fourth and octave, sometimes tonic, fifth and octave, and sometimes the tonic, fourth and minor seventh. It may be imagined how difficult it is to assimilate our ideas to theirs. When Mr. Chisholm had given his recital, playing the native music on the pianoforte, the admiration of his audience knew no bounds. On his second visit to Japan, his admirers prepared an elaborate drawing representing him in the act of playing; and round the drawing were appended various eulogistic comments on the pianoforte and its player."

ANCIENT CHINESE ENAMELS.—Some very fine specimens of this rare *matériel* were lately brought under the hammer of Messrs. Christie, Manson, and Woods, at their rooms in King-street. Among the more important were:—A pair of beautiful cylindrical vases and covers, enamelled with plants in white and brilliant colours, on turquoise ground—25 guineas. A pair of large teapots and covers, on feet, enamelled with flowers in brilliant colours, on turquoise, 12in.—30 guineas. A pair of beautiful two-handled vases, with plants in lapis lazuli and green, on white ground, the neck and foot enamelled with ornaments on turquoise ground, 12 in.—45 guineas. A pair of very fine double-flat bottles of the rare white, yellow, black, and red ground, united with ornaments in colours, and with medallions of insects and flowers, 11¼in.—55 guineas. A very rare and curious double cylindrical vase and cover of the rare white ground, with ornaments and characters in brilliant colours, the foot and handles formed as grotesque animals and birds, 26in. high—85 guineas. A fine, large circular bowl, enamelled with flowers in colours, on turquoise ground, inside and out, a metal-gilt boss in the centre chased with dragons, 18in. in diameter; and a fine, large circular dish, turquoise ground, with gold trellis-work, with animals and plants in colours in circular medallions inside and butterflies in colours outside, 21¼in. diameter—45 guineas. A pair of fine square-shaped vases, enamelled with flowers in colours, on turquoise ground, in borders, with ornaments in colours—75 guineas. A pair of elephants, miniature size, with trappings, and a pair of bottles, enamelled with flowers in colours—78 guineas. A pair of beautiful enamelled lamps, with perforated panels and a blackbird in enamel—45 guineas. A pair of enamelled slabs, with birds and flowers, beautifully ornamented—55 guineas. A large vase, chased with scrolls, richly gilt, ornamented with flowers and foliage, enamelled, a large medallion of a river scene on each side—35 guineas. A handsome table, the top formed of a large oblong enamelled slab, with flowers on turquoise ground, the stand of rosewood, carved and inlaid with six small enamelled *plaques*—25 guineas. A pair of magnificent garden seats, of the rarest ancient Chinese enamel, with birds, flowers, and ornaments in colour, on turquoise ground, on elaborately carved stands—105 guineas.

TRIAL OF THE "EUPHRATES."—The *Euphrates*, 2, screw iron troopship, 4,173 tons, 700-horse power, Captain Montague B. Dunn, one of five new steamships, standing on the Admiralty navy list as "Transports for service in carrying troops to India," has been officially tried over the measured mile in Stoke's Bay, previous to being despatched to India to enter upon her duties as a troop transport between Calcutta and other Indian ports and Suez. The result of the trial was most satisfactory.

VICE-ADMIRAL SIR JAMES HOPE, C.B., arrived in London last evening on his return from North America and the West Indies, to the naval command of which he was appointed in January, 1864.

Naval and Military.

The copper-bottomed and ironclad screw steamship Ocean, of 4,000 tons burthen and 1,000 horse power, having been appointed to the China station under the flag of Admiral Sir Henry Keppel, K.C.B., as stated in our issue of 26th April, will leave Malta in a few days for China, calling at Gibraltar. The following are the names of the officers attached to the Ocean:—Captain Chandos S. S. Stanhope; Commander Charles W. Manthorp; Lieutenants A. R. Tinklar, John Houghton, Frank Rougemont, R. H. W. Cornwall, Alex. R. Kerr; Master David Moore; Captain of Marines Geo. Brydges; First Lieut. Marines C. P. Heaslop; Second Lieut. C. Waddy; Chaplain Rev. F. W. Nickoll, B.A.; Surgeon John Rorie; Paymaster Richard Curgenven; Chief Engineer Samuel Madden; Sub-Lieutenants Thos. Leventhorpe, F. A. Gataker; Second Master R. W. E. Middleton; Assistant Surgeons Samuel Davidson, M.D., Joseph May; Assistant Paymaster C. B. Willcocks; Additional, Edward Cocks.

It is generally believed that Captain the Hon. A. A. Cochrane, C.B., and Captain the Hon. J. M. S. Spencer, will be the recipients of two of the good-service pensions. The former did good service in China, and was aide-de-camp to Baraguay D'Hilliers in the first Baltic campaign. The latter has served well and long, and merits all that can be bestowed upon him. The fact of Captain Wodehouse being Deputy Comptroller of the Coastguard should not deprive him of his chance of competing with others for an extra prize in the service lottery. Precedents are not wanting for this last-named case, if any should be required by the Admiralty.

Parliamentary Intelligence.

THE TROOPS IN CEYLON, CHINA AND JAPAN.

(6th.) Mr. OLIPHANT, in bringing forward the motion of which he had given notice on this subject, said he had on a former occasion asked the Secretary for War whether it was the intention of the Government to erect barracks for the troops at Point de Galle, when he received the reply that it was; but he thought it would not be difficult to show to anyone practically acquainted with the locality that that was a project which they ought not to entertain. The great *desiderata* in posting troops under such circumstances were their health and discipline; and these objects were to be gained by placing them in the healthiest parts of the country, and keeping them in as large bodies as possible, for distributing troops in small detachments over a country was most detrimental to their discipline. The system generally pursued in the East was exactly the opposite; it was to pick out the most unhealthy localities and distribute the troops in small detachments over those localities. This was notably so in Ceylon. His object was to show that it was in the highest degree inexpedient to build barracks at Galle. The hill station, where he had lived for many years, was very healthy; it was approached by good roads, and was within 100 miles of the sea. There was no physical reason why the troops should be kept in the plain. He hoped to receive an assurance from the right hon. gentleman that the proposed new barracks at Galle would not be built, and that the troops would be located at the more healthy hill station; which could be reached from the sea by means of the existing railway in about four hours; but, at any rate, he trusted that the right hon. gentleman would assent to his proposition that the barracks at Galle should not be built until after the report of the Select Committee upon the distribution of troops in India and the colonies should have been received. He expressed a hope respecting the new huts at Hong Kong, which, he understood, were about to be built at an expense of £20,000 upon a site the soil of which emitted a pestilential vapour. He also wished to be informed how long the 2,000 British troops in Japan were to remain there. These troops were quartered in barracks which had been built in the neighbourhood of Yokohama by the Japanese Government, who might expect that they were entitled to the services of these troops in quelling internal disturbances. Again, our keeping troops in that country was an invitation to other Powers to set up military establishments in the island. It was therefore desirable that the right hon. gentleman should give the House an assurance that our military force in Japan would soon be withdrawn. He trusted that the explanation of the right hon. gentleman would be satisfactory, but in case of the assurances he asked for not being given, he should feel it to be his duty to divide the House upon the motion of which he had given notice. He concluded by moving the following resolution:—"That in the opinion of this House it is desirable to postpone the construction of barracks at Ceylon, the Straits Settlements, China, and Japan until after the report of the Select Committee upon the distribution of troops in India and the colonies shall have been received."—Sir J. PAKINGTON had no hesitation in giving the assurance asked for by the hon. member, because it would take a much longer time for an ar-

Digitized by Google

rangement to be come to with reference to the construction of the barracks than would elapse before the publication of the report. The proposed barracks in Ceylon were to be erected at the expense of that colony, and he did not believe it would be likely that the colonial authorities would build them in a low and unhealthy locality, instead of in a high and healthy position, which was easily accessible. It was not the intention of Her Majesty's Government to prolong our military occupation of Japan, but as the expense of that occupation was included in the estimates, the matter could be more conveniently discussed when that item came before the House.—Sir H. VERNEY thought the question of the locality of barracks for British troops was too important to be left to the decision of colonists. —The motion was then withdrawn.

THE FRENCH EXHIBITION.

The "World's Fair" in Paris is now in the zenith of its splendour. It would of course be useless for us to attempt any succinct account of its attractions; we can but continue from time to time our desultory notices of such portions of it as are likely to prove specially interesting to our own circle of readers. Among these, Food Products may fairly be classed, for the chief exhibitors in this department are the firms of Crosse and Blackwell and Huntley and Palmer, names necessarily "familiar as household words" to all travellers and residents in the East, and indeed in all parts of the world. There are two entrances to the British Food Courts. Commanding these entrances are two most artistically arranged and attractive cases, viz., the glazed biscuit trophy of the renowned Huntley and Palmers, and the really artistic and brilliant array of ornamental glass and pottery in which the great purveyors of European delicacies to our Anglo-Indian empire, Messrs. Crosse and Blackwell, are pleased to enclose their condiments and preserves. These two firms, with their elaborate displays, draw the public into the British Food Court. The case of Messrs. Crosse and Blackwell is one of the handsomest in the British section; and the elegant jars, many of them, be it observed, of fine Wedgwood ware, bought direct from the great firm, are set forth with great taste. As a show of bottles and pottery it is worth a visit. The variety of food preserved is as extraordinary as the quantities are. The necessity for all these preserved provisions has grown with the extension of our population in different parts of the world. The history of this firm is a curious one. It dates as far back as 1706; and yet in 1835 it employed only some fifteen hands. In thirty years the number employed has increased from fifteen to nearly four hundred, because the demand for all the edible luxuries of Europe which can be preserved for the East has sprung up within this period. Some of the lobsters are now caught in Nova Scotia, packed in these small tin cases, and carried off to presently give a savour of home to a dinner up country in India, or in China, or in Australia. No less than 100,000 of these cans travel East every year, in the company of other tins containing salmon which have been caught at Labrador, and oysters, and preserved bacon, and mock turtle and every kind of soup, nay, the plum-pudding for the Anglo-Indian Christmas dinner goes forth in the same good company, with a host of other home delicacies. It is some satisfaction to find that the French, and the most delicate epicures among them, have stood in ecstasies over the delicacies of this one case. They have literally taken the pickled walnuts by storm, and there is not a walnut left in the building—these very walnuts being originally imported green from France. A new flavour is to the *gourmet* what a new opera is to the musician. The pickles, the marmalades, and jams daintily enclosed in every variety of ornamental jar and vase, the fish sauces, the anchovies, the produce of every clime in short deposited on these shelves in perfect state, have given a new charm to epicurian life here. Be the traveller where he may, if he have money in his purse, he can make out his English dinner, eat his English fruits and vegetables. He can carry the truffle with him to Spitzbergen, and from Nantes he can be supplied with ortolans and *foie gras* and asparagus. I will add a few facts illustrative of the extraordinary extent to which the preserved provision trade has spread within the last twenty years. Messrs. Crosse and Blackwell import 80 hogsheads of capers annually, 18,000 gallons of Italian oil, and 7,000 casks of anchovies. They export 17,000 tins of green peas, and 200,000 tins of lobsters. They consume a ton of loaf sugar daily, and annually 240,000 gallons of vinegar, 27,000 gallons of catsup. They preserve 450 tons of fruit, and make 200,000 gallons of pickles. In short, Crosse and Blackwell's case has made a very great sensation.

That which first attracts the visitor to the second great stall in the British Food Court, or the Court which should contain British food, is Owen Jones' clever drawing of Messrs. Huntley and Palmer's works at Reading. The pencil of Owen Jones has been employed on most of the brilliantly-illuminated boxes and labels within the case. You see how our leading manufacturers are wedding art to their industry wherever the union is possible. As we find the art work of Wedgwood enclosing preserved ginger, we discover Owen Jones enfolding Albert or Osborne biscuits. The rapid advance of this great biscuit firm is, I suspect, much owing to international exhibitions. Twelve or fifteen years ago English biscuits were unknown in France, and now madame gently shakes a few of Huntley and Palmer's sweet biscuits out of a little can as a delicacy. The familiar tin boxes of London are to be seen of late years in every good Paris grocer's window. There is every conceivable description of biscuit, even to the old lady's biscuit—one compounded of maizena, and which crumbles with the slightest pressure. There are raspberry, orange, lemon, ginger wafers, a sponge rusk that will stir champagne without breaking, and — the last novelty — the Napoleon biscuit. The quantities in which these simple dainties are made and exported will startle the reader. Upwards of eight hundred sacks of flour are consumed in the one manufacture, at Reading, a week, and about one thousand hands are employed in the manufactory. The striking part of this manufacture is that the French, whose *petits fours* are delightfully various in flavour and appearance, cannot compete with the English biscuit makers. At Reading nearly everything is done by machinery. That which the French make by hand the English can make by machinery. The flour goes in at one end of the series of machines and comes out at the other a perfect Albert. Biscuits, like other things, have their day, some enjoying but a fleeting popularity, while others—the Jamaica biscuit for instance—hold their own for forty years.

The English "Commissioners" sent to the Exposition in Paris, and more especially the Colonial Commissioners, complain bitterly of the neglect with which they are treated in Paris. They say that as Commissioners they are invited nowhere, not even to official entertainments; that they are afforded no means of acquiring information, and are, in fact, little more than visitors to the Exhibition. They attribute the neglect partly to the want of organisation in the Imperial Commission, partly to the hostility of that body to Mr. Cole, and growl most audibly. Perhaps they expect a little too much; but still their own argument, that many of them have come great distances and incurred great expense to help in fulfilling an Imperial idea is true, and should entitle them to more courtesy. They are all to have the Legion of Honour, but of what use is that bit of ribbon to men about to leave Europe again? Can't they strike, as the engine-drivers of the North-Eastern did, for more honourable treatment?

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, JUNE 7.

Since my last letter a general dulness has prevailed in our politics. The Second Chamber has been occupied with discussing the Bill referring to the reorganisation of the militia, which after a long and very tiresome debate passed at last with the trifling majority of three votes (37 to 34). The East Indian Budget for 1868 being not yet received at the Colonial department, it is very improbable that it can be laid before the Chambers before the month of August, ergo it will not be discussed this session notwithstanding the necessity was urged last year. The Second Chamber will adjourn on the 23rd or 25th of June, and will not meet again until September.

According to the *Arnheinsche Courant*, the Cabinet will be interpellated by some Conservative member of the Second Chamber about the behaviour of the Governor-General, Mr. Myer, with regard to the stipulations about the coffee plantations.

For several years the necessity has been urged that the position of the medical officers, both of the marine and the army, should be improved. The ministry has at last taken the first step towards it by increasing the salaries of these gentlemen by 100fl. per annum. It is a concession, but a very poor one.

According to a Royal decree the fortresses of Maestricht, Venlo, and Bergen ap Zoom will be dismantled.

The Minister of the Colonial Department has made some alterations in the conditions on which tenders will be accepted for the conveyance of produce from India to Dutch ports on account of the Government. It will be remembered that Mr. Trahrauen abolished the privileged chartered-ings, which measure should take effect on the 1st January, 1868, and there was much noise about it, because no ships of less than 175 last could be engaged. The Minister now has conceded that for the first three vessels of 125 last should be eligible. Some further liberal alterations are made with regard to the required first officers, whilst the vessels only can be obliged to load in three Indian harbours.

A Dutch translation will be published shortly of the "Commercial Code of Signals for the use of all Nations," by Mr. H. Nygh, of this town. I need not demonstrate that this system is the only one hitherto devised capable of achieving the grand desideratum of universal inter-communication amongst maritime States, so that it will be adopted universally before long. It is time, therefore, that shipmasters should realise the necessity of not going to sea without this book, that only costs 10 fl. on board. The official translation is made by Mr. W. van der Hoeven, expert of veritas here, and is controlled by a special commission appointed by the State.

The Belgian Government has appointed a commission of engineers to report on the Scheldt question. It is an enigma, indeed, what will be the result of the behaviour of the Belgian Government. It always protests, whilst our Government presses on the speedy construction of the works to dam up the Scheldt.

The returns about the rinderpest are very satisfactory. In the week ending the 2nd of May 78 head of cattle were attacked, against 84 and 87 in both the former weeks.

Messrs. Paul van Vlissingen and Duvok van Heel are in course of constructing on their iron works an establishment which will enable them to build iron-clads. I fear they have commenced too late, for most of these vessels, for which credits were granted at the last budget, are ordered now in England.

COMMERCIAL.

COFFEE.—Of the late auction on the 22nd ult. a good deal was sold for export; the white and white yellowish sorts were accepted in the first place, and also the Cuba and West Indian sorts. For the moment the demand is not so animated, but the coffee of the Dutch Trading Society is not much offered. The position of the market is firm. On the 19th inst there will be another auction at Amsterdam of 118.500 bales, including the 51,126 bales bought in at the auction of the 24th April. For private account the following transactions found place at Amsterdam:—650 bales Java, ex Koophandel, fine good ordinary white greenish, 42c.; 1,600 bales Padang, ex Almelo, good white, from 44½c. to 48½c.; and 900 bales Macassar, ex Maria Adolphina, good ordinary and good ordinary white greenish and greenish from 35½c. to 36c. The import was as follows:—342 piculs Java per Tollens, 6,047 per Khandeish, and at Amsterdam 3,094 bales per Princess Amelie. The 1,351 bales Bali bought in at the auction of the 24th May were sold from 19c. to 20c. Deliveries at the Trading Company, from 1st January to 1st May, 353,525 bales, against 284,602 bales in 1866, and 335,282 bales in 1865.

SUGAR.—The market is very firm. Yesterday and to-day 2,300 baskets Java were sold from board at ¼f. to ½f. under the May auction prices, 880 baskets Sourabaya ex Jannetje partly damaged, very good, No. 17¾, at 33¾f., and 2,100 baskets per Majestic, Tollens, and Aunt Lizzie at firm prices. The unsold stock of Java sugar was on the 1st inst. at the Dutch Trading Company, 36,934 baskets, against 68,882 on the 1st June, 1866; sold, but not yet received from preceding auctions of the company, 111,09[illegible]

Digitized by Google

baskets, against 109,315 at the same time in 1866. The stock in first private hands was on the 1st instant 38,350 baskets, say 9,986 baskets here and 28,364 at Amsterdam.

TEA.—The market is firm at the last quotations. There was some demand for Java Pecco, and do. green sorts were sold for export. Good ord. China Congou, 90c., and ord. 80c.

RICE.—No transactions, but firm. Per Tollens, 1,060 bales Java were imported, which were already sold floating; 1st Java, 16 to 18f.; 2nd, 13 to 14f.

SPICES.—Are not below the last prices; but the trade was unimportant; of Pepper 780 bales were imported per Tollens; 520 piculs per Khandeish, and 625 ditto per Aunt Lizzie, from Java. Yesterday, 200 chests China Cinnamon ord. quality were sold, of which the valuation was 70c. and 63c. was paid.

NUTMEGS.—No. 1, from 88 to 90c.; Mace, 108c.; Pepper, 17c.

TOBACCO.—The import amounts to 1,375 bales Java, per Khandeish. The auctions at Amsterdam on the 5th instant were as follows: 1,479 bales Java Kawi, 689 bales D., 539 bales C Blitar, and 186 bales W. G. T. Stock on first hands, 2,134 bales Java, and 56 bales Manila. The result of the tobacco auctions that were held to-day here was as follows: 2,168 bales Java, Kawi from 13 to 39½, average 20 c., and D from 7½ to 20½, average 11½ c.; 186 bales W. G. T. from 12½ to 35½, average 22½ c.; 504 bales Java, 5 lots sold from 14½ to 27 c., and 19 lots bought in from 4 to 50 c.; 539 bales C Blitar from 9 to 17, average 13½ c.; 50 bales Japan bought in at 10 c. At Amsterdam were sold 5,141 ps. cow-hides; imports per Felicia from Samarang; per Baltimore, from Sourabaya, 595 ps. cow-hides; 1,223 do. bought in; Per Jacoba, from Batavia, 657 ps. buffalo hides, of 10½ kilo at 35 c.

COTTON.—The market is in a good position. 150 bales have been sold from 41c. to 42c. for fair Bengal. Stock, 1,523 bales.

INDIGO.—East Indian: 83 bales 5,000 kilo. were bought in at f.30, but afterwards sold at f.29.

HIDES.—The following quantities were sold:—

1667	St. Soerabaya	Cow	...	3¾ to 4	Ko.	Ex *Bombay.*
1957	Do.	do.	...	3¾ to 4	„	
1070	Do.	do.	...	ca. 7½	„	
746	Do.	do.	...	„ 5¾	„	
64	St. Samarang	do.	...	„ 4	„	Ex *Sydney Eggers.*
160	Do.	Buffalo	...	9¾ to 10	„	
823	Do.	Cow	...	3¼ to 3½	„	Ex *Felicia.*
655	Do.	do.	...	ca. 3¼	„	
522	Do.	Buffalo	...	„ 8	„	
304	St. Soerabaya	Cow	...	3¼ to 3½	„	Ex *Sparkenhoe.*
847	St. Passaroeang	Buffalo		8¾ to 9	„	Ex *Bombay.*

Import this year, 28,866 Hides; and in 1866, 44,023. Stock, 15,420, against 15,932 in 1866.

INDIGO.—Unchanged in price, and the trade was not important; there was some demand for good sorts; of which there is very little stock.

SEGARS.—Of Manilla, 1411 mille; 2 do., Cortavas 1862, damaged, were sold from 11¼f. to 22½f.; 280 mille do., of which 20 mille bought in at 36f.; 170 mille Habanos do., of which 30 mille (damaged) sold from 30f. to 30¼f.

TIN.—Banca: 2,000 slabs were sold at 53¼f.; 1,000 do., 53f.; and 1,500, 52¾f.; and in the preceding week 1,000 slabs, 53½f.; 1,200, 53¾f.; 750, 53¼f.; and 1,000, 53⅜; 1,100 slabs, 53½f. The market opened very firm in the beginning of the month, the more favourable turn of Continental politics created a good demand, and prices gradually advanced 1½f. from the closing quotation of last month; in the last few days, however, there was a greater pressure to sell, and prices again declined. Banca was in great request, and the price advanced from 52¼f. to 53¾f. in the middle of the month. Subsequently, however, on the sales prompt (falling due the 28th inst.), holders were more desirous to realise, and large lots were sold from 53f. to 52¾f., which is now the nominal closing quotation. Stock at the Dutch Trading Society on the 31st of May 198,242 slabs, against 213,386 in 1866. Deliveries in May 9884 slabs, and in 1866, 22,739 slabs.

ARACK.—12 casks very fine Batavia ex Felicia, and 50 do. Sourabaya ex Bombay were sold: 123 casks were imported from Batavia per Aunt Lizzie, and at Amsterdam 48 casks per Mydia.

DRUGS.—Of China preserved ginger, direct import, 500 chests were sold at auction from 77c. to 109c., and 50 do. Mandarin at 102c. to 104c. Of Getah Lahoe 35 bales were sold at 1¾f. Camphor: Higher in price; China 80c. and Japan 82c. Of Cubeben 500 bales were sold at 30c. Cassia Lignea: 68c. on the market. Cassia Vera, 39 to 40c. Oleum Anisi Steleati, 6¾f. to 7¼f.; ditto Cassia, 4½f. Gum Benjamin, 115c. to 125c. Japan Wax, 42f. to 56f. O.S. Gum Elasticum not on the market. Gum Damar, 40c.

RATTANS.—The transactions were very important; 187 piculs ex Jane Avery. 350 ex Pluton, 709 ex Sparkenhoe, 200 ex Cœur de Lion, 30 ex Baltimore, and 400 ex Rothby.

SHIPPING INTELLIGENCE.

ARRIVALS.—Texel, May 27, Doelwyk, from Batavia; Princess Amelie, from Macassar; May 28, Nydia, from Banjoewangie; Danube, from Passaroeang; Brouwershaven, May 29, Tollens, from Batavia; Hellevoet, May 29, Sophia Amalia, from Tjilatjap; Texel, May 29, Astrea, from Banjoewangie; Brouwershaven, May 31, Khandeish, from Banjoewangie; Hellevoet, May 31, Aunt Lizzie, from Batavia; Texel, June 2, John Fraser, from Banjoewangie; Brouwershaven, June 4, Licht Straal, County of Bute, both from Banjoewangie. Texel, June 4, Kronprinzen, Jolar, both from Batavia; Vice-Admiral May, from Passaroeang, Padang Packet, from Padang; Brouwershaven, June 6, Harkaway, from Banjoewangie; Oceanus, from Fanaroekan; Jessie Ann, from Banjoewangie.

DEPARTURES.—Texel, May 23, A. R. Falck, Java Packet, both for Batavia; Brouwershaven, May 25, Zeemanshoop, for Batavia; Hellevoet, May 25, Neptunus, for Singapore, via Newcastle; Texel, May 31, Auguste for Batavia; June 4, Vriendschap, for Samarang; Texel, June 3, Sindbad, for Sourabaya.

PASSENGERS INWARD.—From Java, per Christina Maria, M. P. W. de Bok and family; per Doelwyk, Mr. C. Boogart de Best and family; Vermeer, Muller, Isman, Knoute, Mrs. Slot and five children; per Astrea, Mr. Scheltema and family; per Padang Packet, Mr. Wilkens, J. L. de Bere and family, Mrs. de la Conture, 2 young gentlemen, John T. Veld; per Lichtstraal, Mr. Vyzelaar and family; Mr. Leideking and family' Mrs. Dezlaan and two children, Mrs. Von der Beer; per Vice-Admiral May, Mr. J. Van Leuver and family.

PASSENGERS OUTWARD.—Per Padang Packet; Lieuts. Lauzing de Vletter, Kaels, and 125 soldiers; per Vriendschap, Mr. P. H. Van der Welden and family.

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, JUNE 7.

At a much earlier period than in former years the official annual returns of the trade and navigation of this city for 1866, drawn up as usual with wonderful carefulness and perspicuity of detail, have just been published by our local Board of Trade in the shape of a rather bulky quarto volume of tables. From these it appears that the value of the imports in 1866 by sea and by land amounted to 779,088,010 marks Banco, against 771,668,880 marks Banco in 1865, thus showing a trifling increase over the previous year. There is also a corresponding improvement in the weight of the goods imported, which were 47,269,932 centners, against 47,198,954 centners in 1865. Perfect as these tables are in everything connected with the import trade, it is much to be regretted that they again suffer from the same chronic imperfection noticed before in these columns of the total absence of all matter relating to the exports; though it is but fair to add that it is not the fault of the Board of Trade, who have ever been most anxious to appreciate the value of such an important part of the commercial statistics, but it is not in their power to obtain any *data* on the subject; for ever since the abolition of the export duty a few years ago there are no declarations to make at the Custom-house and therefore no control over the value or contents of packages shipped. At first it was supposed that some clue might be obtained by overhauling the manifests of outward bound vessels, but this was soon found to be futile; for independently of its being altogether a matter of courtesy and goodwill on the part of consuls and shipowners to give a copy of the manifests, the merchants themselves entertain an invincible aversion to what they consider to be an impertinent prying into their private concerns, and shroud the extent and nature of their export transactions under the mysterious terms of so many "bales of manufactured goods," or so many packages of merchandise inserted in their bills of lading.

With regard to navigation, the total number of vessels that arrived in the port of Hamburg from all places in 1866 was 5,185, against 5,186 in the previous year, but there was a considerable increase in the amount of tonnage; for whereas in 1865 they contained 543,735 Hamburg lasts of 3 English tons each, in 1866 the tonnage had risen to 599,077 lasts, showing an increase of 55,342 lasts, or 166,000 tons. Of the total number 477 vessels with a tonnage of 89,822 lasts came from places out of Europe. Among the outward bound vessels there was a slight increase in the number, and a larger one in the tonnage, the figures being 5,210 vessels of 592,250 lasts that cleared out in 1866, against 5,186 vessels of 540,666 lasts the previous year. As the ships exhibit a larger tonnage there is also a corresponding increase in the numbers of the crews; in 1865 the vessels that arrived were manned by 56,468 men, and those that sailed by 56,319, whereas for last year the numbers were respectively 61,194 and 61,198.

With special reference to the navigation with the Far East, these tables show among the arrivals 10 vessels of 1,220 lasts from China—1 from Canton, 1 from Canton and Macao, 2 from Canton and Whampoa, 1 from Canton, Hong Kong, and Macao, 2 from Foochow, 1 from Hong Kong and Canton, and 2 from Hong Kong and Macao; 6 vessels of 1,014 lasts from the Philippine Islands—3 from Ilo-Ilo, 2 from Ilo-Ilo and Hong Kong, and 1 from Manila; 4 vessels of 419 lasts from Netherlands India—1 from Batavia and Samarang, and 3 from Batavia and Sourabaya; and 15 vessels of 3,158 lasts from the British East Indies—5 from Akyab, 2 from Bassein, 1 from Chittagong, 1 from Cochin, 4 from Rangoon, and 2 from Singapore. Total, 35 vessels, with 5,811 lasts, or 17,433 tons.

Among the departures were 23 vessels of 3,303 lasts to China—12 to Hong Kong, 2 to Hong Kong and Shanghai, 1 to Hong Kong and Whampoa, 1 to Macao and Macassar, 5 to Shanghai, 1 to Shanghai and Tien-tsin, and 1 to Tien-tsin direct; 1 to Manila; 6 vessels of 930 lasts to Nicolayefsk; 3 to the Navigators' Islands; and 10 of 1,982 lasts to Singapore. Total, 40 vessels of 6,332 lasts or 18,996 tons.

At the last sitting of the Academy of Sciences at St. Petersburg the Academician von Brandt announced a valuable present made by Major General Kukel, in command of the military district of East Siberia, to the Zoological Museum, consisting of a fine male specimen of the Mongolian antelope (*antelope gutturosa*). This very rare animal has not been seen or described since the days of Pallas. The thanks of the meeting were voted to the General.

COMMERCIAL.

COFFEE.—There is a continued good demand, and full prices are willingly paid. Sales of the week, 14,000 bags.

SUGAR.—The raw market is firm, and better prices are now obtained. The imports this year were 7,500,000 lbs., against 19,250,000 lbs. at this period in 1866. Present stock is 2,250,000 lbs., against 7,500,000 lbs. last year. Of refined 12,000 loaves were taken at full rates, and the sales would have been greater, but there was no more of ready goods in the market.

RICE.—This market is firm, but with limited dealings. A cargo of Indromayo (5,640 bags) has come to hand, but was previously sold for arrival.

SPICES.—Market quiet, but prices well supported.

SPELTER.—No transactions to report. Quotations are a trifle lower, as Silesian slabs may be had both for delivery and ex warehouse at 13 marks 13 Sch. Banco.

DISCOUNT.—The money market continues in a favourable condition; discount, 1½ per cent. On the Stock Exchange everything is *couleur de rose*, and all descriptions of funds and shares are rising every day.

SHIPPING.

SAILED.—Emma, to Singapore and Penang; Overmann, to Hong Kong.

ARRIVED.—Triton, from Batavia; Johann Christopp, from Whampoa.

Digitized by Google

THE P. AND O. COMPANY.

THE fifty-ninth half-yearly report of the directors of the Peninsular and Oriental Company is the least satisfactory they have issued for many years. The accounts to the 31st March exhibit an excess of expenditure over receipts of some £36,000, and consequently the "interim dividend," which of late years has been declared with such unvarying regularity that it has come to be looked for by shareholders as a reliable source of income, is not forthcoming. The abnormal state of the India and China trade, resulting in an almost entire cessation of specie shipments, the active competition of the French Company, and the greatly enhanced cost of coal, are the reasons put forward by the directors for this unfavourable state of the Company's affairs, and we are bound to admit that they are amply sufficient to account for a temporary falling off in its prosperity. That it will be other than temporary there is happily no ground for apprehension. The China trade already begins to emerge from the slough of despond in which it has for a time been smothered, and there is every reason to believe that it will surely, though perhaps slowly, re-establish itself on a firmer basis than ever. As regards the competition of the French Company, it is eminently satisfactory to find on the part of the directors such a candid admission that it really *is* a formidable opposition; the unreserved recognition of this fact will doubtless result in renewed exertions to increase the efficiency of the P. and O. Company's vessels, so that they may no longer be left behind in the race. It is true enough that the French Company has a larger subsidy—but it is equally true that there are other reasons than this for their success; it is not the subsidy granted them by the French Government that induces so many English passengers and shippers to give the French steamers the preference. There is no doubt that of late the P. and O. Company has launched some very fine vessels, and got rid of many useless "mistakes"—that, with their experience, ought never to have occurred—and it is an encouraging fact that this work of remodelling and in part reconstructing their vast fleet, which has been going on for some time at a great outlay, is now nearly completed. So we may reasonably hope that the good time will soon come when increased efficiency and an increased subsidy will go hand in hand with the much-desired dividends. The following are extracts from

THE REPORT.

The reports submitted to the proprietors at the half-yearly meetings of the company have usually been more brief and of less importance than those of the annual meetings held in December, when the operations of the whole financial year are dealt with and the accounts produced; but the directors find it necessary on this occasion considerably to exceed the ordinary limits of the June report. They beg, however, before proceeding to matters of special interest, to furnish the usual information relating to

THE COMPANY'S FLEET.

The *Mooltan* has received her new engines and boilers, and was despatched to Alexandria with the mails of the 27th instant. The *Columbian*, and the new ship, built by Messrs. Denny Brothers (which has been named the *Bangalore*), also appear on the list of vessels in active service, as each will start on her first voyage during the month of June. It was stated in the last report that the *Nemesis* was on her way home from the East to receive new boilers and a general refit. On arrival she was carefully surveyed, and it being estimated that the cost of the necessary repairs would amount to considerably more than half the price of a new ship of the same size and power, the directors accepted the offer of Messrs. Denny Brothers, of Dumbarton, to sell them a sister ship to the *Bangalore*, of about 2,167 tons and 500-horse power, then on the stocks, that firm taking the *Nemesis* as representing £25,000 of the purchase money. This new vessel, which has been called the *Sumatra*, was launched on the 6th instant, and will be ready for sea in August. The *Poonah* is receiving new engines and boilers in the Thames. The *Massilia* will be laid up to take in new boilers on her return from her present voyage; and the *Orissa* is undergoing a similar process at Bombay. The *Pekin* has been sold at Hong Kong to be broken up for a sum nearly equal to what she stood at in the company's books; this vessel was sent to the East upwards of twenty years ago, and was not worth repair. By the end of the year 1867 the building and repairing operations referred to above will be completed, and the company's fleet generally will be in a high state of efficiency.

THE NEW SUPPLEMENTAL CHARTER AND CAPITAL.

Her Majesty in Council having been pleased to grant the petition of the directors for a further charter, that document was passed under the great seal on the 7th February last. It conferred upon the company the power to raise one million of fresh capital by the issue of 20,000 new shares of £50 each, and it extended to the subscribers to this additional capital all the privileges secured under the original charter of 1840. The directors lost no time in placing the new shares at the disposal of the existing shareholders in the proper proportions, and they have the satisfaction to announce that the proprietors have responded by accepting their allotments to the extent of 15,902 shares, being 1,730 in excess of the number taken up in 1855, when a similar operation took place. The proprietors will bear in mind that this charter was applied for in August last, shortly after the appearance of the report of the Parliamentary Committee of 1866, which recommended a reorganisation and extension of the postal service with the East; and when it had become known that the Government would in the main adopt the recommendations of that committee, terminate the current contracts, and invite competition for new ones, to meet all the circumstances arising out of which it was necessary the company should be well prepared.

A new and important source of traffic in the conveyance of Manchester goods and cotton by the overland route had also to be provided for, and this furnished an additional reason for the purchase and construction of vessels combining large cargo capacity and passenger accommodation with the requisite speed for the mail service. Some of the older ships have been withdrawn from active service and their places have been taken by the new and larger ships mentioned above, and this process of substitution and increase of the fleet could not be accomplished without calling upon the shareholders for additional means. It would seem, on reference to the list of sea-going ships prefixed to the annual report of 1866, that the fleet consisted of 49 ships, measuring in the aggregate 73,954 tons.

THE POSTAL SERVICE.

In the last and previous reports the directors prepared the shareholders for the announcement they have now to make, namely, that notice was served on them by the Postmaster-General, on the 31st January last, that the India and China contracts of 1853, and the Bombay contract of 1854 would be terminated on the 1st of February, 1868. Shortly afterwards advertisements appeared in the public papers inviting tenders for new services to be sent in on the 16th September next. In the last annual report the directors stated that "they were far from viewing the probable termination of the existing contracts with anxiety, as the experience of the last few years had proved to them that in consequence of the increase in the price of labour, the advance in the cost of coals and stores of all kinds, together with the onerous effect of certain clauses, a modification of the terms of these contracts had become necessary." The few months which have elapsed since the date of that report have given much additional force to these observations. The directors are not at present prepared to go into the details of the proposed new services. Their experience of the past, their knowledge of the present, and a careful estimate of the future, as regards the working of a great mail contract, will, they hope, form a safe basis on which to make their tender in September next.

From the commencement of the year until the 20th instant the company have run two additional steamers each month between Bombay and Suez, in conformity with the intention announced in the last annual report, with the view of ascertaining at what probable expense to the public such a service, or one embracing a departure on a fixed day in each week, could be maintained. This extra service, as well as the ordinary contract service with Bombay, has worked with perfect regularity, and the two combined have furnished to the public the advantages of a postal communication with Bombay four times a month. That this was a voluntary experiment made by the company, that it formed no portion of their engagements with the Government, and that the conveyance of mails by these extra steamers was a gratuitous act on their part, appear to have been forgotten or overlooked, judging from the comments in some of the newspapers, and the questions put in Parliament on the announcement from the company and the Post-Office that this extra service would be discontinued from the 20th instant, the ordinary season for the setting in of the monsoon.

RECEIPTS AND EXPENDITURE.

The export of specie to the East, which has usually formed a considerable portion of the company's revenue, has during the six months embraced in this report almost entirely ceased. There has also been a great falling off in the revenue, owing to the contraction of mercantile operations in the East which has followed the monetary panic of 1866, and the very active competition of the French Company. To these disadvantages has been added a considerable rise in the cost of coal at the foreign depots, involving an increased outlay, as compared with the corresponding six months of last year, of upwards of £40,000. It is scarcely necessary to state that the directors could exercise no control over these adverse circumstances, neither could they by any modification or curtailment of the services counteract the unfortunate results, as the strict conditions of the Mail Contract had to be fulfilled. Without, therefore, entering into detailed statements and figures, which will be presented as usual at the annual general meeting in December next, the directors regret to report that the state of the accounts to 31st March exhibits an excess of expenditure over receipts to the extent of £36,000, without making any provision for insurance or depreciation. They are consequently unable to recommend the declaration of an interim dividend. In conclusion, it has become evident that if the company are to continue bound to the compulsory departures—the high rates of speed and other onerous and costly conditions of a mail service contract—now that they are exposed to the competition of a foreign company, which is subsidized by its Government to an extent so far in excess of the rate per mile paid by our Government, they must look for a very material addition to the subsidy. The directors will not fail, therefore, to lay the subject before the Government in such a manner, when the time comes for sending in the tenders, as should lead to its consideration on the broad basis whether such a system of postal communication with the remote dependencies of the country, as that which has been carried on by the company for the last twenty-five years, merits the support of the State to the extent necessary to afford a reasonable prospect of earning, in combination with other sources of revenue, a fair return on the capital embarked in the enterprise. The postal services with the East are connected with a commerce now amounting to the enormous sum of £110,000,000 sterling annually. This commerce has for years past rapidly increased, and the ocean lines of postal communication with the countries with which it is carried on have without doubt materially contributed to its development. Bearing in view these facts, together with those previously mentioned, the directors cannot but feel confident that an enlightened consideration of the whole question will be taken by the Government.

LONDON, MONDAY, JUNE 10, 1867.

THE HONG KONG MINT.

THE latest accounts from Hong Kong are to the effect that unless some very unexpected circumstances should suddenly arise to give renewed hope of success, the doors of the Mint will be closed during the present month. To say the least, such a step as this would be premature; and however strong may be Sir RICHARD MACDONNELL'S own convictions on the subject, we can hardly believe that he will allow them to carry him over the barrier of "instructions from home," which should certainly be waited for and acted upon. The course to be adopted is still the subject of anxious consideration here, both by the Treasury and the Colonial-office, and as no decision has yet been arrived at, the final instructions of the SECRETARY OF STATE have not been sent forward. With regard to this part of the subject, we can only repeat the opinion we have already expressed. The experiment was tried at an unfortunate time, but should not therefore be hastily abandoned. It has had a most exceptional state of things to contend with throughout. Never since our trade with China commenced has it experienced such a series of mercantile disasters as have lately fallen on it, restricting business, throwing out the course of exchange, and unhinging, as it were, the whole fabric of commercial operations. How could immediate and unalloyed success have been expected under such circumstances? Now, however, the first heavy expenses have been paid, though doubtless at the cost of much inconvenience, and the large sum thus invested should not be lightly thrown away. The working expenses have been reduced to a comparatively nominal sum, and these should be maintained for at least another year, if only for the bare chance of "something turning up" before it is finally decided to close the establishment. We may shortly expect to hear of an order having been sent from Singapore for the coinage of a supply of small silver currency, if not of dollars, and this would at least help to tide over the present period of inactivity.

If, however, the fiat has gone forth, and the Mint has been abandoned by Sir RICHARD MACDONNELL, either with or without the consent of the Home Government, the next question that arises is, "What will he do with it?" By *it* we mean, of course, the plant that has been conveyed to Hong Kong, and there set up at such a heavy cost to the colony. It is clearly of no use bringing it home again. Could not the Chinese be persuaded to purchase it, and set it up in some part of North China? They might then issue coins in conformity with the circulation there which fixes the tael as the standard, with a subsidiary coinage of mace and candareens, or tael cents. If persevered in, this would in time supersede the Mexican dollar altogether. Moreover, however capricious may be the movements of the precious metals in Hong Kong, there is always plenty of sycee in the North to feed a mint; and if the coin produced by it were made a legal tender in payment of duties, and recognised by the Hai-quan Bank, there is little doubt that it would soon acquire an extensive circulation. The cost of production could be no obstacle here; the Chinese are always willing to pay a fancy price for a coin that pleases them; all that is necessary is to make it palatable to them. Should the Hong Kong experiment, then, prove a hopeless blunder after all, here is at least one chance of getting out of it with comparatively little loss, and with a prospect of ultimately doing more to establish an uniform currency for China than would result from a permanent mint in Hong Kong. Of course there would be difficulties in the way, but not necessarily insuperable ones. With the recent memorial of the TSONG-LI-YAMEN before us, we must no longer regard as hopeless the introduction and application of European science in China. Failing this, perhaps the Japanese Government, or one of the Princes, might be disposed to make the purchase.

MORE TREATY PORTS IN JAPAN.

VERY little regret was manifested on the part of the public when the Japanese Government allowed the time fixed for opening Ne-e-gata to pass over without manifesting any disposition to fulfil that stipulation of the Treaty. We were still far from being comfortably settled either at Yokohama or Nagasaki. Hakodadi was generally admitted to be a failure, and recent experiences in China had gone far to prove that a "new port" was not *always* certain to prove a mine of wealth, from which the early settler must necessarily draw a rapid fortune. And when Ne-e-gata was found to be entirely deficient in the requisite qualifications for a mercantile settlement the matter was considered to be shelved for an indefinite period, and those who were given to indulging in sanguine anticipations regarding the further "opening up" of the country, turned their attention to Osaka, which still seemed to promise a golden future. It is true that the option was reserved of substituting for Ne-e-gata some other suitable port on the West coast of Niphon; but it must be remembered that to be "suitable" in the terms of the Treaty, it was necessary that the place selected should be situated within the limits of the so-called Imperial territory; and of ports so placed there were few to choose from. By late advices from Japan we learnt that Captain BLAKISTON, R.E., who lately visited the West coast, had there discovered a port possessing all the advantages in which Ne-e-gata was deficient; but nothing was then said as to the prospect of its being thrown open in place of the latter.

A telegram just received from Shanghai *via* Galle, ought to throw some additional light on the subject, but as usual fails to do so. It is dated May 7, and is thus worded:—"Advices received here from Japan announce that four ports will be open "to foreign commerce in January next." This, as it stands, means—nothing. There are three Treaty ports already, and Hiogo, the opening of which is definitively fixed for the 1st of January, 1868, will of course make the fourth; so that, taken literally, the telegram conveys no news at all. But if (as seems not improbable) a couple of letters have been accidentally omitted —if it be intended to read "four ports will be opened," instead of "four ports will be open,"—then, indeed, it becomes important, for in the latter case the word "new" or "additional" may be understood. Where four more suitable ports are to be found within the Imperial territory we are at a loss to discern; but perhaps this condition will now be dispensed with. Of the many weak points in the Treaty of 1858 this vexatious restriction is about the worst. The SHIOGOON'S Government, it will be remembered, asserted that the Daimios were one and all hostile to foreigners and averse to opening their ports, and that though willing, he was powerless to coerce them. We now know that this statement was false, that from the first many of the Daimios were eager to secure a share of the advantages arising from foreign trade, and that the SHIOGOON used such power as he did possess to defeat their object, and so preserve his own monopoly. The utter failure however of the operations against CHOSIU, as well as the haughty attitude of other powerful Daimios, may well have convinced the new SHIOGOON of the expediency of abandoning his assumed right to exclude them from the benefits of the Treaty; in which case it would be an easy matter to select four additional ports in every way suitable, and we may be quite sure that Simonoseki and Kagosima would be among them. The new port above alluded to in place of Ne-e-gata, might be another; although it is very doubtful whether this boon would prove worth having, for the northern part of the Island of Niphon is but sparsely populated, and is far from being as productive as the southern portion, or Kiusiu. But the admission of foreigners at the two former ports is greatly to be desired, and would we are certain do more towards thoroughly developing the resources of the country than even the opening of Osaka itself.

The *Japan Times*, in discussing this matter, advocates "the "abrogation of the present Treaty, so hastily and inconsiderately "made, and the substitution for it of another more comprehen

Digitized by Google

"sive and practical." In this we do not quite agree. The Treaty is certainly very defective, but the fact of its having been made hastily and inconsiderately is no argument for throwing it aside in a similar manner. Far better to endeavour by persuasion, and when necessary by gentle pressure, to get it gradually modified and extended until it meets the requirements of the time. Again, the *Times* says, "We have a Treaty with the SHIOGOON, which "Treaty can have force in his territory alone." This we think scarcely describes the actual state of the case. It is true the Treaty was originally made with the SHIOGOON, but it has since been formally accepted and ratified by the MIKADO, whose vassal the SHIOGOON is, in common with all the other Daimios, and it ought therefore to be available throughout the length and breadth of the country. Why then should not a clause be added to it by which foreigners shall be permitted to trade with such of the Daimios as may be found willing to throw their ports open, giving at the same time a guarantee not to force themselves on those who are averse to such intercourse? Were the matter taken in hand with the requisite tact and firmness, there is little doubt that such a clause would be assented to by the SHIOGOON and ratified by the MIKADO. It must be evident to them both by this time that with or without their permission certain Daimios *will* avail themselves of the benefits of commerce; and it should not need much persuasion to induce them to withdraw a prohibition they are powerless to enforce.

THE MAIL SERVICE.

IT will be seen in our Parliamentary reports that a distinct question was put to the Treasury department as to their intentions in reference to inviting the Messageries Imperiales to tender for the performance of our India and China mail service. There was a great outcry on this subject at the meeting of the P. and O. Company, and there is a general uproar at the possibility of such a contract being made; but the agitators need not disturb themselves on the subject, for there is no probability of our Post-office coming to terms with the French company, which is restrained by the very proper belief that they cannot serve two masters. Any arrangement with the English Government would necessarily interfere with the high subsidy they at present receive from their own. In consequence of some misconception of the intentions of the Committee on the Postal Service, the chairman (Mr. CRAWFORD, M.P.) has published the following letter in *The Times*. It is important to know that the committee did not mean by the expression, "*having regard to any facilities which may be afforded by the "monthly service to China now performed by the Messageries "Imperiales from Marseilles*," that such service was to be used as a substitute for one of our own English services, but that full facilities should be afforded by our Post-office to avail of such service in addition to our own fortnightly one. Of course there is no security as to how long the Messageries line may run, and it would be highly impolitic to base our arrangements in any way upon it, except as a supplementary or extra service.

"Broad-street, June 6.

"Sir,—I wish to remove some misapprehensions which exist in the minds of many persons as to the intent and meaning of the paragraph in the 'recommendations' of the Select Committee of last session, in which reference was made to the Messageries Imperiales Company of France. The paragraph ran as follows:—

"'That Her Majesty's Government should take into their early consideration the arrangements to be made in consequence of the proposed separation of the Indian service for maintaining a fortnightly or half-monthly service to China, and a monthly or four-weekly service to Australia, having regard to any facilities which may be afforded by the monthly service to China now performed by the Messageries Imperiales from Marseilles.'

"The committee did not propose, nor was it in their view, that the Government should enter into any contract with the Messageries Imperiales Company for the conveyance of the China mails. They had before them the fact that as our mails are conveyed once in the month to and from the Brazils and the Gulf of Mexico by the mail steamers of the French company, with much advantage to the British public, in the fortnight intervening between the monthly departures of the vessels of the Royal Mail Steam Packet Company, so an endeavour should be made to utilise, more than is at present done for our purposes, the service of the Messageries Company, by arrangements made to harmonise the departure of their vessels from Marseilles with those of the Peninsular and Oriental Company from the same port.

"There is every reason why we should not be dependent upon a foreign company for the conveyance of our regular mails, but no reason, on the other hand, why we should refuse to use freely for the purposes of our commerce any supplementary facilities which a foreign service may place in our way.—I am, Sir, your obedient servant, "R. W. CRAWFORD."

THE JAPANESE VISITORS TO PARIS.

THE rival Japanese missions still continue to attract a good deal of attention. A Paris paper having stated that there were two Embassies from Japan now in Paris, one representing the Shiogoon and the other the Prince of Satsuma, "one of the most powerful and influential of the Japanese Confederation," *La France* objects to this description. It is not true that the brother of the Shiogoon now in Paris is an *Ambassador*. He has no title but that of Prince; he is merely a private individual; and the Minister he has brought with him has no other function but that of settling questions of etiquette during the young Prince's stay in the French capital. Neither is it correct to give the title of Ambassador to the representative of the Prince of Satsuma, for the simple reason that Prince Satsuma is a vassal of the Japanese Crown, and by consequence has no right to be represented by *Ambassadors* at foreign Courts. The personages sent to Paris by Prince Satsuma are Commissioners to the Exhibition; and that they are not accredited as diplomatic agents to this Court is proved by the fact of their not having been received officially by the Minister of Foreign Affairs.

WE understand that instructions have been sent out to the officer who commanded the 73rd Regiment on its passage to Hong Kong per *Golden Fleece*, to forward an official explanation as to certain statements that appeared in the *Hong Kong Daily Press* in reference to their ill-treatment on board, improper clothing when landed, and the despatch of the women to Stanley, whilst their husbands were kept in the town barracks. The complaints as to want of ventilation we are glad to learn were attended to before the vessel left on her return voyage.

IT appears that Mr. POPE HENNESSY has accepted the post offered him of Governor of Labuan and Consul-General in Borneo, but his departure has been delayed for the present. Should any more desirable appointment fall vacant before Mr. HENNESSY proceeds to the East it is not impossible that his acknowledged claim on the Conservative party will receive due consideration from Lord DERBY'S Government.

THE next departure of the steamer *Colorado* from Hong Kong is fixed for the 18th May. Allowing six days for the run to Yokohama—which is ample during the S.W. monsoon—two days detention, and twenty days from thence to San Francisco, she may be considered due at the latter port on the 15th June. Should the telegraphic wires and the Atlantic cable be in working order we may expect messages on the following day, and we trust they will prove more useful than the last.

WE find that the intimation received by last mail regarding the probable opening of Nanking did not proceed from an official source. It is very doubtful whether such a step will be taken during the present year, as experience indicates that we have enough open ports on the Yang-tse already.

WE are informed that the publication of the correspondence moved for by Mr. WHITE in the House of Commons relative to Dutch aggressions in Sumatra, has been delayed in consequence of the transfer of the Straits Settlements from the India department to the Colonial-office.

WE observe that the instalment of Sikhs, which it had been decided should be recruited in India for the police force at Hong Kong, has left Calcutta for that place, the number being about 150.

IT is notified in the *Gazette* that the Queen has been pleased to approve Mr. Th. Probst as Consul at Hong Kong for his Majesty the King of Prussia.

PENINSULAR AND ORIENTAL STEAM NAVIGATION COMPANY.

The half-yearly general meeting of proprietors was held on the 5th inst., at the offices of the company, 122, Leadenhall-street; Mr. P. D. HADOW, the deputy-chairman, presiding.

The report of the directors, which is given in another column, having been read by Mr. HOWELL, the secretary,

The CHAIRMAN proceeded to move its adoption. He prefaced his remarks by stating that the lamented absence of Mr. Anderson rendered it incumbent upon him to occupy his present position. The causes of the deficiency were very clear and very simple. They arose chiefly in two respects—namely, the enormous increase of necessary outlay, and the almost total cessation of freight that they had been accustomed to have regularly for the last 14 years. As had been stated in the report, the increase in the price of coals during the past six months was £42,000, and to that must be added the immense falling off in the carriage of specie. Those, he thought, were two satisfactory and conclusive reasons why the

Digitized by Google

directors did not offer a dividend on that occasion. They had also been tied to the performance of a complicated series of contracts, which were taken in 1853 and 1854; and in times like these, when everything was so increased in price—when, in fact, everything had risen 15 per cent. as compared with the period to which he referred—many circumstances tended to add to the unfavourableness of their position. Those contracts admitted of no relaxation. Their non-performance would have been attended with heavy penalties, and the board hailed with satisfaction their termination in February, 1868. When they first entered upon the contracts they had no foreign competitor to contend with; they had the ground to themselves; they had higher fares, and they had less expense as regarded wages and other items than they had now. Since that time great changes had taken place not only in trade generally, but in their position. The French Government, seeing how the commercial position of England had advanced, and the Emperor naturally desirous to promote his own prestige amongst other sovereigns, encouraged the formation of a very large and powerful steam company for the purpose of trading to India, China, and Japan. His Majesty subsidised the company, and not only did that, but advanced the money to commence the creation of this large fleet, which was now working, and of course, with great advantages compared with those afforded to the Peninsular and Oriental Company. When they took the contracts in 1853 and 1854 they did not think the word "mails" was so comprehensive in its character as it subsequently proved to be, and they, in their simplicity, thought it merely included letters and newspapers, whereas they now found it embraced books, jewellery, and other things which they formerly used to carry as valuable parcels. If they had contracts any more they should have that matter adjusted. He wished to mention all the unfavourable circumstances to them, and he therefore would not omit to state that the Government were about to establish a transport between Suez and Bombay for the conveyance of troops from this country to the latter place, and that step on the part of the Government would tend to diminish their passenger traffic. With regard to the contracts which would expire in February, he wished to say that they would receive the attention of the directors. Owing to the general increase in their expenses it was quite necessary that they should have an increase of subsidy, and it was impossible to expect that they could go on with advantage without it. The Chairman then read a letter from Mr. Anderson, the chairman of the company. That gentleman, after explaining the cause of his absence from the meeting, stated "that the inability of the directors to recommend any payment on account of dividend had naturally caused disappointment, but he trusted that a careful perusal of the report would have convinced the proprietors that no means had been neglected by the managers of the company's affairs to protect their interest. The circumstances which had led to the present check to the company's hitherto successful progress he looked upon as only of a temporary character. The time was not distant when they would be in a position to obtain a revision of their contracts for the India and China postal service, with such an increase of remuneration as might form an adequate compensation for the expenses and drawbacks which the execution of that service involved. The recent stagnation of trade in the East must before long have its reaction, as the history of such commercial vicissitudes had generally demonstrated. But should there be some falling off of the freight hitherto obtained on valuable articles, such as silk and specie, he thought they might look forward to that being to a considerable extent, if not altogether, compensated by the new branch of carrying traffic springing up, viz., that of raw cotton homewards and manufactured goods outwards, now taken by the overland route instead of that by the Cape of Good Hope. They had not failed in taking measures for reaping the benefit of their new branch of traffic. The new ships recently added and being added to their fleet were well adapted for it by large cargo capacity. Taking into view these circumstances, he could not entertain any feeling of despondency as to the future progress of their great enterprise, and he trusted he might venture, after having been intimately and actively connected from its origin with the steps which had led to its successful progress hitherto, without too much presumption, to claim some confidence for his opinion. He would state a fact which he thought could not fail to prove his confidence in what he predicted, viz.—that of the large number of shares held by him he did not intend to part with one. On the most careful consideration he confessed that he could not see anything either in the present position or future prospects of the company to cause that alarm which seemed to have led some of the shareholders to rush into the market with their shares, sacrificing their own property and depreciating, for the present at least, that of their fellow-shareholders. Their splendid fleet never was in a better condition than at present, and it was fully equal to carrying out the whole of the proposed extended postal service with India and the East. They had the recorded approval of the highest and most competent authorities—the Parliamentary committee and the Postmaster-General—of the efficiency with which they had hitherto performed the postal service, as well as the liberal manner in which they had dealt with the Government and the public in respect to it, and this for a period extending over more than a quarter of a century." The Chairman, referring to one portion of Mr. Anderson's letter, explained that the directors had sent a proposal in favour of remodelling the contracts, but it had not been accepted, although he believed it would have been well for the country if it had been accepted. He then concluded by moving the adoption of the report.

Mr. EWART seconded the motion.

Mr. WARD, after complaining of the increase in the item of coal, inquired what steps had been taken by the directors during the past twelve months to investigate the question of the supply of Australian coal for use at the Indian ports. He said that that coal could be landed in Bombay at 30s. per ton, and he had been told the company had been paying 58s. for their supply at the same place. He had in his possession reports from the Government and from public companies to show that Australian coal was at all events equal to the best English coal.

Dr. BEATTIE said that five years ago, at a half-yearly meeting in that room, while referring to the vast benefits conferred on this country and its Eastern possessions by the rapid and exact communication kept up by their company, he gave expression to his view of the consequences which would result from the competition which was then being established by the Compagnie des Messageries Imperiales. An hon. director then presiding, and who he regretted to see was unable to be present on that occasion, said he did not share in his anticipations. The result, however, had been unfortunate to the shareholders, nor could it be otherwise, seeing the French company received from Government a subsidy four times as much as the Peninsular and Oriental Company got. That company had, therefore, been able not only to give increased opportunity of postal communication with the East, but to carry English passengers, treasure, and merchandise at a reduced tariff, be it observed, without requiring or obtaining any aid from our Government. Past experience did not, he thought, justify the expectations expressed in the directors' report now before them that the Government would take a liberal or an enlightened view of the question, about which the British public at large, as well as they themselves, were at present interested. They would have observed a question put on Monday night in the House of Commons by an energetic member lately connected with the Treasury, and no doubt an aspirant for office hereafter, but who as a director of an important subsidised mail company with which the French company competed ought not to hold his present opinions and that office. The reply given by a member of the Government was that the French company had been invited to tender, and it was hoped would tender, for carrying the English mails to the East. Well, neither he nor any one then present feared or grudged competition by English capitalists, but for his part he thought it an unpatriotic and very questionable proceeding to solicit a foreign company to compete with English shipowners to convey English mails to English colonies, and to alienate a portion of the revenues of this country to strengthen the commercial navy of the French. He knew not what the intentions of the directors of the company were in reference to the present emergency. He had confidence they would act judiciously, but he regretted, before taking power to increase the capital of the company, that they did not adopt the initiative and give notice to Government that they could not carry on the service without higher compensation.

Sir P. COLQUHOUN considered that the 9½ per cent., which was the average of the dividend that they had received, could be hardly said to be a good return on an investment in a sea-going company which had great risks in connection with it. He thought the great blot in the company was that it had no depreciation fund. They were continually eating their property, and in order to restore it to its former position they must get new capital.

Mr. JONES echoed the hopes entertained by the chairman, and believed the cry of discontent came solely from the non-commercial shareholders. With reference to the invitation given by the Government to the French Company to send tenders for the conveyance of English mails, he thought a general outcry should be raised against such a proceeding, which he believed would act most prejudicially against the commercial interests of this country.

One or two other proprietors shared in the feeling expressed by Mr. Jones in reference to the conveyance of English mails by a foreign company, and considered the company should enter their indignant protest against any proposal to that effect.

The CHAIRMAN, in replying to questions that had been put, and to the observations that had been made, said that if coals of good quality and in sufficient quantity were supplied at a cheaper rate than they at present paid, they would be very happy to receive them. The stores were of the best possible description, and not to be equalled by any other steamship fleet afloat. With regard to the suggestion made in reference to the publication of the accounts, he wished to say that the accounts were open to the inspection of shareholders a fortnight before the meeting. The real deficiency was £153,000, which included insurance and depreciation. It was not true that the board had made four calls, knowing the state of affairs, and thereby taken in the shareholders. He told them last year that the new capital would be issued as soon as the new charter could be obtained, in February, and the board did not then anticipate not receiving a dividend. The directors had all taken their shares and paid upon them. The reserve fund, which was £450,000, was invested in the company's fleet, and if it had not been utilised in that way they must have called up an equal amount of capital. The amount of business upon which the loss had taken place was over £1,000,000. He considered it probable that another call would be made this year.

Sir PATRICK COLQUHOUN introduced a motion in favour of the appointment of a committee of investigation, but as it found no seconder it fell to the ground, and the report was adopted.

A vote of thanks to the chairman terminated the proceedings.

SALES OF CHINESE OBJECTS OF ART IN PARIS.

The demand for artistic objects of Chinese and Japanese origin seems to be on the increase; there have been several sales of importance of late, and at one of them less than two hundred lots realised an amount equal to £5,639. A large semi-oval porcelain vase sold for a sum equal to £100; one china jardiniere for £149, and another for £95; a narrow-necked bottle of "camelia-leaf" green, £440. The cloisonné enamelled ware as usual reached still higher prices; a balustre-shaped vase fetched £146; a four-faced vase £120; a large square perfume pan, £81; a triple gourd-shaped vase, £118; and another balustre-shaped vase, £160. The gems of the sale, however, were a pair of elephant vases (not very large) which fetched £524; and two statues, half life-size divinities, supposed to offer protection against evil genii and to personate wisdom and science, which realised £564. It is not the custom in Paris so announce the names of buyers, so that it is by no means easy to ascertain into whose hands such treasures pass; the facts themselves however are sufficient to show that the taste for what the French call *Chinoiseries* is far from having expired in Paris.

BANKS AND COMPANIES CONNECTED WITH THE FAR EAST.

Peninsular and Oriental Steam Navigation Company, 122, Leadenhall-street.

Monetary and Commercial.

The bullion in the Bank of England has now reached a total of £20,954,326, showing an increase of £537,043. The reserve of notes has augmented to £11,627,090, exhibiting an increase of £268,495. The other securities show a decrease of only £9,825. The Government balances have increased £354,696, and the private balances have decreased £122,179. The Bank of France return is also exceedingly satisfactory. A further increase of bullion to the extent of £1,140,000 has taken place. The private accounts show an increase of £203,320. There has been a decrease in the bills discounted of £2,240,000, and a decrease in the amount of notes circulated of £1,120,000.

The progress shown in the banking world from 1839 to 1866, as represented by the total balances of the four greatest joint-stock banks in London, is exceedingly remarkable. The total balances held by the London and Westminster, the London Joint-Stock, the London and County, and the Union Bank of London, at the close of 1839 (or as near that date as can be ascertained) amounted to £3,030,963; and the same banks held on the 31st of December last the enormous amount of £71,788,555, which shows a growth equal to no less than 2,268 per cent. since 1839. To what extent the balances held by the other banks of the metropolis have increased during that period there is no means of ascertaining.

The Commercial Bank Corporation of India and the East have received a telegram from Mr. Chauntrell, of Bombay, stating that meetings of the shareholders and creditors have been held, and resolutions unanimously passed, approving the project by Messrs. Chadwick, K'Kenna, and Co., for the reconstruction of the bank, and for the payment of the creditors by instalments.

In the matter of Overend, Gurney, and Company the application for the £10 call, which the Court on the 3rd of May directed the liquidators to make, came on before Vice-Chancellor Malins in chambers. It was opposed on behalf of the shareholders, but, nevertheless, the order was made for the call of £10, to be paid on the 25th June, the Vice-Chancellor remarking that he could not permit the pendency of the appeal to the House of Lords to interfere with the general liquidation, and that in his view the shareholders, and not the creditors, were to wait the realisation of the locked-up assets. He considered the creditors entitled to look to the unpaid capital as an asset of the company, and that, under the circumstances of the case, however much he regretted the necessity, it was his duty to make the call. The parties mentioned that they had every hope that the appeal would be decided by the House of Lords before the end of the session.

Messrs. Thomson, Bonar, and Co., have invited subscriptions for £200,000 bonds of the Provincial Orel and Vitebsk Railway Company, with an absolute guarantee of 5 per cent. from the Russian Government, being part of an authorised sum of £4,500,000. The dividends will date from the 15th of April last, and the issuing price is 77½, representing a money total of £1,550,000. The instalments extend to the 15th of November next, and the bonds are to be redeemed by a sinking fund, at par, within a term of 85 years. The railway, it is stated in the prospectus, completes a system of lines "directly connecting the most productive districts of central Russia and the capitals of the empire with its western ports, and of itself offers ample security for the payment of the dividends on the capital employed in its construction." The guarantee for the 5 per cent. interest, however, is not dependent on the line paying its working expenses, but is unqualified and free from all contingencies.

The annual meeting of the Ceylon Company (Limited) will be held on the 18th instant, when a dividend for the six months ending March last will be declared.

The biddings for £250,000 in bills on India took place at the Bank of England. The amounts allotted were—to Calcutta, £124,800; to Madras, £17,500; and to Bombay, £58,500 The *minimum* price was fixed, as before, at 1s. 11½d. on all the Presidencies, and all tenders at and above the *minimum* will receive in full. These results show a further considerable falling off in the demand for means of remittance to the East.

The half-yearly meeting of the P. and O. Company was held on the 5th instant, and the report duly adopted. A notice will be found in another column.

BOARD OF TRADE RETURNS.

A further falling off in both the Import and Export trade of this country is shown by the Returns of the Board of Trade for the month of April and the first four months of the year, which have been published somewhat later than usual. As evidence of the universal depression at present existing in all branches of commerce, the value of the exports for the month of April as compared with April, 1866, exhibits a decline of ten per cent., the figures being £13,804,908, against £15,366,414. For the four months the deficiency amounts to nine per cent., the value of the exports being £56,186,529, against £62,357,579 in the corresponding four months of 1866. The Imports are returned only for the month of March, and for the first quarter of the year. Their value for that month was £17,183,770, fourteen per cent. less than the value for March, 1866, which was returned at £19,891,204; while for the three months ended 31st March, the Imports amounted in value to £41,464,818, against £46,348,927 in the corresponding period of last year, showing a reduction of £4,984,109, or about ten per cent.

The value of the Imports into this country from China (exclusive of Hong Kong) for the first quarter of the present year, compared with the corresponding period of 1866, shows an increase of twenty per cent., from Hong Kong an increase of eighty-five per cent., from Japan an increase of twenty-six per cent., from Singapore a decrease of eighteen per cent., and from Ceylon a decrease of thirteen per cent. The Importation of Raw Silk from China has decreased in value seventy-six per cent., and that of Sugar from the Philippine Islands sixty-eight per cent.

Our Export trade with the Far East has also for the most part undergone considerable decline. Thus the value of the Exports to China (exclusive of Hong Kong) for the three months, when compared with the corresponding quarter of last year, exhibits a reduction of sixteen per cent., to Hong Kong forty-eight per cent., to Japan twenty-five per cent., and to Java five per cent. On the other hand, the Export to Singapore shows an increase in value of thirty per cent., and to the Philippine Islands of sixty per cent. The principal falling-off appears to have been in Cotton Goods, the export of Yarns to China being thirty-nine per cent., and of Manufactures forty-three per cent. lower in value than last year.

Digitized by Google

The following is a summary of those figures relating to our Export and Import trade with China and the countries in the Far East:—

IMPORTS.

The total quantity of Raw Cotton imported during the month and four months ended 30th April, and the value to the 31st March, are thus given :—

From	1865.	1866.	1867.	
	Quantity for the Month ended 30th April.			
China	36,672	—	—	cwts.
British India	230,900	610,930	139,233	„
Egypt	123,330	155,598	97,140	„
Total from all parts	592,095	1,663,025	987,176	„
	Quantity for the Four Months ended 30th April.			
China	142,818	—	2,041	cwts.
British India	635.510	1,068.380	286,263	„
Egypt	600 693	402.495	551.145	„
Total from all parts	2,025,369	3,689,434	2,802,395	„
	Value for the Month ended 31st March.			
China	£268,190	—	—	
British India	1,101,132	£1,062.783	£230,972	
Egypt	1,118.997	1,058.618	1,708.903	
Total from all parts	3,762,195	7,848,229	5,854.959	
	Value for the Three Months ended 31st March.			
China	£538.048	—	£10,001	
British India	2,362,135	£3.215.313	696,137	
Egypt	4,165.482	2.544,308	3,415.414	
Total from all parts	10,819,439	17,903,379	12,119.848	

The quantity and value of the Raw Coffee imported into the United Kingdom from British Possessions are thus shown :—

From	1865.	1866.	1867.	
	Quantity for the Month ended 30th April.			
Ceylon	5,796.814	7,980.343	9,680.005	lbs.
Other British Possessions	1,394,493	1,689,969	1,628,056	„
	Quantity for the Four Months ended 30th April.			
Ceylon	15,350,315	15,323.641	16.533,024	lbs.
Other British Possessions	4,820,990	2,863,736	3,129.974	„
	Value for the Month ended 31st March.			
Ceylon	£212,026	£124.693	£76.175	
Other British Possessions	47,763	17,519	8,940	
	Value for the Three Months ended 31st March.			
Ceylon	£329,913	£237.800	£236,564	
Other British Possessions	107,332	38,742	45,215	

The following quantities were entered for Home Consumption :—

	1865.	1866.	1867.	
	In the Month ended 30th April.			
Ceylon	1,463,070	1,556,626	1,807,976	lbs.
Other British Possessions	537,560	387,114	470,683	„
	In the Four Months ended 30th April.			
Ceylon	6,693 578	6,937,090	7,408,797	lbs.
Other British Possessions	2,988,590	1,936,809	2,458,075	„

Returns are given of the quantity and value of the Unrefined Sugar imported from Java and the Philippine Islands :—

	1865.	1866.	1867.	
	Quantity for the Month ended 30th April.			
Of 3rd quality	25.519	—	—	cwts.
Of 4th do.	81,662	12,165	58,289	„

Total	1,900,930	1,842,174	2,170,467	
	Value for the Three Months ended 31st			
China	£38,199	£57,602	£13,597	
British India	4.047	64.430	—	
*Egypt	1,318,664	1,127,826	1,461,059	
Other Countries	474,822	672,310	950.164	
Total	1,835.732	1,922,168	2,424,820	

* In transit from India, China, and Japan.

The total quantity of the several Imports named brought into this country from all parts during the month and four months ended 30th April, and their value to the 31st March of the years 1865, 1866, and 1867, together with the quantities entered for Home Consumption during the month and four months ended 30th April are returned as follows ;—

	1865.	1866.	1867.
	Quantity for the Month ended 30th April.		
Coffee (lbs.)	8,173,730	11,023,332	13,583.044
Hemp (cwts.)	30.149	39,305	27,270
Thrown Silk (lbs.)	762	8 619	15,211
Tea (lbs.)	25,334.277	11,949 738	9,047,336
Unrefined Sugar (cwts.)	608,160	1,017,310	1,366,237
	Quantity for the Four Months ended 30th April.		
Coffee (lbs.)	25,138,900	23,577,309	25,423,392
Hemp (cwts.)	148,649	117,522	86,325
Thrown Silk (lbs.)	8,246	16.832	31,142
Tea (lbs.)	50.550,424	41,035,656	51,007,635
Unrefined Sugar (cwts.)	2,229,412	2,703,220	3,184,463
	Value for the Month ended 31st March.		
Coffee	£319,519	£173,578	£113,985
Hemp	87.638	121,078	67,086
Thrown Silk	3.250	4,647	18.731

MANCHESTER MARKETS.

After the 1st inst. the demand in this market became more active, and higher prices generally quoted with firmness, both for Yarns and Goods; but at the advance buyers have not shown much inclination to continue operations. The market is very steady at full prices, but sales are within small compass. Grey Shirtings, 7 lbs., 9s. 9d. to 10s.; 8½ lbs., 12s. 3d.; Cotton Yarn, Nos. 16-24, 1s. 4½d. to 1s 5d.; 28-32, 1s. 5½d. to 1s. 6d.; Maddapollams, 4s. 3d.; Long Cloths, 11s. 3d.; T-Cloths, 7s. 6d.

ARTICLES OF IMPORT.

TEA.—We have no activity to note in our market during the past fortnight. The large daily consumption is sufficient to keep prices tolerably steady, as the trade generally, holding but small stocks, are compelled to select such as they require from the quantity offering. The total afloat now being very small, the daily wants will have to be supplied chiefly from the stock now on hand, which will tend to keep a steady market, with a slight advance on current rates. The day for any alarm as to small stocks has certainly passed. Congous.—Siftings show no material change, Moning kinds selling from 5d. to 7d., and Kaisows from 6d. to 9d., according to quality. Broken-leaf have been steady. Fair to good common have sold to a moderate extent at former prices. Fair to good flavory kinds have sold at former prices. Good Kaisows have met with rather more inquiry, and prices show ½d. to 1d. per lb. advance. Fine to finest show no change, the transactions being limited; the same applies to Pak Ling kinds. In new-make Canton kinds sales have been made to some extent at from 1s. 3½d. to 1s. 7d. per lb. for half-chests, and 1s. 5d. to 1s. 11d. per lb. for boxes. Oolongs show no change, the finer kinds being the most in request. Souchongs remain much as before, fine to finest not selling so readily, but common to good kinds are in steady demand at full prices. Flowery Pekoes remain without change. Scented Capers have sold freely, but in some instances the late extreme rates have been barely maintained. Scented Orange Pekoes have been in rather more request, but without improvement in prices. Foochow kinds, however, have been rather dearer. Uncoloured Japans show no alteration. Green Teas: There has been a good demand for most kinds during the fortnight. Fair to good Twankays have sold rather higher. Moyune Young Hysons and Gunpowders have been steady, also the Ping Suey kinds. Hysons have sold at about previous prices. Canton Young Hysons and Gunpowders fully maintain the late advanced quotations. The public sales of China Tea on the 4th comprised 24,813 packages, of which 19,307 packages were sold, 18,890 packages being offered without reserve. The stock in the United Kingdom on the 31st May was estimated at 105,000,000 lbs., against 118,500,000 lbs. in 1866. The quantity afloat is now reduced to about 5,500,000 lbs. in seven vessels.

SILK.—During the last few days the advices that the crops had suffered less from the recent bad weather than might have been expected have caused speculators rather to pause, but there is still a fair business doing, and evidently for immediate and chiefly home comsumption, for which stocks on hand are extremely limited in addition to the assortment of fine and good useful silk by no means large. This statistical position seems to be identical everywhere, both here and on the Continent. The latest telegram from China (Shanghai, May 7) reports the silk season closed. The export being 42,000 bales, including about 13,500 Japans, against 53,625 bales to the same date in 1866. Piece Goods: A small parcel of Black Silk Handkerchiefs and Szechuen Pongees, lately arrived, found buyers at good prices, and this small business constitutes the only feature of the month, nothing else having been done in China Cloths since the Public Sales in May, the market having been very quiet. A fair parcel of Plain Crape Shawls of assorted

Digitized by Google

weights has recently changed hands at fair prices, but this article is also devoid of general inquiry. The deliveries of all China Silk Piece Goods in May were small; the present stocks are moderate. The deliveries of Raw Silk for May have been 2,675 China, 790 Japan, and from the 1st to 6th June 404 China, 125 Japan.

COTTON.—A better tone has prevailed since our report of the 27th ult., and quotations for some descriptions are raised ⅛d. to ¼d. per lb. The total London sales have been 7,100 bales afloat and 6,900 on the spot, which includes 150 bales middling to good fair China at 8⅝d. to 10¼d. per lb. The stock of China and Japan is 525 bales, and the importations from 1st January to 6th June have been 1,048 bales.

COFFEE.—A steady demand continues to prevail for Colonial sorts, and with much lighter supplies of Ceylon on the market, prices have remained without alteration. Of Plantation Ceylon, 2,400 casks and 1,900 barrels and bags have realised—fine ordinary small to fine fine ordinary, 71s. to 76s.; low medium and medium, 77s. 6d. to 81s.; good and fine medium, 83s. to 87s.; pea berry, 89s. to 95s. The sales of Native have been 360 casks and 5,000 bags as follows:—Good ordinary, 64s. to 65s.; bold, 69s. 6d. to 71s.; small, 58s. 58s. 6d.; ordinary, 50s. to 54s. 6d.; brown garblings, 26s. to 40s. The only other sale reported is of 68 bags indirect Java at 65s. The stock of coffee in the United Kingdom on the 1st inst. was 12,500 tons, against 18,600 tons at the same time last year, and 12,950 tons in 1865. The amount on hand in the five principal ports of the Continent was 57,300 tons, against 56,000 tons in 1866, and 59,300 tons in the preceding year.

COIR YARN.—A fair supply at the public sales was all disposed of without alteration in the current rates. Of Ceylon at auction 38 tons sold, good medium at £34 to £34 5s.; medium, £30 5s.; common to good common, £25 10s. to £28 5s. By private contract 104 tons found buyers, common at £25 10s. to £27 5s.; good common, £28 10s.; medium, £29 15s. to £30 10s.; good medium £34 to £36; fine, £43 to £46 per ton.

DRUGS.—Beans: Of 11 packages Tonquin offered 10 packages sold, very ordinary to good medium at 10d. to 13d. Cubebs: At auction 50 bags second-class mouldy Singapore were bought in at 48s. per cwt. Camphor: Quotations are still maintained at the previous advance, and 100 cases China realised £6 15s. to £6 17s. 6d. former weights and 50 cases £7 reweights. Of Japan 50 tubs sold at £6 16s. 3d. per cwt. Galls: 20 cases partly broken Japan were bought in at 55s. per cwt. Rhubarb: Of 208 cases China at auction 80 cases sold, very good at 8s. to 8s. 9d.; fair, 5s. 6d.; good medium, 4s. 3d.; medium, 3s. 1d.; low medium, 2s. 3d. to 2s. 6d.; one lot very ordinary 11d. per lb.

EBONY.—Of Ceylon 33 logs (14 tons) were bought in at £7 10s. to £9 per ton.

GUMS.—Benjamin: At auction 2 cases medium Sumatra seconds realised £9 2s. 6d. per cwt. Copal: The sales have been 77 cases Manila, good medium hard at 37s. 6d. to 38s.; good soft yellow, 29s.; ordinary mixed soft, 22s. to 23s. 6d.; and 8 cases Singapore at 32s. 6d. per cwt. Damar: 25 cases small pale Batavian sold at 75s. per cwt.

INDIA RUBBER.—The only sale reported is of 67 baskets low damp Singapore at 1s. 3¼d. to 1s. 3½d. per lb.

ISINGLASS.—Of Penang 7 cases and 6 bags realised: good tongue, 3s. 9d.; good medium, 3s. 7d.; medium, 2s. 8d. to 2s. 10d.; Manila sort, 1s. 6d.; pickings, 10d. to 1s 3d.

JAPAN WAX.—Of 512 boxes saucers 200 were withdrawn, and the remainder sold at steady rates; medium, partly mixed, 73s. to 74s. 6d.; ordinary mixed, 67s. to 69s. 6d.; also 19 boxes good middling cake at 78s. 6d. per cwt.

MANILA HEMP.—Prices are obtained at the former value, but transactions have been to a trifling extent, the total sales not exceeding 300 bales, chiefly good roping, at £50 per ton.

PLUMBAGO.—The sales have been 272 barrels Ceylon good lump at 25s. 6d.; good chips, 17s. to 17s. 6d.; very small chips, 11s. 6d. to 12s.; dust, 9s.; ordinary dull and sea-damaged lump, 11s. to 13s. per cwt.

PEPPER.—Black continues in request, and about 4,000 bags have been taken during the week, chiefly Penang, common to good at 2⅛d. to 2 15-16d.; Singapore, 3 3-16d. to 3¼d.; and Cochin at 3⅛d. 200 bags fair Penang White were disposed of by auction at 5⅜d. to 5½d., being ⅛d. cheaper. By private contract 1,600 bags have been sold, Singapore 3 3-16d. to 3¼d.; West Coast Penang, 2 15-16d.; Trang, 3 1-16d. to 3⅛d.; and 800 bags Cochin at 3⅛d. 205 bags Singapore White were partly taken at 5½d.

RICE.—A dull tone has continued to exist in this market on the spot, and of soft grain only 5,000 bags Nakrenzie have been sold at 11s. 4½d. The business reported in other kinds is also small, viz., 800 bags Ballam at 14s. 1½d. to 14s. 3d., and 200 tons Madagascar at 16s. For arrival, 50 tons low red Bengal have been placed at 11s. 4½d. to 11s. 6d. Floating cargoes are still inquired for, and several have been sold, but in some cases at easier prices—two of Nakrenzie, 2,000 tons, at 10s. 4½d. to 10s. 6d., and two together 1,500 tons Rangoon at 11s., Continental terms.

SUGAR.—The market has been extremely animated, and a large business has been transacted. The change has not been entirely produced by any exceptional circumstance, but is owing to a combination of favourable influences, such as stocks, prospects of supply, and low prices, brought more prominently into notice by a general amelioration of finance. The trade were disposed to buy freely, but holders becoming very firm, and at the same time a determination to buy on speculation appearing, the general value has been advanced 6d. to 1s. per cwt., while in some instances, more particularly for the common descriptions of East India, as much as 1s. 6d. to 2s. advance has been paid. The business done in floating cargoes has been unusually large, and at gradually advancing prices, which are now 1s. to 1s. 6d. above those current previously. At auction 1,400 bags Penang have been placed at 30s. 6d. to 34s., and 5,593 bags unclayed Manilla of recent import at 25s. 6d. to 26s. The private sales have comprised 36,000 bags unclayed Manila at 25s. to 26s., and 1,200 bags clayed Manila at 30s. to 31s. per cwt. The imports of sugar into the United Kingdom during the first five months of the year are estimated at 256,000 tons, against 230,000 tons in 1866; the clearances for home consumption at 258,000, against 214,200 tons; the stock at the end of May was 185,600 tons, against 203,000 tons last year.

STICKLAC.—In good demand, and 200 cases Siam sold without discount at 52s. 6d.

SAPANWOOD.—Of 24 tons Siam offered 15 tons sold, first pile at £12 10s.; second, £11 10s. to £11 15s. Of Manila, 22 tons were bought in at £12 10s.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £5 15s. to £6; nail rod, £7. 10s. to £8; hoops, £8. 10s. to £9; sheets, single, £9. 15s. to £10; Staffordshire bars, £7. 10s. to £8 10s.; rails, £6 5s. to £6 10s.

STEEL.—Swedish keg, £16.

COPPER.—Sheet and Sheathing, £83 to £89 per ton; yellow metal, 7¼d. to 7½d. per lb.

TIN.—£89 for block; £90 for common bars. Tin plates, best charcoal I.C., 30s. to 31s. 6d.

LEAD, &c.—English pig, W.B., £21 5s.; shot, patent, £23; sheet, £21; spelter, £21 to £21. 5s.; zinc, English sheet, £26 10s. to £27; quicksilver, £6 17s.

The following is from the Circular of Messrs. French and Smith:—There are symptoms of increased activity in this market, although we see but little improvement in prices. The low price of money should, we think, have some influence on price, especially as some metals are much below their average value. Iron: Scotch pig is firm; Welsh is rather stronger; Staffordshire, for best brands, is still inquired for. Copper: The first part of May there was an improved demand, and prices advanced 1 to 2 per cent.; the latter portion of the month this advance was lost. Chili bars now quoted £71. 10s.; Burra, £87; Wallaroo, £84; Tough, £83. At the Swansea sale of 28th ult. the price of ores rose 2 per cent. TIN: In this article we have had a good deal of business, principally for immediate consumption, but there being no speculative operations to assist holders, the price has moved up but little. To-day £85 10s. is paid freely for fine quality Straits; £86 to £87 afloat, according to date of sailing. Banca here is quiet at £92. In Holland some transactions are reported at £52 guilders. The last price of Straits quoted at Singapore brings the price to about 88 laid down here. Tin Plates: The quotations have continued to give way, more especially coke plates, not so much owing to a falling off in demand as to the great and increasing production. The shipments for May were 145,000 boxes, against 80,000 boxes same month in 1866. By the Board of Trade Returns the exports, January to April, were 23,230 tons in 1867, against 24,680 tons in 1866. The United States have taken 5,500 tons less the first four months of the present year than during the same months in last, a part of this falling off being compensated by increased export to other countries. Lead: The price is a little more in favour of buyers, as the export demand the past month was very limited. The falling off in the exports is mainly to China and the East, the shipments to this quarter being 2,600 tons less than last year. The United States have also taken less by 1,000 tons than last year during the same months. Spelter remains at £21 to £21 5s. per ton, with scarcely any variation through the past month; the stock on 31st ult. was 3,296 tons, against 5,787 tons in 1866. Quicksilver, unchanged.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 1st January by the P. and O. Company's mail steamers.

FREIGHTS AND CHARTERS.

Outward freights to the Eastern ports remain as quoted in our last issue. Coal freights from the northern outports still continue firm.

Current rates of freight for vessels on the berth:—To Yokohama: 20s. to 30s. weight, 50s. meast. To Nagasaki: 50s. weight or meast. To Shanghai: 40s. weight, 45s. meast. To Amoy: 45s. weight or meast. To Foo-chow-Foo: 45s. weight or meast. To Hong Kong: 35s. weight, 40s. meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Manila: 40s. weight, 85s. meast. To Ceylon: 25s. to 30s. weight, 35s. meast.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Hong Kong: £46. For Singapore: £40. For Shanghai: £56 For Saigon: £50. For Yokohama: £52. For Batavia: £35. From Newport, Cardiff, or Swansea, per ton.—For Hong Kong, £2 2s. For Singapore: £1 18s. For Shanghai: £2 12s. 6d. For Saigon: £2 8s. For Yokohama: £2 10s. Batavia: £1 15s. Coke.

The Admiralty have invited tenders for the conveyance of 570 hogsheads beer from the Thames to Hong Kong; and of 11 tons heavy, a gun, iron garlands and shells, to Trincomalee.

CASUALTIES.

The Northfleet, from London to Hong Kong, spoken April 19, 2 N., 13 W., had met with a severe gale from N.W. March 25, when a heavy sea broke on board, washed overboard chief mate, and carried away starboard quarter boat and lee bulwarks.

The Welfenfurst, Schramm, from New York to Hong Kong, put in at Rio Janeiro Jan. 31, being leaky, and has since been sold by auction.

The Coringa, Fellows, from Liverpool to Hong Kong, arrived at Queenstown June 1, reported leaky.

The Samuel, Wigzel, which sailed from Cardiff May 23 for Chefoo, arrived at Scilly May 31, with mainhatch stove, loss of bulwarks, cargo shifted, &c.

The Seaflower, Talbot, from Sunderland to Shanghai, which put in at Rio de Janeiro April 21, with damage, will have to discharge her cargo.

A telegram from Penang dated May 23 states that the Freeland (ship), from Cardiff to Singapore, has foundered, and is a total loss; crew saved.

MISCELLANEOUS.

At MADEIRA.—May 15, Royalist (s.), Oxford, from Glasgow, and left for Singapore.

At ST. VINCENT (C.V.).—May 11, Pehio (s.), Bell, from Glasgow, and left 12 for China; April 27, Thales (s.), Bramwell, from Liverpool, and left May 1 for China; May 17, Lamont (s.), Castilla, from Glasgow, and left 21 for Shanghai; April 23, Coquette (s.), Lobnitz, and sailed for Japan.

At MAURITIUS.—March 18, Pride of the West, Curwen, from Singapore; 23, Borneo, Mathews, sailed for Batavia; 31, Alabama, Harrison, and sailed for Galle.

The steamer Lamont put into Lisbon on the 3rd May, leaving on the 9th, and arrived at St. Vincent on the 17th, which port she left on the 21st for Cape and China. The Peiho, steamer, left St. Vincent on the 12th May for China. The Courier, steamer, arrived on the 19th, and was to leave on the 22nd or 23rd for Japan.

EXQUISITE SCENTS FOR THE HANDKERCHIEF.
HYGIENIC ELIXIR FOR THE MOUTH.
SUPERFINE MILK OF LETTUCE SOAP.
EMOLLIENT POMADE FOR PRESERVING AND BEAUTIFYING THE HAIR.

HUBBUCK'S PATENT WHITE ZINC PAINT.

THE most durable and beautiful paint known, is cheaper than White Lead, and is proved to be superior for all purposes than the pernicious Lead Paint, and equally adapted for all climates.
Its whiteness is unaffected by bilge water, boiling sugar, or noxious gases.
It is free from any poisonous ingredient, and suited in all respects to the use of the painter.

Each Cask of Pure White Zinc is Stamped "HUBBUCK, LONDON PATENT."

Inferior Zinc Paint, so marked, having been sold in Foreign Markets, the Patentees offer a Reward of FIFTY POUNDS for information which will lead to the conviction in an English or Colonial Court, of those who have pirated their Mark. Both Exporters and Retailers are liable for its sale.

THOMAS HUBBUCK AND SON,

WHITE LEAD, OIL, PAINT, AND VARNISH WORKS,
24, LIME-STREET, LONDON.

HUBBUCK'S ANTI-CORROSIVE PAINTS

Are very durable, and the most valuable protection to Iron Roofs, Bridges, Piers, Ships and Buildings, exposed to stormy weather and scorching sun; they soon become extremely hard, and do not blister.
They are made of Stone, Slate, Copper, White, Blue, Green, or any other Colour that is desired.

HUBBUCK'S ANTI-OXIDATION COMPOSITION,

For Coating Iron and Wood Ships' Bottoms; a preservative against fouling and corrosion. This Composition is ready for immediate use, and obviates the waste of carrying unmixed Paints, Oils, Driers, &c. It is also applicable to as the purposes of other Paints.

HUBBUCK'S PALE BOILED OIL

Hasless colour than Raw Linseed Oil, is a quick, hard and certain drier for White and Light Coloured Paint.

PAINTS AND OILS PROPERLY PACKED FOR EXPORTATION.

SADDLE, HARNESS, WHIP MANUFACTURER, & GENERAL EXPORTER

TO THE COURTS OF FRANCE, RUSSIA, SPAIN, ITALY, &c.

B. ELLAM

BEGS most respectfully to remind the Nobility, Gentry, and his connections abroad, that he has just completed his extensive new Premises in PICCADILLY, where in future he will have the largest STOCK of first-class SADDLERY, HARNESS, and WHIPS in the World. Every Article will be made on the Establishment, and by first-class Workmen. First quality Hunting Saddles, complete, Five Guineas each; if booked Six Guineas.

N.B.—B. ELLAM begs to CAUTION his friends and the Public against Purchasing articles not Manufactured by him, but sold as such. He is compelled to make this announcement to protect his Customers. DINNEFORD'S FLUID MAGNESIA.

THE Medical Profession for Thirty Years have approved of this Pure SOLUTION OF MAGNESIA as the best remedy for ACIDITY OF THE STOMACH, HEARTBURN, HEADACHE, GOUT, and INDIGESTION; and as the best mild aperient for delicate constitutions, for LADIES, CHILDREN, and INFANTS and for regular use in WARM CLIMATES.

DINNEFORD & CO.,
CHEMISTS, &c.,
172, NEW BOND-STREET, LONDON,
And of all other Chemists throughout the world.
N.B.—Ask for DINNEFORD'S Magnesia.

COUGHS, ASTHMA, and INCIPIENT CONSUMPTION are EFFECTUALLY CURED by

KEATING'S COUGH LOZENGES.

JUDGED BY THE IMMENSE DEMAND, this UNIVERSAL REMEDY now stands the first in public favour and confidence; this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British Colony, and throughout India and China they have been highly esteemed wherever introduced. For Coughs, Asthma, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.

Prepared and Sold in Boxes, Tins, and Bottles of various sizes, by THOMAS KEATING, Chemist, &c., 79, St. Paul's Churchyard, London. Sold Retail by all Druggists and Patent Medicine Vendors in the World.

Testimonial from Colonel HEWETT, J.P. and D.L., 3rd Brigade, Cardiff Artillery Volunteers.
Ter. Mab. Ellis, Ponty-Pridd,
Glamorgan, May, 1866.

DEAR SIR,—I was attacked with a severe cough, which your Lozenges removed in a few days. My servants, also, by taking your Lozenges, were soon cured.

I feel it a duty (to the public) to offer my testimony to their efficacy, which you are at liberty to publish.—Yours truly, W. HEWETT.

To Mr. THOMAS KEATING.

CHILDREN'S WORM TABLETS (KEATING'S).

The great remedy for these disorders in children can now be administered IN THE FORM OF A PURELY VEGETABLE SWEETMEAT, at once agreeable and effective.

Prepared and sold in tins and bottles by THOMAS KEATING, Chemist, &c., 79, St. Paul's Church-yard, London, E.C. and retail by all druggists and patent medicine vendors in the world.

Observe the words "KEATING'S WORM TABLETS" are engraven on the Government Stamp of each tin, without which none are genuine.

TESTIMONIAL.
Loughton, November 28, 1865.

DEAR SIR,—I write to inform you I purchased a box of your Worm Tablets, and they have brought no less than 30 worms, some 3 or 4 inches in length, from my child, two-years-and-a-half old. I feel it my duty to make this public, as others who may be similarly afflicted may derive benefit.—I am, your obliged,
EDWARD BUSH.

HOLLOWAY'S OINTMENT and PILLS.—Sores which are daily extending, ulcers which are hourly deepening, may be arrested in their torturing progress, and induced to take a healthy action by applying this healing Ointment, and taking these purifying Pills. It soothes all distempers of—and extracts all morbid humour from—the skin. Old ulcers of the legs, inflammations caused by varicose veins, and cramps of the lower limbs, can sensibly be eased and shortly cured by Holloway's never failing Ointment, which represses excessive and stimulates sluggish vascular and nervous action. In constitutions breaking down under piles, fistulas, and other similarly painful maladies, a few applications of this healing Ointment will give comfort, and a persistence in its use will effect a cure.

GEO. RICHARDSON & CO.,
Central Chambers, 17, South Castle-street, LIVERPOOL,
(LATE BROADGREEN.)

An immense variety of Vertical, Horizontal, Locomotive and Marine Steam Engines from 6s 6d to £5 each. Metallic Model Screw and Paddle Steamers and Sailing Yachts from 5s to £20 each. All thoroughly tested previous to dispatch.

TESTIMONIALS.

From LORD BROUGHAM.
I think very highly of your Telescope as a powerful Instrument, and am quite astonished at the very moderate price you have put upon it.

From D. CRIGHTON, Esq., FORFAR, N.B.
I have thoroughly tested your £2 2s. Od. Model Steam Engine, with which my boys are highly delighted; the material and workmanship are excellent, and being quite safe, I don't know of a more useful and instructive mechanical gift for young lads.

From the Hon. F. G. WYNNE.
The Hon. F. G. Wynne is highly pleased with the 17s 6d Vertical Engine, it is remarkably cheap, and well worth its price. He gives Mr. Richardson great credit for it.

From A. COURT, Esq., Her Majesty's Ship Cumberland.—
Your Telescope and Microscope are both admirable and wonderfully cheap.

TELESCOPES.

The Lord Brougham Telescope.—This splendid Telescope will distinguish the time by a church clock five miles, a flagstaff ten miles, windows ten miles off, landscapes thirty miles off, and will define the satellites of Jupiter and the phases of Venus, &c. This extraordinary cheap and powerful glass is of the best make, and possesses Achromatic Lenses, and is equal to a Telescope that costs £5. No Schoolboy or Tourist should be without one. Price 7s 6d, will be sent free by Rail, or post, for 8s 6d

THE NEW MICROSCOPE.

This highly finished Microscope is warranted to show the animalculæ in water, eels in paste, &c., magnifying several hundred times. The Microscope is mounted on a brass stand, and has a compound body with Achromatic Lenses, Test Objects, Forceps, and spare glasses for mounting objects, &c. &c. The whole contained in a highly polished mahogany case, price 7s 6d, or will be sent carriage free (by Rail) for 8s 6d.

ILLUSTRATED CATALOGUE.

G. RICHARDSON & Co. have published a Catalogue of 80 pages, illustrated with 8 full page engravings of Steam Engines, 8 Lithographed Drawings, beautifully printed in colours, of Screw & Paddle Steamers & Sailing Yachts, and 12 Views of Magic Lanterns and Slides describing upwards of 1500 Slides embracing every subject; also full particulars of Microscopes, Telescopes, &c., &c. G. R. & Co. earnestly invite every one to procure a copy, as it gives an extended view of the various articles which cannot be put into an advertisement. It will be sent free on receipt of ONE Stamp for postage.

Prize Medal 1862.

HARMONIUMS.

W. E. EVANS,

THE ORIGINAL INVENTOR AND MANUFACTURER OF HARMONIUMS IN ENGLAND,

Prize Medal 1862.

RESPECTFULLY draws the attention of intending purchasers to his Unrivalled Instruments, in which he has recently introduced several important patented improvements. Amongst which may be specially mentioned the "double-action expression wind movement," by means of which the wind is supplied with half the usual exertion, and the most perfect expression realised; thus superseding the use of the "Expression Stop," so difficult of management in all Harmoniums. The advantage to purchasers is obvious, in selecting an instrument of a manufacturer whose whole life has been devoted to perfecting the Harmonium, and who finishes with his own hand every Instrument that leaves his Manufactory; whilst the prices charged are no higher than those of other makers. Every Instrument is Warranted. The undermentioned, SPECIALLY PREPARED FOR INDIA, are recommended:—

No. 1.—With One Stop, in Oak or Mahogany... ... ... 11 Guineas.
(Tinned Packing-case, and delivery at any home port, 35s. extra).

No. 3.—With Four Stops, in Oak or Mahogany ... ... 21 Guineas.
(Tinned Packing-case, and delivery at any home port, 40s. extra).

No. 5A.—With Twelve Stops, in Oak or Mahogany ... ... 29 Guineas.
Tinned Packing-case, and delivered at any home port, 42s. extra).

No. 6A.—With Fifteen Stops, in Oak or Mahogany ... ... 43 Guineas.
(Tinned Packing-case, and delivery at any home port, 45s. extra).

No. 9.—With Nineteen Stops, and Two Rows of Keys, in Oak or Mahogany... ... ... 80 Guineas.
(Tinned Packing-case, and delivery at any home port 53s. extra).

THE "EVANS" IMPROVED HARMONIUMS

are remarkable for the entire absence of the nasal and reedy tone which has hitherto been the great impediment to the general adoption of the Harmonium in private house whilst the sluggishness of speech, another great defect in most Harmoniums, has been entirely overcome by W. E. EVANS' improvements, without any MECHANICAL appliances. Fully detailed Price List, with Testimonials from the most eminent Musicians, &c., may be obtained of the Sole Manufacturer and Patentee,

W. E. EVANS, 2B, MARKET-PLACE, GREAT PORTLAND-STREET, LONDON, W.

Mr. Evans is in no way connected with any other House in London.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

DR. J. COLLIS BROWNE'S CHLORODYNE. Vice-Chancellor Sir W. Page Wood stated publicly in Court that Dr. J. Collis Browne was undoubtedly the Inventor of Chlorodyne; that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See *The Times*, July 13, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any service in Cholera was Chlorodyne.—See *Lancet*, Dec. 31, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. Extract from *Medical Times*, Jan. 12, 1866.—"Is prescribed by scores of orthodox medical practitioners. Of course it would not be thus singularly popular did it not supply a want and fill a place."

DR. J. COLLIS BROWNE'S CHLORODYNE is the best and most certain remedy in COUGHS, COLDS, ASTHMA, CONSUMPTION, NEURALGIA, RHEUMATISM, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE is a certain cure in CHOLERA, DYSENTERY, DIARRHŒA, COLICS, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE. EXTRACT *from the* GENERAL BOARD OF HEALTH, *London, as to its efficacy in Cholera*—"So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. MONTGOMERY, Esq., *late Inspector of Hospitals, Bombay*.—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other remedies had failed."

DR. J. COLLIS BROWNE'S CHLORODYNE: CAUTION.—None genuine without the words "Dr. J. Collis Browne's Chlorodyne is on the Government Stamp. Overwhelming medical testimony accompanies each bottle. Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury, London. The immense demand enables the proprietors to reduce the price; it is now sold in bottles, 1s. 1½d., 2s. 9d., 4s. 6d., and 11s.

AGENT: Hong Kong, Mr. A. S. WATSON.

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor

For passage, freight, and information apply to B. W. and H. HORNE, 4, Moorgate-street, London; G. H. FLETCHER and Co., Liverpool; at the offices of the Services Maritimes des Messageries Imperiales in Paris, Lyons, Bordeaux, and Marseilles; or to SMITH and Co., Rotterdam.

*** Passengers eastward of Suez securing their berths in London are entitled to the conveyance of their luggage free to Marseilles.

INDIA AND CHINA VIA ITALY.

SHORTEST SEA PASSAGE FROM EUROPE TO EGYPT

BRINDISI to ALEXANDRIA—Contract Passage, 82 hours
It is frequently done in 73 hours.

THE Società Anonima Italiana di Navigazione Adriatica Orientale, under contract to carry the Direct Mails despatch as under their first-class English-built steamers CAIRO, BRINDISI, PRINCIPE DI CARIGNANO, or PRINCIPE TOMASO, between BRINDISI and ALEXANDRIA. The vessels of the Company sail as follows:—From Brindisi for Alexandria on the 7th, 14th, 22nd, and 30th of each month, at 2 P.M.; Alexandria for Brindisi, on the arrival of the mails, about the 5th, 12th, 20th, and 29th of each month. The arrivals at and departures from Alexandria are in coincidence with those of the steamers of the Peninsular and Oriental Company, with the Calcutta, China, and Bombay Mails.

Fares:—Brindisi to Alexandria, including provisions 1st class, 275f.; 2nd class, 200f.; third class, 90f., and *vice versa*.

For further particulars apply to the Company's offices at FLORENCE, via Montebello, 42; PARIS, Rue de L'Universite, 108; LONDON, Messrs. PALMER, 44, Eastcheap, E.C.

JAPAN AND CHINA NEW MAIL ROUTE VIA PANAMA AND SAN FRANCISCO.

THE PACIFIC MAIL STEAM SHIP COMPANY despatch their splendid side-wheel steamers from NEW YORK on the 1st, 11th, and 21st, and from PANAMA on the 9th, 19th, and 29th of every month for SAN FRANCISCO, calling at ACAPULCO, MANZANILLO, MAZATLAN, *en route* thence to YOKOHAMA, NAGASAKI SHANGHAI, and HONG KONG. Passengers from England may connect with this line at New York by any of the various steamers from Liverpool, Southampton, or Falmouth, to that port, or at Panama by the steamers of the Royal Mail Steam Packet Company leaving Southampton on the 2nd and 17th of every month. Passengers by this route are less than ten days in the tropics.

The next departures from San Francisco are:—
GREAT REPUBLIC, 5,000 tons, September 3rd.
CELESTIAL EMPIRE, 5,000 tons, October 25rd.
COLORADO, 4,000 tons, November —.

For particulars of Freight, through passage rates, &c &c., apply to H. STARR and Co., General European Agents, 145, Cheapside, London.

NEW OCEAN MAIL ROUTE to CHINA and JAPAN, via the Isthmus of Panama and San Francisco.

THE WEST INDIA AND PACIFIC STEAMSHIP COMPANY (Limited) have made special arrangements with the Panama Railway Company and the Pacific Mail Steamship Company for the conveyance of Passengers, Specie, and Cargo between EUROPE, YOKOHAMA, NAGASAKI, SHANGHAI, and HONG KONG.

The next departures will be:—

From LIVERPOOL—5th and 20th of July,

Intending to connect, at San Francisco, with the steamer leaving on the 3rd Sptember for Japan and China, arriving at Yokohama on the 22nd, Shanghai on the 27th, and Hong Kong on the 29th September. The branch steamer to Shanghai calls at Nagasaki on both trips. It is expected that the communication will be monthly after these dates.

The Pacific Mail Company's steamers on the China station are large paddle-wheel vessels, of upwards of 3,000 tons register. The greatest attention has been given to insure the comfort and convenience of passengers by the vessels of all the connecting companies on this route.

Shippers will find this route cheaper and as expeditious as any mail service to the East.

For rates of Freight and Passage apply to the agent, J. M. CURRIE, Havre and Paris; or at the Company's Offices, The Temple, Dale-street, Liverpool, and 117, Leadenhall-street, London, E.C.

ARTHUR R. FORWOOD, Managing Director.

STEAM to INDIA, via the CAPE.—The UNION STEAMSHIP COMPANY (Limited) have entered into an arrangement with the Government for the extension of the Packet Service from Mauritius to Ceylon. Passengers can proceed from Southampton on the 8th of every Month to Point de Galle, where a junction is formed with steamers proceeding to India, China, Australia, &c. Rates of freight and passage very moderate.

Apply to FALCONER and MERCER, 23, Leadenhall-street, London; or THOMAS HILL, Southampton.

JAPAN AND CHINA.—Arrangements have been made with the United States Pacific Mail Steamship Company by which GOODS for Japan and China can be shipped under through bill of lading via Panama by the ROYAL MAIL STEAMPACKET COMPANY'S STEAMER leaving Southampton on 17th May. Freight from Southampton, £21. 7s. per ton measurement, with 10s. per ton primage.

Further particulars can be obtained on application to J. M. LLOYD, Secretary.

Royal Mail Steampacket Company, 55, Moorgate-street, London, E.C.

ORIENTAL, AUSTRALIAN, AND GENERAL STEAM AGENCY, AND GLOBE PARCEL EXPRESS.

PARCELS, PACKAGES, and MERCHANDISE forwarded, and PASSAGES engaged to all parts of the world. Baggage collected and shipped, insurances effected, &c.

CALCUTTA, MADRAS, CEYLON, and ADEN—Overland, 4th and 20th of every month.

BOMBAY and ADEN—Overland, 12th and 27th.

No. 22, Great St. Helen's, E.C.

COLOMBO DIRECT, the well-known clipper ship TEVIOT, A 1 13 years, 433 tons register; JOHN WHEELAN, Commander; loading in the West India Docks. This splendid vessel has a full poop, with every accommodation for the comfort and convenience of passengers.

For passage apply to W. H. Tindall, 5, Tokenhouse-yard, and for freight or passage to F. Tallack, 23, Birchin-lane, E.C.

To follow the "Skimmer of the Waves."
Will meet with the usual despatch.

DIRECT FOR COLOMBO, the splendid fast-sailing British-built ship, PALMERSTON, A1 15 years, 894 tons register, J. N. SEAGROVE, Commander; West India Docks. This magnificent vessel has just returned from Cochin in 95 days, and from her high class and quick passages offers the most favourable opportunity for passengers and shippers desirous of despatch.

For Freight or Passage, apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

MALABAR COAST.—SECOND SEASON SHIP.
To follow the LIFE BRIGADE.
Has a large portion of her Cargo engaged, and will meet with quick Despatch.

DIRECT FOR MANGALORE, CANNANORE, CALICUT (or BEYPORE) and COCHIN, the fine, fast-sailing British Ship ELLEN BROWSE. A 1, 345 tons register, J. W. JONES, Commander; West India Docks. This beautiful nearly new ship offers a first-rate opportunity to shippers of Season Goods.

For Freight or Passage apply to JOHN C. CAMPBELL 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

To follow the "Haddington," and will sail June 15.

FOR BOMBAY Direct, the fine British-owned Clipper Ship JESSIE GILBERT, 3/3rds L. 1, 1, 635 Tons Register; JOHN STAPLEDON, Commander, East India Docks. This splendid vessel is nearly new, having just completed her first voyage, and from her fast sailing qualities is confidently recommended to shippers.

For freight or passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C

To follow the "Jessie Gilbert," and will meet with the usual quick dispatch.

FOR BOMBAY direct, the fine British-built iron clipper ship BEBINGTON, AA1, 889 tons register, THOMAS WARLAND, Commander, East India Docks. This splendid vessel, from her high class and fast-sailing qualities, is confidently recommended to shippers of fine goods.

For Freight or Passage, apply to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

Telegrams have been received from Hong Kong in advance of the French mail of 25th May.

List of Passengers.

PASSENGERS INWARD.

By this mail to Marseilles, per P. and O. steamer Syria, arrived June 15.—From Hong Kong: Mr. Burlinghaume, Mr. Ugarte, Mr. del Valle, Captain Heaton, Mr. Dearborn, Mr. Rennie, Mr. Lerysoln, Mr. S. Thompson, Mr. H. C. Moore, and one second-class passenger. From Singapore: Mr. Weynschink and servant, Mr. Baclin, Mr. G. Von Gerrevrick, Don P. Ansoleagas, Mr. R. Callaborra, General Solar, Don B. Espana, A.D.C., Mrs. Hoen, two children, and servant, Padre A. Lugeu, Mrs. Riach. From Ceylon: Mr. Still, Deputy-Inspector of Hospitals, J. Fraser and servant, Mrs. Fraser and four children, and one second-class passenger.

To Southampton, per P. and O. steamer Delta, expected to arrive June 21.—From Hong Kong: Mrs. Robertson, Com. Loney, R.N., Mr. A. F. Bain, Mr. G. Inglis. From Singapore: Mrs. Velze, three children, and servant, Mrs. Vanderyse and child, Don Adolfo Yolif. From Galle: Miss Johnson, Mr. O'Grady, Mr. and Mrs. Barnes, and one second-class passenger.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The mail delivered to-day brings no later dates than the French mail received on the 10th, viz., the 17th of April. The *Colorado* is, however, now due at San Francisco, and telegrams bringing Japan news to the 26th of May may be expected at any moment. In the meantime we have a telegram of doubtful import from New York, to the following effect :—

Intelligence received here, *via* San Francisco, from Yokohama, dated the 28th of April, announces that the former foreign commissioners have been cordially received by the Japanese Government, which had agreed to open the ports of Yedo, Negota, and Osaka on the 1st of June.

This news was conveyed from Yokohama to San Francisco by sailing ship. It is as usual incomprehensible, but refers, we suppose, to the reception of the foreign Ministers at Osaka.

The *Japan Times* has the following article on the opening of the new Treaty Ports :—

"Within a very few weeks of the establishment of this journal occurred the expedition of the foreign Ministers to Osaka, which resulted in the sanction by the Mikado to the Treaties made in 1858 with the Shiogoon. When the allied squadron left Yokohama we, in common with all the diplomatists who had resided in Japan, and the writers who had chronicled their successes and their failures, had no ground for more than strong suspicion that we had been the victims of deliberate and long continued deception, or that the Shiogoon was other than he had been represented. After thirteen days of anxious suspense, the foreign representatives received the ratification which—forgery or not—has since been and must continue to be, the basis of our diplomatic intercourse with the Yedo Government; but, be it understood, with the Yedo Government alone. The decree, published with every necessary formality, is thus worded :—

"The Imperial Consent having been given to the Treaties, you (the Shiogoon) will execute all necessary arrangements connected therewith."

Its tenor most clearly intimates that we have never had a treaty with the real Sovereign of Japan. Our treaties with the Shiogoon were binding on him and his subjects alone, and had force only in his "dominions"—that is, in the eight provinces which lie round Yedo and in the out-lying patches of territory belonging to him in other parts of Japan, such as those in which are situated Nagasaki, Hakodadi, and Osaka.

But it intimates something more. It permits the Shiogoon to carry out these Treaties, which he had made with foreigners, *so far as regards his own* "dominions," and orders the fulfilment of their conditions. Amongst these are the opening of certain ports to foreign trade in 1868. And when we consider the persistent way in which the Shiogoon has endeavoured to keep for his own use the whole benefits of foreign commerce, and his efforts to prevent other Princes of the Empire from holding intercourse with us; when we consider, too, the manner in which these other Princes have received the British Minister and Admiral when, using with a commendable freedom the privileges of their station, they have visited them in their own dominions; and, to sum up—when we contrast the treatment we have received and the treatment we may expect, from these independent Princes, with that we have experienced at the hands of the Yedo chief; when we consider all these points, in connection with what we now know of the constitution of Japan, the relative positions of the Mikado, the Daimios, and the Shiogoon, we can well understand the object of the latter's treacherous delays, and the singularity of the overtures of the Daimios; and we can well believe, too, that the time is nearly come for the Mikado to resume the ancient power of his predecessors, and for the empire of Japan to be really opened to foreign trade.

Meanwhile, Osaka and Hiogo being both in the Shiogoon's territory, will be opened by virtue of our treaties with him. And in discussing the probable effects of the measure, there is one very important base for our calculations which it is desirable to determine :—whether to one or both of these places, foreign traders are to be now admitted. The treaties of 1858, modified as to date only, in this particular, by subsequent conventions, are perfectly clear. Foreigners are to be allowed to reside in Yedo, some port on the west coast, Hiogo and Osaka —as well as at Yokohama, Nagasaki and Hakodadi. We hear that Yedo will be opened before the end of this year, and that the port on the west coast has also been de-

Digitized by Google

manded. But with regard to the great city of the Inland Sea, some difference of opinion appears to exist among the foreign Ministers, and we hear confidently expressed in some quarters the opinion, that residence in Osaka will not be permitted, and that we shall be confined to the outport of Hiogo. The French Minister is believed to advocate the opening of Hiogo only, on the ground that it will be impossible to protect foreign residents in Osaka, the water in that part of the bay not being deep enough to allow of the near approach of our men-of-war. Without the opportunity of forming an opinion on the spot upon this point, it is hardly possible to say whether some part of the city of Osaka cannot be efficiently protected by troops, without the assistance of a naval force, but it is most unlikely that this cannot be done; and the charts show very clearly that, should Hiogo only be opened, the isolation of foreigners from "all classes of Japanese," which it is the constant endeavour of the Shiogoon's Government to secure, and which it should be the constant aim of our representatives to prevent, would be very efficiently provided for. Hiogo is situated on one horn of the bay, and the extreme point is formed by a low spit of land, quite commanded by Japanese forts. It is here that the Shiogoon will most likely recommend the establishment of the foreign settlement. We have had quite sufficient experience of the disadvantages of such a situation as this in Yokohama, and it is most earnestly to be hoped that Sir Harry Parkes will resist alike the arguments of his colleague and those of the Ministers of our Japanese ally. M. Roches' motives are easy to fathom. The objection of the French army to garrisoning such distant stations as these is notorious, and residents in Osaka will have to be protected by a British regiment. The Frenchman may well object to an arrangement which will give his rival in their contest for influence with the Council of the Shiogoon—perhaps shortly with that of the Mikado—the inestimable advantage of the presence of a material, visible force to back his will. At Hiogo, the *Guerriere* could anchor alongside of the *Rodney*, and the Governor would have a wholesome fear of both; but in case of difficulty at Osaka or Kioto, the lead would indubitably be taken by him who had the command of a thousand bayonets.

CHINA.

TIENTSIN.

A correspondent at this port writes as follows, under date April 12 :—

Sir Rutherford Alcock intends visiting the coast ports in May, or some time during the year. People generally are bethinking themselves what grievances we want redressed as the time approaches for revising the tariff. We have commenced already asking for a reduction of the coal duties.

The coal has been tried by several of the steamers, and both bitumen and anthracite are said to be of the best quality for steam purposes, as far as a trial on a very small scale can be said to try them. At present we cannot get enough to try them on a large scale for want of carriage. With railway communication, and the mines worked on scientific principles, we could lay these coals down here, or at Taku, at or under 5 taels per ton; but at present we have only mules and camels as far as Tungchow, and water communication which at present will not admit of more than boats carrying 200 piculs each, and we are not allowed to work the mines. Shansi is full of the best iron and coal, the best description of coal lying at our feet, but we are not allowed to touch it. With the country open to us, Tientsin will be one of the first to profit by it, and more largely than most places.

Steamers are bringing up large quantities of shirtings and getting for them tls. 14 per ton of 40 feet—double the price a sailing vessel gets to bring them from London to Shanghai. When will you be wise and send them on direct? Our silver is five per cent. above that in Shanghai, deduct for freight and insurance, and still we lay the Sycee down at Shanghai at four per cent. over them. We have 14 feet on the bar at spring tide high water; 12 feet can come up to Tientsin. We had seven steamers and 23 sailing vessels arriving in March, and six steamers and twelve sailing vessels left. Amongst the imports in March were—60,700 p. Grey Shirtings, 24,950 White Shirtings, 1,600 Blue do., 3,300 White Spots, 3,255 White Brocades, 1,550 Dyed Spots, 5,990 Dyed Brocades, 9,259 Chintzes, 3,150 T-Reds, 3,670 English Drill, 3,860 do. American, 870 do. Dutch, 21,198 T-Cloths, Spanish Stripes 558, Long Ells 320, Camlets, English, 670, Lastings 9, Lastings Crape 605.

SHANGHAI.

The dates by the present mail are no later than those brought by the French mail. The following is a more detailed account of the proposals of Dr. Macgowan in laying telegraphs in China :—

Among the papers read at the meeting of the Asiatic Society, held on the 18th inst., was one by Dr. Macgowan, Commissioner of the East India Telegraph Company, giving amongst other interesting information some statistical notes on the steamers sold to Japanese Daimios, with remarks on the condition of that empire.

After the conclusion of the paper, information having been requested of Dr. Macgowan respecting the prospect of telegraphs in China and Japan, he remarked that with regard to Japan he found the Government of Yedo well disposed towards the enterprise, which, but for the death of the Mikado, would probably by this time have arranged for the construction of a line between Yokohama and Yedo. He believes that the time is not distant when Japan will be connected by telegraph with the Russo-American line at the Amoor, and he thinks it not unlikely that Shanghai may, by means of a cable to Japan, find its readiest channel of communication with America to Europe.

With regard to China he holds that submarine telegraphy along the coast, as advocated by the newspapers of Shanghai and Hong Kong, is preferable to a land line. That even were a concession for a land line to be made by the Imperial Government, such a line could not compete with a cable, nor even supersede it. The East Indian Telegraph Company, which he represents, has advised him of its having decided to order the manufacture in England of the requisite amount of cable. He proposes to connect the Woosung shore-end with this city by an air line extending along the road constructed by foreigners from Shanghai to that point, which he is confident can be done without much popular opposition; and that no official obstruction can thwart him, as the Imperial concession for a submarine cable necessarily includes the privilege of extension to the company's offices; but as some local functionary might prove unfriendly to the enterprise, he looks to next year's revision of the treaties as certain to ensure a remedy for all the ills that telegraphy may be heir to in China. At Nanking, which he visited in the United States steamer *Wachusett*, he failed to accomplish anything, owing to the absence of the provincial authorities. He is now about to proceed to Peking to prosecute his undertaking in that capital. In view of the strides which submarine telegraphy is making, he looks forward to a telegraphic connection of the continents separated by the broad Pacific, and urges the taking of deep sea soundings at an early day to ascertain the character of its bed, both in the general interests of science and of ocean telegraphy. Assuming that its bed and its depth present no insuperable obstacles, the work can be best accomplished by a line in five sections :—Hong Kong to Luzon, 420 miles; Suez to Guam, 1,280; Guam to the Nadick Group, 1,500; thence to Honolulu, 1,920; and thence to San Francisco, 2,080; making in all, 7,200 miles.

The interruptions to which telegraphy is exposed in the tropics, and the greater ones to which it is liable in the icy regions of Russian America and Siberia, render it probable that, ultimately, preference will be given to ocean telegraphy for girding the globe. There are now 153,000 miles of telegraph lines in the world, 3,000 of which are in India, 60,000 in Europe, and 90,000 in America. [Dr. Macgowan forgot the nearly 3,000 miles in Australia.]

In the Bankruptcy Court, before Sir Edmund Hornby, Chief Judge, K. R. Mackenzie came up to pass his last examination and make application for his order of discharge. The bankrupt's accounts were handed in and sworn to, the deficiency being 33,745 tls., assets, 205,880 tls., and liabilities 239,625 tls. The following debts were proved:—Commercial Bank, tls. 7,555.39—admitted. The Central Bank of India applied to increase their proof by tls. 1,513.90, in consequence of an allowance made by them for repairs to the purchaser of a hong at Hankow which the bankrupt held as security. The assignees not objecting, the proof was increased accordingly to tls. 8,433.03—admitted. Hyde and Jones, per Attorney S. W. Hyde, claimed tls. 14,209.72—admitted. Hong Kong and Shanghai Banking Corporation claimed for tls. 12,000, subject to the sale of security, held by them in respect of the debt—admitted, subject to an application for leave to sell if necessary. Chartered Bank of India claimed taels 13,126.24, balance of account, subject to any dividend payable from the estate of

Digitized by Google

Ballance and Hallam, jointly liable on a promissory note with the bankrupt. Hall and Holtz claimed taels 733.3 balance of account—admitted. No opposition was offered. The assignees stated that the cause of the bankrupt's losses were depreciation of land and produce, failure of the parties jointly interested in promissory notes, and misappropriation of money by Chinese. Order of discharge granted.

In the case of S. Clifton, a bankrupt reported in our last issue, the creditors, at the suggestion of Mr. Robinson, agreed to ask the official assignee to declare a dividend of 4 mace in the tael, which was accordingly done.

A paragraph appears in the *Friend of China* to the effect that the *Comptoir d'Escompte* had recalled their managers and assistants. There is no foundation for such a statement. The managers at Hong Kong and Shanghai applied for leave, and are at present in Europe, the business of the branches being carried on by successors.

The following is the report and balance-sheet of the China Fire Insurance Company alluded to in our last issue :—

The directors have the pleasure to lay before the shareholders a report of the company from 1st January to 31st December, 1866, and a balance-sheet showing its position at the latter date.

It appears from the accounts, which have been duly audited, that there was at credit of the company a balance, exclusive of capital, of Tls. 105,567.22.

The business of the company for the past 12 months has shown (notwithstanding the general depression of trade) an increase upon that of the preceding year of upwards of Tls. 22,000, that is to say, in Shanghai, Tls. 13,481.12, and at the various ports, Tls. 8,738.57.

In referring to the loss at Yokohama the directors regret that the company should have suffered so severely, and have to inform the shareholders that all claims have been settled, and were most strictly examined into before payment.

In accordance with the provisions of the deed of settlement, the term of office of the directors expires this day, but they are eligible for re-election.

Balance-sheet, 31st December, 1866.

FOOCHOW.

Another attack has been made on foreigners at Foochow. The *Advertiser* says :—"Two gentlemen left their boat for a stroll on the bank of the river near Kushan and on passing through a village were attacked by the villagers without the slightest provocation having been offered. It appears that the Chinaman who commenced the attack made some impertinent remarks to the gentleman he met first, and on meeting the other, who was some little way behind his companion, he boldly confronted him in a menacing attitude, and while making a feint with one hand, with the other he snatched at the gentleman's watch chain and managed to secure it. The two gentlemen then went up a hill with the view of ascertaining the most direct route to their boat, and finding it necessary to come down the same side of the hill, they were met by their enemy, who pleased with his former success, had called in the aid of his friends in the village, nearly thirty in number, to secure the remainder of the spoil, an attempt in which they succeeded. At this time the assailants were armed with bamboos and other weapons of a more dangerous character usually to be found in a Chinese village, and one of the gentlemen was struck several times, knocked down and trampled on. We are glad to learn however that he sustained no serious injury, which was not unlikely to have been the result of such treatment. On receiving notice of the occurrence H.B.M.'s Consul despatched a gentleman, in the consular service, with some Chinese officials to inquire into the matter; the latter we understand entered the village and succeeded in recovering some part of the stolen property, but neither the rascal who first perpetrated the attack nor any of his aiders and abettors were secured. We trust H.M.'s Consul will not rest satisfied with the mere recovery of the stolen property, but will insist upon the principal offenders being brought to justice."

HONG KONG.

Dates are down to the 29th of April (Monday). The French mail of March 17 arrived out on the 28th of April.

The following on the subject of the new treaty ports is from the *China Mail* :—"Rumours, apparently well grounded, are in circulation that within a few days or weeks two new ports will be added to the list of those open by treaty, viz., Nanking and Kiung-chow, in Hainan. The opening of the former place has been long expected, and nearly two years ago measures were taken by the British authorities to secure a suitable site for the future settlement. Of Kiung-chow less is known than of Nanking, but judging from the reports to hand, it would seem to present a more favourable opening for commercial enterprise than the ancient capital of China ; and this chiefly from the island of Hainan being to a great extent beyond the range of those adverse official influences which may be expected for some time to restrict European enterprise at Nanking. At the time of Kiung-chow being inserted in the list of ports to be opened, it does not appear that our authorities possessed any very definite ideas of its resources or capabilities, and even to the present day our knowledge of Hainan is chiefly based upon the reports of shipwrecked sailors (who have generally been well treated), or of those who, conceiving that their own rendering of the treaty was a sufficient warrant for frequenting its port,

Digitized by Google

have constantly and successfully run the gauntlet of the Chinese mandarin junks, and by the magnificent gunboats which, by a pleasing fiction, have been lately supposed to do duty as preventive vessels.

The formation of Hainan is mountainous, but it possesses many well cultivated level spots. The thick forests which cover a large portion of the island are inhabited by an aboriginal race who gave for many years considerable trouble to the Chinese authorities. The east coast of the island does not appear to afford any good anchorages, nor, with the exception of Kiung-chow, do the few ports on the north, west, and south sides offer inducements to mariners to frequent them. Dr. Williams, in his "Commercial Guide," 1863, states that the productions of Hainan "comprise cocoa-nuts, betel, fruits, sugar, cotton, salt, lacquer-varnish, beeswax, tanned hides, and rice: gold, silver, pearls, sapanwood, tortoise-shell, and many kinds of fine cabinet wood, we found in or near the island." The list of articles comprise some important items, but there is little information as to the quantity produced. When foreign trade shall have been fully opened, however, these particulars will be speedily ascertained.

It is impossible to predict with any certainty whether mercantile houses will be inclined to establish agencies at Hainan, should the report we have referred to prove true, but for our own part we do not think that many will avail themselves of the privilege for at least some time to come. The state of the financial world in China just now is unfavourable to fresh enterprise, and the few who seek to take advantage of the clause permitting trade at that place will probably find that they hold the monopoly of any trade which may arise. Still, as another step towards the final opening up of the country, we cannot but be glad to learn that Hainan is likely to become fully accessible to foreigners.

Turning to Nanking, reasons of a very different nature account for the satisfaction with which we learn that foreigners will ere long be allowed to reside at the once famous city. As a political centre of foreign action it will be invaluable, and the benefits of its being brought within the range of European influence will be felt by the Chinese even more than by ourselves. Rebellion and rapine must recede before the steps of Western civilisation; and as the bear, the panther, and the serpent retreat before the settler's hut in Western America, so will the appearance of foreigners at Nanking put a stop to the dangers from rebels and Nienfei, which for so many years have harassed the southern capital. As a place of trade we do not think that Nanking is likely, for at least many years, to compete with the more important open ports in its neighbourhood, unless indeed it becomes, like a second Shanghai, a refuge for the wretched country people who have suffered alike for years from rebel and Imperialist. Its opening will, however, mark another step in the onward progress of China, and as such, the accomplishment of that event will be welcome news to all.

We have to acknowledge the receipt of Parts III. and IV. of *Notes and Queries*, containing a very interesting paper on the "Distribution of Gold in China," &c. We have also received a specimen sheet of the *China Punch* to be published at the *China Mail* office, Hong Kong.

STRAITS SETTLEMENTS.

SINGAPORE.

Dates hence are to the 7th May. The outward mail of the 26th March was delivered on the 28th April, with London telegrams to the 13th April. The following summary of news is from the *Straits Times*:—His Excellency the Governor returned from his trip to Malacca on the 30th April. A meeting of the Legislative Council was held on the 4th May, when a few local measures were brought forward. The new order of things appears to be working very smoothly. The disturbances which lately broke out in the native province of Klang in the peninsula still continue, and it would appear are causing considerable hardship to the Chinese British subjects who have made their domicile there. No clear account of the *casus belli* has as yet been made public, but it would seem that European influence has been more or less at work, if not to bring about the disturbances, at least to prolong them. As far as can be gathered, a dispute has arisen between the Sultan and his Rajah regarding the revenue of the province; the latter it seems has collected the revenues and sticks to them, refusing to pay over to his hereditary superior. Whether the Rajah is right or wrong, he has obtained apparently command of the position, and has secured through European influence the loan of a small British steamer (the *John Bull*) with which he maintains, it is said, a tolerably effective blockade of the river Klang—thus preventing any effective attack on the part of his adversaries. The country in the meantime is thrown into a condition of anarchy, completely paralysing industry, and entailing great hardship upon the tin miners and their families; indeed, from the reports which reached Malacca, it was considered advisable to charter a steamer and load her with rice for the relief of those who were starving, and to bring back the wives and families of British subjects. So effective, however, was the blockade of the River established by the Rajah, that the steamer could not ascend to the villages and was obliged to return. However, H.M.S. *Rinaldo* and the Government steamer *Pluto*, were despatched to conduct supplies to the people who are starving, and also to put an end to the interference in the blockade of the British steamer at first alluded to. Doubtless this prompt action will have a salutary effect.

A very interesting discovery has been made by the police, which leads to the detection of the perpetrator of a robbery of jewels that took place on board the steamer *John Bright* some months ago on her voyage from Bombay to Calcutta, and which has hitherto remained a mystery, casting very painful suspicion upon innocent men. The perpetrator was the second officer of the steamer at the time, and, singularly enough, not a breath of suspicion appeared to have attached to him, though the most searching investigation was made in Calcutta. How he effected the theft has not yet appeared, but from Calcutta he proceeded still in the *John Bright* to China, and being there discharged, returned to Singapore, where he has been living since. A few nights ago, in an hour of conviviality, he became communicative, and, singularly enough, selected one of the deputy inspectors of police for his confidante. Bit by bit the whole story came out, and the jewels were displayed under the seal of good fellowship, a delusion on the part of the thief which was rather rudely disturbed by the return of the deputy inspector, an hour after their parting, with a posse of police. The man was at once arrested, and after examination before a magistrate committed to gaol, About Rs. 15,000 worth of jewels have been recovered.

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

GOODWIN—On the 10th April, at Shanghai, the wife of C. W. Goodwin, Esq., of a son.

MACPHERSON—On the 24th April, at Singapore, the wife of Mr. G. Macpherson, Army Schoolmaster, of a son.

SCRYMGEOUR—On the 25th April, at Grange-road Bungalow, Mrs. J. S. Scrymgeour, of a daughter.

MARRIAGE.

MURRAY—AH-HAE.—On the 8th April, at the United States Consulate, Ningpo, by the Rev. E. C. Lord, James S. Murray, Esq., to Miss Tsin Ah-Hae.

DEATHS.

ODOBERTIS—On the 20th April, at the Christian Brothers' School, Singapore, Rev. Brother Odobertis, aged 32 years.

STEWART—On the 21st April, at Penang, Mr. William Stewart, late of Singapore, aged 71 years and 6 days.

COMMERCIAL REPORT.

CHINA AND JAPAN EXPORTS.

TEA.—FOOCHOW.—The market report of Messrs. Rusden, Phipps, and Co. says:—The only settlements have been—Congou, 222 chests at 15 to 17 taels. Souchong, 50 chests at 29 taels. The *Fuike Senior* sailed for Sydney with 245,000 lbs. on 28th March, closing the season. Their review for the season is as follows:—In commenting on the course of our market during the season now closed, we think a remark or two necessary on the complaints now made so continually at home on the deterioration in the quality of tea of late years. In London this is usually attributed to hasty manufacture; but we do not think that this is more than an accidental assistant to the real cause. We believe that it will invariably be found that whenever the cost of the leaf is greatly enhanced by excessive competition that the teas will be proportionately inferior. Then the high price is a double reason for insufficient picking; first, to increase the quantity, and, secondly, to lessen the cost of his tea. The competition deprives the manufacturer of the requisite quantity from the districts which produce the aromatic leaf on which he depends to give his tea a flavour, and he is compelled to make up the quantity from inferior districts, for which, too, he is probably compelled to pay an extravagant price. Another complaint made in England is that shipments are hurried forward so early in the season. Though, no doubt, other causes have assisted to produce this effect, the principal reason, we apprehend, that the teas are shipped off earlier is the increased facilities of communication arising from the present proximity of the shipping ports to the producing districts. The production of the first crop was large; nearly fifty per cent. more than the previous season. The very dry weather lessened the production later on, but had it not been for the continued bad accounts received from home our total supply would have been 60,000 chests in excess of season 1865-66.

CONGOU.—The quality of the teas appeared to be above the average, particularly as regards strength, but from the causes mentioned above, aggravated by the heavy rains that obtained during their manufacture, they have outturned in England in a very disappointing manner to shippers, few of them improving (as first crop Kaisows usually do) on the voyage, and many of them actually deteriorating. The market was opened on the 24th May at 37½ taels for Suey Kuts and Kiennings, an unprecedentedly large business was done until on the 10th June the startling intelligence of Overend, Gurney and Co.'s failure was received by telegram. (Prices for Sa Nues went as high as 42, and for Soomeo and Chingho teas as 46 taels short.) This, however, caused but a temporary lull, for on prices giving way 4 to 5 taels, purchases were resumed and continued until nearly the middle of July, when partly in consequence of Australian orders, prices recovered about 3 taels. Towards the latter part of July rates were barely maintained for the lower grades, while the better kinds remaining declined 2 to 3 taels. During August common kinds were in less demand, while as the better grades became scarce they showed an advance of 1 tael. In September the market was generally quiet, though a few large purchases just after the middle of the month enabled teamen to maintain prices of the better kinds. Common sorts, however, were nearly a tael cheaper. Unfavourable advices from home checked business during October, until the teamen, as stocks had largely accumulated, lowered their ideas, and towards the end of the month a large business was done at 1 tael decline for common and 1½ taels for flavoury. During November a large business was done, but, as teamen were anxious sellers, without any advance in price. Disastrous telegrams received in the beginning of December had the effect of almost stopping business, and at the end of the month the teamen lowered their demands. A large business was consequently done at a reduction of 1 to 2 taels, which caused a reaction in prices of about a tael in the beginning of January. The arrival of the 10th of November mail caused a decline of half a tael, which induced a large business, under the influence of which prices advanced 2 taels during the month. The stock was so reduced at the beginning of February that teamen were able to obtain a further advance of a tael for the few parcels remaining.

SOUCHONG.—The quality of this description was very inferior. The market was opened early in July at 48 taels for burnt tarry kinds. This price being generally considered extravagant, the next settlements were made a fortnight later at 6 taels reduction, and at these rates, the teas being still generally considered too dear, but little business was done until the end of August, when considerable excitement took place, and settlements were large, at only about 2 taels decline, and all chops approaching fine quality were cleared off. During September but little demand existed, but in October buyers were attracted by the lower prices asked, and some quantity were settled at a reduction of about 3 taels; but as their freshness had gone off, prices were only nominally lower. During November a further fall in the price of about 3 taels induced buyers to clear off the greater part of the stock, and the remainder was taken during December and January, latterly at an advance of 2 taels.

PEKOE.—The qualities were inferior, the "even leaf" teas being brown instead of black. The market opened at the end of June at 40 taels for even leaf, and 29½ for mixed leaf. There was very little inquiry for these kinds for Europe, though parcels continued to be taken occasionally until October. Then a demand sprang up for common qualities for the Bombay market, which continued, though not briskly, until January. One or two parcels of fair quality were taken for Europe in December.

OOLONGS.—The quality of the fine grades was superior to late seasons, but the bulk of the crop again had a strong affinity in flavour to Ankoi tea, we presume on account of the high price of the leaf. Some quantity of the fine kinds were settled in May and the beginning of June for the English market at 27 to 39 taels. The market then remained quiet until the middle of July, when a few were taken for San Francisco at a reduction of 4 taels. About the middle of August the market was opened for the United States at 30 taels for fully good cargo, and a large business was done in the finer grades, while lower kinds were neglected. During the latter part of September and October but little was done, the finer grades having been cleared off and teamen asking more than buyers would give for cargo kinds; but in the beginning of November a large business

Digitized by Google

was done at a fall of fully 4 taels, the cheapest parcels showing a reduction of 6 taels. A steady business continued to be transacted at about previous prices until the stock was cleared off at the end of December.

SCENTED.—The quality was fully up to the average. A few parcels of fine and curious were taken in May and early in June at 35½ to 36 and 43½ to 48 taels. The teas, as usual so early in the season, though fine, had scarcely any scent. During June a reduction of 2 taels in price took place, and the scent improved. A steady business continued to be done at about the same rates during July and August. In September a further reduction of 2 taels was established, which caused a continuation of the demand, but in October, it being then ascertained that the supply would be less than the previous season, higher rates were demanded, and the business at the end of October and first half of November was confined to broken leaf kinds. At the end of November prices fell 2 taels, but as the scent was getting poor, and the tea was inferior, the reduction was only nominal.

SHANGHAI.—The following is from the report of the *North China Herald*:—

BLACK TEAS.—Nearly the whole of the small stock of Tea left on the market has been taken, and the season may be considered closed. Purchases have been made at rather easier rates. Teamen being quite ready to meet buyers. The sales comprise, at Exchange 6s. 1d. and Freight £3 per ton:—2,500 chests, Ningchow, common to fair, at taels 19.5 to taels 21.5., equals, 1s. 1d. to 1s. 3d. Re-shipments, none. Stock, 450 chests, against 650 chests at the same date last year. Total Settlements, with re-shipments from the river ports, from the 1st June 1866 to date, 329,000 chests against 272,000 chests last year.

GREEN TEAS.—The settlements are again less than for the previous fortnight, although teamen are getting so anxious ta get back into the country, that while some have shipped the remainder of their stock on their own account to England, the rest are quite willing to accept a considerable decline even on last mail's rates. The settlements comprise:—500 half-chests fair Moyune at tls. 33; 1,100 half-chests common to fair Fychow and Teenkai, 20 to 28.

HANKOW.—The only settlement of the fortnight was one chop Oopack, 460 chests, at 15 taels. By this sale the stock was reduced to 2,000 chests. Should the weather continue favourable, we shall be able to announce next mail that picking the leaf has commenced. About four-fifths of last year's number of hongs have been opened in Oopack and Oonam, but the amount of foreign money sent up country for contracts has been curtailed in much greater proportion. Statistics are:—

	Arrivals.	Settlements.	Stock.
1866-7 ..	372,200 chests. ..	370,200 chests. ..	2,000 chests.
1865-6 ..	325,600 „ ..	325,600 „ ..	nil „

KIUKIANG.—Under date the 17th we hear that there was no change to report in either the Black or Green Tea markets at this port. The expected arrivals of Green Teas have been diverted to Chinkiang, and there has been nothing to direct attention to the small parcels on the market. As regards the new season it is reported that twenty-three hongs have been opened at Ningchow, where some leaf has been bought at prices laying down the tea at Tls. 28 in Kiukiang, as against Tls. 40 last year. The market generally, however, was not yet open.

	Arrivals.		Settlements.		Stock.	
	Black.	Green.	Black.	Green.	Black.	Green.
1866-7 ...	151,800	157,300 ...	151,500	157,000 ..	300	300 pkgs.

CHINKIANG.—The stock remains at 3,000 packages, which the native merchants are getting anxious to sell. No disposition of them, however, has been made as yet.

CANTON.—The report is as follows:—

The market has been quiet, the only settlement in Country Congous being one chop at tls. 23, this shows about the same value as reported last mail. In Country Greens there is nothing further to advise. Canton-made Teas: Some 2,000 boxes new make Congou have found buyers at from tls. 23.5 to 26, these all show fair value. About 200 boxes Sichue have been taken for India at tls. 30, an extreme price. These Teas are now coming fairly on the market, and, as a rule, are being bought at reasonable rates. Scented Teas: Musters of Scented Capers are now being freely shown; make and liquor are fair, but scenting at present is deficient; for that fault there is no excuse, as the flower is now cheap and plentiful; doubtless as fresh parcels are brought forward this will be remedied. Some few musters of Scented Orange Pekoe have been shown and extreme rates asked; they, however, attract no attention whatever, being of medium class only. No transactions have yet transpired in new season's Scenteds. Canton Greens: Musters of new Gunpowder are now plentiful, but receive no attention. A few settlements of old seasons' teas for the Continent are reported. Quotations and settlements are as follows:—Country Congou, 1 chop, tls. 23; Country Greens, none; Canton Congou new make, 2,000 boxes, 23.5 to 26; do., 200 boxes, 30; Scented Caper (old season's), 500 boxes, 12; Imperial, 260 boxes, 23; Hyson, 100 half-chests, 28; Young Hyson, 100 half-chests, 30.

YOKOHAMA.—A fair amount of business has been done in the tea market at rates which show no variation from former prices. The stock of tea is very much reduced, and there are reports about that a large quantity has been destroyed in the country, and some of the plants also damaged by the late inclement weather, which, if believed by the merchants, would tend to strengthen the market materially; the stock of tea in Yeddo is also said to be small. The selection of tea here is very poor. Settlements are estimated at 2,800 piculs. Quotations: Good common, $15 to 18; medium, 20 to 24; good medium, 25 to 29; fine, 30 to 34; finest, 35 to 40.

SILK.—In CANTON there is nothing doing, and quotations are quite nominal. Should the weather continue favourable a large yield may be expected of the first crop. Quotations are as follows:—Loonkong, No. 1, $550 to 560; Kowkong, $400 to 410; Cumchuck Lucklow, $485 to 490; Rereeled Cumchuck, $530 to 535; Punjum, $110; Tsatlee, No. 1, $580 to 600; Suelam, $350 to 360; Pierced Cocoons, $90; Waste Silk, Nos. 1 & 2, $75 to 65. Sundries: Quotations are as follows:—Cassia, $18.75 to 19; Cassia Buds, $40 to 42; Star Anniseed, $20 to 21; Anniseed Oil, $195 to 200; Rhubarb, $75 to 90; Sugar white No. 1, $8.70 to 8.80; Brown, 5.10 to 5.20.

SHANGHAI.—The transactions of the fortnight have been trifling, estimated at 50 bales, which have to be added to 150 bales settled at the close of last mail, but too late to be included in the estimate then given. Thus the fortnight's business has to be considered as 200 bales, say—105 bales Tsatlees, 20 do. Karshing Taysaam, 10 do. "Shang San" Taysaam, 50 do. Hainings, 10 do. Hangchow Tsatlee, 5 do. Tong Kong; total, 200 bales. Prices have been very irregular, but closing quotations show a further decline of 20 to 30 taels per picul. The unsold stock is estimated at 100 bales, and does not contain a single desirable parcel. The Chinamen report, the future supply from the interior will be very trifling, the crop may therefore now be considered virtually at an end, and the former estimate of 30,000 bales for the season, as realised. The hatching of the seed has commenced, and small musters of new silk may be expected down in about a month. The mulberry leaves are in advanced state this season, but any sudden change in the weather may interfere with their growth. Contracts for leaves have been entered into at unusually high rates, $1.30 to 1.60 per picul having been paid, which cannot be considered favourable for the opening prices.

YOKOHAMA.—During the earlier part of the fortnight prices, notwithstanding the paucity of transactions, remained without change. After the arrival of the mail of Feb. 10 the apprehension of a serious fall in prices at home which had hitherto prevailed being fully confirmed, the silkmen were compelled to give way. Some concessions on their part to the extent of from $20 to 40 had revived business a little, and prices were looking up again, when a rise in the rates of exchange and the increasing difficulty of selling bills, nearly brought it to a standstill. On the 13th inst. the French mail of February 19 brought news of such a character, that the market since then has been depressed and is likely to remain so until the Japanese greatly abate their pretensions. For the present, we can only report prices very weak at the quotations below:—Mybash and Sinchu, best, $890 to 920; do., medium, $830 to 880; do., inferior, $750 to 820; Ida, full sized, $700 to 750; Oshio, best, $800 to 840 nominal; do., medium, $730 to 780; do., inferior, $630 to 700; Koshio, best, none; do., medium, $720 to 760; do., inferior, $650 to 680; Sodai, best, $700 to 730; do., medium, $650 to 690; do., inferior, $600 to 640.

CHINA AND JAPAN IMPORTS.

CANTON.—The principal feature of the fortnight is a revival in the demand for Yarn, a brisk inquiry having sprung up, particularly for the lower numbers, and an advance of $10 to 15 has been established. The stock is now very limited, and holders are consequently very firm. Reported sales, 575 bales. Both Grey and White Shirtings are but little noticed, and quotations remain about the same as before. T-Cloths continue to be inquired for, and reported sales are about on a par with those of the last fortnight, rates are however no higher. In other Cotton manufactures there is no change to note. RAW COTTON.—In consequence of moderate supplies, cotton remains firm, with a steady demand for consumption. Rates are slightly advanced. WOOLLENS.—Long Ells: A trifling sale of scarlet is reported at about previous rates. SPANISH STRIPES—Have found buyers to a small extent at $0.97 per yard for heavy makes. CAMLETS.—Inquiry is on a small scale, and only the best makes are saleable. Sales for the fortnight, 300 pieces. LASTINGS have remained quite neglected. METALS and COALS remain much as last advised.

SHANGHAI.—GREY SHIRTINGS have been in rather more inquiry, and a fair number of pieces have changed hands. Eagle Chop realising taels 2.60 to 2.65, other brands about one mace lower. T-CLOTHS.—For the better kinds the demand continues good, and stocks of such are very limited, prices asked, taels 2.30 to 2.45. WHITE SHIRTINGS are more in demand, and limited stocks tend to firmness in prices. 64 reed may be quoted at taels 2.75 to 2.85. Fancy goods are neglected unless in special assortments, suited for the river ports. WOOLLENS.—Spanish Stripes: A few more sales (to the extent of about 600 pieces) are reported at 65 to 66 cents per yard. Total sales for the fortnight 2,600 pieces. CAMLETS.—Sales for the fortnight about 4,200 pieces at taels 13 to 14. Scarlet, gentian, and dark blue, have been placed at taels 14.30 per piece. LONG ELLS.—Prices have an upward tendency. Holders of HH assorted ask tls. 7.20 to 7.25 per pce. C.P.H. Scarlet can be bought at tls. 7.20 per pce. FIGURED ORLEANS.—Sales between 14,000 and 15,000 pcs. at a slight reduction on last mail's rates. CRAPE LUSTRES.—Fair sales at unchanged prices. LASTINGS.—There is no alteration in value, and only small transactions are reported. CRAPE LASTINGS have been placed to the extent of about 2,000 pcs. at rates ranging from tls. 5.25 to 10.20 per pce. METAL.—Iron: The demand continues to run on small sizes of Nail Rod, of which the stock is limited, large sizes neglected; suitable parcels command tls. 2.55 to 2.58. LEAD.—Receded in price, speculative holders having decided to realise. W.B., tls. 5.16 to 5.20; L.B. offered at tls 5; deliveries for consumption small. TIN PLATES.—Inquired for; tls. 4.60 to 5 per box. COALS.—The Helena Donner arrived with patent fuel from Cardiff, and the Anglo-Saxon from Sydney, on the 13th. Prices continue very high, arrivals not keeping pace with demand. Tls. 17 to 18 have been paid for Cardiff to satisfy

Digitized by Google

pressing wants. English sold to arrive, tls. 13 has been accepted. American held for tls. 14. The Anglo-Saxon cargo fetched tls. 11.

YOKOHAMA.—The scarcity of money among native dealers continuing, we have again to report a limited business in most kinds of imported goods. As the value of the dollar, however, has slightly receded, clearances of goods previously sold have been made rather more freely. We have, however, to notice one symptom of improvement. The demand for cotton, rice, and arms is decidedly lessened, and the attention of our customers, for so many months directed strongly to these articles, appears now likely to revert to what we are inclined to think more legitimate, because staple, imports. This is not in consequence of new production, for this year's crop will not be ready for months, but in anticipation of the reopening of the old Governmental and official sources of supply to the common people. We may confidently predict that foreign speculators will find they have overstocked the market, and we expect soon to see re-shipments of the grain. As, however, the principal advantage accruing from the trade both in rice and cotton has lately been falling into the hands of the Chinese and other outsiders, we contemplate the collapse of this business with equanimity. It is certain that upon these imports the Japanese have had to expend large sums, which would otherwise have been available for the purchase of European goods. In our usual staples business has been confined almost entirely to the sale of cotton yarn, grey shirtings, velvets, &c. Grey shirtings have slightly improved in value. Fancy cottons and woollens of all kinds have been completely neglected, and even black cloth must now be classed among unsaleable articles. We have mentioned rice and cotton. Of other outside articles, arms are less wanted and much lower; in some kinds a decline in value of 20 per cent. has been established during the month.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—None.

At SHANGHAI.—None.

At HONG KONG.—From Liverpool, previous to May 25, Everest, (reported by telegram).

At MANILA.—None.

At SINGAPORE.—From London, April 24, Hoang Ho; from England (via Batavia), 30, H.M.S. Rinaldo; May 5, H.M.S. Sylvia (via Cape of Good Hope); from Liverpool, 25, Patriot Queen; 27, Advance; May 5, Twilight; from Sunderland, 6, Thusnelda; from Cardiff, April 23, Guurtje and Maria; from Swansea, May 4, Loreley; from Hamburg, 5, Margarita; from Rotterdam, 4, Constance; from Bordeaux, 2, Charlotte; from Calcutta, 1, Far East (str.).

At PENANG.—From Liverpool, May 8, Ajax (str.).

DEPARTURES.

From YOKOHAMA.—None.

From SHANGHAI.—None.

From FOOCHOW.—None.

From HONG KONG, CANTON, &c.—For London, April 19, Hugh Fortescue; 25, Kosmos.

From MANILA.—None.

From SINGAPORE.—For London, May 2, Summer Cloud; for Bordeaux, 4, Suzanne; for Hong Kong, May 2, Far East (str.).

From PENANG.—None.

VESSELS LOADING.

At YOKOHAMA.—For London, Lord Collingwood; for New York, Glenclune, Havelock.

At SHANGHAI.—For London, Crawshay Bailey.

At HONG KONG and CANTON.—For London, Belted Will, Min.

At MANILA.—For London, Dilkoosh; for Havana, Maria y Vicenta, San Julian.

At SINGAPORE.—For London, Mirella; for Liverpool, Mataura, Patriot Queen; for Falmouth, Prince Regent; for Bordeaux, Argonaut.

At PENANG.—For London, Tameran, Spirit of the Deep.

FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London, Cotton and Tea, £3 to £3 10s. per ton; Silk, £4 to £4 10s. To New York, £2 10s. to £3 per ton of 40 cubic feet.

AT SHANGHAI.—To London, there is only one vessel on the berth, and is loading at £3 per ton. To New York, no vessel loading. For coasting purposes there is a fair inquiry for tonnage, but rates have slightly declined.

AT FOOCHOW.—No vessel on the berth for home or United States.

At HONG KONG and CANTON.—For London, the Belted Will and the Min have taken the berth at Whampoa for new teas. The rate is not yet fixed, but will probably be £3 10s. to £3 15s. per ton. The circular of George Holmes gives the number of disengaged vessels in harbour (exclusive of Siamese) at 30, representing 15,683 tons.

At MANILA.—Last rates were £3 per ton for dry sugar, and £3 10s. per ton hemp, to London direct.

At SINGAPORE.—Freights remain firm. Rates to London £2 5s. for dead weight, and £2 15s. for light cargo. It is probable that next ship will have higher rates.

At PENANG.—For London the Tamerlane (183 tons) and Spirit of the Deep (629 tons) are loading and both have full cargoes engaged, the former at £3 per ton for dead weight and light freight, and £3 5s. for measurement; and the latter £3 10s. for sugar, india rubber, gutta percha, and hides, £3 10s. to £3 15s. for tin, and £3 15s. for measurement.

VESSELS PASSED STRAITS OF SUNDA.

COMMERCIAL POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—June 4, at Texel, from Padang, Padang Packet; 10, at Deal, from Colombo, Ceylon; 7, off Dungeness, from Batavia, Webfoot; May 25, at New York, from Singapore, George Canning; at Boston, from Foochow, Lubra; June 11, at London, from Colombo, Liberator; 9, at Sheerness, from Maulmain, Constance; 8, off Portland, from China, Lancashire Witch; 4, at Cadiz, from Manila, A. Lloret; May 29, at New York, from Canton, Sea Serpent; off Brighton, from Sourabaya, China; June 9, at Texel, from Banjoewangie, Bellatrix; May 30, at New York, from Amoy, Japan; June 11, off Falmouth, from Rangoon, Paradies; 12, from Akyab, Victoria; 8, at Brouwershaven, from Singapore, Bengal; 10, from Banjoewangie, Samarang; 11, off Scilly, from Batavia, Nieuwe Waterweg; 14, at London, from Shanghai, Burmah; 12, off Falmouth, from Singapore, Helen's Bank; 15, in the Downs, from Colombo, Lady Ann.

DEPARTURES.—June 8, from Swansea, for Shanghai, Bella Donna; 11, from London for Hong Kong and Canton, Southern Cross; for Japan, Neville; for Newcastle and Galle, Johanna Oluffa; 5, from Shields, for Shanghai, Helen; — from Newcastle, for Singapore, Pauline Constance Eleanor; — for Yokohama, Argonaut; 7, from Newport, for Singapore, Isabella; 8, from Cardiff, for Galle, Argo; 10, from Liverpool for Chefoo, Hans; 13, from London, for Cardiff and Yokohama, Alexandrina; — from Amsterdam, for Java, Sinbad; 11, from Cardiff, for Galle, Ozanam; — from Liverpool, for Manila, Bella Maria.

LAID ON.—At London, for Colombo, Frances, Hesperia; at Liverpool, for Hong Kong, Kingfisher; for Manila, Feliz; for Galle, Robert; for Amoor River, *via* San Francisco, Hausa; at Glasgow, for Singapore, Jane Blyth.

MISCELLANEOUS.—At St. Helena, May 2, Nuevo Lantaro, Estiral, from Manila and sailed for Barcelona; Patriarch Samhiri, Lion, from Batavia and sailed for Rotterdam. Off St. Helena, May 7, Sea Bird (British barque), from Macao; Earl of Dalhonsie, from Manila for New York.

The steamer *Osaka* will proceed to Japan from the Clyde, under the command of Captain Maddison. The steamer *Adeline*, formerly the *Rappahannock*, has sailed for Japan from Falmouth, to which port she put back through stress of weather.

THE CHINA CHALLENGE CUP.

This magnificent piece of plate, presented by the China Volunteers to be competed for by English marksmen at Wimbledon, has arrived in London. It will be remembered that although several excellent designs for the proposed cup were last year submitted by certain English firms, it was finally decided to have it made in China, relying on the well-known skill of the Canton silversmiths, and the excellence of native workmanship to render it both handsome and characteristic. The experiment was a bold one, but has certainly succeeded. The cup having been, by special favour of Government, admitted without payment of duty, and having also been liberally conveyed home by the P. and O. Company free of charge, has been safely deposited in the premises of Messrs. Elkington and Co. of Regent-street, who have taken charge of it for the present, and by whose courtesy we have been permitted to examine it. The first thing that strikes one is its large size; the dimensions being, for a "piece of plate" really immense. The height is about four feet six inches, and the diameter in the widest part over a yard. Standing on the floor without its cover, it is as large as an ordinary font; larger indeed than many. The outline is graceful, and the ornamentations elaborate and skilfully worked out; the broad bands surrounding both cup and cover, filled with figures in low relief, are especially worthy of commendation, but other parts are less satisfactory. The group of dragons, &c., that surmounts the cover is characteristic certainly, but crude in design and wanting in finish; while the border that surrounds the edge, and appears on other parts also, is very far from being purely Chinese; it bears more resemblance in fact to a "rose, shamrock, and thistle" pattern than anything else. In the contest last year this splendid prize was carried off by Staffordshire; but (as the term "challenge cup" implies) it must be held by one county for two successive years before it can be permanently claimed. There will doubtless be a keen contest for it at the ensuing meeting.

The London & China Telegraph.

LONDON, SATURDAY, JUNE 15, 1867.

THE PROPOSED EUROPEAN COLLEGE AT PEKING.

FROM the time that we first set to ourselves the task of bringing the affairs of the Celestial Empire prominently before the English public in the columns of the *London and China Telegraph*, we have persistently set forth the necessity for a change in the conditions under which the Chinese nation has hitherto shared in the advantages of European art. We have repeatedly pointed out the evident fact that, while the mercantile community is alone interested in the sale of the products of European workshops and docks, the politician and philanthropist has of necessity another object in view; namely, that nobler one of rendering the Chinese independent of the mere temporary assistance derived from the purchase of ships and munition of war in a full state of preparation. In other words, we have insisted upon the propriety of teaching them to supply their own wants, instead of supplying these wants directly. No doubt some at least of our readers have, in view of the realisation of our schemes, conjured up the phantom of China becoming at length too powerful for us, turning our weapons against ourselves, and causing us deeply to rue our interference with her ignorance. And this anticipation may possibly be to a certain extent well grounded; for in the event of war between the Chinese empire and any foreign Power the chances of success would certainly be more evenly balanced were both sides equally well provided with the appliances of modern warfare. But we submit that those who reason thus, while they possess a shadowy ground for their arguments, forget that with the increase of knowledge must come increased enlightenment, both social and political, and a corresponding diminution in the number of contingent chances leading to misunderstanding and war. Upon purely abstract grounds it would, in the light of modern science, be impossible to build up a tenable argument capable of proving that any advantage either immediate or remote could accrue from encouraging the continuance of ignorance amid so large and important a section of the human race. And we have further to note the importance which China may yet assume in the settlement of "the Eastern question," when the locality involved in that question shall be removed from the shores of the Black Sea and the slopes of the Cancasus to the Altai and Himalaya ranges and the banks of the Amour. We throw out the hint "without prejudice" to any one of the three great Powers now so deeply interested in maintaining the integrity of the Chinese Empire. We have had so much to do in keeping the "sick man" of Europe from finally giving up the ghost, that the prospect of having to nurse another invalid on the farthest confines of Asia may well make us pause. The same feeling will prompt us to hail every sign of vitality, and carefully encourage every attempt that may seem to imply the power and the will of the Chinese Government to take care of its own internal affairs. There can be no question that in order to raise itself from its present position China must have aid from without; but how is that aid to be applied? We find that the more enlightened of the native statesmen acknowledge freely that "no man of "discernment believes otherwise than that the way to strengthen "the empire consists in pursuing certain of the European studies "and in the manufacture of foreign appliances." Such is the language of a memorial addressed to the Throne by the Board of Foreign Affairs, and sanctioned by their Majesties the EMPRESSES DOWAGER at the close of last year. In it we find that the very root of the matter is arrived at. We might almost say that the memorialists have unconsciously borrowed the literal wording of the arguments we have from time to time brought forward. They continue:—

It may indeed be objected that transactions such as the hiring of steamships and the purchase of foreign arms have already been carried out at the various ports, and it may be asked, this plan being at once convenient and economical, what need exists for further trouble and expense? Views such as these are due to insensibility of the fact that the study which China stands in need of is in no wise confined to steamships, muskets, and artillery; but even on the ground of steamships and firearms, although the plan of hiring and purchasing as occasion dictates is a convenient one, yet by such a course the act of their production remains for ever in the hands of others, whilst by studying to elucidate their principles of origin, both the art is made intelligible and its practical application is placed within our power. The one course is an expedient to meet the requirements of circumstances, the other is a plan adapted to lasting needs; which of the two is the right one it requires no discussion to make clear.

This clear exposition of the ground whereon the proposed courses of study—astronomy and mathematics—are based ob viates of itself the objection which would at once rise to the lips of one inclined to cavil at any evidence of progress in China, namely, that the only object of desire is increased facilities for the manufacture of munitions of war. The memorialists say in all fairness—If we are to preserve our integrity as a nation, if we are to remove from foreign Powers the responsibility of defending us from our enemies within the State, and to remove from ourselves the obloquy of being continually at the mercy of all our external foes, it is of the highest importance that we should possess the means of defending the existing dynasty independently of mercenary and spasmodic aid from without; but "there are other objects whereof China stands in need." So far the framers of the memorial must possess our most perfect sympathy. No political convulsion can take place within the empire without some evil effect manifesting itself upon our mercantile interests; and when we add to this important and essentially selfish argument, those others more general, to which we have alluded above, we are compelled to admire the wisdom which dictated the representation made to the Throne. That some European hand was concerned in drawing up the memorial, or that some European head suggested many of the ideas which it contains, we do not for a moment doubt. But if it indeed be so, while the fact reflects honour upon whomsoever did inspire the memorial, it does not alter the one primary phenomenon with which we are concerned—that such a document was issued with the imprimatur of the Board of Foreign Affairs, and was formally sanctioned by the EMPEROR.

Foreign relations with China have of late years passed through many phases. We had first blind and unreasoning opposition, against which all arguments save bayonets and Armstrong guns were found powerless. The remedy was a desperate one, but it was both necessary and expedient, and it succeeded beyond the hopes of even the most sanguine. Within a few months the accident of the Taiping rebellion brought the Imperial Government to our feet as a suitor, and until the capture of Nanking the influence of foreigners was literally unbounded. We need not pause to eulogise the justice wherewith that influence was used by the European representatives at Peking. It suffices to say that every attempt was made to preserve the dignity of the central Government, and that while the most ample concessions might have been unconditionally wrested from the Cabinet, all that was demanded was a liberal interpretation of the treaty provisions. On the other hand, the foreign INSPECTOR-GENERAL of CUSTOMS had for several years so conducted the perplexing affairs of his department as to leave on the Chinese mind the most exalted ideas of European justice, temperance, and integrity. When in an evil moment Mr. LAY usurped an authority which he had not, his countrymen notably fell away from him, and his successor endeavoured with success to regain the somewhat alienated good opinion of the Government. Then everything was favourable to the extension of foreign relations. When the immediate need for aid was removed, a reaction set in, and it must be confessed that in the new and stringent regulations laid down for the guidance and limitation of foreign trade foreigners had much to complain of. We are, however, disposed to think that much of this was due simply to the natural and inevitable effect of the reaction from a sense of complete dependence to one of comparative security. We are, it is true, arguing after the fact, for during the past few months we have seen the effect of that reaction gradually passing away, and a healthier feeling towards

Digitized by Google

foreigners taking possession of the native mind. Still, until the publication of the TSUNG-LI-YAMEN'S memorial we were disposed to imagine that the recognition of foreigners was passive rather than active—that they were tolerated as unavoidable evils rather than accepted as friends. In the former light they are doubtless still regarded by the more illiberal of the Chinese Conservatives, but the cooler and more sagacious leaders of the advanced party have carried the day, and have succeeded in imparting a national character to their opinions and wishes. We are especially anxious to avoid all appearance of giving countenance to ill-founded hopes. The memorial itself which has formed the text of our remarks has already been widely distributed amongst the constantly increasing class of those who are interested in the development of the ideas now nascent in China. It has gone the round of the English papers published in China, and will be found copied *in extenso* in the *London and China Telegraph* of the 4th ultimo. It deserves diligent perusal, and our readers will, we are confident, agree with us in saying that if its spirit be carried out it will prove the foundation-stone of a new Celestial Empire.

THE NEW PORTS IN JAPAN.

WHEN alluding in our last issue to the telegram stating that "four Treaty ports would be open on the 1st January next," we surmised that one of the words composing it had been cut short, and that it was intended to announce that "four (additional) ports would be opened" on that date. And advices received by last mail show this to have been the true meaning of the telegram; a result which is not surprising, for it is Mr. REUTER'S unhappy fate to find the sense of his China telegrams constantly perverted by similar and often worse blunders, made in their transmission. But though our interpretation of the message itself proves correct, the hopes we ventured to build upon it were unhappily devoid of foundation. Instead of including Simonoseki or Kagosima, we find the places indicated to consist only of Hiogo, Osaka, Yedo, and a port on the west coast in place of Ne-e-gata. This is disppointing. The first two we have been accustomed to regard as one, for all practical purposes, looking on Hiogo merely as an adjunct to the city of Osaka, which itself is not sufficiently accessible to shipping. The value of the right to reside in Yedo is, in a mercantile point of view, exceedingly doubtful; and the same remark applies to the port on the western coast. What we require to place our relations with Japan on a thoroughly satisfactory footing, is free and unrestricted access to the territory of those Daimos who are willing to grant it; and this, sooner or later, we must have.

While on this topic we would direct attention to a letter that will be found in another column on the manner of constructing "settlements" for foreign occupation. The writer, who is well qualified both by professional knowledge and personal experience to treat of the matter, points out the evil results that necessarily arise from the system hitherto adopted. A piece of low swampy ground, or a mud-bank covered with unwholesome slime caused by deposits of putrescent organic matter, which in its normal state is only prevented from being pestilential by the unceasing ebb and flow of the tide, is "bunded" in, and filled up to the desired level. Built over a festering morass, whose poisonous exhalations easily permeate the loose earth and rubbish heaped upon it; badly drained, and with (probably) a large native population, whose unclean habits alone form a serious element of danger, how can such "settlements" be otherwise than unhealthy? At Yokohama too much capital has been invested in property for the idea of a removal to be at all feasible. All that can be done is to endeavour to mitigate the evil by as perfect a system of drainage and as many sanitary precautions as may be within reach; *au reste*, "what can't be cured must be endured." At Nagasaki the danger is to a great extent neutralised by the custom there prevalent of sleeping out of the settlement; the bungalows on the surrounding hills certainly have the benefit of as pure and healthy an atmosphere as can be desired. But greater care should be exercised in the selection of sites for future settlements, and we trust that Sir HARRY PARKES and his colleagues, when arranging for foreign residence at Osaka, Hiogo, and other places that may be thrown open to us, will not neglect the warning voice that is now raised. Better a site that is healthy, though otherwise somewhat inconvenient, than one that reverses these conditions. In a recent article on Hiogo, the *Japan Times* mentions "a *low spit of land*, situated at one extremity of the bay," as the probable site of the future foreign settlement. It is to be hoped this "low spit of land" will not be converted into a hotbed of fever and cholera, whereof future generations of Europeans will be the victims.

THE NEW GUNBOAT FOR CHINA.

THE cheeseparing policy of our navy reformers has proved successful after all. The debate on the Estimates that we noticed on a former occasion has resulted in the votes as proposed by the Admiralty being considerably modified, as a reference to our Parliamentary report will show. The building of a sister ship to the *Inconstant*, of 4,000 tons, is abandoned; and the number of gunboats for service in China is reduced from ten to eight, on the ground of "it having appeared that some "of the gunboats in China which it had been supposed "were in a very defective state might be repaired." The saving thus effected is to go towards the construction of another ironclad of the second class, to be built in a private yard. With this latter project we have no fault to find, more armour-plated vessels of moderate tonnage being undoubtedly wanted for service on foreign stations; but there is no reason why the number of gunboats should be diminished to provide for their cost. The sum required for two new vessels of this class would be undeniably well invested, while money spent in patching up the crazy remnants of those old ones that are now rotting in China waters will as certainly be thrown away.

JAPANESE SCIENCE IN PARIS.

HIS Highness the PRINCE TOUKOUNGARA MIMBOU TAYO, brother of the SHIOGOON, has placed his name on the list of the patrons of the Société D'Accclimation, which includes nearly all the Sovereigns of Europe. Messieurs IKONCHIMA and TANAKA, two young Japanese botanists attached to the mission now in Paris, have been named members of the same society, and were present the other day at one of its meetings. They are said to have furnished interesting notes on the methods of cultivating the species of rice called *sec* in various soils; on the mode of extracting the vegetable wax from the seeds of the *rhus vernicifera* and *succedanea*, which wax is used in the manufacture of various qualities of candles according to the amount of pressure to which it is subjected; and, lastly, on the extraction of the beautiful Japan varnish, the envy of Europe, from two trees of the sumach species. These trees are said to be very hardy, and likely, as they believe, to succeed well in France. It should be mentioned that a tree, called in France the Japan varnish tree, is largely cultivated in Paris, and may be seen on more than one boulevard; this has no relation whatever to the true varnish trees, but is the ailanthus tree on which feed the large silkworms, the rearing of which is now being actively pursued in France. Both the tree and the worms succeed well, the only difficulty being to wind the silk off; at present it can only be treated as spun silk, and closely resembles that of India. The new members have further promised notes on the early wheat, largely grown in Japan, and on the various trees from which much of the excellent paper of the Japanese is derived, and especially a lacquered paper with raised patterns, the fibres for which are obtained from the *Broussonetia papyrifera*, paper mulberry, and which makes a rich and effective paper-hanging.

CEYLON AFFAIRS.

WE trust that the Colonial Office will review its decision in respect to the limitation it has placed on the amount of Ceylon surplus revenue to be applied to the construction of the proposed Grampola Railway, a work essential as a feeder of the great central line now completed, as avoiding for neighbouring districts an expensive and circuitous detour in forwarding produce. As the difference between the lowest estimate presented and the Government minimum is only thirty thousand pounds, and as the estimate has only been rendered thus low by the facilities afforded by the presence of the numerous working staff discharged from the Colombo and Kandy line, and by the abundance of available labour on the island, which cannot be guaranteed for any length of time, the persistence of the Home Colonial Office in maintaining a purely arbitrary figure, cannot be well justified. No doubt there is great need for the exercise of economy, and vigilance is at all times of service in the disposal of the public money; but that economy should be judicious, and that vigilance well-directed. The accepted tender applies only to the present time, and the planting interest is unanimous as to the advantage to be derived from carrying out the undertaking. It is not as though Ceylon

Digitized by Google

had rushed into railway business before the time. A quarter of a century ago the existing trunk line was advocated, and had it then been executed, the imports and exports of the colony would have been doubled; now when the discharge of the whole indebtedness it involves is provided for within a moderate period of time, and the traffic assured is certain to leave a large profit on the working, no sound reason can be urged against a moderate lateral extension. The planters who contribute so large a proportion of revenue by the export duty on coffee, and the import duty on rice have a right to be heard on the matter, and all favour immediate construction. Meanwhile it is gratifying to find that the opening of new roads and the improvement of old ones are being carried on with so much vigour. No colony of the British Crown, viewed relatively to its area, can boast of such a splendid road organisation.

An important result which we anticipate from the connection of Kandy with Colombo by rail will be the establishment of extensive tea-farms on the slopes of the mountain ranges, and the cultivation of a large amount of ordinary agricultural produce for consumption in the interior, hitherto supplied from the coast. The cultivation of tea may be carried on in Ceylon with the advantage of the ample experience afforded in Assam, and, on the whole, under more auspicious influences, that is to say, if like errors be avoided. The Bengal coolies have been engaged in the Assam gardens in a way totally different from Ceylon labourers; for in addition to first cost, practically augmented by numerous deaths, the legal obligation exists to supply them with rice at low cost, and the whole tea interest has been depressed by an extension of estates disproportioned to means quite as bad in its way as overtrading, with the accompanying financial embarrasssments, usually intensified by the inexperience of agents. In Ceylon tea-growing may be carried on simultaneously with coffee-growing, land on the same estate unsuitable to the one meeting the requirements of the other; and it is very possible that the variety which in the end may be found most suitable to the colony, may obtain such a preference at home as to command even a higher price than Assam. The experiments in rearing the tea plant so far made in Ceylon have been eminently successful, but it is to be remembered that it is not the imported plant that gives the best yield, but cuttings from the plant which more and more improve as they become acclimatised.

The combined efforts now being made to reopen for Ceylon that neglected source of wealth—irrigation—operating, as it will do, to lead to the culture of rice, will remove a most important impediment in the way of the planting interest. The cultivation of rice on any large and prosperous scale can only, in our belief, be conducted on the Indian ryot system; it is a business, not for Europeans, but for natives and coolies. The returns yielded to the Indian Government for its share of the produce of land irrigation has afforded a very high percentage on the original outlay, demonstrating as well the profitableness of the cultivation of the article. The late drought in Bengal, from which Ceylon planters had so greatly suffered, was, as we learn on the highest authority, to a great extent due to the neglect of official plans of irrigation which would have proved highly remunerative. The tours of Sir HERCULES ROBINSON to various portions of the colony can hardly fail to lead to the promotion of works of public utility.

WE regret to hear that a telegram has been received from Peking *via* Kiachta announcing the death of Sir ERIC ROBERT TOWNSEND FARQUHAR, Bart., Second Secretary of Legation at Peking. Sir ERIC has been in the diplomatic service since 1856, and was transferred to Peking in December, 1865. He succeeded to the title on the death of his father, Sir WALTER MINTO FARQUHAR, just a year since, and it was expected that he would then have resigned his post and returned to this country. He was however persuaded to remain at the urgent request of Sir RUTHERFORD ALCOCK. His brother, WALTER MINTO FARQUHAR succeeds to the baronetcy.

RUMOURS have been current for the past few days of the receipt of telegrams from Hong Kong to the 26th May—in advance of the French mail—advising the opening of the tea market at Foochow, at prices equal to 1s. 9d. laid down in London. We cannot in any way confirm this intelligence, but we shall be glad to find that some of the best chops have been settled at such figures.

IT appears that the French expedition, which was announced to leave Shanghai for Korea in April, has been abandoned—probably by orders from Paris, as the advices by telegram now reach to the 12th May.

WE hear from New York that the late Confederate ram *Stonewall*, built in England, had been sold by the United States Government to the Japanese for $500,000.

THE "IMPROVEMENT" OF YOKOHAMA.

(To the Editor of the *London and China Telegraph.*)

SIR,—In a late number of your journal I notice some particulars relative to the enlargement and improvement of the foreign settlement of Yokohama, and especially to the filling up of the portion known as the Bantan Dore. This phrase "filling up" is to me an ominous one. I had hoped that the recent fires, though doubtless much to be deplored as far as regarded the immediate losses they entailed, would have led to the entire abandonment of a site so inconvenient and unwholesome, and that the more favourable disposition of the new Shiogoon and the Government generally would have facilitated the acquisition of a more suitable one. Many will ask, perhaps, what fault I have to find with the present position of the settlement. To this I reply, unhesitatingly, that in a sanitary point of view it is bad to begin with, and that this "filling up" process will make it worse. It is, in fact, merely hiding a foul sore which in the course of time will surely break out again, and manifest its presence by sickness and death. Indeed, fever of a typhoid type has already shown itself, and is unhappily likely to increase.

The settlement appears to me to be placed at the mouth of what has originally been an indentation on the coast, or an inlet of the sea; but which has now become a swamp, having two connections with the sea, between which lies the settlement. The town itself is built on what has been a shingly beach, gradually thrown up and raised by the action of the tides, and now covered with decayed vegetable matter, earth, &c. The main street is the highest part, and though its height is not great, it may possibly be sufficient to allow a fall for the drainage from that part of the settlement to the bund; but what becomes of that part of the town that reaches from the main street towards the swamp? The whole of the sewerage from this must run into the canal, and the heavier part of it will be deposited in the bottom, which when the tide is low will be exposed to the action of the rays of a hot sun, and will thus spread its pestilential influence around. The "filling in" that is now going on in the Bantan Dore, and other places, is simply a covering over of filth, sewerage deposit, &c., the accumulation of the last eight years. However carefully this may be covered up, in the course of time the gases will penetrate the soil and arriving at the surface spread themselves around, and all former experience points to sickness of various kinds as the *sure result*. You may say, "It is very easy to find fault and point out defects, but can you propose a remedy?" It is hardly feasible to expect that mercantile firms who have in many instances paid large sums of money for the ground on which their houses and godowns are built should see the thing in the same light as a medical man does, more particularly when the evil day appears distant. They may say, "This will last our time, let those that come after look out for themselves," which may be all very natural, but is it right? Suppose the difficulty is met half way by using the present settlement for godowns and offices only; retaining as few Europeans there as possible, and excluding as far as possible all natives and their families. This would to some extent mitigate the evil, and as I said before, the owners of property should not rest until the Japanese Government allows them portions of land on the Bluff, and along the new roads on which to build bungalows.

I would most earnestly call the attention of our worthy Minister, Sir Harry Parkes, as well as the other foreign Ministers, to this matter in the hope that they will give it that consideration due to a subject so important. I may state that in Nagasaki what I have recommended here has already been done; all the officials and nearly all the merchants have bungalows on the surrounding hills, leaving of course a few Europeans in charge of their stores in the settlement proper; but I am sorry to add that here also the natives are allowed to live up the creek in close proximity to the settlement, and that the drains are in my opinion faulty, as to their shape. I would advise that the bottoms of all drains should be made angular, in the shape of the letter V, so that when the water runs low there would greater depth in which to carry off the thick sediment, and not a large flat surface to allow it to spread out and deposit itself, as there is in the usual flat-bottomed drains or even in the round ones.

Excuse this long letter, but the subject is one of importance and may be interesting to some of your readers. M.D., F.R.C.S.E.

June 12th, 1867.

Parliamentary Intelligence.

—o—

HEAVY ORDNANCE.

(June 13th.) An important and interesting discussion on the constitution of the Ordnance Committee and the armament of our military and naval services was commenced by Mr. H. BAILLIE, who moved for a Select Committee to inquire into the present condition of the Ordnance Committee. He condemned unreservedly the hasty amalgamation of the department with the War Office, and argued its total break-down from its failure to furnish the country with efficient field ordnance, heavy naval guns, or a satisfactory small arm. Under each of these heads Mr. Baillie brought a heavy indictment against the Ordnance Select Committee, insinuating that the original choice of the Armstrong gun was traceable to an intimate business relation between members of the Elswick Company and members of the Committee and of the War Department, asserting roundly that the Armstrong field artillery and the heavy naval guns were alike failures, that trials were not fairly conducted, that orders were given regardless of expense, and that we were in an inferior position in respect to our armament to the rest of the world. The Snider rifle too, he alleged, was also a failure, and the delay in procuring an efficient breechloader arose

Digitized by Google

from the unwillingness of gunmakers to submit patterns to the Committee because they feared their inventions would be pirated. By way of illustration, he would take as an example one of the finest frigates in Her Majesty's service, the *Liverpool*, of 50 guns, and now in the Channel squadron. Her armament at present consisted of three descriptions of guns. First of all, she had a certain number of breech-loading Armstrong guns, guns which had been condemned as unfit for the naval service, and which upon the only occasions on which they had been used had absolutely failed. The reports of all those failures had been laid on the table of the House; but such reports, when the officers making them knew they would be disagreeable, were always softened down, and the private reports were much stronger than those which were sent to the Government. [The hon. member here read an extract from the private report of an officer who commanded a ship at Kagosima, which was to the effect that in spite of all the pains and care taken with the 110-pounder Armstrong gun, it would not go off, and that but for the fact that there were a few smooth-bore guns on board, the ship must have been lost.] That gun which so absolutely failed formed part of the armament of the *Liverpool*. The next portion of her armament consisted of Armstrong shunt-guns—guns which the Ordnance Select Committee were now boring out the rifling from because it was so defective, and which were altogether useless for battering purposes. The third portion of the *Liverpool's* armament consisted of 8-inch smooth-bore guns, which were now quite out of date, and also entirely useless for battering purposes. That, then, was the armament of one of the finest frigates in Her Majesty's navy, and it might be taken as a very fair type of that of all other wooden ships in the service. None of them were better armed; perhaps some were not armed so well.—Sir J. HAY replied to so much of Mr. Baillie's accusation as related to the navy, describing the different guns with which the navy is armed, which had given general satisfaction to the officers, and the fundamental principle—the Elswick coil—of which had been adopted by all European nations, except France, Prussia, and Russia. He defended, also, the constitution of the select committee and its impartiality.—Lord ELCHO attributed whatever shortcomings had occurred not so much to the action of the committee as of their masters, the Secretaries of War, referring to Lord Hartington's refusal to accept their report in favour of the oval bore; but maintained that the Minister ought to be solely responsible, and as an instance he mentioned General Peel's prompt and successful adoption of the Armstrong gun, which was the best arm known at the time. On the whole, our naval armament was superior to that of any other nation except the United States, but he doubted whether our system of rifling was applicable to large guns (for endurance it was certainly a failure, as he showed from the returns), and preferring the 15-inch and 20-inch American smooth-bores, recommended that a comparison be instituted between the two systems.—General PEEL explained the circumstances under which the Armstrong gun and the Snider rifle had been adopted, maintaining the wisdom of the choice and its practical success, and defending the complete impartiality and disinterestedness of the select committee. As to the motion itself, he urged the committee not to consent to the appointment of a select committee, but to leave the responsibility to the Minister. —Mr. SHAW-LEFEVRE, from the experience of a recent visit to the United States, asserted that American officers were rather in favour of our principle than their own, and that during the whole war none of these big guns had penetrated the sides of an ironclad.—Sir J. PAKINGTON opposed the motion on the ground that it would be injurious to the public service, would paralyse the departments, and that there was nothing in the state of affairs to justify such an investigation. He described experiments now going on for the improvement of our armament, asserting that there were now in store a considerable number of 9 inch guns fit for service in any part of the world.—After some remarks from Mr. NEWDEGATE, who insisted that the head of the department ought alone to be responsible, the motion was withdrawn.

THE NAVY ESTIMATES.—GUNBOATS FOR CHINA, &C.

(13th.) On the vote of £855,511 for naval stores, for the building, repair, and outfit of the fleet and coastguard, steam machinery, and ships built by contract, Mr. CORRY said that hon. members were aware that this vote had undergone some modification. The original estimate provided, among other works, for the building of a sister ship to the *Inconstant*. That ship was to have been of 4,010 tons, 1,000-horse power, and a complement of 600 men. The original estimate had also included ten gunboats to be built by contract. He had expressed his cordial acquiesence in the policy of his right hon. predecessor in supplying another very fast ship for the protection of our commerce; but some of his hon. friends opposite had objected to the building of a second ship the size of the *Inconstant*, and also to the building of so many small vessels; and, subsequently, after a consultation with the Controller of the Navy, he himself came to the conclusion that perhaps a vessel of a smaller tonnage and horse-power than the *Inconstant* might answer the purposes for which the new ship was intended. It having appeared, also, that some of the gunboats in China which it had been supposed were in a very defective state might be repaired, he arrived at the conclusion that the number of gunboats in the estimate might be reduced from ten to eight. Having discussed the matter with his naval colleagues, they decided that, instead of building a second *Inconstant* of 4,010 ton, 1,000-horse power, and a complement of 600 men, they should build a vessel, to be called the *Volage*, of 2,250 tons, 600 horse power, and a complement of 350 men. This vessel would have very nearly the speed of the *Inconstant*. By substituting the *Volage* and eight gunboats for the second *Inconstant* and ten gunboats, a sum of £73,150 would be saved, and by reducing the vote for engines for unarmed there would be a further saving of £14,880, making a total saving of £88,030. Then came the question how they should appropriate that sum. It was stated, in the course of a discussion, which had taken place on a former occasion, that the number of our armour ships, in comparison with those possessed by the French or any other nation, was so large that the Admiralty ought not to build more. He had, all along, entertained a totally different opinion, and he was anxious to make arrangements for the building of a third armour-clad ship, in addition to the two the building of which had been decided on. The Admiralty, therefore, proposed to appropriate a sum of £68,000 towards the construction of the hull and engines of a third armour-clad frigate of the second class, and to appropriate £10,000 towards advancing each of the two already provided, which would make £65,000 for each, instead of £55,000. That would absorb the total saving of £88,030. He had always been of opinion that competition was a very wholesome thing; and acting on that principle, though no one had a higher opinion of the Controller of the Navy, he had thought it desirable to invite some eminent shipbuilders to send in designs for the third armour-plated ship. The firms to whom that invitation had been sent out were Messrs. Napier and Sons, Messrs. Samuda, Messrs. Laird Brothers, the Thames Iron Company, Messrs. Palmer Brothers, and the Millwall Ironworks Company.—Mr. STANSFELD expressed his cordial approval of the altered programme of the Board of Admiralty.—The remaining votes of the Naval Estimates were agreed to without remark. (14th.) Colonel SYKES congratulated the right hon. gentleman the First Lord of the Admiralty on his having diminished the estimate for gunboats on the China station. He wished, indeed, that there had been a greater diminution, and that the number of these boats had been reduced from eight to five. At the present time he understood that 16 out of the 44 vessels on the China station were in the harbour of Hong Kong, while only one was employed in cruising against the pirates. According to the former return, however, there were three boats employed in repressing piracy, and only 14 were in the harbour of Hong Kong. It might, perhaps, be said that the vessels in harbour were rotten, but if that were the case they ought to be dismantled and withdrawn, instead of being paid for as if they were efficient. He believed that a force of ten gunboats and five vessels of war on the China station would be sufficient for the due protection of our interests there, and that, at all events, 20 vessels would be more than enough for the purpose. Our force in the China Seas was, however, 44 vessels at the present time. —Mr. CORRY said he had expected to have the pleasure of seeing his hon. and gallant friend last evening, when he was prepared with documents which would have enabled him to give the hon. member a more satisfactory answer than he could do now that the papers were not at hand. He might remark that it was not usual to raise a question of this kind on the report of Supply. The hon. and gallant gentleman was labouring under a misapprehension as to the number of vessels on service on the China station, for many of the gunboats there had been paid off and were not in commission at all. The actual number of vessels in the China Seas at the present time was 28, and not 44, as had been stated by the hon. and gallant gentleman. With respect to the 16 gunboats the hon. member had given him a list of the names of the vessels lying in the harbour of Hong Kong. He had referred that document to the head clerk in the proper branch of the Admiralty, requesting an explanation of the fact that so many vessels were in that harbour. The reply was that only one of them was a seagoing vessel, all the rest being hospital ships, or troopships, or gunboats which had been paid off and were under repair. With respect to the statement that the force in the China seas was too large, he was glad to be able to say that since the question was discussed in that House he had had an opportunity of making inquiries on the subject of perhaps the highest authority in the country—viz., Sir James Hope, who had been commander-in-chief in the China seas, whence he returned four years ago, and who had just returned from the chief command of the North America and West India station. When this question as to the number of small vessels was raised two or three months ago, he promised to ascertain whether it would be possible to make any reduction in the number of vessels on the North America and West India and the China stations, and he had been fortunate enough to find in Sir James Hope an officer who was capable of giving an answer respecting both these stations. Sir J. Hope had sent him a paper on the subject, in which he stated that as regards North America and the West Indies, considering that the ships were constantly refitting and going long voyages, and that a comparatively small number were available for actual service, it would be impossible to reduce the number of ships in North America and the West Indies without incurring considerable risk to our commerce. With regard to the squadron in the China seas, Sir J. Hope stated that as he left the station four years ago he could not say what might be the actual necessities of the moment, but he pointed out that in Japan, China, and Singapore there were eighteen treaty or open ports, and that as we were obliged to keep a vessel in each port, there were only ten vessels left available for the general coast service. He thought under these circumstances that it would be inadvisable to diminish the force; and with regard to piracy in those seas, it was satisfactory to know that it had to a great extent been suppressed.—Colonel SYKES asked whether he was to understand that the ships in the harbour of Hong Kong had been withdrawn.—Mr. CORRY replied that they had. They were in ordinary, and indeed some of them had been broken up.—The report of Supply was then agreed to.

Continental Intelligence.

HAMBURG.

(FROM OUR OWN CORRESPONDENT.)

The following tables, having reference to the commerce of this port with the Far East, are extracted from the statistical returns for the year 1866, published and compiled by the Hamburg Board of Trade:—

1.—*Direct Imports from China.*

	Value in Marks Banco.
Tea, 17,324 chests, 362 packages	778,890
Cigars, 12 chests, 2 packages	3,930
Cassia lignea, 12,964 chests, 365 packages	504,160
Cassia flores, 100 chests	14,860
Cinnamon, 100 chests...	3,990
Candied ginger, 925 chests, 4 casks	19,000
Preserves	1,630
Galls, 350 chests	18,530
Vermilion, 10 chests	1,310
Rhubarb, 95 chests	22,620
Galangal root, 1,546 bales	16,470
Star annis, 1,600 chests	132,720
Oil of cassia, 99 chests...	33,120
Oil of star annis, 46 chests	16,870
Wax, 2 casks, 3 chests...	1,640
Walking-sticks, 193,000 No.	9,560

Digitized by Google

	Value in Marks Banco.
Silk manufactures, 30 chests, 2 packages	15,780
Cotton goods, 24 bales...	5,830
Linen goods, 4 chests	1,280
Mats, 277 packages	5,800
Carved woodwork, 40 chests, 1 package	3,310
Paper, 41 chests	3,090
Glassware, 12 chests	3,090
Porcelaine, 117 chests	7,560
Gold and silver wares, 2 chests	20,210
Fireworks, 635 chests, 814 packages	30,010
Cutlery, 66 chests	8,070
Other articles	21,530
Total ... ... Marks Banco	1,704,760

against 2,183,640 marks banco in 1865.

2.—*Direct Imports from the Philippine Islands.*

	Value in Marks Banco.
Raw Sugar, 78,956 mats	496,020
Cigars, 15 chests	6,080
Redwood, 1,060 centners	8,470
Hides, 1,230 No.	6,500
Buffalo horns, 3,332 No.	2,140
Cocoanut, 700 centners	10,000
Mats, 6,347 packages	36,710
Sundries	1,900
Marks Banco	567,820

against 433,350 marks banco in 1865.

3.—*Direct Imports from Singapore.*

	Value in Marks Banco.

Those articles marked (*) were larger both in quantity and value than in 1865.

The Germans at Shanghai have made a collection for the soldiers wounded in the war last year and remitted the amount—nearly 3,000 marks banco—to Count Eulenburg, now the Minister of the Interior, but who in 1861 visited the above-named port, when, after concluding the treaty between Prussia and Japan, he was proceeding on a similar mission to Peking. The Germans at Hong Kong, who last year collected a very handsome sum for the same philanthropic and patriotic purpose, have now made a second collection, amounting to $750, and also sent it to Count Eulenburg, who has forwarded both contributions to the Victoria National Institution for Invalids.

Mr. J. Th. Janssen, of Chefoo, has been appointed Prussian Consular Agent at that port.

*** *Companies omitted in the above list will be included if the particulars are forwarded.*

Monetary and Commercial.

The following, regarding supplies of coal for steamers in the Far East, is from *The Times*:—

At the late meeting of the Peninsular and Oriental Steam Company, a shareholder suggested, with reference to the loss sustained by the high price of coal, that some economy might be effected by obtaining supplies from Australia. The coal question as regards the Eastern seas seems almost incomprehensible. Twenty years ago the discovery of the mines in Labuan was hailed as a most auspicious event for the development of steam enterprise in that region, and from that period the reports received, whether from the commanders of Her Majesty's ships or from the officers of the Peninsular and Oriental Company, have all been apparently satisfactory as regards the quality of the deposits, while the averments of the parties on the spot have at the same time represented the quantity to be abundant. In fact, the understanding has been that any amount could be raised at the cost of 7s. per ton. Year after year, however, tens of thousands of pounds have been spent in connection with the enterprise, and the shareholders are at this hour apparently hopeless of any result. The distance of the island from Singapore, where the great steam traffic of the East centres, is only about 700 miles, and the navigation is perfectly easy. The anomaly, therefore, appears to be such as to deserve special investigation, in consideration of its bearing alike on our political and commercial interests.

From the report of the directors of the Ceylon Company (Limited), to be presented at the annual meeting on the 18th inst., we take the following:—

The directors have pleasure in submitting to the shareholders the annexed general statement of the company's affairs and balance-sheet for the year ending on the 31st March, 1867:—The net profit, including the sum brought forward from the last year's account, after defraying all current expenses, amounts to £63,308 5s., and the directors propose that a dividend at the rate of 10 per cent. per annum on the capital paid up on the 31st March, amounting to 10s. on each original, and 2s. on each A share, be declared and made payable, free from income-tax, on the 20th instant; this, with the interim dividend paid in December, the amount appropriated for interest on debentures, and that written off in Mauritius, will absorb £59,691 12s. 3d., and leave a balance of £3,616 12s. 9d. to be carried forward.

The following circular has been issued by Adamson, Gilfillan, and Co., formerly connected with the Borneo Company:—

We beg to inform you that we have entered into a co-partnership to carry on a business in Singapore, as commission agents and merchants, under the style of Gilfillan, Wood, and Co., in Singapore, and Adamson, Gilfillan, and Co. here. Mr. Wood will for the present represent the firm in Singapore.

HOLLOWAY'S OINTMENT and PILLS.—OLD WOUNDS, SORES, AND ULCERS.—Daily experience confirms the fact which has triumphed over opposition for twenty-seven years—viz., that no means are known equal to Holloway's remedies for curing bad legs, sores, wounds, diseases of the skin, erysipelas, abscess, burns, scalds, and, in truth, all cases where the skin is broken. To cure these infirmities quickly is of primary importance, or the compulsory confinement in-doors weakens the general health. The ready means of cure are found in Holloway's Ointment and Pills, which heal the sores and expel their cause. In the very worst cases the Ointment has succeeded in effecting a perfect cure after other severe means had failed of giving any relief. Desperate cases display its virtues.

Prize Medal 1862.

HARMONIUMS.

Prize Medal 1862

W. E. EVANS,

THE ORIGINAL INVENTOR AND MANUFACTURER OF HARMONIUMS IN ENGLAND,

RESPECTFULLY draws the attention of intending purchasers to his Unrivalled Instruments, in which he has recently introduced several important patented improvements. Amongst which may be specially mentioned the "double-action expression wind movement," by means of which the wind is supplied with half the usual exertion, and the most perfect expression realised; thus superseding the use of the "Expression Stop," so difficult of management in all Harmoniums. The advantage to purchasers is obvious, in selecting an instrument of a manufacturer whose whole life has been devoted to perfecting the Harmonium, and who finishes with his own hand every Instrument that leaves his Manufactory; whilst the prices charged are no higher than those of other makers. Every Instrument is Warranted. The undermentioned, SPECIALLY PREPARED FOR INDIA, are recommended:—

No. 1.—With One Stop, in Oak or Mahogany... ... ... 11 Guineas.
(Tinned Packing-case, and delivery at any home port, 35s. extra).

No. 3.—With Four Stops, in Oak or Mahogany ... ... 21 Guineas.
(Tinned Packing-case, and delivery at any home port, 40s. extra).

No. 5A.—With Twelve Stops, in Oak or Mahogany ... ... 29 Guineas.
Tinned Packing-case, and delivered at any home port, 42s. extra).

No. 6A.—With Fifteen Stops, in Oak or Mahogany ... ... 43 Guineas
(Tinned Packing-case, and delivery at any home port, 45s. extra).

No. 9.—With Nineteen Stops, and Two Rows of Keys, in Oak or Mahogany... ... ... 80 Guineas.
(Tinned Packing-case, and delivery at any home port 63s. extra).

THE "EVANS" IMPROVED HARMONIUMS

are remarkable for the entire absence of the nasal and reedy tone which has hitherto been the great impediment to the general adoption of the Harmonium in private house whilst the sluggishness of speech, another great defect in most Harmoniums, has been entirely overcome by W. E. EVANS' improvements, without any MECHANICAL appliance

Fully detailed Price List, with Testimonials from the most eminent Musicians, &c., may be obtained of the Sole Manufacturer and Patentee,

W. E. EVANS, 2B, MARKET-PLACE, GREAT PORTLAND-STREET, LONDON, W.

Mr. Evans is in no way connected with any other House in London.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

DR. J. COLLIS BROWNE'S CHLORODYNE. Vice-Chancellor Sir W. Page Wood stated publicly in Court that Dr. J. Collis Browne was undoubtedly the Inventor of Chlorodyne; that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See *The Times*, July 13, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any service in Cholera was Chlorodyne.—See *Lancet*, Dec. 31, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. Extract from *Medical Times*, Jan. 12, 1866.—"Is prescribed by scores of orthodox medical practitioners. Of course it would not be thus singularly popular did it not supply a want and fill a place."

DR. J. COLLIS BROWNE'S CHLORODYNE is the best and most certain remedy in COUGHS, COLDS, ASTHMA, CONSUMPTION, NEURALGIA, RHEUMATISM, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE. is a certain cure in CHOLERA, DYSENTERY, DIARRHŒA, COLICS, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE. EXTRACT *from the* GENERAL BOARD OF HEALTH, *London, as to its efficacy in Cholera*—"So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. MONTGOMERY, Esq., *late Inspector of Hospitals, Bombay*.—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other remedies had failed."

DR. J. COLLIS BROWNE'S CHLORODYNE. CAUTION.—None genuine without the words "Dr. J. Collis Browne's Chlorodyne is on the Government Stamp. Overwhelming medical testimony accompanies each bottle. Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury, London. The immense demand enables the proprietors to reduce the price; it is now sold in bottles, 1s. 1½d., 2s. 9d., 4s. 6d., and 11s.

AGENT: Hong Kong, Mr. A. S. WATSON.

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor

SUPERFINE PERFUMERY & TOILET SOAPS.

ED. PINAUD, CHEMIST-PERFUMER, Rue St. Martin, No. 298. PARIS.

ED. PINAUD, whose House we specially recommend, is distinguished by the strictly hygienic and tonic quality of his productions, and for this cause his articles are in high favour with the *beau monde*

HIS Establishment is the only one of its kind in which the recent Discoveries in Chemistry and the Arts have been put into practice. The proof is that ED. PINAUD obtained the Medal at the last London Exhibition.

The Productions of this House may be obtained at the Chief Perfumers in France and Abroad.

RENOWNED FOR HIS SPECIAL PREPARATIONS FROM THE FAMOUS VIOLETS OF PARMA.

EXQUISITE SCENTS FOR THE HANDKERCHIEF.
HYGIENIC ELIXIR FOR THE MOUTH.
SUPERFINE MILK OF LETTUCE SOAP.
EMOLLIENT POMADE FOR PRESERVING AND BEAUTIFYING THE HAIR.

PEACOCK AND BUCHAN'S COMPOSITIONS FOR KEEPING OFF BARNACLES, WEEDS, &c.

THIS is now established as the BEST and CHEAPEST known for protecting ships bottoms from galvanic action or fouling. It is used on the ships of the "Peninsular and Oriental," "Royal West India," "Panama and New Zealand," "Pacific Steam," and other Royal Mail Companies; also on foreign ships of war, and in H.M.'s Royal Dockyards. Apply to the Manufacturers direct, SOUTHAMPTON, or to their accredited Agents at all the seaports of the world.

Extract from the "Standard" of October 18th, 1866.

"**COMPOSITION FOR IRON SHIPS' BOTTOMS.**—It appears that the iron turret ship 'Huascar,' on Captain Cowper Coles' plan, and fitted with his patent tripod masts, &c., belonging to the Chilian Government, before leaving England was coated on her bottom with Messrs. PEACOCK and BUCHAN'S last Improved Composition for protecting the plates and rivets, and keeping off shell fish, &c., and which has given such entire satisfaction that they, the said Government, have just ordered *five* tons of the material to be sent out to the Arsenal at Valparaiso for the use of their Iron Fleet in the Pacific. The Spanish Government have also ordered a considerable quantity of this composition for the use of their Iron Fleet."

Extract from the "Greenock Advertiser" of October 11th, 1866.

"**ANTI-FOULING COMPOSITION.**—The ship 'Ceres,' of Greenock, lately reached this port after a two years' voyage, and has been put into Dock to receive a fresh coating of Messrs. PEACOCK and BUCHAN'S (of Southampton) Patent Composition. The vessel was coated with it at London, in 1863, and sailed thence to Melbourne, Calcutta, Bombay, and Greenock, and on her arrival here the copper was quite clean and clear of barnacles, and has thus saved a very heavy per centage of wear and tear. We understand that the local agents, Messrs. Macallister and Fyfe, have received a letter from Captain M'Kenzie, of the "Hooyland," of Glasgow, stating that on his ship's return from a voyage to Surinam the copper, which had also been coated with this Cmposition, was perfectly clean."

ELASTIC.  BOOTS.

W. SPARKES HALL & CO. beg to call attention to their PANNUS CORIUM BOOTS which are peculiarly adapted for India or any warm climate. They have the appearance of leather, and are cleaned with ordinary Blacking, but the material is much softer than any leather ever introduced. Pannus Corium Boots are now coming into general use in India, and will be found a great luxury to Ladies and Gentlemen in any climate with tender feet.

Printed Circular, with full particulars of Prices, forwarded free to any part of the world.

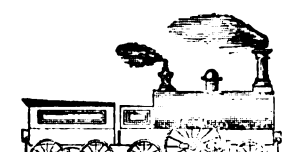
Elegant, Useful, and Instructive Presents.

Catalogue free on application to

GEO. RICHARDSON & CO.,

Central Chambers, 17, South Castle-street,
LIVERPOOL.
(LATE BROADGREEN.)



An immense variety of Vertical, Horizontal, Locomotive and Marine Steam Engines from 6s 6d to £5 each. Metallic Model Screw and Paddle Steamers and Sailing Yachts from 5s to £20 each. All thoroughly tested previous to dispatch.

TESTIMONIALS.

From LORD BROUGHAM.

I think very highly of your Telescope as a powerful Instrument, and am quite astonished at the very moderate price you have put upon it.

From D. CRIGHTON, Esq., FORFAR, N.B.,

I have thoroughly tested your £2 2s. Od. Model Steam Engine, with which my boys are highly delighted; the material and workmanship are excellent, and being quite safe, I don't know of a more useful and instructive mechanical gift for young lads.

From the Hon. F. G. WYNNE.

The Hon. F. G. Wynne is highly pleased with the 17s 6d Vertical Engine, it is remarkably cheap, and well worth its price. He gives Mr. Richardson great credit for it.

From A. COURT, Esq., Her Majesty's Ship Cumberland.—

Your Telescope and Microscope are both admirable and wonderfully cheap.

TELESCOPES.

The Lord Brougham Telescope.—This splendid Telescope will distinguish the time by a church clock five miles, a flagstaff ten miles, windows ten miles off, landscapes thirty miles off, and will define the satellites of Jupiter and the phases of Venus &c. This extraordinary cheap and powerful glass is of the best make, and possesses Achromatic Lenses, and is equal to a Telescope that costs £5. No Schoolboy or Tourist should be without one. Price 7s 6d, will be sent free by Rail, or post, for 8s 6d.

THE NEW MICROSCOPE.

This highly finished Microscope is warranted to show the animalculæ in water, eels in paste, &c., magnifying several hundred times. The Microscope is mounted on a brass stand, and has a compound body with Achromatic Lenses, Test Objects, Forceps, and spare glasses for mounting objects, &c. &c. The whole contained in a highly polished mahogany case, price 7s 6d, or will be sent carriage free (by Rail) for 8s 6d.

ILLUSTRATED CATALOGUE.

G. RICHARDSON & Co. have published a Catalogue of 80 pages, illustrated with 8 full page engravings of Steam Engines, 8 Lithographed Drawings, beautifully printed in colours, of Screw & Paddle Steamers & Sailing Yachts, and 12 Views of Magic Lanterns and Slides describing upwards of 1500 Slides embracing every subject; also full particulars of Microscopes, Telescopes, &c., &c. G. R. & Co. earnestly invite every one to procure a copy, as it gives an extended view of the various articles which cannot be put into an advertisement. It will be sent free on receipt of ONE Stamp for postage.

P. O. Orders Payable to George Richardson & Co., Liverpool; Cheques crossed Alliance Bank, Liverpool.

THE SHORTEST ROUTE TO AND FROM MANIL AND THE PHILIPPINES.

NOTICE to SHIPPERS and PASSENGERS by the OVERLAND ROUTE:—

The CHINA STEAM and LABUAN COAL COMPANY (Limited), in pursuance of an agreement entered into with the Government of Manila, have arranged to despatch the steamships "MONA" and "JAPAN," or other of their first-class steamers, with the mails and passengers monthly between Singapore and Manila, and Manila and Singapore, in correspondence with the Messageries Imperiales Overland Route.

By a special permit all goods by these steamers from the 1st August, 1866, will be admitted into Manila at the reduced duty of 10½ per cent.

The Company's agents at Singapore will take charge of goods for transhipment. For further particulars apply at the Offices of the Company, Ethelburga-house, 70 and 71, Bishopsgate-street, London, E.C.

OVERLAND ROUTE.

COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., *via* EGYPT, from SOUTHAMPTON and MARSEILLES.—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and RECEIVE CARGO and PARCELS for GIBRALTAR, MALTA, EGYPT, ADEN, CEYLON, MADRAS, CALCUTTA, the STRAITS, CHINA, and JAPAN (YOKOHAMA), by their steamers leaving Southampton on the 4th and 20th of every month. For GIBRALTAR, MALTA, EGYPT, ADEN, and BOMBAY, by those of the 12th and 27th of each month: and for KING GEORGE'S SOUND, MELBOURNE, and SYDNEY, by the steamer leaving Southampton on the 20th of every month. The steamers leave Marseilles on the 5th, 12th, 20th, and 28th of the Month.

For further particulars apply at the Company's Offices, 122, Leadenhall-street, London, E.C., or Oriental-place Southampton.

OVERLAND ROUTE VIA MARSEILLES.

SERVICES MARITIMES DES MESSAGERIES IMPERIALES.

JAPAN AND CHINA NEW MAIL ROUTE VIA PANAMA AND SAN FRANCISCO.

THE PACIFIC MAIL STEAM SHIP COMPANY despatch their splendid side-wheel steamers from NEW YORK on the 1st, 11th, and 21st, and from PANAMA on the 9th, 19th, and 29th of every month for SAN FRANCISCO, calling at ACAPULCO, MANZANILLO, MAZATLAN, *en route* thence to YOKOHAMA, NAGASAKI SHANGHAI, and HONG KONG. Passengers from England may connect with this line at New York by any of the various steamers from Liverpool, Southampton, or Falmouth, to that port, or at Panama by the steamers of the Royal Mail Steam Packet Company leaving Southampton on the 2nd and 17th of every month. Passengers by this route are less than ten days in the tropics.

The next departures from San Francisco are:—

GREAT REPUBLIC, 5,000 tons, September 3rd.
CELESTIAL EMPIRE, 5,000 tons, October 23rd.
COLORADO, 4,000 tons, November —.

For particulars of Freight, through passage rates, &c &c., apply to H. STARR and Co., General European Agents, 145, Cheapside London.

NEW OCEAN MAIL ROUTE to CHINA and JAPAN, via the Isthmus of Panama and San Francisco.

THE WEST INDIA AND PACIFIC STEAMSHIP COMPANY (Limited) have made special arrangements with the Panama Railway Company and the Pacific Mail Steamship Company for the conveyance of Passengers, Specie, and Cargo between EUROPE, YOKOHAMA, NAGASAKI, SHANGHAI, and HONG KONG.

The next departures will be:—

From LIVERPOOL—5th and 20th of July,

Intending to connect, at San Francisco, with the steamer leaving on the 3rd Sptember for Japan and China, arriving at Yokohama on the 22nd, Shanghai on the 27th, and Hong Kong on the 29th September. The branch steamer to Shanghai calls at Nagasaki on both trips. It is expected that the communication will be monthly after these dates.

The Pacific Mail Company's steamers on the China station are large paddle-wheel vessels, of upwards of 3,000 tons register. The greatest attention has been given to insure the comfort and convenience of passengers by the vessels of all the connecting companies on this route.

Shippers will find this route cheaper and as expeditious as any mail service to the East.

For rates of Freight and Passage apply to the agent, J. M. CURRIE, Havre and Paris; or at the Company's Offices, The Temple, Dale-street, Liverpool, and 117, Leadenhall-street, London, E.C.

ARTHUR R. FORWOOD, Managing Director.

From Galle to Shanghai: Mr. Bird.

Summary of News from the Far East.

We have received, in anticipation of the regular P. and O. mail, our despatches from China and Japan. We have also received later news by the *Colorado*, *via* San Francisco.

JAPAN.

The Pacific Mail Company's steamer *Colorado* arrived at San Francisco on the 13th June, with dates from Japan to the 25th May, having made the passage in twenty days. The *Colorado* brought 50 first-class passengers and a full cargo of freight.

The political intelligence from Japan is interesting. The visit of the foreign Ministers to Osaka was concluded on the 20th of May, and those functionaries had returned to Yokohama.

The treatment of the foreigners by the Shiogoon at Osaka was princely. Houses had been prepared for them, filled with the costliest European furniture. French cooks and European servants were provided, wines and liquors were without stint, and, in fact, everything they wanted during their stay was furnished in abundance and free of expense. Each representative and suite was granted a private audience and dinner with the Shiogoon several days before the official visits took place. On these occasions the Shiogoon presided at the table, in a large, high room, wholly European in its outfittings. The dinner was thoroughly French in detail, and small but valuable presents were laid beside each plate. At the official visit, which was of short duration, everything was Japanese. After the usual commonplaces, the Shiogoon expressed to Minister van Valkenberg his great gratification at the establishment of the new steamship line between America and Japan. Subsequently the Shiogoon met the Ministers at Hiogo, eleven miles across the bay, and laid out the foreign settlement there, where a tract of ground, a mile in width, extending three or four miles back from the water, has been appropriated under the same arrangements as in other ports of Japan. The anchorage is good. The settlement in Osaka is about the centre of the town. All were highly pleased with Osaka.

In about a month the ministers will visit the west coast to establish a port there. The place selected will probably be Tsuranga, in the province of Kanga.

The Prince of Owari, who is acting for Stotsbashi as second officer of the empire, visited Yokohama recently. He has been until lately prejudiced strongly against foreigners. He was received with all the honours, and in many places all business was suspended.

The United States ships *Hartford* and *Wyoming* have gone down the Inland Sea, the latter homeward bound. The *Shenandoah* is at Yokohama, where the *Monocacy* and *Supply* are expected.

Among the passengers by the *Colorado* are H.R.H. Duc de Pentheivre, Count Bearain, and Captain Fauvel, who intend to spend some time in California; also Captain Cardow, of H.M. 20th Regiment, who intends enjoying shooting on the plains, and Sasaki Youruk, a retainer of Prince Echizen, who will study mines and mining in California, and proceed thence to the East, where he will buy fifteen thousand rifles.

In most of the districts the silkworms were reported to be in about the third stage of temperature, which is regarded as favourable.

The stock of tea was very much reduced. The Japanese say there will be an increased production this year.

Freights to New York and London, £3 10s. per ton. Exchange on London, six months, 4s. 6½d.

YOKOHAMA.

The mail delivered this morning (*via* Brindisi) brings news from Yokohama to the 1st May. The outward mail of Feb. 26 was received on the 21st April.

The foreign Ministers were all absent at Osaka, and despatches had been received overland announcing that H.M.S. *Basilisk* arrived there on the morning of the 17th April. They found

Digitized by Google

there the *Argus*, which had arrived on the previous Saturday, together with the *Pelorus* (Capt. Haswell) and the surveying ship *Serpent* (Capt. Bullock), which had both arrived on the previous evening from Nagasaki. On the 18th Sir Harry Parkes, accompanied by Lady Parkes and his suite, landed, under salutes from the *Pelorus* and from the Japanese fort. They landed a few miles up the river, and were received by a Japanese functionary, who conducted them to the temples which had been appropriated to the use of the British Legation, where all suitable arrangements had been made for their reception. The Dutch Minister with his two ships, the *Watergeus* and a Japanese Government steamer, arrived in Osaka on the evening of the 17th. A private letter received by H.M.S. *Argus* contained the following :—

"The Shiogoon is expected to-day, when I imagine audiences will be the order of the day. All is going on well—the people are as good as gold. Sir Harry is, of course, keeping up his character for hard work; and there is no need for the merchants to fear, because a colleague spent a few days at Osaka on a previous occasion, that British individuals will suffer. The *Argus* is going to start again for Shanghai soon after her arrival at Yokohama, to take Sir Rutherford Alcock on his visit to the China ports."

The subjoined notification gives the gratifying information that the prime object of the ministerial visit is accomplished, and that the ports of Osaka, Hiogo, Yedo, and one on the west coast, are to be opened on the 1st of January, 1868 :—

"The undersigned, Her Britannic Majesty's Envoy Extraordinary and Minister Plenipotentiary in Japan, hereby makes known for the information of Her Majesty's subjects that he has received formal notice from the Japanese Government that they are fully prepared to open to British subjects on the first day of January next, in the manner stipulated in Article III. of the Treaty of Yedo, the cities of Yedo and Osaka, the port of Hiogo, and another port in the west coast of Japan. Arrangements are consequently in progress for determining the place which may be occupied by British subjects at the said cities and ports for purposes of residence and trade, and due notice will be given as soon as these and other necessary arrangements for the execution of the said treaty in respect to the said cities and ports shall be completed.—HARRY PARKES, Her Britannic Majesty's Envoy Extraordinary and Minister Plenipotentiary in Japan."

The 8th April was the day said to have been appointed by the new Shiogoon for the meeting of the great Council of Daimios, of which we heard so much last year; but we have not yet learnt whether it took place. Satsuma, Tosa, Echizen, Hosokawa and other powerful chiefs were expected to be present, although many had refused when previously summoned. The object of the assemblage was the final settlement of the difficulty with Chiosiu; but if what we reported last mail of the new quarrel between him and Hosokawa be true, as we have every reason to believe is the case, this object is hardly likely to be attained. But we cannot believe that Stotsbashi has yet so far succeeded in outliving the objections to his elevation to the Shiogoonate as to have induced such powerful nobles as Satsuma to obey his summons to the Council. This country is without doubt passing through a revolutionary period in its history. Whether the crisis will be managed without blood-letting is hard to say; the European Powers and their representatives have indubitably acquired a certain influence and inspired a decided feeling of respect; it may be that their advice and the examples of constitutional government placed before the Japanese oligarchy may have their due weight, and that the change in their existing system of government, which is inevitable, may be accomplished peaceably. One thing appears very certain, that all danger to ourselves is past; the war party—the patriotic party—the party of old Japan—of which we heard so much in the early days of our intercourse, and by whose spirit were actuated the *enfans perdus* who twice attacked the British Legation, and the stray fanatics who murdered the English and French officers—this party is virtually extinct. And happily so, for it is only by submitting to some degree of assimiliation that the polity of Japan can preserve any portion of its individuality. Determined opposition by any civilisation to that of Europe has always resulted, and must always result, in the complete breaking to pieces of the system, and generally, the annihilation of the nationality. It is a pleasant belief to hold that so fine a people as the Japanese is reserved for a better fate. The Parsees are proud of the title which some trader, pure and simple, must have given them, "the Anglo-Saxons of the East." Japan, from its insular position, the independent character of the people, their hardihood, perseverance, industry, and valour, may well claim some day the title of the England of the Pacific.

The *Japan Times* narrates a circumstance that is far from creditable to the Government :—"Our readers will remember that many months ago a number of Japanese proceeding from Yedo to their native island in the south, Hatchijo Sima, in a junk, were shipwrecked, picked up, and carried into Hong Kong. They were put on board the ill-fated *Korea* and again wrecked off Amoy, the vessel going down in about five-and-twenty minutes. Returned to Hong Kong, they were again shipped in the clipper *Ariel* and arrived here safe and well, with the exception of one who had been drowned when the *Korea* was lost. Nearly two months have elapsed since their arrival here, and yet (will it be believed?) the Yedo Government detains them from their homes and families on a flimsy pretext that their report of the shipwreck was false, and a mere excuse to enable them to visit China without passports. This is a comparatively slight matter, doubtless, when such important affairs as the opening of Osaka are on the *tapis*, but surely the Ministers of the Shiogoon should be given to understand that the attention of foreigners has been directed to these poor shipwrecked people.

The demand for sugar and rice on the part of the Japanese, says the *Japan Herald*, has been the means of causing a thorough rush of shipping to this port. Among the ships that have arrived with full cargoes from China ports are three clippers that were in the race last year, the *Ariel*, the *Serica*, and the *Taetsing*. Besides these we have the fine clipper ships *Black Prince* and *Chinaman*, in addition to the more ordinary class of vessels. The harbour has not presented such a crowded appearance since the good old days when the allied squadrons of England, France, Holland, and America were here. On one day during the present week no less than eight arrivals were announced, almost all with rice and sugar; a very extraordinary circumstance for our little port.

The following items are also from the *Herald* :—

There is a prospect of the settlement being lighted with gas very much earlier than many imagined. A gentleman has come over from San Francisco as the agent for a moneyed association in that city, and if he can obtain subscribers for 2,000 burners he undertakes to establish the works —charging a maximum rate of $6 per 1,000 cubic feet—or for an average 3½ hours a day a rate of $2.75 per month. This appears very high as compared with other places, but it will bear reduction according to increased consumption; and a calculation of existing expenses for lighting will show that if it is a little dearer, the saving in cleanliness, the non-requirement of lamp coolies, and the smaller amount of breakage of glasses, &c., gives it the advantage. We hope that the scheme which Mr. Pease is about to set afoot will be supported.

The spring meeting of the Yokohama Race Club comes off on the 6th and 7th May, and will make a little change in what has been the dullest season ever known since the treaties were signed. In public amusements, social enjoyments, and business operations alike, there has been an absence of life such as must be experienced to be understood. All are looking forward with more than the usual interest to the coming meeting as presenting one or two features that have been wanting hitherto.

The Government is working with a will at filling up all the swamp immediately at the settlement and with the boundary creek. It looks as if the work would be finished pretty nearly in the time agreed upon. But the deepening of the creek to a uniform depth of four feet at low water looks as if they had no immediate intention of beginning to carry out this part of the last December agreement. We also hear no more about the giving out of the hill lots, which we were led to expect at the expiry of three months. Probably weightier matters have engaged the attention of foreign Ministers, and they have allowed it to rest until their return from Osaka. It is a disappointment to many that the land is now not available in time for summer residences this year.

CHINA.

From China we have the following items of news to the 20th May by the *Colorado*, via San Francisco :—

The Nienfei on the Yantsze had caused a great deal of alarm. They had burnt many villages, and committed great depredations. By the last accounts the fears of their committing further atrocities had subsided.

The United States corvette *Wachusetts* had rendered great

Digitized by Google

service at Kiu-kiang, and saved that city from being destroyed after it had been set on fire.

Great dissatisfaction prevailed at Shanghai on account of the failure of the *Colorado* to call at that port, and Messrs. Russell and Co. were obliged to charter a steamer to find the *Colorado* one hundred miles at sea, and place on board mails, &c. Wells, Fargo and Co.'s Express had nine tons of express packages at Shanghai waiting for her, and one hundred tons were offered if there was any certainty of connection being made with the Pacific mail steamer.

There had been a grand parade of Fire Companies at Shanghai. The firemen turned out with three hand engines, one steam engine, and one hook and ladder truck.

Exchange on London at sight was 5s. 11½d. per tael, and at four months sight 6s. 1¼d. per tael.

Ten ships are reported as going to Hankow this season to load for London. The *Ada* had been towed up. Several insurance companies refuse to issue policies, on account of the dangers of navigation.

SHANGHAI.

Despatches received this morning *via* Brindisi bring advices to the 6th May. The outward mail of March 17 was received on the 3rd May.

A policeman at Shanghai having been discharged by the Municipal Council for alleged excessive violence in the discharge of his duty, brought an action against his late employers, and laid his damages at 1,826 tls. Sir E. Hornby concluded his direction to the jury by saying :—"The Council had no feeling against the man, who had, up to the event I have alluded to, conducted himself well. You know what salary he was to have, and a comparatively small sum would be all that is necessary to send him home, to pay his wages since his dismissal, and to compensate him for the loss of a situation, such as he held. It is not a question of anger or haste on the part of the Council, but it simply is one of justification—was the offence one which must satisfy any one that the man was unfit for his situation? If you think so, find for the Council, if you think it did not demand his summary dismissal, find for him, and compensate him in a spirit of fairness." The jury retired, and in a few minutes returned, having found a verdict for the plaintiff with 600 tls. damages. The Judge said he agreed with the verdict, but hoped it would not be regarded as a precedent to encourage the police to unnecessary violence.

Our old friend Chu quai, says the *Shanghai Recorder* of the 4th inst., contrary to general expectation, made his appearance again at the Mixed Court yesterday, when the charges brought against him and the shroffs in the E-who Bank were further investigated. Until the accounts be thoroughly overhauled it is impossible to form any idea of the rights and wrongs of the case, which at present rests entirely upon hearsay, and requires substantiating in every point. We are glad, however, that steps have been taken which may probably clear up the mystery that hangs over this matter. Mr. Whittall's suggestion that the books of the bank should be investigated is to be acted upon; and it may be hoped that the true state of the affairs will thus be discovered.

A meeting of land renters has been held at which the accounts of the past year, showing a surplus of 23,000 taels, and the budget for 1867-8 were passed. It will be heard with pleasure that there is at length a prospect of getting rid of the Soochow Bridge annoyance. Instead of making a heavy annual payment in commutation of the tolls, the Council are authorised to set aside 2,000 taels yearly for the purpose of building a free bridge. The original proclamation by the Taotai, which has been so often referred to as giving a monopoly to the bridge proprietors, simply authorises the collection of a toll from people who may elect to cross by it.

The Customs Reports upon foreign trade at the treaty ports for the month of March have been issued from the Imperial Maritime Customs Press. The principal articles of import into Shanghai during that month are :—Grey shirtings 344,646 pcs., as compared with 248,796 pcs. in 1866; White Shirtings 36,733 pcs., against 93,086 pcs. in 1866; T'Cloths 78,254 pcs., against in 1866, 14,609. Of Drills 16,000 pcs. have been imported in March, 1867, against 2,600 in 1866; of Camlets only 8,480, against 26,763 in 1866; of Long Ells 10,200 pcs., against 20,570 in 1866. Iron stands at 10,395 pcs., against 4,991 pcs., in 1866; Lead 4,627 pcls., against 14,191 pcls. for 1866. The item of Brown Sugar is noticeable, being 90,889 pcls. against 23,819 same month last year. Turning to Hankow, we find that there has been a steady increase in imports. T-cloths have increased from 10,109 pcs. in February this year to 27,165 pcs. in March. With respect to the Nienfei rebels, it is stated by Mr. Lord, Commissioner of Customs at Hankow, that trade has not been interrupted by the conflicts that have been raging some distance below that port between the Imperialist armies and the Nienfei rebels, who, it would appear, do not devastate the country in the wholesale manner usually prevalent, but content themselves with levying black-mail and tribute in kind, by making rapid descents on defenceless villages or wealthy towns.

The Shanghai Club has collapsed from pressure of debt. A special meeting of shareholders was held on the 1st May, at which the committee recommended that at the next due date of interest on 30th June, 1867, the first mortgagee, Dr. Baston, be allowed to foreclose the mortgage, and to put up the club building for sale, and that any surplus of the proceeds of the sale over the amount of the mortgage loan, together with the proceeds of sale of the furniture and stores in the club, be applied to the liquidation of the then outstanding liabilities of the club. The recommendation (with others) was adopted unanimously. The *Recorder* remarks :—"We cannot but regret the downfall of this institution, as it is needless to point out the usefulness of a good club in Shanghai. No doubt a new one will ere long be started. There cannot be any reason to fear for its success, if it be properly conducted, as we have ample evidence in the prosperity of the 'Club Concordia,' which, commencing in a far less ostentatious manner, has steadily progressed, and is now a popular and flourishing establishment."

The *Hankow Times* of the 27th April notices that a Chamber of Commerce has been established at Hankow. The immediate inducement to establish a Chamber of Commerce was to decide on some generally recognised and fixed custom as to the sale of imports, and a proposition was unanimously adopted that for all imports, except Straits, China, and Japan produce, the conditions of sale should be bankers' orders of a usance not exceeding ten days on delivery, with a term of three days for clearance.

The *Daily News* has the following notice of the Shanghai Brick and Saw Mill Company :—

The Shanghai Brick and Saw Mill Company was established in 1863, on a capital of 100,000 taels, in two hundred shares of 500 taels each. Sixty-six *mow* of land, comprising 2,420 feet of river frontage, were purchased at the then moderate price of $50 per *mow*, and buildings and machinery erected thereon at a cost of 60,000 taels more. "The bricks turned out," to use the language of the first annual report, "were perfect, and the manner in which the saw mills performed their work highly satisfactory." But one difficulty had unfortunately been overlooked. The necessary cost of working was too great to enable the company to compete advantageously with its native rivals. Against an outlay, accordingly, of 19,300 taels in wages and taels 5,500 in coal, it could only show a receipt of about taels 9,000 during the first year of its working. The next twelve months were no more successful, and the 1st August, 1865, found the company with a deficit of taels 33,000 and assets of which the majority represented only nominally the sums set against them. In this extremity the shareholders resolved on an expedient which has been tried without success in other cases as well as the present. They endeavoured to get up a new company, to take over the whole property at a price which would leave a slight margin over the debt; and a prospectus setting forth the high advantages offered by the scheme was issued in the following January. The capital of the new company was to be tls. 20,000, its annual outlay was to be tls. 19,000, and its income tls. 24,000, thus leaving a profit of tls. 5,000, which was to yield a dividend of 25 per cent. on the capital. This project, however, turned out little better than the former. It was based, in the first place, on the sanguine calculation that the machinery was to be kept in full work all the year round; and the manager engaged seems to have known little about his work. Only half the required capital, moreover, was subscribed, and the project died a natural death. After this the old company actually did for a short time earn a small net profit. They handed over their yard bodily to the church trustees, who, through the agency of a Chinaman, made the bricks of which the new church is built, and paid to the Brick and Saw Mill Company a royalty of tls. 1,000 in the course of about twelve months. This, however, went only a short way towards paying interest on the debt, and even this source of revenue has now ceased; all attempts to dispose of the property have proved ineffectual, and, as we remark d before,

Digitized by Google

the shareholders have wisely resolved to get quit of it at any price that it will fetch.

FOOCHOW.

The following items are from the Foochow *Advertiser* of April 20 and 25 :—

Our favourite steamer *Fesso* has been chartered by Chinamen for $20,000 to proceed to Shanghai, Chefoo, and Tientsin. We are sorry to lose her, even for a short period, and hope as soon as the charter has expired that she will run between here and Hong Kong again as formerly.

Three months ago the Foo-chow-Foo Government advertised for young men to enter their new English school ; applicants were to submit to a certain examination, and the best scholars were to be admitted. Successful candidates besides their education gratis were to receive board and lodgings, or so many thousands of cash each per month sufficient to pay all expenses for food and clothing. No less than six thousand applicants are stated to have come forward, out of which only ten were chosen—a sufficient proof of the eagerness of the Chinese to learn English on the one hand, and of the Government to procure the best pupils on the other. The number of scholars in the new school, as was stated before, is 30 to 50. Whether these were selected out of twelve or eighteen thousand more candidates is what we are not likely to believe or to be told either, but probably the standard of qualifications has been lowered, or a higher class has presented itself. In addition to the English there is, or will be soon, a French one. To carry out the idea properly there ought to be a German school. Germans in China, we presume, being more numerous than French, their interests are greater.

AMOY.

A correspondent at this port sends us the following interesting account of the state of the surrounding country, and of a visit to the neighbouring city of Chang-chow :—

" Some two years ago this region was much disturbed by an incursion of rebels, who during the time they remained inflicted a vast amount of suffering and distress upon the inhabitants. Amoy was saved from falling into their hands simply in consequence of the presence of foreign gunboats, and because an intimation had been given them that they would be repelled by force of arms in any attempt to gain possession of this port. As past experience had taught them the folly of coming into collision with foreigners, they made Chang-chow, a large prefectural city, about thirty miles distant from this place, their head quarters. From that place they carried on a system of plunder and destruction, from which the whole region suffered very severely, until finally, being closely pressed by the Imperialists, they were compelled to retreat westward, where it is said they were ultimately scattered. Chang-chow itself had suffered perhaps more than any other place, and when it was finally evacuated by the rebels it was left but a mere wreck of its former self. As I had frequently visited it in its palmy days, and had then been much struck not only with the beauty of its position, but its great activity and prosperity as a town, I felt anxious to visit it again, and see what condition it was in after having been occupied by the followers of the " great peaceful heavenly kingdom." As the usual mode of travelling in this part of the country is by boat, I started from Amoy by the early morning tide, hoping, if possible, to get there by the evening of the same day. The weather was lovely in the extreme, and the hills which lie around Amoy, rugged and bare though they be, looked quite beautiful under the bright morning sun. As we get away from the harbour of Amoy, and leave the island of Kaw-long-su behind us, the bay begins to narrow, and the hills seem to gather together until we enter the river, which passes away far into the interior. The mountain at whose base we sailed along has, whenever I have passed it before, presented only an appearance of great loneliness and bleakness. The trees which would grow here in great profusion are regularly cut down when they attain a certain growth, to be used as firewood. The consequence is, the place has always a look of desolation and barrenness. This time, however, the scene was entirely changed. Being the festival of the Chinese known as ' the feast of tombs,' the mountain side was literally swarming with people who had come to visit the tombs of their fathers. From the water's edge almost to the very summit they could be seen gathering around the graves, making their offerings and putting them in repair. As we sailed on we could see them coming in streams from the villages beyond, all bearing with them the various articles they are accustomed to present at this season of the year. After proceeding up the river a few miles I came to a large flourishing town of the name of ' the Stone Horse.' Here I stopped, as it was necessary for me to change my boat for a smaller one. The river from this point up to Chang-chow is so shallow that only boats specially adapted for the river can pass up and down. I found from inquiry of the boatmen around that as the tide would soon begin to run out it would be impossible to go on before next morning. The stream runs so rapidly down that unless there is a strong fair wind it is difficult to make any progress whatsoever. Seeing that I must quietly submit and wait until next day, I had my baggage removed on shore to the chapel belonging to the American Presbyterians. This town has for many years been one of their most prosperous stations, and the influence of Christianity is seen in the flourishing Church which is here gathered together. Next morning, with the turn of the tide, I started in one of these river boats manned by three men, and as the wind was fair we soon left the ' White Horse ' far behind us. This river is one of the most interesting I have ever been on in China. The country on both sides is so exceedingly beautiful that in whatever direction one looks one never feels wearied in admiring the grandeur of the scenery. The only thing that is wanting to make the whole scene absolutely complete is a better supply of trees. The hills which tower up on all sides are but sparsely supplied with trees, the same cause as that already mentioned spreading here also, and giving rather a bare and naked appearance to what would otherwise be lovely in the extreme. After an hour's sailing we passed through the narrow gorge which brings us into what is called the Valley of Chang-chow. This valley is about ten to twelve miles long and about the same in breadth at its widest part, and the town is situated at about the centre of this valley, at the foot of a high hill which rises up from the plain, which can be seen distinctly on a clear day from Amoy. It would be impossible in any description to convey an adequate idea of the special beauties of this valley. As one advances towards the centre it appears to be completely surrounded by mountains of every variety of shape and form. Enclosed within these is the level plain along which rolls the river up which we have been travelling, and another branching off at right angles, which passes up through the hills into the region beyond. The plain watered by these two rivers is exceedingly fruitful, as is manifested by the abundance of trees that abound in every direction, and the fine crops which are yearly gathered from it. The river, from the gorge we entered up to the town of Chang-chow, is a scene of great activity. It seems to be always swarming with boats, passing and repassing with the produce of the country around. Among these are conspicuous the long, heavy-looking boats known as the Chang-chow boats, which are usually employed in carrying down wood to Amoy. Both in rowing and in steering the women, who are large-footed, take a most active part, and certainly I have not seen women in any other part of China so healthy looking and so well developed as these same women. After another two hours' sail we arrived at the spot where the boats usually stop, at the foot of a long bridge which here spans the river, and which, from its having houses built on it at various parts, put me in mind of representations that I have seen of London-bridge in olden times. After having got a coolie to carry my baggage, I proceeded through the suburbs towards the east gate. It may be as well to state here that every Chinese city is surrounded by a wall, which has never less than four gates, each one lying in the direction indicated by the name. As I passed through these suburbs I was perfectly amazed at the scenes of desolation that met me. Houses tumbled down in every direction, and heaps of ruins, all indicating where houses had once stood. The population, too, had wonderfully diminished, and I passed through quite a succession of streets which in former times were crowded with people, but where now only an occasional passer by was observed. After walking thus about twenty minutes I emerged into the main street which leads to the east gate, and for the first time began to be reminded by the bustle and activity of what Chang-chow was the last time I had visited it. I observed, however, that all the houses had been newly built, and found upon inquiry that this place had been levelled to the ground ; but in consequence of its position, being in fact part of the great road of China, houses had sprung up to meet the necessities of trade. This street is famous for the number of monumental arches that are found spanning it ; and I was indignant to find that the rebels had endeavoured to throw them down, happily without success in a great many instances. On entering the city through the gate I found that the destruction of houses was as great, if not greater, than in the suburbs.

Digitized by Google

Whole quarters were lying in desolation and ruin. Every house had been completely gutted, only the two side walls in each case being left standing. It was the first real glimpse I had ever had an opportunity of making into the internal arrangements of the Chinese houses, on so extensive a scale at least. The majority of course were very simple, and not worthy of any attention. There were others, however, that had evidently belonged to people of wealth, and even amid the ruins that lay around one could distinguish traces of the taste and ingenuity of their former owners. The trees which almost invariably had been found growing in the open court-yard in the centre of the building had been ruthlessly cut down by the rebels during their occupation of the town, and only the jagged stumps remained, as if in stern keeping with the ruined and disordered state of things around. I walked for some considerable distance, and still the scene was the same. Streets that had once teemed with an immense population were now silent and deserted; and over the floors of the houses which but so lately had been trodden by the living, grass and wild flowers were growing in wild luxuriance. As I approached the centre of the city I found myself emerging somewhat from this region of desolation into one which, although bearing many severe traces of former troubles, had some life-like and business appearances. The shops had been rebuilt, and trade was being carried on, though somewhat languidly indeed in comparison with former times. I was particularly struck with the condition of the temples that I passed on my way. Special care had evidently been taken to destroy these as thoroughly as possible, so that to restore them would be practically an entire rebuilding of them. Most of the smaller images had entirely disappeared, and the very large ones, although still sitting on their pedestals, were broken by the fire which had passed over them. One very large temple, dedicated to the 'Pearly Emperor,' was a scene of as complete disorder as I have ever witnessed. One great idol just outside of the grand entrance, which somehow or other had escaped destruction, and over which an immense covering of gauze had been thrown, sat in grim disorder and covered with heaps of dust. Inside were three or four blackened with the smoke of the burning building, and apparently engaged in an earnest consideration of the desolate scene before them. Never had I seen a picture before in which the thorough helplessness of these idols was so forcibly presented to the gaze of those by whom they had been worshipped, and quite impossible would it have been for a stronger commentary to have been offered upon the foolishness of trusting in gods that had been so manifestly proved incapable as these. With the elasticity of Chinese towns, however, Chang-chow is rapidly recovering itself. All the western and southern quarters have been pretty well rebuilt, and no doubt in the course of a few years, if no fresh incursion takes place, all traces of these disasters will have quite disappeared. In a walk that I took round the walls I found bodies of soldiers stationed at regular distances, and I was informed that a large military force was at present quartered in the city. I am afraid, however, that in case of actual danger these 'braves' would consider 'discretion the better part of valour,' and would disappear rather hastily on the appearance of an enemy. On two hills outside the west gate I observed two miniature cities which had been built by the military authorities, in order to give their soldiers a lesson in the taking and defence of cities. Knowing the character of Chinese soldiers when officered and led by native officers, the only practical use that these erections would have would be to teach them with what increased speed they could evacuate a town upon the approach of those terrible long-haired rebels. I was much struck with the very improved state of feeling manifested by the people towards foreigners. Formerly one suffered a great deal of annoyance in passing through the streets, not only from the opprobrious epithets, but in some cases from the stones that were hurled at one. With nothing of the kind, however, did I meet as I rambled through the streets; and during the whole of the Sabbath our chapel was crowded with quiet and attentive listeners who made no attempt in any way to prevent the preaching of the gospel. From the above rapid sketch a faint idea may be obtained of the present ruinous condition in which this fine city has been left. It is a mournful spectacle to see a great city lying in ruins, with its population scattered or destroyed, and in what had once been leading streets to find the grass growing as rankly as though no human foot had trodden them for years. It is to be hoped that Chang-chow may never again have to pass through so fiery an ordeal as that which has now brought her to the very brink of destruction."

HONG KONG.

Dates from this port are to the 13th May. The mail of March 26 arrived out on the 5th May.

The following items are from the *China Mail* :—

On Saturday morning, the 11th May, a number of colonists met to present an address to the Hon. W. T. Mercer, who leaves for England by the homeward mail. Mr. Dent, who had been requested to read the address, prefaced it with a few remarks, in which he mentioned the gratification he felt at having been entrusted with that duty, and further said he was sure that he would be pardoned if he so far supplemented the words of the address as to take the opportunity of saying that Mr. Mercer's departure was not merely a source of regret in a public sense to himself and those who had signed the document, but was really felt to be a personal loss by all who had enjoyed the pleasure of his acquaintance.

Mr. Dent then read the address as follows :—

To the Honourable W. T. Mercer, M.L.C., Colonial Secretary, Hong Kong.

SIR,—Your approaching departure from Hong Kong affords your fellow-colonists a fitting opportunity to give expression to the cordial sentiments of esteem and regard which they, and those who have preceded them here, have always entertained for you; but we beg you to believe that no simple desire of conveying to you a mere assurance of friendly feeling, or good wishes, now prompts us to address you; we do so because we think that your worth and actions as a public servant, claim from us some public acknowledgment of their value.

We are sorry that you are about to leave us; we regret that the state of your health necessitates your depriving us of the presence of a genial and kindly friend. But, as we have observed, it is not in recognition of the many social excellencies for which you are distinguished that we have to-day met here; our first object in thus assembling together is, anxiety to tell you that in our opinion, this colony owes much, very much of her surprising and gratifying progress, during the last three-and-twenty years to the untiring energy with which, throughout that period, you have always upheld and promoted her best interests. A settlement not much better than an uninhabited rock witnessed your advent to these shores; a populous and handsome city looks grave at your departure. We are very well aware, Sir, in what large measure this result has been attained by your zeal and intelligence; and we say this with a hearty desire to, at the same time, fully recognise the very able services of those gentlemen whose duties you have sometimes aided and sometimes administered. We thank you for what you have done; we are glad that we can remember you as one that has held the chief reins of power; and whilst we acknowledge the sound decision which at present guides this Government, we confess it was with disappointment we learned that your tenure of the office of Her Majesty's representative would not be otherwise than brief.

During your stay amongst us you have borne the burden and heat of the day, and we are to-day proud to be allowed to thus publicly testify to the unswerving consistency and the stedfast perseverance which have throughout characterised your career.

We trust, when your health may be sufficiently restored, that your long and faithful services in this colony will procure for you another field wherein to display your talents and your administrative capacity, and we beg to be allowed to subscribe ourselves,—Your friends and well-wishers,

Signed by—Messrs. James Whittall, John Dent, J. McDouall, W. Jackson, V. Kresser, H. B. Gibb, per J. F. D., J. F. Duncanson, W. H. Gibb, C. F. Duncanson, W. R. Dalziel, Jno. Fraser, J. F. Mr. Mercer made the following reply:—Gentlemen: "I am deeply indebted to you for the high and gratifying compliment paid me after my unusual and, I may say, singular length of service in this colony. Having been for many years past the only remaining one of the original staff sent out in 1844 to organise the Government of Hong Kong, it is quite time that I should think of making my departing bow, and you will agree with me that it cannot be matter of surprise that the faculty should be of the same opinion.

"The community of Hong Kong is naturally a varying and changeable one as regards its component individual parts, and therefore I am pleased to hear that, while you offer me this expression of your confidence, you answer also for those who have gone before you, as holding the same views with regard to me as yourselves. As to my official conduct, I can but say that I have endeavoured to do my duty, and I am happy to know that the public records prove that, in the opinion of the Governors under whom I have served, I have succeeded in doing it, while my administration of this Government for a period of nearly three years has received the approval of the Secretary of State. I shall be brief, gentlemen, but I wish to say one word as to the colony and its future. I shall not occupy your time in dwelling on its marvellous growth and continued prosperity. Where little more than a quarter of a century back were a barren hillside and a few fishing huts, now rise stately palaces and substantial godowns. For the rude boats and uncouth junks that once paid occasional visits to the waters of Hong Kong, you now see the tapering mast and smoky funnel that tell the magnitude of the commerce that is transacted in this central entrepot of the China Coast. And, gentlemen, this result may be explained by one word—the harbour. So long as no convulsion of nature sinks the island in the sea, or chokes up its magnificent harbour, will Hong Kong continue to advance, and without fear of a rival. In due course of time the iron horse—the inevitable iron horse—will find its way through the length and breadth of the land of China, and the question naturally arises, how will this affect Hong Kong? It will in my opinion make it even greater than before. A railway from a Yangtze port, say Hankow, to the south of China will be a necessity, as saving hundreds of miles of ocean and river navigation. Where shall its terminus be? It will doubtless seek Canton and bring up on the shore of Kowloon, and there the produce of the Celestial Empire will be shot into ocean-going vessels lying alongside the convenient piers and landing-places. This is no vain notion. I firmly believe it and have confidently predicted it. But, gentlemen, there is a social point involved in your address, and on that a few words may be said. It has always been my aim since I first set foot on this island to practise and promote the amenities of society, for with a large community dwelling like us in a space somewhat confined, it must happen that toes are at times trodden on, and to heal differences and increase good feeling should be the part of every one who wishes to do his duty to his fellow-men. This I have steadily and perseveringly endeavoured, and I am rejoiced to recollect that this is not the first time by many in which your approval has satisfied me that I have not essayed in vain. Painful as it is to part from well known places and familiar associations, still more from friends who can give so convincing proof of their confidence and regard as you now give me, the pain is somewhat tempered by the reflection that my memories of Hong Kong will always be of a pleasant nature, and not among the least agreeable will be the remembrance of this day when you offer me a most distinguished compliment, for which I can but inadequately express my heartfelt thanks. Gentlemen, I wish you health, happiness and prosperity, and I bid you one and all farewell."

Mr. Mercer was frequently applauded during the delivery of his reply. Three hearty cheers were given for him and an extra one for Mrs. Mercer, and the meeting terminated.

At the Hong Kong Club on Saturday, May 4th, an address was also presented to the Honourable W. T. Mercer, as President of the St. Andrew's Club, from his "Brither Scots" resident in Hong Kong, in consequence of his intended departure from the colony. Upwards of fifty gentlemen were present.

It appears that Stanford, convicted in 1862 of the opium robbery, has been pardoned the remaining term of penal servitude, and is, we believe, now in England.

The *Colorado* arrived from San Francisco on the 6th May, and was to leave again on the 18th. She brought 280 passengers and about 1,200 tons cargo.

A Chinese gentleman of respectable appearance was summoned before Mr. Masson for not having reported himself to the Registrar General. He had been four months in the colony; and it was averred by Mr. Chas. Osmond, of the Registrar General's department, that he had been cautioned more than once to comply with the provisions of the Registration Ordinances. He was fined $3.

A Canton correspondent writes:—The reported intention on the part of the Americans to build on the old factory site should no longer be treated merely as an after dinner chit chat, for it will soon be put to practical demonstration. Although this determination of the Americans may be viewed in the light of a flank movement against the Britishers of Shameen, yet there may be some cogent reasons for it, which, at any rate, discloses the gratifying fact of the doctors at last entertaining a favourable opinion of the "sick man's" recovery. Knowing well that when once our transatlantic friends make up their minds for the prosecution of an object they "go at it,' the old factory site will ere long assume the title of American Bund, followed most probably by the phœnix-like resurrection of the old and new China streets, where the native merchants had before their "pidgin" quarters. That the "commercial square" will return to where it existed ante-bellum may be safely calculated upon, which will consequently cause a desideratum in the way of office accommodation to the residents of Shameen and Honam. A row of "club chambers" might yield a better remuneration to capitalists than dabbling in the shares of the local joint-stock associations. Taking it for granted that the headquarters of bankers and merchants are re-established here, and the vessels come up to Whampoa to discharge as of yore, will not the estimated revenue from the Stamp Act be thereby curtailed? Sir Richard should be wide awake and prepared with some other ways and means for making up the deficit, like the Indian Finance Minister, who felt it necessary to introduce in his last budget certain new methods of taxation in order to make the two ends meet during the next financial year.

A proclamation has been posted up throughout that city forbidding the printing of Chinese newspapers by foreigners. It has, we learn, put a summary stop to the existence of the little broadsheet published under foreign editorship at Canton, the age for a "free press" evidently not having arrived in the eyes of the Chinese authorities. This awe-inspiring document purports to be an Imperial order transmitted by the Governor-General of the two Kiangs (Kiang-tsu and Kiang-se) to the Governor of Canton, and runs as follows:—

Translation.

Despatch of the Board for Foreign Affairs concerning the foreign commerce in all the open ports. Foreigners are printing newspapers, in which they are repeatedly reviling officials of the middle kingdom, whereas the English Ambassador Peh (Sir Harry Parkes) in consultations with us agreed to forbid such (as reviling of officials). Now all the treaties concluded with foreign countries contain an article on the reviling of officials, making it a heavy crime for Chinese as well as for foreigners, wherefore it is at once strictly to be forbidden. In accordance with this every court has to issue a prohibition, and therefore we declare to those whom it concerns, and may they know it. Henceforth let every one attend to his own business and try to earn money in his proper sphere, and dare not henceforth print any newspaper in Chinese characters; moreover, every block which has already been used for printing newspapers is to be destroyed. Disobey not, respect this manifest.

Tung-ch'i VI, 3, 21.

REVENUE AND EXPENDITURE OF HONG KONG

During the Year ended Dec. 31, 1866.

REVENUE.

Land revenue		$140,250 46
Rents, exclusive of lands		44,228 00

Deduct Increase	—	144,605 30
Nett Decrease	—	850 69

The following on the revenue and expenditure is from the *Daily Press*:—

In another column will be seen the return of the actual revenue and expenditure of the colony for the year 1866. Considering our population and extent of territory, the broad result that in the course of that year we spent $167,877 more than we received, and that with an income of over three-quarters of a million of dollars, seems to show that there are other people in the place besides mercantile assistants who ought to reform their habits of extravagance. The scale on which the public expenditure of the colony is designed is in every way just as largely in excess of the legitimate wants of such a community as this, as the expenditure of the most extravagant private resident may be in excess of his real needs. In fact, the Government has been far more extravagant than those mercantile assistants of whom we argued that they were foolish in spending all their incomes instead of saving. We did not accuse them of spending more than their incomes, but the Government rivals the Portuguese clerks who spend half a crown out of sixpence a day. If they keep ponies and chair coolies which their incomes do not justify, the Government keeps judges, magistrates, and dignified civil officers which it cannot properly afford. The same explanation of the extravagance holds good in both cases. It is not the fashion in China to cut your coat according to your cloth with any class of persons. You design the coat according to the cut of your neighbour's garments, and if there is not cloth enough you go into debt for a new piece.

The total result of the accounts is to show that there had been a net decrease in the expenditure for 1866 as compared with that of 1865 amounting to the imposing sum of $850; but when the items of increase and decrease are examined, they present features which are by no means agreeable. Thus we find that the bulk of the decrease is accounted for by a decrease of $136,000 under the head public works—that is to say simply that the exceptional expenditure on the Mint which took place in 1865 has not been repeated. Of course not; therefore if the expenditure of 1866 on the ordinary department had been only the same as in 1865 there would have been a decrease on this present account of $136,000. But, instead of this, there is a net decrease of only $805! In other words, as much money has been laid out on the establishments, departments, and so forth in 1866 in excess of that which was so spent in 1865 as is sufficient to neutralise the saving which ought to have appeared of $136,000. The items under which this increase is observable will be seen from Table No. II., which is an abridgment of a comparative statement which appears in the *Gazette*.

The *Far East* left Calcutta on the 20th April, and arrived at Penang on the 27th, remaining there, discharging and taking in cargo, until the 29th; arrived at Singapore on the 1st May, and left for Hong Kong on the 3rd May. Had light N.E. and E. to S. winds, and fine weather up to the Paracels; since then light northerly winds and fine weather. On the 6th May, in lat. 10.20 N., and long. 109 40 E., spoke the ship *Anna Dorothea*, from Cardiff to Shanghai, 130 days out. (By telegram we learn that the *Far East* was loading for Japan.)

The case arising from the Admiralty seizure of the *Min*, referred to in our Hong Kong correspondent's letter in a former issue, came on for trial before the Chief Justice in the Hong Kong Supreme Court on the 7th April. Mr. Pollard, Q.C., in-

Digitized by Google

structed by Mr. Caldwell, appeared for the plaintiffs; and the Attorney-General, instructed by Mr. Hazeland, for the defendants and the garnishees. This was an action for the non-delivery of certain cargo shipped on board the British ship *Min* (Captain Sargant) in London, consigned to Messrs. Lyall, Still, and Co., of Hong Kong, the bills of lading for which were duly endorsed to the plaintiffs, the Comptoir d'Escompte and Chartered Bank of India, Australia, and China, for value. On the arrival of the vessel in this harbour, Captain Sargant delivered the goods in question under guarantee to Messrs. Jardine, Matheson and Co., and others, authorised to receive them by the unpaid vendors in England, exercising their right of stoppage *in transitu*. The defendants are the owners of the ship *Min*, and being in England are sued under the Foreign Attachment Ordinance No. 2 of 1855. On a former day the Attorney-General applied to the Court by motion to dissolve the attachment issued against Messrs. Gilman and Co. and Capt. Sargant as garnishees, on the grounds that the cause of action did not arise within the colony of Hong Kong or its dependencies, the provisions of the above-mentioned ordinance being solely applicable, under the second section thereof, to cases where the cause of action arose within the colony. After hearing the arguments of the learned counsel *pro* and *con.*, the Chief Justice reserved his decision on this point, permitting the Attorney-General to proceed with his motion, subject to such decision.

Upon his Lordship resuming the hearing of the case, after a lengthened argument by counsel, Mr. Pollard proceeded to call witnesses. Mr. Alex. Rodger proved the signature of his father upon the bills of lading; his father being an owner of the vessel, signed the bills on account of the captain's illness. Mr. George F. Maclean proved having received the bills of lading from London and having sent them to the Comptoir d'Escompte, in accordance with an assignment; and Mr. Still proved that the business conducted in London under the style of George Lyall and C. F. Still was simply an agency of the China house of Lyall, Still and Co., all transactions entered into by the London branch being on account of the China house. Mr. Harris, clerk to Mr. Caldwell, was called to prove that the captain of the *Min* had refused to deliver the goods. The learned counsel then submitted that he had proved everything necessary to constitute his right of action upon the contract; but supposing that he had not done so in the opinion of the Court, he was certain he possessed a right to proceed under trover and detinue. Some objections were here raised by Mr. Pauncefote as to the formal legality of the writ—that due notice had not been given—when some hard words ensued as to breach of undertaking on the part of the defendant's attorney. It was, however, agreed to proceed with the legal point, and issue a new writ if necessary.

In course of the argument Captain Sargant was called, as garnishee, to answer to the court why he had taken the ship to Whampoa, thus removing the vessel out of the Court's jurisdiction, and becoming guilty of a contempt of court in so doing. The Attorney-General, for the garnishee, replied that it was more a matter of dry legal interpretation of the words of the ordinance than a contempt of court. His Honour said he had the captain at least, and he would take good care he did not sail away as the vessel did. He should detain the garnishee under the care of the officer of the court until a full equivalent for the ship was placed in court.

It was ultimately arranged that the writ be dissolved, an undertaking being entered into by all those concerned to defend the action; which in fact now resolves itself into a suit or action at common law in trover and detinue.

The *Formica*, Norwegian schooner, lately arrived at Hong Kong from San Francisco, is one of the most remarkable vessels that has ever appeared in China waters. She is the pioneer of a fleet in process of construction by her enterprising Norwegian builders, and if cheapness of build, economy of labour and space on board, combined with great speed, be the chief recommendations of a small sailing vessel, then the *Formica* must be the most useful and most profitable ship ever seen in this port. Her build and rig throughout are on the latest scientific principles, and in this respect she is nothing short of a many detailed experiment in naval architecture. She can carry nearly 500 tons at only twelve feet draught, and is one of the fastest vessels afloat, having averaged ten knots an hour for eight days in succession. Her maximum speed is said to be fifteen knots. Her crew number nine men, four of whom can put her under close reefed canvas with the greatest ease in less than five minutes. With the exception of her fore and main top gallant sails, all her sails are reefed and furled from deck, and even the foretopgallant sails, when clewed up by an improved method, are so snug that they may almost be said to be well stowed. Thus it is not necessary in shortening sail for any of the crew to go aloft. From stem to stern of this fine vessel everything appears, even to the eye of an unnautical observer, fitted and adapted in the most efficient and scientific manner conceivable. Her top sails, of which she has two (fore and main), are patent reefing, similar to Cunningham's patent. On her fore and main yard runs a traveller, much resembling the rail on which an ordinary railway carriage runs. When the square foresail or mainsail, therefore, requires to be taken in, instead of the ordinary method of clewing up the sail, the outhaulers leading to each yard-arm are let go, and the sail is brailed into the centre of the yard in a moment. A similar line of rail runs abaft each mast, up and down with the gaff travels—thus dispensing with the mast-hoops, &c. The fore and aft sails are reefed by being rolled round the boom on a most admirable principle, so that one man can efficiently reef the foresail, mainsail, or mizen as quickly as half-a-dozen men can haul down a reef by the old system, to say nothing of tying points and settling all taut again. The *Formica* has a spar deck running fore and aft, which entirely covers the lumber usually seen on a ship's deck; her main deck, which is about six feet high and over 100 feet in length, is admirably adapted for carrying either cargo or passengers. Unlike ordinary vessels the *Formica's* chain plates are not visible, her topsides being as innocent of any projection as a ship's cutter; neither has she any bulwarks, unless a sort of topgallant rail of some fifteen inches can be so called. Her rudder is an improved patent, and is so adapted that the vessel can be steered from the between decks or cabin if required—a very great matter in the event of the vessel being attacked by pirates.

The *Formica* was built at Tonsberg by M. Decker—the builder of the *W. S. Lindsay*, which recently made the passage from New Zealand to Antwerp in 68 days, the fastest passage on record—and is owned by Mr. A. Bull, of Tonsberg. She is no doubt a very fast sailer, and we should say is one of the most profitable vessels that ever sailed. She requires little or no ballast even to go to sea, and her deck is said to be as dry as a drawing-room during a lengthened voyage and in a heavy sea. Although built of soft wood, she is classed A 1 at Lloyd's for ten years. The *Formica* is in every respect a vessel well worthy the attention of every nautical man, or that of any one interested in the progress of transport in timber-built sailing craft.

The following notices have appeared:—

The interest and responsibility of Mr. Michael Sichel in our firm ceased on the 30th April, 1867. Mr. James Wheatley and Mr. Adolphus Zimmern are this day admitted partners in our firm, which Mr. Frederick C. Adams ceases to sign per procuration. REISS and Co.

China and Japan, 1st May, 1867.

We the undersigned have this day established ourselves as general commission agents and merchants at Chefoo.

ENGWAT BROTHERS and Co.

Chefoo, 1st May, 1867.

At Manila . . .	6 ditto	4s. 3d.	4s. 4d.

At Shanghai, bills on India, Rs. 297 per 100 taels. At Hong Kong, Rs. 219½ per $100. Bar Silver at Shanghai, tls. 111·3·0; at Hong Kong, 10⅛ per cent. premium. Mexican dollars at Shanghai, tls. 74·05 per 100; and exchange on Hong Kong, 27 discount. Hong Kong and Shanghai Bank shares new, 3 per cent.; old, 5 per cent. dis.; Gas Company, par; Hong Kong and Whampoa Dock, 19 to 30 per cent.; Steam Shares, 12 per cent. dis.; Union Dock Company, 25 per cent. dis.; China Traders' Insurance, 1½ per cent. premium.

The following is from Sharp and Co.'s Circular:—

Gold.—A smaller local business has been done than for some time past.

The total imports are $380,000, and on the other side the summation is $500,000. The export from Japan of the Silver-Gold I-shus has almost ceased.

Silver.—Amount inwards, $2,180,000. Outwards, $1,400,000.

The Bar Silver and Sycee have again been wholly purchased for Indian remittance. Large sums have been received from Yokohama in Silver Bous, some of which will probably find their way to the Mint.

Dollar Currency.—The totals received during the fortnight aggregate $630,000, and those sent away $450,000. Very few dollars will be packed for shipment by the present opportunities.

Exchange.—More has been doing in India Bills; a rupee extra just shutting out the coin. In sterling a small business only has been done at a decline. It would appear that merchants are prudently waiting to see what teas are to cost this time before laying down their funds.

Discount and Mortgages.—Money is placed on first-class Mortgages at 12 per cent.

Shares.—Quotations for these have improved since our last; some purchases for investment being made.

COMMERCIAL REPORT.

CHINA AND JAPAN IMPORTS.

The following report is from the *Overland Trade Report*:—

CANTON.—About 500 piculs of Common and 600 of W.B. Lead have been settled during the fortnight taels 7.15 to 7.25 for the former, and taels 7.35 to 7.45 for the latter. 3,500 piculs remain on offer. 250 flasks of Quicksilver have been placed at taels 70 to 71, and 200 more remain on the market.

SWATOW.—Shirtings, Grey, 8.4 lbs., $3.85; 10 lbs., $5.60; imports, 2,614 pieces. White, $8.10; imports, 185 pieces; T-Cloths, 6 lbs., $2.40; 7 lbs., $3 per piece; imports, 858 pieces. Cotton Yarn, No. 16-24, $219 per bale; imports, 112 bales. Bombay Yarn, $168 per bale. Metals: Nail Rod Iron, $4; Bar Iron, $3.80; imports, 850 bundles. Lead, W.B., $7.25 per picul.

AMOY.—Cotton Yarn, 16 to 24's are in good demand at $67 to 68; stock, 75 bales. Grey Shirtings, sales of 300 pieces good 8¼ lbs. have been made at $3.85, and the range of the market is $3.80 to 3.85; 7 lbs., $3.50; stock, 4,000 pieces. White Shirtings very dull; 68 reed, $3.40; 60 reed, $3.55; 56 reed, $3.40; stock, 200 pieces. T-Cloths, sales of 300 pieces 7¼ lbs. are noted at $3.05; 6 lbs., quoted at $2.80; stock, 2,200 pieces. Long Ells, Scarlet, $8 to 11; assorted, $7.10; no stock. Spanish Stripes, Assorted, 90 cents to $1 per yard. Quotations for other piece goods are as follows:—T. R. Cambrics, $3.80 to 4.20. Dyed Figured Shirtings; sales of 150 pieces at $5.35; stock, 100 pieces. White Brocades at $4.40; stock, 500 pieces. Coloured Brocades, $5.50. Coloured Chintz, $2.70 to 3.20; stock, 250 pieces. Camlets, $21 to 22; stock, 440 pieces. American Drills, sales of 150 pieces at $6.60; no stock. Metals, Tin, $23.50; stock, 600 slabs. Lead, $6.90 to 7.20; stock, 245 pigs. Quicksilver, $72. Nail Rod Iron, $3.30 to 3.60.

HANKOW.—Grey Shirtings: Arrivals from Shanghai have been large, whereas the demand has been less brisk. Prices have, in consequence, given way about 5 cents per piece on 7 and 8 lbs. cloth, quotations for same being this day tls. 2.35 to 2.40, and tls. 2.60 to 2.68 respectively. Heavier makes remain without change, 9 lbs. 10 oz. cloth being still worth taels 3.60 to 3.65 per piece. White Shirtings remain as last quoted, little demand being experienced for same. T-Cloths continue well inquired for, 7 lbs. cloth shows an advance of 1 mace per piece; good chop being to-day worth 2.40 taels. Other weights remain without change. Drills: English have been placed to a fair extent at a further decline of from 2 to 3 mace per piece. Fancy Cottons continue neglected, and in several instances show a fall of 1 and 2 mace on last mail's quotations. Camlets have continued in fair demand, principally for Szechuen, and may be quoted a quarter of a tael higher than at date of last issue. Lastings are in limited inquiry at previous rates. Long Ells show no alteration in values, the demand continuing insignificant. Spanish Stripes, Broad and Medium Cloths continue out of favour. Woollen and Cotton Mixtures: In consequence of accumulating stocks and limited demand, a fall of fully 3 mace per piece has to be recorded in the value of Figured Orleans. Metals: Lead has been rather more inquired for, but stocks have increased, and importers have submitted to rather easier rates. Sales have been at Tls. 5,50 for inferior, and Tls. 5.70 a 5.80 per picul for L. B. and W. B. marks. Quicksilver, there have not been any transactions, and last quotations are repeated. Tin continues to pass off in small lots at Tls. 19.80 a 20 per picul.

YOKOHAMA.—The last market Report was dated 16th ult., and during the fortnight that has since elapsed the import business has been quiet, and sales have been comparatively trifling. Grey Shirtings, 8.4 to 8.8, have been sold at $3.60. Yarn keeps in fair demand at former rates. Black Velvets have fallen considerably, and are difficult of sale at $13. Camlets remain as last quoted; holders are in some cases apparently more anxious to realise. Sales are reported as low as 16. Turkey Reds, Dyed Brocades and Spots, Lustres, Orleans, &c., are in no demand. Metals are quiet.

COALS.—*Hong Kong*: The only arrival has been a cargo of about 600 tons Australian coal for sale. English and Welsh firm at $13 50 and $14.50 per ton. Australian $9.50 to $10. Shanghai: The market has remained unaltered, but the demand having fallen off the tendency is downward. Sales of Australian (Sydney kinds) have been made at taels 11 per ton from ship; for native consumption the Newcastle kinds are not so well liked. Of Cardiff small sales at taels 16.5. per ton from ship. Nothing doing in American and Japan coals. English coals are without arrivals, which since the 20th ultimo were—1,889 tons from Great Britain, 734 tons from Australia, and 170 tons from Japan,—in all, 2,793 tons. English, taels 13 per ton; Cardiff, taels 16 per ton; Welsh, taels 14 per ton; American Anthracite, taels 12 per ton; Sydney, taels 10-7.5 to 11 per ton; Japan, taels 7 per ton; Formosa, taels 6 per ton.

SHIP-CHANDLERY.—Since last mail the flour market has been much changed, owing to the arrival of the Colorado and other vessels with large supplies of bbls. and sacks. Quotations are: bbls., $8 to 9 (extra) quarter sacks, superfine, $1.45 to 1.50; half-sacks, $2 80 to 2.90. The quotations for Beef and Pork still remain nominal, no sales except at retail, and large holders are still anxious to sell.

HONG KONG.—Grey Shirtings: There has been a limited demand for these goods, and prices for all weights are considerably weaker from the effects of the above mentioned forced sales. As high as $3.55 and $3.52½ was obtained for two lots of favourite chop 8¼ lbs., but the ruling price has been $3.47½. The highest price for 7 lbs. was $3.05 to 3.02½, but these latter were slightly spotted. Sales include 8,850 pieces—say 800 pieces 7 lbs. at $3.02½ to 3.05, 7,800 pieces 8.4 at $3.47½ to 3.55, 250 pieces 9½ lbs. at $4.50. White Shirtings: These goods have only been in small request, sales including 4,350 pieces, of which a considerable quantity have been of the higher reeds. The range of the market may be quoted at $2.75 to 6.50 for 54 to 84 reed. T-Cloths: Transactions have been comparatively large, and prices show a shade of improvement since last report. Stocks are becoming reduced, and this, combined with firmness on the part of holders, should operate favourably for still better rates. Sales include 23,880 pieces, say 8,500 pieces 6 lbs. at $2.30 to 2.60, 9,000 pieces 7 lbs. at $2.65 to 2.75, 6,380 pieces 8 lbs. at $3.40 to 3.95. Fancy Cottons: There has been a marked improvement in the demand for these goods, and considerable sales have been made of all descriptions, but prices show no material change and are at about their former level. Transactions include 500 pieces White Spots at $4, 750 pieces Brocades at $3.80 to 5, 400 pieces Damasks at $8 to 8.50, 400 pieces Chintz at $2 25 to 2 60, 11,800 dozens Handkerchiefs at 92½c. to $1.10, and 10,600 pieces Turkey Reds at

Digitized by Google

$3.60 to 3.80. Woollens: Have been in little demand; no change to note. Sales include 100 pieces Spanish Stripes at 80 to 92 cents, 200 pieces Lastings at $18.50, 540 pieces Long Ells at $9.40 to 9.50, and 200 pairs Blankets at $5. Cotton Yarn: The brisk demand noted in last report continued during the early part of the fortnight, and considerable quantities were placed of the finer qualities at former rates; latterly, however the demand has almost entirely disappeared, and the quotations must be considered nominal. The market, however, is firm, and in view of the small stocks in hand not likely to decline from its present level. Sales embrace 328 bales, say 213 bales 16-24, at 164 dols. to 200 dols., 30 bales 28-32 at 207 dols. to 210 dols, and 85 bales 38-42 185½ dols. to 220 dols.

METALS have been in rather fair request. Sales include 1,008 piculs Nail Rod Iron at 3.40 dols. to 3.50 dols., 4,100 piculs Bar Iron at 3.05 dols. to 4.40 dols., and 500 boxes Tin Plates at 6.80 dols.

CHINA AND JAPAN EXPORTS.

TEA.

CANTON.—Sales confined to new make Congou 4,000 boxes at Tls. 24 to 25; old chops no buyers; prices for New Scented not yet settled, but arrivals large. Young Hyson sales, Tls. 27. The total export is computed at—

Canton	14,239,100
Foochow and Amoy	47,121,600
Shanghai and Hankow	55,428,800
Japan	1,291,900
	118,081,400

And the export to United States 32,513,500. These totals differ slightly from our statements.

FOOCHOW.—There have been no further transactions in old teas. The *Overland Trade Report* says:—"Letters have been received by the Chinese from the tea districts which advise that settlements of leaf have been effected at prices to lay down at Foochow 8 to 10 taels per picul under the cost last year. It is probable that the new teas will begin to arrive at this port in about ten days or a fortnight."

SHANGHAI.—*Black Teas.*—The season is now virtually closed, a small parcel of common Hohow at Tls. 16, being the only settlement since the mail. Re-shipments, none. Stock, 150 chests. Total settlements, with re-shipments from the River Ports, from 1st June, 1866, to date, 330,000 chests, against 274,000 chests last year. The settlements comprise:—1,300 half-chests fair Teenkai; 800 half-chests common Moyune; 3,200 half-chests common Fychow and Shanghai-packed; total, 5,300 half-chests. Re-shipments (on native account), 1,200 half-chests. Stock, 8,000 half-chests, against 3,000 half-chests at same date last year. Total settlements, with re-shipments from the River Ports, from 1st June to date, 875,000 half-chests, against 285,000 half-chests last year. *Green Teas*—A further decline of about two taels in rates has led to a somewhat increased business, all but the very lowest grades being now cleared off the market. At Chinkiang 3,000 packages of fine tea remain in stock, but they are expected to arrive for sale at this port in a few days.

YOKOHAMA.—As the present season draws to a close, the amount of business done in this staple naturally decreases, and we have to report only moderate purchases during the past fortnight. Settlements do not exceed 2,600 piculs, at prices without change since our last, although for one or two better samples slightly higher rates have been paid. The unsold stock in Yokohama is small and of inferior quality, and the dealers do not expect to receive much more than 2,000 to 4,000 piculs of the present crop. Samples of the new crop should arrive towards the middle of next month, but no large parcels will be upon the market until early in June. All native accounts agree in representing the yield as most promising both in quality and quantity.

SILK.

CANTON.—The new crop was expected about the 24th May, but recent rains would probably affect the quality and also reduce the quantity available. Some old silk still remained unsold, but was chiefly of the inferior grades, and very high prices were asked.

SHANGHAI.—There had been no settlements during the fortnight, and about 400 bales had arrived from Japan. Total settlements, 1st June to 17th May, 42,050 bales against 54,200 in the same period of the previous season. Total export to 17th May, 48,800 bales against 62,000 in the previous season. The weather had been favourable for the new crop.

YOKOHAMA.—Notwithstanding the somewhat improved advices received by telegraph, transactions have been on a limited scale, and a portion of these have been in barter. The rise in exchange has weakened prices generally, the finer sorts having been extremely scarce, and hence quite nominal. Supplies have been equal to settlements, but generally of the lower grades. The unsold stock is estimated at 500 bales. Quotations for Mybash and Sinchu are:—Nos. 1 and 2, 880 to 920 dols. per picul; Nos. 1, 2, and 3, 800 to 850 dols.; and Nos. 2, 3, and 4, 725 to 759 dols. Total export from 1st July to 26th April, 12,114 bales, against 9,879 bales in the corresponding period of the previous season.

SHIPPING INTELLIGENCE.

ARRIVALS.

At SHANGHAI.—From Liverpool, April 27, Chalmers; from Newcastle, 29, Diamond; from London, City of Aberdeen (reported by telegram); from New York, April 21, Luisa Canevero.

At HONG KONG and CANTON.—From London, May 10, John Milton; from Shields, Deerfoot; from Singapore, &c., 11, Far East (str.).

DEPARTURES.

From YOKOHAMA.—For New York, April 27, Glenclune.

From SHANGHAI.—For New York, April 30, Condor.

From HONG KONG and CANTON.—For New York, May 11, Windward.

From MANILA.—For London, May 2, Dilkhoosh; for Cork, April 30, Betty Peribach; for Havana, 27, Maria y Vicente.

VESSELS LOADING.

At YOKOHAMA.—For London, Lord Collingwood; for New York, Glenclune, Havelock.

At SHANGHAI.—For London, Crawshay Bailey (full), Isles of the South.

At MANILA.—For London, Monarch; for Cork, Lord Raglan; for New York, Daniel Marcy.

At HONG KONG and CANTON.—For London, Belted Will, Min; for New York, Ethel.

VESSELS PASSED STRAITS OF SUNDA.

April 22, Pakwan, London to Hong Kong (reported by telegram).

FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London, Cotton and Tea, £3 to £3 10s.; Silk, £4 to £4 10s., per ton of 50 cubic feet. To New York, per sailing vessel, £2 10s. to £3; per steamer, $45 per ton of 40 cubic feet.

AT SHANGHAI.—The Isles of the South is loading for London at £3 per ton for New York; there is no vessel on the berth. Coast rates show a decline.

At HONG KONG and CANTON.—There have been no fresh charter effected for London direct, and via Manila the Emerald is the only vessel closed. For New York the Ethel has been taken at £2 15s. per ton, showing an advance of fully 15s. per ton on previous rates. The circular of George Holmes gives the number of disengaged vessels in harbour (exclusive of Siamese) at 20, representing 9,048 tons.

At MANILA.—The Monarch has taken the berth for London direct at £2 10s. per ton for unclayed sugar, and the Daniel Marcy for New York at 12 dols. per ton of 20 cwt. for dry, and 11 dols. per ton of 4 bales hemp to New York or Boston.

REPORTS AND CASUALTIES.

SHANGHAI.

Italian ship Luisa Canevero, Nov. 12th, left New York, crossed the Equator Dec. 6th, in long. 28 W. In the meridian of the Cape of Good Hope, Jan. 19th. Off St. Paul's, Jan. 25th. Feb. 5th, encountered a severe gale from the N.E. which lasted to the 12th, and carried away the patent steering apparatus. Feb. 19th, sighted Sandalwood Island. Arrived at Woosung, April 12th, detained there for eight days for water on the Bar, the ship drawing twenty-two feet. Coal laden.

HONG KONG.

The British ship John Milton reports having left the East India-docks on December 17th, and Gravesend on the 22nd. Experienced heavy gales in the Channel, and in the Bay of Biscay a succession of gales, in which she lost a man overboard, split several sails, and had a boat washed away. A tremendous sea all the time, decks full of water, spars and everything movable adrift. Afterwards fine weather to the Equator, which was crossed on February 4th, in lon 23. Had moderate S.E. trades, and fine weather to the Cape. Passed the meridian on March 2nd, in lat. 39 S., and went as far as 45 S. Had a strong gale, in which a man fell from the fore topsail yard and broke his arm. Sighted Java Head on April 3rd, with light easterly winds, and a strong current setting to the westward. Passed Anjer April 8th. Thence to arrival, light variable winds and calms, with thick weather and rain. On April 3rd, in the Straits of Sunda, spoke the ship Thomas Killan, eighty-seven days out from London, bound for China; and on the 23rd, in lat. 13 N., long. 107 E., the barque Rifle, from London, bound for Nagasaki, 106 days out.

The British ship Ariel from Saigon, April 29th, reports that the barques Richard Cobden, Coq du Village and Costa Rica left same date, the latter bound for Macao. On May 1st in Lat. 10.32 N. Long. 109.29 E. passed the British ship J. R. Worcester from the Tyne to Shanghai 105 days out, 29 days from the Straits of Sunda. Experienced light variable winds and calms during the passage. A large Spanish vessel with coolies was reported to have been lost on Cecir de Mer. Two French gun-boats had gone down to the scene of the wreck, but had not returned when the Ariel left Saigon. The particulars are therefore unknown.

COMMERCIAL POSTSCRIPT.

We beg to call the attention of our subscribers to an addition in our Export Supplement, consisting of a statement of the cargo by the P. and O. Company's steamers.

We are requested to state that on the 1st of July next the London office of the Hong Kong and Shanghai Banking Corporation will be removed to No. 32, Nicholas-lane, Lombard-street.

The firm of Messrs. Finlay, Hodgson, and Co., of high standing in the China trade, and that of Messrs. Baring Brothers and Co., have amalgamated, the arrangement taking effect from the 1st proximo. Mr. D. J. Kay and Mr. Kirkman Finlay retire from the former and Mr. Charles Baring Young from the latter firm, in which the present partners are Mr. Thos. Baring, M.P., Mr. Charles Baring Young, Mr. Russel Sturgis, Mr. Edward Charles Baring, and Mr. Henry Bingham Mildmay. Under the designation of John Francis Baring and Co. the house was established in 1763, the name of Baring Brothers only dating from 1805. The house of Finlay, Hodgson, and Co. dates from the year 1809. Their branch in Liverpool, Messrs. Thomson, Finlay, and Co., will be included in the union. Mr. Baring and Mr. Kirkman Hodgson are both directors of the Bank of England.

ARRIVAL NOT IN THE TABLES.—June 3, at Havana, from Macao, Esperanza. June 14, at New York, from Foochow, Robin Hood.

DEPARTURES.—June 25, from London, for Shanghai, Dilpussund; for Hong Kong, Art Union; 20, from off Dungeness, for Batavia, Cornelis Gips; 21, from Cardiff, for Singapore, Joachim; 22, from Newport, for Shanghai, Ladye Love.

SPOKEN.—Joseph Manook (?) (barque), from Colombo, March 31, 1 N., 24 W.; Barracouta (barque), Liverpool to Japan, April 20, 33 S., 18 W.; Lord Nelson (barque), from Colombo, May 5, 36 S., 23 E.; Miss Nightingale (?) (Prussian ship), Singapore to London, May 8, 35 S., lon. 16; County of Lanark, Batavia to Rotterdam, May 13, 31 S., 15 E.; Batavia, Batavia to Rotterdam, 17 S., 4 E.; Colgrain, Colombo to London, April 24, 36 S., 23 E.; General Havelock, Foochow to New York, April 24, 36 S., 22 E.; Avon, Colombo to London, May 2, 34 S., 27 E.; Lansdowne, Java to Amsterdam, May 21, 71 days out; Carolina and Maria (Dutch ship), Batavia to London, March 1; Victoria (Austrian ship), Macao to Havana, out 36 days, 13 S., 97 E.; Huntley Castle (ship), Glasgow to Singapore; Hastings (ship), Trincomalee to London, April 8, 21 S., 53 E.; Magellan, from Shanghai, 58 days out, April 12, 15 S., 90 E.; Admiral de Ruyter, Batavia to Am-

Digitized by Google

sterdam, May 2, 35 S., 24 E.; Thankful, Singapore to London, April 12 30 S., 39 E.; Delft, Bali to Rotterdam, 34 S., 15 E.; Zanzibar, Penang to London, May 11, 25 S., 6 E.

CASUALTIES.—The Argo (Russ. ship), Rosenberg, from Cardiff to Galle, which put in at Lisbon June 20, reported leaky in her topsides, will probably have to lighten to repair. The Amersham (ship), Barton, of and for London, from Penang, which put in at St. Helena, May 4, leaky, &c., and was surveyed and recommended to lighten, was again surveyed May 27, and the surveyors have recommended that the remainder of the cargo should be discharged and the vessel sold. The Concordia (brig), of Dordt, has been chartered to take a portion of the cargo to its destination. The China clipper Ethiopian has been towed into Sydney by H.I.M. ship Marceau. The Ethiopian was seven days off the Heads after being totally dismasted in a hurricane and losing her chief officer overboard. Divers have recovered 92 cases of copper and yellow metal, 30 tons of railroad iron, and a quantity of bar iron, from the Taymouth Castle, from Glasgow to Singapore, wrecked at Torhead 6th January. Should the weather continue fine, it is expected that a large quantity of the dead weight will be recovered.

The crew of the Prussian ship Virginia (from Cronstadt to the Amoor River, abandoned in lat. 8 N., long. 12 ?) were taken off and landed by the Royal Edward at Capetown, not as stated in the paragraph of casualties at Plymouth.

MISCELLANEOUS.—At Ascension, May 23, Aurora Australis, from Shanghai, and sailed for New York.

Off Ascension, May 9, Earl of Chester, from Sourabaya for Rotterdam; Thame, from Ceylon; 21, Aletta Augusta, from Padang; 23, Kanagawa, from Batavia, both for Amsterdam; 27, Eskdale, from Colombo; 28, Walcheren, from Bali, for Rotterdam.

At TABLE BAY, April 22, Nieman, Beckwith, from Macao; 23, San Fernando, Gamecho, from Manila, and sailed 27 for London; 26, Krimpenaan de Lek, Rotgans, from Macao, and sailed 27 for Havana; May 11, Costa Rica, Furber, from New York, and sailed 15 for China; 15, Sultana, Henderson, from Batavia; April 30, Dragon (s.), Gibbon, sailed for China; May 5, Hayo Maro (s.), Carne, sailed for Japan.

The Admiralty have invited tenders for the conveyance of seven tons meast., ranges, &c., from the Thames to Hong Kong.

BANKRUPTCY COURT.—IN RE GEORGE LYALL.—The bankrupt in this case was a merchant, of Leadenhall-street, in partnership with Mr. Still and Mr. Maclean, under the firm of Lyall, Still, and Co., Hong Kong. The joint liabilities are stated at £173,381; assets estimated at £36,300, a portion of which is subject to a decision of the court at Hong Kong. Mr. Reed opposed for Mr. Lieart, of Manchester, a creditor for £47,000, and asked for additional accounts. The house at Hong Kong had failed, and most of the property was there, consisting of goods which had been purchased in this country. This failure was stated to be the result of undue speculations entered into by Mr. Maclean at Hong Kong, and against which his partners had from time to time protested. The adjudication in the case of Mr. Lyall was obtained at the instance of a creditor, and an adjudication had also been pronounced against the firm at Hong Kong. After hearing Mr. Lawrance for the assignees, his Honour directed an adjournment.

RECEPTION OF THE JAPANESE ENVOYS AT WASHINGTON. — The following details are given of the interview of the Japanese Commissioners with the President:—Ono Tomogoro, the Chief Commissioner, said: "I have the honour to offer to the honourable President of the United States the assurance of his Majesty the Tycoon's best respects, and his earnest wishes for the excellent health of the President, and also his best wishes for the happiness and the prosperity of the people of the United States. His Majesty the Tycoon sincerely desires that the friendship now existing between the honourable President and himself, and between the people of both countries, may continue and grow firmer in coming years; that the intercourse between the two nations may be extended, and thus the welfare and happiness of both may be promoted by their dealings with each other." The President, after cordially welcoming the Commissioners to Washington, said: "I am glad to see the representatives of Japan here, that I may say to them personally, and with a full knowledge that what I am saying may go abroad throughout the world, that from the first hour in which the United States were admitted to look in upon Japan we have sought to obtain from her people no advantages which were not reciprocally beneficial to themselves; and, on the one hand, that while my own country has been tried in the furnace of civil war, as Japan now is, every word that has been uttered to us by the Tycoon of Japan has been frank, sincere, just, and honourable, and that whatever difficulties have at any time arisen between some of his people and citizens of the United States, your Sovereign has always done all that was in his power to avert and heal them. We are advancing our frontiers near to Japan, while we are at the same time connecting our ports with hers by a new, regular, and frequent steamship line. It shall not be my fault if the two countries do not come to esteem each other the more by reason of greater commercial and social intimacy. You will make your special business known to the Secretary of State at your own convenience, and it will receive the attention and respect which is always bestowed by this Government upon the wishes of a friendly nation. If beyond this it shall be in the power of this Government to aid you with disinterested advice, counsel, and assistance, they will be cheerfully afforded."

The publishers, Van Heuvell and Van Santen, at Leyden have published the second volume of "Five Years in Japan (1857-1863)," by Jhr. J. L. C. Pompe van Meerdervoort. This volume is a geographical and historical description of that country, and is said to have great merit.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

The Netherlands India Trading Company held its annual meeting at Amsterdam some days ago. In the report it is stated that the capital, on which an interest of 5 per cent. is due, amounts to f.3,925,000. The last year has been very advantageous, and most of the undertakings in India have given large profits, amounting to one hundred thousand guilders more than last year. The account of profit and loss shows a net profit of f.261,086.17, so that a dividend at f.10.20 will be paid, making 6½ per cent. on the paid-up capital. Messrs. R. Daniel Wolterbeek and M. H. Insinger were elected commissioners.

The shareholders of the Rotterdam Bank held a meeting on the 19th inst., at which Mr. W. Betzold (formerly director of the agency at Batavia) was appointed manager here, whilst Mr. Heinrich Meyer, from the Baden Credit-Anstalt at Vienna, was appointed to his former post. Further, the managers stated that no payments will be made in future upon the shares of the second series, without a resolution of a general meeting, in order to prevent a different quotation in these shares and those of the first series at the Bourse.

The International Credit and Trading Company has published its account of profit and loss, from which I gather that the net gain amounts to f.102,558.21½, out of which a dividend will be paid of 5 per cent. on the paid-up capital.

COMMERCIAL.

COFFEE.—The Dutch Trading Company's sale of 118,500 bags Java has gone off at firm prices for the pale and yellow qualities, the fine at 1c. above the valuation; the green and speckled unclean sorts sold at 1c. under the valuation; good ordinary is worth now 40¾c., fully good ordinary 41c., against 41c. to 41½c. at the May sale. Since the auction there has been some demand for the pale and pale yellow qualities and for the unclean ditto. The market is firm. Of private imports the following transactions took place at Amsterdam before the auction:—3,000 b. Macassar, ex Princes Amelie, ordinary pale to good pale yellow from 33½c. to 42½c.; 4,212 b. Padang, ex Padang Packet, pale greenish to fine pale yellow, from 40½c. to 46½c.; and 600 bags Java, ex Kronprinzes, Preamger, good pale to yellow at 46c. Here 15,000 b. of private import were offered after the sale, of which 5,200 b., ex Bantum, were sold at different prices, and 1,489 b. Java, ex County of Bute, good ordinary and real good ordinary West Indian sorts from 42c. to 45c. Per Nieuwland, 1,257 b. Java were imported for private account.

SUGAR.—3,000 baskets Java were sold this week at very firm prices. The market remains in a very firm position, and there was some demand for export for the fine white sorts. The stock of the raw sugar on the 15th of June amounts to 46,718,593 kilo., against 57,682,216 kilo. in 1866.

RICE.—At Amsterdam 2,912 bags Java, ex Kronprinzen, were sold at f. 9⅜ to f. 10⅜; 2,814 b. were imported here, per Nieuwland. Cleaned sorts with moderate transactions.

TEA firm at the last quotations. On the 10th of July the cargo, ex Yeavering Bell, and the bought in parcels, ex Monarchy will be offered for sale.

SPICES unchanged; 2,555 b. Singapore Pepper, ex Bengal, were sold at 17¼c. from board.

TOBACCO.—The different lots imported per China, from Java, at Amsterdam, comprise the following marks:—1,014 b. Kawie, 164 b. D; 1,199 b. Malang, and 291 b. de S; per Nieuwe Waterweg, 754 pic. Java were imported.

SEGARS (Manilla.)—300 mille 2a cortados 1863 a little damaged were sold from f. 13 to f. 23½ (f. 23½ B); and 90 mille ditto, 1865, offered for sale were partly sold from f. 36¼ to f. 36½; the rest was bought in at f. 37.

DRUGS.—The Dutch Trading Company will offer for sale on the 17th July, at Amsterdam, 2 pk. Getah Gitang; 40,000 kilo. Gutta Percha; 181 pk. Cassia Vera; 2 ch. Cinnamon Oil; 29 pk. India Rubber, and 73 b. Cassia Vera.

GINGER.—For private account 500 chests Preserved Ginger, imported from China, per Bankside, via London, are to be offered for sale on the 28th July.

ARRACK.—In the first hand 25 casks and 28 ½-casks Batavia, floating, per Maria Elisabeth, were sold at different prices. The 162 c. Sourabaya, ex Sparkenhoe, had not been sold when offered at inscription. 280 c. were imported, ex Anna and Sophia, from Banjoewangie.

JAVA INDIGO.—The trade was very important; 70 chests were sold, principally consisting of fine quality, at very firm prices; ord. sorts cannot be sold promptly.

COTTON dull; some trifling lots were sold for export.

KAPOK.—376 b. E. I. Kapok, ex Charlotte, from Java, have been sold at 56c. for fine quality, and 18 to 21c. for ordinary.

MANUFACTURES.—The market is in a good position; the quotations for 6-4 Madapolams and Calicuts is f. 5.40 to f. 5.60; No. 28 Warps 15½d. to 15⅝d.; No. 14 do., 14¼d. to 14½d.; No. 30 Cops 14d.; No. 16 do., 13¼d.; home fabr. No. 28 Warps, f. 1.82, and No. 30 Cops f. 1.60 per kilo.

TIN.—1,100 slabs Banca were sold at f. 53, and 300 slabs do. at f. 52¾; 927 slabs Billiton floating at f. 52½. The quotation for Banca is f. 52¾, and for Billiton f. 52.

MONEY.—There is a very large supply of capital. The Bank decreased the rate of discount. Discount at the Bank since the 17th of June:—For Bills, 2½ per cent.; for acceptances, 3 per cent.; in the open market from 2½ to 3 per cent. 'Change: London, 3 mo., f.11.81; 2 mo., f.11.83; short, f.11.89½. Paris, 3 mo., f.46.90; 2 mo., f.46.97½; short, f. 47.10. Antwerp, 3 mo., f. 46.80; short, f. 47.10. Hambro, 3 mo., f.34.90; 2 mo., f.34.97½; short, f.35.10.

SHIPPING INTELLIGENCE.

ARRIVALS.—June 16, at Texel, from Passaroeang, Nieuwe Waterweg; 18, from Banjoewangie, Anna and Sophia.

DEPARTURES.—June 19, from Brouwershaven for Batavia, Cornelis Gips; from Hellevoet for Singapore, via Cardiff, Leopold, Graff van Limburg Stirum; 20, from Brouwershaven for Batavia, Jannetje; from Texel for Samarang, Drie Gezusters; 21, from Brouwershaven for Macassar, Vrachtzoeker; from Texel for Batavia, Ortelius; 22, for Batavia, Ridderkerk; 23, from Hellevoet for Singapore, via Cardiff, Schoonderloo.

PASSENGERS INWARD.—From Java, per Nieuwland: Mr. Van den Bergh. Per Anna and Sophia, Mr. C. G. H. van Schendel and family, E. Miller, and Messrs. Quentyn.

PASSENGERS OUTWARD.—For Java, per Vrachtzoeker: Mr. W. H. Woelders and family, Mr. Bunand and family, N. Renvoy and family, and Messrs. A. Cambier; per Drie Gezusters: Mr. Douwes and family, Miss Hazewinkel, and Mr. Ulker and family.

LONDON, THURSDAY, JUNE 27, 1867.

THE STRAITS GOVERNMENT.

THE new order of things in the Straits is, we understand, working well; the appointments made appear to be on the whole judicious. But the supine character of the late Government, so frequently noticed by us, has left unsettled a number of troublesome and intricate questions, the solution of which will tax to the utmost the energy and administrative ability of the new *regime;* among others we may instance the relations between the Straits Government and the adjacent native States as being of urgent importance and demanding immediate action. The first of these that presents itself to our notice is the province of Klang, which according to the last accounts was in a complete state of anarchy, owing to a dispute between the Rajah and his chiefs; and the British war-steamers *Rinaldo* and *Pluto* had been despatched to restore order.

As far as we can understand the question its history is as follows:—The exclusive right of selling opium and spirituous liquors in the province is "farmed" by certain persons who are British subjects, and who in accordance with the well-known custom pay the Rajah a monetary equivalent for the privilege. To protect the rights thus purchased, they are obliged to employ persons in the capacity of revenue officers — whose avocation appears to be about as popular among the natives of Klang as that of a "gauger" is in the Emerald Isle. At all events the chiefs of the country have set up a strenuous opposition to the entire system, which has been to a certain extent successful, as they hold absolute possession of the interior and exercise great influence over the populace. The farmers, on their side, have built a stockade commanding the principal town, and have organised a force to assist the SULTAN in maintaining his rights and their own privileges. This attitude of mutual hostility has now lasted some time, greatly to the injury of trade as well as to the detriment of law and order. It appears to us that the RAJAH has an undoubted right to farm out his own revenues, and as the contumacy of the chiefs seriously interfered with our commercial relations with the country, as well as its internal peace, the Straits Government should from the first have interposed to maintain the RAJAH's supremacy. We understand that the late Governor, General CAVENAGH, visited the province just before his departure for Europe, and wrote a letter from Penang recommending his successor to adopt vigorous measures; but why were such measures not adopted long ago? The spectacle of an ex-Governor going comfortably home in a P. and O. steamer and amusing himself *en route* by recommending his successor to attend to affairs that he himself had neglected, would be ludicrous,—were it not sadly illustrative of the system from which has resulted a vast amount of misery and suffering, to say nothing of serious injury to trade.

The position of Kassang, another important native State, is no less worthy of consideration. The SULTAN of JOHORE, whose property it is, is we believe in want of money, and anxious to dispose of this territory. He is bound by treaty to give our own Government the refusal of it, and a favourable opportunity thus offers of possessing ourselves of a valuable province on easy terms, and greatly extending our influence in the Peninsular. The district lies between Malacca and Johore; it is rich in tin, and probably in gold also, and the land is fertile. The opportunity of acquiring it should not be lost, for unless grasped at once it will assuredly slip through our fingers. Kassang, added to Malacca, would convert into a valuable province what is now only an expensive appendage of the Straits Settlements and a constant drain on their resources. Perak is another State that might advantageously be annexed. British subjects have on several occasions been infamously treated there, and even now the country is in a complete state of anarchy. A transfer might, we believe, be arranged to the satisfaction of all parties, for the natives would be glad to substitute our rule for that of the Malays, while the latter would probably be equally glad to part with their turbulent subjects—for a consideration. Should these matters receive from Colonel ORD the attention they merit, his administration will in great measure repair the mischief resulting from the *laissez faire* system of his predecessor.

THE SAN FRANCISCO, JAPAN, AND CHINA LINE.

THE next steamer from San Francisco for Japan and China is appointed to leave on the 1st September. The steamers of the West India and Pacific Steamship Company will convey freight and passengers from Liverpool, and the Royal Mail Company's steamers from Southampton, for conveyance by this route. From the New York papers we learn that the steamship *China* —a sister ship to the *Great Republic* and *Celestial Empire*—had her trial trip on the 11th June. The vessel proceeded from New York about thirty miles to sea, and during the run easily attained eleven knots. The following is a sketch of the dimensions, &c., of the *China:*—Length between perpendiculars, 360 feet; length over all 373 feet, breadth of beam 46 feet, breadth of beam including outer planking 47 feet 10 inches. She has three complete decks and an orlop deck, four watertight bulkheads fore and aft, floors of white oak, iron strapped on the inside of frame and outside of inner course of planking, being doubled planked from keel to the wales, and edgewise bolted in a most thorough manner. She is bark rigged, having fore and aft main sails, topsails, and top-gallant masts. There is but one engine of 105 inch cylinder and 12 feet stroke, having cut-off and surface condensers. There are four tubular boilers with horizontal tubes, 24 furnaces with independent circulating pump. The vessel possesses accommodation for 500 first and second-class cabin passengers and 800 steerage. The means for saving life consist of 1,500 life preservers, 12 metallic lifeboats, and two liferafts. Her tonnage is 3,886 tons official measurement, and 5,009 tons builder's measurement. The *China* has been built by Mr. W. H. WEBB, of New York, under the superintendence of Mr. W. W. VANDERBILT, the general manager of the Pacific Mail Company.

THE silkworm disease has again shown itself in France; it appeared this spring under a new aspect, principally in the arrondissement of Grenoble, where it has been disastrous for the breeders. The worm does not present, as in former years, any traces of the malady, such as blackish spots, &c., but where it has arrived at the third change it cannot go any further, and dies of exhaustion. This is attributed to the yellowish leaves of the mulberry, which do not furnish sufficient nourishment. The evil has not been so great in fact in the Ardèche or the Gard, where the weather has been less rainy. Too much rain, it is known, proves injurious to the nutritive qualities of the mulberry leaf.

ON the 24th inst. a question was asked in the House of Commons as to the appointment of a British Consul at Saigon. Lord Stanley said in reply that he had not received any representation on the subject, but should he do so he would give the matter his best consideration. In order to obtain the appointment of a Consul it is therefore necessary that the merchants, shipowners and others at Saigon, Singapore, &c., interested in the trade, should memorialise the Government, pointing out the loss and inconvenience now existing. In our issue of the 6th March we noticed this subject, and we have received several letters since requesting us to urge on the appointment. We shall be happy to take charge of any memorials and present them to the Foreign-office, and we fully believe that Lord STANLEY will sanction the appointment forthwith. The Consulate at Sarawak has not yet been filled up, and is not likely to be.

The Post-office authorities have notified, in reference to the invitation for tenders for the performance of the mail services to India, China, and Japan, that tenders may be sent in (on or before the 16th of September) not only for any one of these services, or for two or more of them in combination, but

Digitized by Google

for a single packet per month; as, for example, for a packet once each month of four weeks between Suez and Bombay, or for a packet once in every like period between Aden and Yokohama.

AMONG the presentations at the last levee we notice that of Mr. J. POPE HENNESSY, "on appointment as Governor, Commander-in-chief and Vice-Admiral of Labuan," by the Duke of BUCKINGHAM.

THE NAVIGATION OF CHINA WATERS.

FROM the time that the Chinese trade was first opened to foreigners until now, those members of the mercantile marine whose business has lain upon the coasts of Eastern Asia have loudly and unceasingly demanded *charts*, *beacons*, and *pilots* as the desiderata of all navigators of the Chinese seas and rivers. The first demand has been liberally responded to, for the industry and skill of the officers attached to the various surveying expeditions, supplemented by the scientific observations of many merchant captains, have left but little to be desired in the matter of charts. Even those recently published are, we understand, at the present moment undergoing careful revision and collation with a mass of notes and sketches carefully gathered by Mr. HOCKLY, the harbour-master at Shanghai, and submitted to the Hydrographic-office with the view of aiding in the improvement of the facilities for (more especially) the river navigation. Such being the case, it may fairly be presumed that the next issue of China charts will be absolutely correct, at least up to the date of Mr. HOCKLY's departure from China. We may here mention that the results of the surveys of H.M.S. *Serpent* and *Swallow* have been published, with the exception of Formosa and Korea. It must be remembered—and we commend the fact to the recollections both of the Hydrographic authorities and of those who are disposed to grumble over the manifold inaccuracies of the existing charts of the Yang-tze—that the characters of the rapidly rushing rivers of China, and necessarily of the approaches to those rivers from the sea, are subject to *daily* change; and this not in the general sense wherein it is true that the course of every river alters inappreciably from day to day, but literally, that where to-day there is deep water, there may to-morrow be a shoal, and where to-day reeds and rushes are seen above the tide, the channel may lie to-morrow. Almost incredible as this must be to those who are unacquainted with the perverse habits of many of the larger rivers of both the Eastern and Western Continents, it will be readily understood by those who are at all familiar with the navigation of the Yang-tze, the St. Lawrence, or the Mississippi. Placing this on one side, however, all that chart makers can do under circumstances of such difficulty will, we may rest assured, be done; and so far as the general features of the sea coast and river banks are concerned, mariners will have nothing to complain of in the forthcoming set of China charts.

The erection of lighthouses and beacons, which is quite as necessary as the construction of accurate charts, was, however, a matter of more difficulty, not on account of the greater expense involved, but rather because of the peculiarities of the Government that had the power of granting or withholding the required boon. Withheld it was, indeed, as long as possible, until pressure from without through the ministers and consuls, and, we suspect, pressure from within through the Inspector-General of Customs, resulted in the tardy compliance of the native authorities with the provisions for safe navigation expressed in Article 10 of the Rules of Trade attached to the English Treaty of 1858. It was monstrous that the important revenue derived from Tonnage Dues, which for the year ended 30th June, 1864, amounted to one hundred thousand pounds sterling, should be subject to no corresponding deduction towards securing the safety of the mariners whose exertions contributed so largely to the native exchequer. Very naturally, if not very honourably, the native superintendents of foreign trade chuckled over the largeness of their collections, but displayed extraordinary stinginess in carrying out the suggestions of the Consuls and Commissioners of Customs whenever these gentlemen pressed the observation of the Treaty stipulations. But it is a more grateful task to refer to the concessions we have gained rather than to the difficulties which encumbered our path while we were seeking for the fulfilment of the promises made by the Chinese Government. We now find from the China papers that a lighthouse and extensive beacon works at the mouth of the Yang-tze are to supersede the miserable light-ship which has for so long alternately guided and misguided the voyagers up or down the muddy stream. A lighthouse will be erected at Chefoo, where, perhaps more than at any other port on the coast, a light of some kind is urgently needed. In addition to these, the Custom-House authorities have purchased a barque of 400 tons burden, and fitted her up as a light-ship for the mouth of the river Liao, which affords entrance to the port of Newchwang. Here, during the period for which the river is open, a light will be displayed, and it is to be hoped we shall thereafter hear of fewer accidents to vessels approaching that most treacherous of Chinese rivers. The light will be visible over a circle of ten miles radius, within which all the dangers of the approach lie. The river itself and its embouchure were during last year carefully surveyed by Captain TOWNSEND, of the U.S. man-of-war *Wachussetts*, and the position of the new light ship has been chosen in accordance with his suggestions. The trade with the north is hardly of sufficient importance to warrant the foreign representatives in demanding the erection of so complicated a series of lights and beacons as would be necessary in order to render the entrance to the Peiho approachable by night. Ningpo is already provided for, and we believe that under the existing arrangements the smaller coast ports are easy and safe of access.

So far, therefore, the Chinese Government has left us comparatively little to complain of; and we are further happy to see that it has taken yet another step towards rendering the navigation of its waters safe as well as profitable. We allude to the establishment of properly constituted pilot boards, under whose directions examinations will be held and certificates issued to duly authorised and properly qualified candidates for employment. It is needless for us to enlarge on the importance of having not only coast pilots whose duty it should be to take charge of vessels running for the first time from one open seaport such as Hong Kong to another such as Chefoo, but also harbour pilots licensed by a local board at each place, and qualified by daily observation of the changes which occur in the channels of such rivers as the Wusung, Min, and Yung, to assume charge of a vessel from the time she leaves Guttzlaff, Sharp Peak, or Chinhai respectively until she casts anchor before Shanghai, Nantai, or Ningpo. To take Shanghai as an example; for many years the Consuls gave piloting licences to men who from their long experience were supposed to know something about the river navigation. Some of these, however, proved so grossly incompetent that a company was formed under the control of a board formed by the local agents of the insurance offices and the marine surveyors. This board examined apprentices, drew up rules under which these apprentices should in process of time be admitted to act as pilots, and issued licences. The stock in trade of the company was supplied by the insurance offices, which were of course deeply interested in the safe navigation of the river. For some time this plan worked well, but when some men were of necessity dismissed for drunkenness or other misdemeanour, and some were refused admission on the ground of incompetence, or for some equally valid reason, there was speedily formed a ragged regiment, consisting of such pilots as were "in distress, and every one "that was in debt, and every one that was discontented." These individuals, after making several attempts, more or less unsuccessful, to form an opposition company, began to practice each man for himself; and it was curious and instructive to remark that during at least four years every serious accident that occurred in the Wusung river happened under the auspices of an unlicensed pilot. Still as their tariff was lower than that charged by the Company, they readily found employers among the inferior class of merchant captains. Meanwhile the members of the Pilot Company contrived to get up a schism among themselves, and after some litigation and much ill-feeling the board was compelled to dissolve. A suggestion made some months ago in these columns—namely, that of placing the harbour pilots under the direct control of the harbour-master as representative of the Chinese authority on the water—was talked of; but, partly on account of Mr. HOCKLY's absence from his post on leave, and partly because the Consuls were reluctant to resign the shadowy power they possessed over the pilotage, another plan was adopted, the Consuls appointing an examining board, which was to derive its authority from *all the consuls jointly*. But after a few days Mr. TETTENBORN, the representative of his Prussian Majesty, having taken offence at the rejection by the board of examiners of a German sailor whom he believed to be competent to assume charge of a vessel and cargo, withdrew his adhesion to the arrangement, and announced his intention of issuing licences on his own account.

Digitized by Google

Some persons writing on the spot stigmatised this conduct as somewhat childish and certainly imprudent. With this we have nothing to do; suffice it to say that Mr. TETTENBORN'S unexpected line of action restored the chaos which it was hoped was about permanently to be replaced by order.

The Chinese Government has, however, now stepped in and announces its intention of drawing up certain rules and regulations for the appointment of pilots at the different ports, which regulations, when sanctioned by the Ministers, will have the force of law, and will be binding on the nationals of every foreign country represented in China. That the Board of Foreign Affairs possesses the right to take this step there can be no manner of doubt, inasmuch as the duty of making such rules in all civilised countries devolves upon the territorial Government; and, on the other hand, it is the native Government alone that can draw up regulations of any practical value or upon which any dependence as to stability can be placed. This has been rendered evident by the result of the attempt just made to form a plan of combined *consular* action at Shanghai. In a word, then, the Tsung-li-yamen, after careful deliberation and with the aid of the foreign representatives, has drawn up a system of pilotage regulations which is, with the necessary modifications in each case, to be applied to all the open ports. We expect much from this fresh step on the part of the native Government. Those only who have witnessed the shortcomings of the plans heretofore adopted can properly appreciate the advantages likely to accrue from the purposed change.

JAPANESE WEIGHTS, MEASURES, AND CURRENCY.

A BLUE-BOOK just issued contains a most interesting report by Mr. SIDNEY LOCOCK, Her Majesty's Secretary of Legation in Japan, on the weights, measures, and currency of that country. The first two subjects are briefly dealt with, a good deal of valuable information being condensed into a very small space; but on the currency question Mr. LOCOCK dwells at much greater length, and it is this portion of his report which contains the most striking features of general interest. Mr. LOCOCK commences by describing the curious manner in which two distinct methods of computation are combined by the Japanese; the decimal system being almost universally adopted as regards weights and measures, while in the coinage the standard silver coins are halved and quartered, and the copper ones doubled and redoubled, very much after our own fashion. To assimilate the latter system to the former, and so (it is presumed) to simplify it, the number 96 is in certain cases allowed to pass as the square of 10, an expedient which seems to us more likely to make "confusion worse confounded." And as an additional instance of the difficulties surrounding the subject of his investigation, Mr. LOCOCK tells us that between two of the specimens of the Japanese unit of weight supplied to him by the Government, and purporting to be accurate, there was a difference of exactly one-third of a grain troy! The table of weights used in Japan is a compound of the Chinese monetary and commercial weights, the smaller weights being borrowed from the former and the larger from the latter. It has been possible to effect this combination without confusion, in consequence of there being in the two Chinese scales a weight common to both, namely, the liang or tael, equal to 10 Japanese me or momme. We cannot leave this part of the subject without quoting a paragraph on the curious system of estimating the revenue of a Daimio in kokus of rice—the "koku" being a measure of capacity equivalent to nearly five bushels.

The revenues of the great Princes or Daimios of Japan, even though partially paid in money, are measured in kokus of rice. Thus the revenue of the Prince of Satsuma is computed at 760,800 kokus, and that of the Prince of Mito at 350,000 kokus. Titsingh (A.D. 1780) represents the koku of rice to correspond in value to the gold coin called a kobang, the value of which was 18s. 4½d. Caron, who lived in the previous century, gives as the current value 10 guilders, or 16s. 8d. Sir Rutherford Alcock valued the koku at 13s. 10d. Rice has since then risen so much in price that a koku is now valued at 9 rio or £2 11s. The total annual revenues of all the great landed proprietors of Japan were, according to Caron, computed to amount about the middle of the seventeenth century to 28,345,000 kokus, or about 4,500,000 tons. The official returns on which this calculation was based are, however, little to be relied on; they were drawn up in the beginning of the seventeenth century, and have been but occasionally altered since. Even when first prepared they were often far from correct, for where the rent was paid in coin the koku was frequently reckoned at an absurdly low figure, in order to swell the apparent revenue of the proprietor. The temptation to such over valuation is apparent when it is remembered that in Japan revenue confers rank and its corresponding privileges. One of the highest rights of the Japanese noble, that of personal audience of his Sovereign, depends on his having the required income; only Daimios, possessing a revenue of not less than 100,000 kokus of rice are admitted to the Mikado's presence; the Emperor cannot countenance poverty. The koku is further employed in the measurement of vessels, the calculation of crops, the assessment of taxes, and the imposition of fines.

It thus appears that, taking the present high value of the koku as a basis for calculation, the annual revenue of the Prince of SATSUMA would be equivalent to nearly two millions sterling, while that of the Prince of MITO would be about £892,000 of our money—right princely incomes both of them.

Turning to the more important subject of the currency, we find that Mr. LOCOCK commences by observing that it has from the earliest times been at the mercy of such accidents as the discovery of new mines of gold, silver, or copper, the admission or exclusion of foreign merchants, and the operations of foreign trade. These circumstances, added to the fact that the seclusion of the country rendered the relative values of the precious metals dependent on the productiveness of her own mines, have given rise to so many violent fluctuations, and so many arbitrary expedients to counteract their effects, that the currency presents a mixture of anomalies not easy either to describe or to understand. We will not attempt to follow Mr. LOCOCK in his sketch of these vicissitudes, from the days of MARCO POLO down to the visit of Commodore PERRY in 1853, but their complexity will be evident from the fact that a native treatise published at Yedo in 1822 contains descriptions and illustrations of no less than 550 different coins, showing that Japan has had as extensive a numismatology as most countries. In 1858, when the American treaty was made, the currency was in a very disordered state, owing to the over-valuation of silver as compared with gold or copper; and the bou, or "ichibou," as it is generally termed,—

Was a coin which obtained circulation, not in accordance with anything approaching the worth of the metal it contained, but at a rate more than three times that value. A person purchasing manufactured articles of silver was expected to pay less than half their weight in ichibous. Gold bullion or coins might be purchased, it was said, for three and a half times their weight in silver coins. The ichibou was in every sense a *token* coin.

The recognition of this last fact by Mr. HARRIS might have saved much of the trouble that subsequently arose out of the "currency question;" but persistently ignoring the evident fact that the bou was a token coin, and nothing more, he insisted on the dollar being admitted on the same footing, and the following clause was inserted into his treaty and copied into all the others:—

All foreign coin shall be current in Japan and pass for its corresponding weight of Japanese coin of the same description. Americans and Japanese may freely use foreign or Japanese coin in making payments to each other. As some time will elapse before the Japanese will be acquainted with the value of foreign coin, the Japanese Government will, for the period of one year after the opening of each harbour, furnish the Americans with Japanese coins in exchange for theirs, equal weights being given and no discount taken for re-coinage. Coins of all descriptions (with the exception of Japanese copper coin) may be exported from Japan, and foreign gold and silver uncoined.

Thus originated the "weight for weight" exchange system; a system we have emphatically condemned from the first, whether as granted to merchants, or officials, or both. The working of it is thus described in the report before us:—

The wholesale spoliation of the Government by foreigners was the inevitable result of such terms of barter, which were copied nearly textually into the treaty of every other nation which obtained access to the country. The process was so simple and so easy. The merchant took his 100 dollars to the Custom-house, and obtained for them token coins, weight for weight, *i.e.*, 311 ichibous; with this money he went into the market and bought gold kobangs to the value of between two and three times the intrinsic value of his dollars; he had only to send these kobangs to Shanghai and convert them back into dollars there, to recommence the operation. The gain to the foreigner and the loss to the Japanese was between 100 and 200 per cent.

The abuse carried its cure with it. The kobangs came to an end, or rather the silver token coins, of which from the very fact of their being tokens the supply was very limited, because exhausted. It was useless for foreigners to appear with their stupendous demands for ichibous, and point to the monetary article of their treaties; there were no bous to be had, or, at least, not a millionth part of what would have satisfied their demands. To have carried out such a stipulation for the space of one year, on such terms, would in any country in the world have been an impossibility.

Of course various stratagems were tried by the Japanese to escape from their bad bargain. First, in defiance of the Treaties, they prohibited the sale and export of gold coins. This failing, they issued a new silver coin called a half-ichibou, containing more silver then the old ichibou, and attempted to force this into circulation, still retaining the gold kobang at its former valuation. Being obliged to relinquish this plan, the nominal value of the kobang itself was raised from 4 to 13½ ichibous; and, finally, a new kobang was coined less than a third the value of the old one.

The expiry of the time during which the "weight for weight" exchange was granted caused an immediate heavy fall in the value of the dollar, which, from being worth over 300, declined

Digitized by Google

to 200 ichibous, and for years never rose above 250. Mr. LOCOCK says :—

It has been somewhat the custom to lay this depreciation of foreign coin at the door of the Japanese Government, and to assert that they placed impediments in the way of its free circulation. But this is an accusation which was never proved on the one side, and always denied on the other. It is, moreover, a fact that edicts were promulgated declaring the dollar current weight for weight, while the method was also tried of giving it freer circulation by stamping it with a Government stamp declaring its value to be 3 ichibous.

Certainly, the accusation was unblushingly denied by the Japanese ; but with due deference to Mr. LOCOCK, its truth has been positively and distinctly proven. Mr. LOCOCK himself says that "Government effected large purchases at this low rate for the use of their Mint ;" but he does not seem inclined to admit that in order to keep dollars at the said conveniently low rate, they *did* place every possible impediment in the way of their free circulation. It is well known that the Mexican dollars circulating in China and Japan are the product of several Mints, the various mintages being distinguishable one from another by slight marks, or differences in the superscription ; and for a long period the Japanese Government consented to receive from the native bankers only one or two of these, rejecting all the rest as spurious. At one time more than half the dollars sent from China to Japan for the purchase of produce were of a certain mintage, the distinguishing mark of which consisted of three small dots near the edge. These, called by the Japanese *mitsbosh* dollars, were *all* thus rejected or taken only at a heavy discount, although of full weight and equal purity with any others. What more effectual method could have been devised for impeding the circulation of the dollar and depreciating its value ? Their motive for wishing to do so will be sufficiently obvious, even to those not conversant with the details of the subject. While exchange was at its lowest point, the Treasury could buy one hundred dollars for two hundred ichibous. These dollars they would at once coin into *three* hundred ichibous, for which they could then purchase one hundred and fifty dollars, thus making a clear profit of fifty per cent. on each minting —a very handsome seigniorage.

As for the Edicts alluded to, they were never intended to be enforced, and were, in fact, a dead letter from the first, as all persons know who were then in Japan. We must acknowledge however that this state of things, discouraging and unpleasant as it was at the time, may have subsequently exercised a salutary influence on the import trade, which has certainly been steadily increasing ever since. This is what the report says :—

Nor was the low rate of exchange without its good effect upon trade. The operations of foreign merchants had at first been devoted too exclusively to deriving immediate advantages from a highly remunerative export trade, and they had given but little attention to forming a market for the manufactures of Europe. But with a large amount of dollars floating in the market at a discount, it soon became evident that the loss on them which had been suffered in purchasing silk from the native might be recovered by taking them back at the same rate in exchange for cotton. A rapidly increasing import trade was the result, and the result of this again was a rise in the exchange, until on one occasion the 100 dollars rose to 316 bous, or even more than their intrinsic value.

We now come to the much-debated subject of the exchange granted by the Japanese Government to the different foreign services. The "weight-for-weight" exchange issued to all alike during the first year, was discontinued after its expiry, *except* to the diplomatic, naval, and military officers of the several Treaty Powers, who were still allowed the benefit of it. The distinction was an invidious one, and as a matter of course led to serious abuse. We have already had occasion to dilate at considerable length on this exceedingly unpleasant subject, and need not here recapitulate the disclosures—some of them of a disgraceful character—that have appeared in these columns, without eliciting either denial or attempt at justification. Mr. LOCOCK himself evidently thinks that the less said on this subject the better :—

Only a few words need here be said on the exchange granted by the Japanese Government to the different foreign services. The use or the abuse of this privilege is now, and is likely to remain, a thing of the past. For several months the rate of exchange in the market has been as often above as below the rate at which the Japanese Government allow officials to convert their pay into ichibous at the Custom-house; and the English Diplomatic Service at all events has ceased to avail itself of it. But it should be observed—for it is a point which has been strangely overlooked in discussions on this subject—that whereas the foreign services in Japan have never been allowed more than 298 ichibous for their 100 dollars, the Government thus deducting over 4 per cent. for the cost of coinage, foreign merchants in Japan have from the first obliged, and still continue to this day to oblige, the Government to receive duties (which are levied in ichibous) at the still more advantageous rate of 311 bous to the 100 dollars. leaving thus no margin whatever to pay for recoinage.

The *tu quoque* argument is inapplicable here. The mode of paying duties is provided for in a distinctly separate article of the Treaty, and has nothing whatever to do with the subject under discussion. The duty imposed by the tariff on most articles was an *ad valorem* one of 5 per cent., payable in dollars at a fixed rate, it being understood from the first that the said duties, though nominally 5 per cent., were in reality thus reduced to somewhat less. Importers and exporters have never calculated on the imposition of an actual 5 per cent. duty, and the only alteration that could reasonably be made in the system would be the substitution of an actual 4 per cent. duty, payable in native coin, or in dollars at their market value, for a nominal 5 per cent. duty. It is unfortunate that the Treaty, as it stands, provides for a similar system of exchange for a period of one year after the opening of every new port, so that, as Mr. LOCOCK points out, the Japanese Government

Will then be bound during the whole of the year 1868 to supply ichibous at those ports (Yedo, Osaka, and Hiogo) weight for weight against dollars.

But not, we presume, to an unlimited extent. When the old treaty ports were first opened it was at Yokohama only that the right to demand "weight for weight" exchange was conceded without any nominal limitation (though practically it was limited by the producing power of the Mint). At Naga-aki a specified sum of one thousand dollars per month was allowed to be exchanged by each Consulate, while the non-official residents were restricted to three dollars per day each, with an additional dollar for every native servant they employed ; and on this, or some similar footing, the new ports will probably be placed. In arranging the terms of the Convention of June, 1866, this difficulty was not lost sight of, and in one of its Articles the Japanese Government expresses its willingness to solve the problem by so enlarging the Mint as to admit of their exchanging for native coin any quantity of bullion or foreign coin that may be presented for that purpose, less only the cost of coinage. Mr. LOCOCK tells us that,—

In accordance with this Article arrangements have already been made for obtaining from France the machinery required in a mint on a European model. Immediately on its receipt, and on the arrival of persons fitted for the undertaking, a new Mint will be erected at Yedo, and coins at once struck. It is understood that a new silver coin will be issued equal to four ichibous ; its shape will be circular, and it will replace the gold rio or kobang, which has already almost disappeared. The immense superiority in every way of the coins struck by the new Mint will be so apparent that it will probably not be long before the rectangular ichibous will be replaced by others of a circular form.

In view of the complete revolution in monetary matters thus foreshadowed, a description of the Mint as it at present exists, and of the mode in which its operations are conducted, cannot fail to be interesting.

Reference has been made more than once in this report to the Government Mint. It consists of three establishments situated in different parts of Yedo, there being one for each metal. The gold mint has recently been destroyed by fire, but a description of the silver mint, the only one yet visited by foreigners, may not prove uninteresting. The building, which consists of an agglomeration of wooden sheds of the poorest description, is situated in a narrow street in the mercantile portion of the capital. The eye is attracted on entering by groups of men squatting on the ground, occupied in weighing, hammering, cutting, sorting, and packing. A few officers circulate from shed to shed preserving order and issuing directions. The process of minting an ichibou is thus conducted. A lump of silver of the necessary fineness, obtained either from the Government mines or by melting down Mexican dollars, is placed in an iron ladle and reduced to a molten state by means of a charcoal fire and a pair of blacksmith's bellows. It is next poured into a mould, from which it is taken out in the shape of thin rectangular bars, which are immediately thrown into a tub of cold water. On being taken out they are handed to a man seated on the ground, who with a pair of large fixed scissors shears off all jagged pieces adhering to the angles. They are still further improved by hammering. They are now handed to another man who, holding a balance in his left hand and weighing them one by one, divides them into different parcels according to their weight. Another man then takes a bundle at a time and cuts off from one end of each bar what he estimates will reduce it to its proper weight, which is 19 momme. Of this weight 6 fung are allowed for waste in the subsequent processes, leaving a net weight of 18·4 momme to the bar.

The next process is that of dividing the bar into eight equal portions of the size of ichibous. This is effected by a fixed pair of shears. The workman takes a bar, cuts it as nearly in half as his practised eye will enable him to do ; he then divides the halves into quarters and these again into eighths. The weighing here re-commences and tests the skill of the cutter. the pieces being separated into different groups according to their weights, and those which are too light being rejected. The scissors are again in requisition to reduce the heavy ones to their proper weight, after which the light ones are again weighed and weeded out. They are now heated white hot in a charcoal fire, plunged into water, boiled and washed in a kind of brine, from which they come out with a moderately bright surface. They are next very slightly milled on the two sides, and more deeply on the edges, by means of a milled hammer. They are now ready for stamping, which is performed in the following manner. A man places with his left hand one of the pieces on a stationary die, while with his right he places on the top the other die, which is movable. A second man sitting on a stool is armed with a huge hammer, gives one blow on the upper die, and the coin is struck. The blows are dealt in rapid succession, and the whole scene reminds one of a blacksmith's shop. The coins

Digitized by Google

are now passed on to another man, who arranges them in little frames in such a manner that they are standing about a hundred together on their edges. Boys are now employed to punch small stars on the edges by means of chisels and hammers. The coins are now weighed one by one for the last time, and the light ones rejected. They are not yet, however, current coins of the realm, the Imperial stamp being wanting. This is added to each by means of another stamped chisel and mallet, and the coins are complete. They are, lastly, rolled up in paper packets of a hundred, each packet is weighed and marked with a seal, which serves as a guarantee of its contents, and gives it currency as 100 ichibous.

Though every operation is performed in so primitive a manner, perfect order prevails in the establishment; every man goes through his portion of the work in silence, and with the regularity of clockwork, and many evince considerable skill. There are about 300 hands employed in the building. When the men enter in the morning they are made to divest themselves of their own clothes and put on others belonging to the Mint. At the end of the day's work a gong sounds, when the somewhat curious spectacle is presented of 300 men springing from the ground on which they had been seated, throwing off their clothes, and rushing, a naked throng, to one end of a yard. Here they pass through the following ordeal in order to prove they have no silver on them; their back hair is pulled down and examined, they wash their hands and hold them up to view, they drink water and then hollos, and, lastly, they run to the other end of the yard clearing two or three hurdles on their way; after which performance they are allowed to put on their own clothes and depart. The Japanese silver mint has been only twice, it is believed, entered by foreigners; the apparent absence of all restrictions with regard to touching and handling the coins would point to the probability that it is not often open to the public, but, even if it were, the manners and customs of the country are not such as would preclude a mixed assemblage of visitors from going over it and remaining to the end.

The quantity of silver at present being coined daily is 50,000 momme which, at the rate of 2·3 momme to the ichibou, gives a daily total issue of over 21,000 bous, or about £1,500 sterling. The whole of these are produced by the simplest manual labour, unaided by a single piece of machinery.

With this extract we must conclude our somewhat lengthy notice of Mr. LOCOCK'S valuable report, first, however, recording our suspicion that in the last sentence of the penultimate paragraph thereof, the word "not" has slipped in accidentally—our own private opinion being that the manners and customs of the lower orders of Japanese decidedly *are* such as would preclude a mixed assemblage of European visitors from witnessing the proceedings from beginning to end—that is, with any degree of comfort to themselves.

Literature.

—o—

Sketches of Japanese Manners and Customs. By Lieut. J. M. W. SILVER, Royal Marines. Illustrated by fac-similes of Native Drawings. London: Day and Son (Limited).—The publishers of this work long since made the application of chromo-lithography to the illustration of books a *specialite* of their own. At the present time they are still unrivalled in this branch of art, their pre-eminence being indisputably established by such productions as the "Victoria Psalter," the "Illuminated Missals of the Middle Ages," and the "Grammar of Ornament." Besides these and other magnificent and necessarily costly volumes belonging to the region of high art, Messrs. Day and Son have from time to time produced numerous ornamental, scientific and descriptive works, in most of which the beautiful art of chromo-lithography has been made available; and the volume before us exhibits yet another successful application of it in the production of exact fac-similes of Japanese paintings. The idea of illustrating the "manners and customs" of Japan by native delineations thereof was undoubtedly a happy one, and these delineations are reproduced by Messrs. Day and Son in the most perfect manner. As usual in Japanese drawings, the perspective is generally doubtful, the figure-drawing defective, and the colour dazzling; yet with all these defects the series selected by Lieut. Silver (twenty-six in number) conveys, with the aid of his concise descriptive chapters, a really admirable notion of Japanese life and character. Besides the chromo-lithographs, the text is further illustrated with numerous fac-similes of Japanese woodcuts, most of which are exceedingly interesting, while some give evidence of a fine sense of humour. The work is written throughout in a pleasant unaffected style, as a few extracts will show, the first we select being a graphic account of a Japanese fire brigade on duty:—

A Japanese "shecase," or fire brigade, passing silently along the streets, lighted by its weird red-and-black distinguishing lanterns, is a strange sight. Some of its members wear armour, with helmets and black-lacquered iron visors, and carry "martoe," or "fire charms," and various necessary implements; others are clad in head-and-shoulder pieces and gauntlets of light chain armour, to protect them while pulling down and unroofing houses, which is their special duty. All have a regular fire costume, from the "oki Yaconin," or "head man," to the bare-legged coolie, who carries the badge of the brigade in large red characters on his back. On arriving at a fire a *point de tete* is selected, generally a house, on the roof of which the fire-charms are immediately fixed, as if to forbid its further advance. These charms (the circular white objects with black mouldings) have, of course, as little effect on one element as Canute's celebrated command had on another; but the people put such faith in their virtue that their presence is a powerful auxiliary in proscribing the limits of fires, which are rarely allowed to pass the bounds marked out by them. The firemen fight with the flames as they close on the charms like men determined to stand by their colours to the last, rushing into the burning houses, pulling them down, and drenching the blazing thatch with great courage and endurance. When, by thus putting their shoulder to the wheel, the fire is fairly subdued, they turn round and point exultingly to the martoes as the Hercules that has procured the result. On one occasion, at a fire in the village of Omura, adjoining Yokohama, the charms and their supporters were actually licked by the flames from the house opposite to that on which they were fixed, whose thatched roof was pulled off while in a state of rampant ignition by fire-coolies, who with bare hands, and no other protection than their saturated clothing, fought with the actual fire. One plucky fellow fell through the roof while thus employed, and, as the spectators still shuddered at his anticipated fate, rushed out apparently uninjured, and, re-ascending, resumed his fiery task with unabated vigour. Although the fire-charms were triumphant on this occasion, they did not escape unscorched, and several engines had to be kept in constant play upon them and their supporters, to prevent the one from ignition, and the other from being baked in their armour like crabs in their shells.

As an illustration of the spirit which characterises British merchants in their intercourse with the Japanese it may be mentioned that a liberal subscription was promptly got up for the re-establishment of these burnt-out villages; but, although the Japanese Government seemed thoroughly to appreciate the kindly spirit in which it was offered, national pride came in the way of its acceptance, and the people were only induced to waive their objection on its being urgently pressed upon them that the fire which destroyed the Foreigners' Club was the cause of the calamity.

The tone of the last paragraph, we are glad to say, does no more than justice to the spirit that characterises our countrymen in Japan, while it quite correctly accounts for the reluctance of the Government to accept aid from external sources. We remember a very similar case several years since, when the village of Mogi, near Nagasaki, was entirely destroyed by fire. In this instance the cause of the calamity could in no way be traced to a foreign source, yet the merchants of Nagasaki on hearing of the sufferings of the burnt-out villagers subscribed a handsome sum for their relief. The Governor, however, declined to allow it to be expended in the manner proposed, on the ground that a paternal Government, like that of Japan, provided for all the wants of its subjects. The next chapter we quote from is devoted to the system of government, the Sovereign and his functions, &c. It gives the following interesting particulars regarding the "inner life" of the thrice sacred Mikado, whose dreams of perpetual peace and seclusion must, we fear, have been somewhat rudely dispelled by recent events.

The spiritual Emperor of Japan is supposed to be a direct descendant of the gods, and as such enjoys the adoration as well as the fealty of his subjects. Unfortunately his divine attributes deprive him of the free exercise of his human functions, as his feet are never permitted to touch the ground out of doors; nor is he allowed to cut his hair, beard, or nails, or to expose himself to the rays of the sun, which would detract from the excellency of his person. His principal titles are, 'Zen Zi'—"Son of Heaven;" "Mikado"—"Emperor;" and "Dairi," or "Kanrai"—"Grand Interior;" the latter denoting the perpetual seclusion of his person. It is said that his ancestry can be traced in an unbroken line for nearly 700 years before the Christian era. The Mikado never goes beyond the precincts of the Imperial residence, which occupies a large portion of the city of Miako, comprising numerous palaces and gardens; and connected with it are the schools alluded to in the last chapter, which are established on the plan of a university, and are much resorted to by the children of the nobility. Whenever this great personage wishes to take an airing, he is carried by fourteen men in a large norimon with laticed windows, through which he is able to see without being seen; and even when granting an audience he is said to be concealed from view by bamboo screen-work. His court consists of the members of his own family, and certain great officers of State appointed by the Tycoon, who nominally receive and promulgate his commands; but, in ordinary times, he has no real power in the temporal affairs of the empire, and only refuses to confer legality on the acts of his lieutenants under the pressure of intrigue or undue family influence. To relieve the wearisome monotony of his life, as well as to prevent the possibility of the sacred race becoming extinct, he is allowed twelve wives, who are chosen from the most beautiful daughters of the chief princes of the empire. These ladies occupy separate palaces in the immediate vicinity of his, where they are attended by their own retainers; but only one of them enjoys the rank of empress, although they are all treated with the deference due to royalty. He is also said to have an unlimited number of concubines, who reside within the bounds of the Imperial establishment. The destinctive mark of the members of the Mikado's court and of the ladies of his family consists of two black patches placed on the forehead, and in the arrangement of the hair, which is gathered up in a long cue and curved over the head by one sex, and worn dishevelled and without any kind or ornament by the other. Though the Mikado has little influence in the secular affairs of the State, his authority in religious questions is supreme; but it is doubtful if he personally takes any part in the solemnities which are constantly occurring at Miako.

No work on Japan would be complete without an account of the curious custom of Hara Kiru, or self-immolation, which seems to combine a semi-barbaric fanaticism with a more than chivalrous sense of honour. The subject is well illustrated

Digitized by Google

here by a series of five drawings, respectively entitled— "The Tycoon's Messengers Reading the Sentence"—"Preparing for the Sacrifice"—"The Daimio's Funeral"—"Cremation of the Body"—and "Relatives Collecting the Ashes." The theory of this extraordinary custom, with the mode of accomplishing it, are thus correctly described by Lieutenant Silver :—

The Japanese, being a high-spirited and patriotic people, consider that death under any circumstances is preferable to dishonour; and the privileged classes always carry about with them when they travel the paraphernalia used at the performance of the "Hara Kiru," in token of their readiness to prove their patriotism, or to die rather than disgrace their family. The dress consists of a robe and "harakama," or "winged official dress," of coarse white cloth—white being the funeral colour of the country—which is undistinguished by the crest or any sigh of the owner. There is also the disembowelling knife, the blade of which is about eight inches long, and very sharp. When the sentence of the "Hara Kiru" is awarded, or the humble request of a defeated politician to perform it is acceded to, a formal document is made out and duly signed by the competent authorities. It is then delivered to two commissioners, by whom it is conveyed to the culprit. Should the proposed victim be a Daimio of importance, and sufficiently powerful to set the Tycoon at defiance, the delivery of the imperial mandate is likely to be attended with unpleasant results, as the bearers are sometimes waylaid and murdered by retainers of the doomed prince, and have frequently to resort to stratagem to accomplish their task. But when once the mandate is delivered the prince must submit, or he would lose caste even with his own followers, so strongly are the Japanese imbued with respect for the ancient customs of their country. The accompanying illustrations represent the different formalities that are observed at the performance of the "Hara Kiru" by a Daimio. On receiving the official intimation of his sentence he orders the necessary preparation to be made, and informs his friends and relatives of it, inviting them to share in a parting carouse with him. On the appointed day, after taking a private farewell of his family, he receives his friends. He is habited in his white robes, and supported by two of his relatives or Ministers similarly attired. When the time arrives (which is previously arranged with the commissioners) he takes leave of his guests, as on any ordinary occasion, and enters the screened enclosure accompanied by his supporters. It will be noticed that the retainers guarding the exterior and entrance are barefooted, which is a mark of respect in honour of the rank of the culprit, and of the solemnity of the occasion. The Tycoon's messengers then read the Imperial mandate, which proclaims that, in accordance with the ancient custom of the country, the Daimio is permitted honourably to sacrifice himself for its benefit, and thus to expatiate in his own person the crime or offence he has committed against the welfare of the State. In the illustration, the two officials charged with this disagreeable office are sitting opposite the Daimio and his friends, reading the fatal document, their suite surrounding them in respectful attitudes. The whole party wear the official dress, which intimates at once the respect due to the victim, and the official nature of the ceremony. The second scene shows the Daimo on the point of performing the sacrificial ceremony. His forelock is reversed, as a sign of submission to his fate, and to assist the executioner, who, as soon as his master goes through the form of disembowelling himself with the knife on the stand, will, with one blow of his razor-edged sword, complete the sacrifice by decapitation. Only the two chief commissioners appointed by the Tycoon, and the sorely-tasked supporters of the victim, remain to witness the last act of the drama. The rest of the party await its completion in the adjoining compartment of the enclosure, which is expressly constructed for that purpose.

We are strongly tempted to make further extracts, but our space will admit of no more. In taking leave of Lieutenant Silver's pleasant book we must however record our satisfaction that he has not fallen into the error, so common among superficial observers, of decrying all that they are incapable of understanding. Of the "Manners and Customs" here described, some are grotesque and ridiculous, others incomprehensible, and some even revolting, according to our notions; but we are glad to see that our author does not allow these facts to blind him to the many estimable and sterling qualities that the Japanese, as a race, undoubtedly possess; qualities which, as they become better known, will increase our sympathy with the people and our interest in their beautiful country.

China: A Brief Account of the Country, its Inhabitants, and their Institutions. By SAMUEL MOSSMAN. London: Society for Promoting Christian Knowledge.—Books on China and the Chinese are now plentiful as blackberries. There are historical works, ponderous and diffuse; theoretical works, speculative and bewildering; argumentative works, showing beyond possibility of dispute the superiority of the Imperialists over the Taipings, or *vice versa*, according to the sympathies of rival authors; missionary books, good, but often tedious and wanting in practical utility; and lively books, in which the narrative of a few months' cruise in China waters is swelled to the portly dimensions of a "book of travels" by desultory notes on habits and customs, scraps of history, descriptions of scenery, and quotations from old writers *apropos* of nothing particular. Each of these perhaps supplies a want, and all are doubtless valuable in their way; but we do not know of one, taken singly, that has hitherto fulfilled the desideratum of a thoroughly practical account of China in a popular style and handy form. This want is undoubtedly supplied by the work before us. Mr. Mossman tells us at the outset that he has nothing to say regarding the outlying dependencies and tributary States of the vast Empire; he confines himself strictly to a concise account of China proper, as it exists under the direct rule of the Government. He commences with a chapter on "Geography and Population," conveying much information descriptive and statistical. This is followed by a summary of the "Ancient and Modern History" of the Empire, carefully brought down to the present time; special attention being devoted to the reign of Hienfung, notable for so many events of importance to ourselves. Then comes a very interesting chapter on "Early Foreign Intercourse," and another on "British Intercourse." The "Taiping Rebellion," with its desolating effects, forms the subject of the next chapter, and is dwelt on in fitting terms of reprobation; it is hardly necessary to say that the blasphemous assumption of a "divine mission" by the Taipings is not regarded by Mr. Mossman as an extenuating circumstance in their favour. The next two chapters, respectively entitled "The Chief Cities, Treaty Ports, and Commerce," and "Industrial Pursuits and Manufactures," embody a correct and circumstantial account of our trade with the country as it is now carried on, together with much valuable information on its natural productions, mineral wealth, &c. The remaining chapters are devoted to Chinese arts and sciences, the social and moral condition of the people, their language, literature, politics, and religion; all these being described in a systematic, graphic, and intelligible manner that cannot fail to render the volume highly popular with a large class of readers.

The following is a list of the principal new works and new editions published during the month:—

In History and Biography we have—*Philosophy, Theology, and Piety in the Age and Art of Rafael*, by Mr. William Watkins Lloyd; Mr. W. J. Thoms writes *The Stories of Hannah Lightfoot, Queen Charlotte, and the Chevalier d'Eon, Dr. Wilmot's Polish Princess*; the first volume of the *History of India from the Earlist Ages* is issued by Mr. J. Talboys Wheeler, containing an account of the Vedic period and the Mahá Bhárata; Miss Maria Webb gives us *A History of the Penns and Penningtons of the 17th Century*, illustrated by original family letters, with incidental notices of their friend Thomas Ellwood, and some of his unpublished verses; *The Calendar of State Papers relating to Ireland, of the Reign of Elizabeth*, 1574-1585, is edited by H. C. Hamilton; and Mr. J. Thompson has written an essay on *English Municipal History*.

In Geography and Travel Mr. Bayard Taylor gives us *The Narrative of a Summer Trip in Colorado*.

In Fiction Mrs. J. H. Riddell, better known as the authoress of "George Geith," gives us *Far above Rubies*, in 3 vols. (which has the advantage in an art point of view of not having been written for piecemeal publication in a periodical); Mr. Thomas Sutton writes a *Romance in a Yacht*, in 1 vol.; Miss Annie Thomas issues *Called to Account*, 3 vols.; and *Irene's Repentance* is the title of a novel by Christian Eyre, in 3 vols.; while *May and September* is a novel in 3 vols. by F. Walpole. In Educational Literature we have *Synonyms and Antonyms Collected and Contrasted*, by the Venerable C. J. Smith.

Among New Editions we ought to notice the new edition of Mr. Dickens's "Pickwick," the first of a new series of popular editions of his works, which is unexceptionable in print, paper, and illustrations, and marvellously cheap.

During the month of August a new sixpenny monthly periodical will be started under the title of *The Broadway: London and New York*, the object of which is to provide an international magazine of light and amusing literature. In order the more fully to carry out this design, arrangements are, we understand, being made with the best American authors to contribute original articles to the pages of the new comer, which numbers among its contributors on this side of the Atlantic the following well-known names:—The Rev. J. M. Bellew, Robert Buchanan, F. C. Burnand, H. J. Byron, Amelia B. Edwards, John Hollingshead, Tom Hood, Charles Knight, Samuel Lover, John Oxenford, Percy Fitzgerald, Ernest Griset, T. W. Robertson, Hesba Stretton, Mrs. Riddell, W. H. Russell, of *The Times*, G. A. Sala, Arthur Sketchley, Moy Thomas, Edmund Yates, and others. *The Broadway* will contain eighty pages, illustrated by some of our best artists, and will open with an original novel by the author of "Guy Livingstone."

BRITISH TROOPS IN JAPAN.

The good feeling manifested by the natives towards the British troops stationed in Japan is evidenced in the following despatch from Sir Harry Parkes to Lord Stanley, and the enclosure from Colonel Knox:—

"Yedo, December 31, 1866.

"My Lord,—Since I reported to your lordship in my despatch of the 31st October last that I had called upon the Japanese Government to repair the huts which form the camp of Her Majesty's troops stationed in Japan, and that this demand had been promptly complied with, I had the honour to receive your lordship's despatch of the 26th September, covering correspondence on this subject with the War-office, and directing me to follow a similar course to that which had already been adopted.

"The willingness of the Japanese Government to undertake this work at their own cost convinced me, as I observed in the former despatch, that they do not entertain any wish to see Her Majesty's troops immediately removed from this country. This impression is further confirmed by the punctuality they have observed in the execution of the work, as shown by the enclosed letter to me from Colonel Knox, the commandant, in which he reports the satisfactory completion of all the repairs within the time agreed to for the purpose.

Digitized by Google

"The Japanese authorities have also proved themselves to be liberally disposed in this matter by providing some additional accommodation for servants' offices, and by reimbursing Her Majesty's 9th Regiment for an expense they had previously incurred in providing a canteen and recreation-room for the men.

"I presume the huts may now be considered to be sound as when they were first constructed under our own direction, and provided that is the case, I trust that these arrangements, which appear to give satisfaction to the military authorities on the spot, will be approved by your Lordship and the War-office.—I have, &c. (Signed) "HARRY S. PARKES."

Colonel KNOX to Sir H. PARKES.

"Camp, Yokohama, December 24, 1866.

"Sir,—The Japanese authorities having now punctually performed the service of repairing the huts in this camp, I have great pleasure in reporting to your Excellency the satisfactory and complete manner in which the work has been performed, though, owing to the long drought, I am at present unable to report that the huts are waterproof.

"The native officers employed in these repairs have been most civil and accommodating, especially a young man, name unknown, who speaks English fluently.

"Though many coolies and workmen have been employed about the camp, I have not heard of a single act of robbery or pilfering.

"I request you will be be good enough to convey to the Governor of Yokohama my best thanks for the manner in which this service has been performed.—I have, &c. (Signed) "THOS. E. KNOX."

Naval and Military.

On the 18th instant General Sir John Burgoyne, G.C.B., Inspector-General of Royal Engineers and Fortifications, made his annual inspection of the Royal Engineers at Chatham. The whole of the morning was devoted by Sir John Burgoyne to the inspection of the various scientific departments at the Royal Engineer establishment, the field works, magazines, batteries, and other undertakings connected with sapping and mining, the pontooning in the harbour, and also some interesting experiments demonstrating the method by which vessels of war, or other hostile ships, can be easily destroyed by submarine torpedo explosions when attempting to enter a harbour or river in the hands of the enemy. In the experiments made some time since at Chatham, under the direction of Mr. Beardsley, the torpedoes were fired by percussion, and possessed the fatal defect of being equally destructive to both friendly and hostile ships. The torpedo experimented upon by the Royal Engineers is fired by means of the voltaic battery, and consequently its destructive powers are controlled from the shore. The explosion is unerringly made at the right moment. The torpedoes being completely submerged with nothing to indicate their position, the exact spot in the harbour where each lies concealed is ascertained, with mathematical accuracy, by means of bearings and cross-angles taken from various positions, the result being that, although the passage of a harbour may be thickly studded with any number of torpedoes, friendly vessels would proceed in and out with safety, while the moment a hostile ship attempted the entrance the torpedoes would be fired with fatal exactitude. Instead of laying the torpedoes down in the harbour the experiments made were carried out in the field works with results in all respects similar to those which would have taken place in the harbour. About a dozen charges, representing as many torpedoes, were laid in different parts of the field works, each charge being connected with the voltaic batteries by concealed wires. A number of men were then selected and ordered in various directions over the works, each man for the occasion supposed to represent a vessel. Observations during this time were being taken, and the instant a man approached and was over what was supposed to be a torpedo the fuse was fired, care, of course, being taken that the explosion should prove harmless. In this manner the whole of the charges were fired, while in every instance they were exploded with unerring exactness at the instant the man's foot was on that part of the ground beneath which the charged fuse was concealed. There was but one opinion expressed by General Sir John Burgoyne and the officers who witnessed the experiments, that with a powerful agency of this kind in our hands the defences of our naval ports and harbours would be effectually provided for, irrespective of granite and armour-plated batteries.

The Euphrates, new troopship, Captain Montague B. Dunn, has left Spithead for the Indian troop service. The following officers took passage in her to join their respective regiments in India:—Captain Dumbleton and Lieutenant Coghlan, 21st Hussars; Captain Kirkland, 106th Foot; Lieutenant Gregson, 26th Regiment; Lieutenant Faulkner, 95th Regiment; Lieutenant Bancraft, 1st Battalion 5th Regiment; Captain Goren, 1st Battalion 19th Regiment; Ensigns Welch, Lloyd, and Greenaway, 108th Regiment; Ensign Yule, 74th Regiment; Ensign Tower, 95th Regiment; Ensign Rind, 102nd Regiment; Ensign Roden, 1st Battalion 19th Regiment; Ensign Mayne, 49th Regiment; Ensign Fair, 1st Battalion 4th Regiment; Staff Assistant-Surgeon Longheed; Quartermaster Robinson, 18th Brigade Royal Artillery, and lady.

On the 24th inst., being the anniversary of Her Majesty's accession, a royal salute was fired at noon from the Spur battery, Chatham, Tilbury Fort, and the battery at Sheerness. The guardships, and the whole of the other vessels of war in harbour, "dressed" and were decorated with colours. The ships in Portsmouth harbour and Victoria, at Spithead, were also dressed, and the royal standard was hoisted at the different batteries on shore, as well as the Government establishments. At noon a royal salute was fired from the ships in commission and the garrison battery, led off by the Victory, flagship of Rear-Admiral G. Wellesley, during the absence of the Commander-in-Chief of the port, Admiral Sir T. S. Pasley. At Plymouth all the ships of war and merchant vessels were gaily dressed in colours. At noon royal salutes were fired from the citadels.

The iron screw steam transport Euphrates, 2, Capt. Montagu B. Dunn, having been supplied with some oil and other stores, left Plymouth Sound for Bombay.

It appears by the advices from the Cape of Good Hope that the Golden Fleece, steamer, had arrived with troops from China, and left for England on 15th May.

The screw steam sloop Cameleon, 17, left Plymouth on the 22nd inst. for the Pacific.

Deputy Purveyor V. White and Assistant Superintendent of Stores J. F. Dalrymple have been appointed to Singapore.

Monetary and Commercial.

The fifth annual meeting of the Ceylon Company (Limited) was held at the offices of the company on the 18th inst., when 54 shareholders were present. In the course of a few preliminary remarks the chairman, Lawford Acland, Esq., stated that the recent unsatisfactory condition of the money market had been prejudicial to the interests of the company by preventing the purposed issue of the remainder of the shares, but he trusted that better times were in store, when they might be placed on the market with good results. In deference to the wishes of several shareholders the form of the balance-sheet had been modified. With regard to the large amount appearing on the debit side of the Mauritius account, the chairman wished to say that the increase was purely temporary, being occasioned by changes which it had been found necessary to make in the local management. In answer to a question, the chairman said that not having been able to realise the advances made upon some estates in Mauritius the company had been compelled to take possession of them, but there was no intention to keep them longer than could be helped, and if a profitable offer were made they would be immediately disposed of. In reference to the debentures falling due, the directors did not anticipate any difficulty in obtaining renewals. The directors had not yet determined upon filling up the vacancy in the board caused by the retirement of Mr. Robert Smith. The resolution proposing that a dividend at the rate of 10 per cent. per annum on the capital paid up on the 31st March, amounting to 10s. on each original, and 2s. on each A share, be declared and made payable, free of income-tax, on the 20th instant, was then put by the chairman, seconded by Mr. Gordon, and carried unanimously. Messrs. D. J. Kay, S. P. Kennard, and P. F. Robertson, the retiring directors, were re-elected, and Mr. Ball was nominated auditor for the ensuing year at a salary of £80. Votes of thanks to the chairman and directors, and to the colonial managers, terminated the proceedings.

Mr. J. G. Fry and Mr. J. S. Rigge, underwriters at Lloyds, and partners in the firm of Messrs. Sanderson, Frys, Rigge, and Co., China merchants and Insurance brokers, have called a meeting of persons interested in their affairs as underwriters to consider their position. It appears that a portion of the capital has been used in advances upon shipments to China, and that a defalcation of £55,000 committed by an agent in Hong Kong, together with heavy losses on marine policies, had very seriously crippled their resources. The meeting was presided over by William Simpson, Esq., and after a full explanation it was unanimously resolved by those present that the estates of Mr. Fry and Mr. Rigge should be wound up under the inspection of Mr. James Farquhar Morice, Mr. William Simpson, and Mr. Alexander Macpherson Campbell. The business of Messrs. Sanderson, Frys, Rigge, and Co., as China merchants and Insurance brokers, is not affected by this arrangement, and will be continued as heretofore.

A deputation representing the shareholders in England of the Bank of Bombay has waited on the Secretary of State for India requesting him to withdraw his sanction to the proposed amalgamation of the Banks of Bombay and Bengal for the present.

A dividend of 3 per cent., free of income tax, has been declared by the directors of the Chartered Mercantile Bank of India, London, and China for the half-year ending the 30th inst. The warrants are payable on the 1st proximo.

At the meeting of the shareholders of the China Steam-ship and Labuan Coal Company, held on the 19th inst., it was moved by C. Edwards, Esq., M.P., seconded by Dr. May, M.D., and unanimously resolved, "That this meeting consider it for the interests of the shareholders that a call of £1 10s. be now made, and those present earnestly appeal to all shareholders to pay up the call forthwith, including arrears."

The Glasgow and Greenock papers have been indulging in various surmises as to the starting of the clipper ships with the new season's teas; one gives the list of vessels as sailing on the 1st June. It is only necessary to state that all the statements are without foundation. No intelligence has been received of the names of vessels arrived at Foochow for the purpose of loading the new season's tea.

The biddings for £270,000 in Bills on India were made at the Bank of England. The amounts allotted were, to Calcutta £156,000, to Madras £14,000, and to Bombay £99,500. The minimum price was fixed at 1s. 11d. on all the Presidencies, being a reduction of 1 per cent. Tenders at the minimum on Calcutta and Madras will receive about 7 per cent., and those above in full. Tenders on Bombay at and above the minimum will receive in full.

At the meeting of the Northern Assurance Company, at Aberdeen, the report stated that owing to the loss of £50,000 by the fire at Yokohama in November last, and the generally unfavourable character of the fire insurance business during the past year, the payments in that department had been £225,544, against receipts £166,192. In the life department the new policies for the year were 544, for an aggregate of £348,657, yielding in annual premiums £11,814.

The liquidator of the Blakely Ordnance Company has offered for sale the stock of the company at East Greenwich and Southwark.

The amount of bullion by the P. and O. Company's steamer *Ceylon*, from Southampton, on the 20th inst., was—In gold, to Madras, £99; in silver, to Singapore, £1,225; to Shanghai, £10,540; total in gold, £99; in silver, £11,765.

In reference to the dissolution of partnership between Mr. Hickie and Mr. Borman, notified in the *Gazette*, we have received the following circulars:—

We beg to inform you that we have this day determined upon dissolving partnership and giving up the business heretofore carried on by us under the style of Hickie, Borman, and Co., and that our friends, Mr. J. R. D. Hickie, son of our Mr. Hickie, and Mr. Edward Borman, brother of our Mr. Borman, intend commencing business as general merchants, ship and insurance brokers, and agents, and whom we have the pleasure to introduce to your notice.—We remain, your obedient servants, JOHN HICKIE, JAMES BORMAN.

127, Leadenhall street, London, and Oriental-place, Southampton.

We beg to inform you that we have this day commenced business as general merchants, ship and insurance brokers, and agents, under the style of Hickie, Borman, and Co., and shall be glad to take charge of any business you may entrust to our care.—Referring to our respective signatures at foot, we are, your obedient servants, J. R. D. HICKIE, E. BORMAN.

EXPORTS TO THE FAR EAST.

The quantities and value of the Cotton Goods shipped from the ports of London, Liverpool, Southampton and the Clyde, to China, Japan, the Straits Settlements, Ceylon, Batavia, and Manila, during the month and six months ended 16th June, 1867, exhibit, according to Mr. Sam Mendel's monthly export tables, a considerable falling off in value when compared with the six months of last year. Thus the export to Hong Kong has decreased in value to the extent of thirty-one per cent., to Shanghai twenty-six per cent., to Japan forty-nine per cent., to Singapore and Penang five per cent., and to Ceylon three per cent. On the other hand, the export to Manila shows an increase of forty-one per cent. The following is a summary of the quantities and value for the month and six months of the years 1865, 1866, and 1867.

To HONG KONG AND WHAMPOA.—For the month ended 16th June, 1867: Plain Cottons, 2,654,916; Coloured Cottons, 190,200; Printed Cottons, 14,704 yards; Cotton Yarn, 552,438 lbs.; total value of Cotton Goods, £107,701. For the six months ended 16th June, 1867: Plain Cottons, 15,900,811; Coloured Cottons, 824,882; Printed Cottons, 261,222 yards; Cotton Yarn, 2,099,476 lbs.; total value of Cotton Goods, £614,170. Decrease for 1867 against 1866, £271,729. For the six months ended 16th June, 1866: Plain Cottons, 21,833,873; Coloured Cottons, 2,549,628; Printed Cottons, 296,200 yards; Cotton Yarn, 2,610,438 lbs.; total value of Cotton Goods, £885,899. For the six months ended 16th June, 1865: Plain Cottons, 12,774,139; Coloured Cottons, 1,600,276; Printed Cottons, 202,136 yards; Cotton Yarn, 967,820 lbs.; total value of Cotton Goods, £427,690.

To SHANGHAI.—For the month ended 16th June, 1867: Plain Cottons, 14,263,940; Coloured Cottons, 1,088,347; Printed Cottons, 527,990 yards; Cotton Yarn, 40,000 lbs.; total value of Cotton Goods, £324,042. For the six months ended 16th June, 1867: Plain Cottons, 45,541,610; Coloured Cottons, 6,404,544; Printed Cottons, 2,601,359 yards; Cotton Yarn, 143,132 lbs.; total value of Cotton Goods, £1,128,055. Decrease for 1867 against 1866, £394,183. For the six months ended 16th June, 1866: Plain Cottons, 52,692,857; Coloured Cottons, 6,408,977; Printed Cottons, 2,034,205 yards; Cotton Yarn, 11,600 lbs.; total value of Cotton Goods, £1,522,238. For the six months ended 16th June, 1865: Plain Cottons, 36,932,063; Coloured Cottons, 2,994,818; Printed Cottons, 951,531 yards; Cotton Yarn, 69,580 lbs.; total value of Cotton Goods, £925,890.

To JAPAN.—For the month ended 16th June, 1867: Plain Cottons, 38,500; Printed Cottons, 24,860 yards; Cotton Yarn, 20,000 lbs.; total value of Cotton Goods, £3,575. For the six months ended 16th June, 1867: Plain Cottons, 7,377,515; Coloured Cottons, 2,085,585; Printed Cottons, 466,590 yards; Cotton Yarn, 966,900 lbs.; total value of Cotton Goods, £302,291; decrease for 1867 against 1866, £289,551. For the six months ended 16th June, 1866: Plain Cottons, 16,584,457; Coloured Cottons, 1,615,639; Printed Cottons, 1,700,199 yards; Cotton Yarn, 1,006,410 lbs.; total value of Cotton Goods, £591,842. For the six months ended 16th June, 1865: Plain Cottons, 5,081,524; Coloured Cottons, 677,071; Printed Cottons, 570,532 yards; Cotton Yarn, 172,100 lbs.; total value of Cotton Goods, £177,921.

To SINGAPORE AND PENANG.—For the month ended 16th June, 1867: Plain Cottons, 5,413,160; Coloured Cottons, 856,479; Printed Cottons, 447,025 yards; Cotton Yarn, 242,870 lbs.; total value of Cotton Goods, £151,019. For the six months ended 16th June, 1867: Plain Cottons, 28,915,577; Coloured Cottons, 5,281,606; Printed Cottons, 2,028,822 yards; Cotton Yarn, 1,094,751 lbs.; total value of Cotton Goods, £846,922. Decrease for 1867 against 1866, £40,456. For the six months ended 16th June, 1866: Plain Cottons, 26,773,693; Coloured Cottons, 3,697,656; Printed Cottons, 2,323,378 yards; Cotton Yarn, 736,263 lbs.; total value of Cotton Goods, £887,378. For the six months ended 16th June, 1865: Plain Cottons, 18,203,527; Coloured Cottons, 2,305,416; Printed Cottons, 971,360 yards; Cotton Yarn, 599,381 lbs.; total value of Cotton Goods, £513,884.

To BATAVIA.—For the month ended 16th June, 1867: Plain Cottons, 630,288; Coloured Cottons, 775,447; Printed Cottons, 608,624 yards; Cotton Yarn, 58,800 lbs.; total value of Cotton Goods, £60,669. For the six months ended 16th June, 1867: Plain Cottons, 9,814,633; Coloured Cottons, 8,500,172; Printed Cottons, 8,725,833 yards; Cotton Yarn, 364,555 lbs.; total value of Cotton Goods, £659,020. Decrease for 1867 against 1866, £44.

To MANILA.—For the month ended 16th June, 1867: Plain Cottons, 1,462,815; Coloured Cottons, 992,332; Printed Cottons, 57,544 yards; Cotton Yarn, 6,200 lbs.; total value of Cotton Goods, £59,678. For the six months ended 16th June, 1867: Plain Cottons, 8,721,758; Coloured Cottons, 8,503,773; Printed Cottons, 634,768 yards; Cotton Yarn, 72,426 lbs.; total value of Cotton Goods, £446,015. Increase for 1867 against 1866, £183,063. For the six months ended 16th June, 1866: Plain Cottons, 4,161,178; Coloured Cottons, 5,826,566; Printed Cottons, 87,697 yards; Cotton Yarn, 33,750 lbs.; total value of Cotton Goods, £262,952. For the six months ended 16th June, 1865: Plain Cottons, 6,229,763; Coloured Cottons, 6,177,351; Printed Cottons, 803,626 yards; Cotton Yarn, 36,050 lbs.; total value of Cotton Goods, £330,607.

To CEYLON.—For the month ended 16th June, 1867: Plain Cottons, 335,138; Coloured Cottons, 41,515; Printed Cottons, 19,000 yards; total value of Cotton Goods, £11,006. For the six months ended 16th June, 1867: Plain Cottons, 9,767,173; Coloured Cottons, 851,689; Printed Cottons, 1,474,502 yards; Cotton Yarn, 53,500 lbs.; total value of Cotton Goods, £280,655; Decrease for 1867 against 1866, £9,629. For the six months ended 16th June, 1866: Plain Cottons, 6,265,030: Coloured Cottons, 1,974,025; Printed Cottons, 2,329,755 yards; Cotton Yarn, 177,527 lbs.; total value of Cotton Goods, £290,284. For the six months ended 16th June, 1865: Plain Cottons, 3,620,706; Coloured Cottons, 938,814; Printed Cottons, 494,948 yards; Cotton Yarn, 97,899 lbs. total value of Cotton Goods, £147,237.

ARTICLES OF IMPORT.

TEA.—There has been a return to the former quiet tone, and, on the whole, we have but little alteration to quote in prices. The deliveries continue on a satisfactory scale, but nothing induces the trade to become larger holders, and it seems quite determined on to let the stocks run down to six months' consumption. No reliable intelligence has been received relative to the opening of the market for new season's teas, but more than usual interest is displayed for the first news, as the future course of this market mainly depends upon the actions of operators in China. If supplies are sent forward somewhat on a par with our monthly requirements we shall have a satisfactory trade, but if pushed on with the same haste as during the early part of last (1866-1867) season, a low range of prices will be established. Congous.—Siftings have sold rather more freely, and in some cases at a slight advance, both in the Moning and Kaisow kinds. Broken-leaf remain firm at full prices. Fair to good common have been

Digitized by Google

saleable at 11½d. to 1s. per lb., showing rather better prices. Fair to good flavoury kinds show no alteration. Good Kaisows from 1s. 6d. to 1s. 9d. support the late advance. Fine to finest sell only in small quantities at about former prices. In Pak Lings there has not been much doing. Further sales of new-make Canton kinds have been made, but prices show ½d. to 1d. per lb. decline. Oolongs remain much as before; a few really fine have sold at extreme prices. A few sales of Flowery Pekoe have been made at full rates. Souchongs remain much as before, common to medium kinds being wanted for export, but fine not selling readily. Scented Capers have not been so much in request, and prices show some reduction upon the late extreme prices. Scented Orange Pekoes have sold rather more readily, and at slightly advanced rates; the Foo-chow kinds have been inquired for. Uncoloured Japans remain as before. Green Teas; In these there has been a fair business done, and prices have been firmly maintained; the Burmah brought a considerable quantity, a good proportion of which has been sold. Moyune Young Hysons and Gunpowders have been taken freely, and some sales of Moyune Hyson have been made at full prices. The Ping Suey kinds have not sold so readily, but prices have been well maintained. In Canton Greens there have been no fresh arrivals, and transactions consequently small.

SILK.—The tone of the Silk market is depressed, uncertainty with regard to the export for the coming season from China and Japan, and the contradictory reports about the European crop, both tending to restrict business. The public sales which took place last week produced no effect; some little was done by the home trade buyers to supply immediate wants, but there was a total absence of spirit, and the transactions by private contract during the week were less than usual. The deliveries are on the smallest scale, nor can we expect any improvement in this respect so long as the present high range of prices is maintained. Deliveries from 1st to 24th inclusive. China, 1,582 bales; Japan, 476 bales; total, 2,058 bales.

COTTON.—Since our last report the market has been dull and drooping, with extremely small business, the sales only amounting to 1,570 bales on the spot and 2,850 for arrival. Prices show a general decline of ¼d. per lb. on previous quotations. No China or Rangoon has been sold either on the spot or to arrive. The stock of cotton in the United Kingdom is 71,117 bales; the imports from the 1st January to 20th June amount to 85,981 bales, against 189,375 during the same period last year. Of China and Japan the imports from the 1st January to 20th June have been 1,048 bales, against 196 last year, the stock being 391, against 467 bales.

COFFEE.—At the beginning of the past week there were some signs of improvement, Plantation Ceylon finding more ready buyers, but since the sale in Holland the market has become dull, and last week's prices of this description are only just supported. Native is 2s. per cwt. lower, and only small quantities are saleable. With the exception of fine East India, all other kinds also show some decline. The sales of plantation have been 1,598 casks, 70 barrels, and 445 bags as follows: Triage, 35s. to 60s.; fine ordinary small dull to fine fine ordinary, 69s. 6d. to 75s.; low medium and medium, 76s. to 81s.; good medium, 82s. to 85s.; fine medium, 86s.; fine bold, 94s.; peaberry, 89s. 6d. to 95s. Transactions in Native were confined to 3000 bags, realising for small, 51s. 6d. to 55s. 6d.; medium, 59s. to 60s.; real good ordinary, 60s. 6d. to 61s. 6d.; fine ordinary, 62s. to 63s.; fine bold, 67s. 6d. per cwt. At the Dutch Trading Company's sale of 118,500 bags on the 19th inst. the common qualities (of which the bulk consisted) went at a decline of one cent—good ordinary Java at about 40 cents—while the better kinds fetched some advance. The stock of Coffee in the United Kingdom on the 15th inst. was 11,040 tons, against 12,240 at the same time last year, the stock of Ceylon being 7,280 tons, against 7,210 at the corresponding date of 1866.

COIR GOODS.—At the public sales of the past week the commoner qualities of Yarn have met with but little inquiry, and the chief portion has been bought in, but fine and good qualities have sold steadily at firm rates. Fibre has generally declined, and a large quantity of rope placed on offer meeting with scarcely any bids was withdrawn. The following have been the sales: 62 tons Ceylon Yarn, medium to good medium, £31 10s. to £35 5s.; common to good common, £26 to £27 15s.; 81 bales Ceylon Yarn, very fine, £61 5s.; fine, £40 5s. to £50 15s.; good, £36 15s.; 1,114 pieces (2¼ tons) Ceylon Junk at £21 5s.; and 218 coils Ceylon Rope, 2¼ to 3¾-inch, at £30 per ton.

COCOA-NUT OIL.—An improvement has at length taken place in this market, and of 226 casks Ceylon at auction 80 hogsheads fair to very fine realised, with three months prompt, £49 to £49 10s. per ton.

CUTCH.—The market for Pegu is dull, and previous rates are not obtainable, 240 boxes being bought in at 44s., and 366 bags very low, from Singapore, at 15s. per cwt.

CAMPHOR.—Small business has been done in Japan at £7 per cwt., but no transactions have taken place in China descriptions.

EBONY.—Of 71 tons Ceylon placed on offer 3 tons only sold at £6, the remainder being bought in at £6 to £7 per ton.

GALLS.—Less demand than existed previously has been experienced, but prices have not declined. At an early sale 50 cases China realised 64s. 6d., but subsequently 160 cases were bought in at 68s. Of Japan 50 cases good sold at 59s., and 269 cases fair but rather broken at 54s. 6d. to 55s.—two lots at 53s. 6d. to 54s. per cwt.

JAPAN WAX.—The tone of the market is firm, and 682 boxes saucers sold at steady rates, viz.:—Good unmixed at 92s. 6d. to 93s., rather inferior 90s., good medium partly mixed 77s. 6d. to 85s. 6d., ordinary to medium mixed 60s. to 72s.; also 157 boxes good medium cake at 76s. to 77s. 6d. per cwt.

MANILA HEMP.—The quietness noticed in our report of the 17th inst. has continued, but previous rates have hitherto been fully maintained. Privately, the sales have been 100 bales on the spot at £52, and for arrival 152 bales at £49. 5s., and 400 bales at £48, March sailing guaranteed fair current quality. The only public sale was of 117 bales first-class, sea-damaged, at £50 to £55 per ton.

PLUMBAGO.—A better demand for Ceylon has been experienced, and 500 barrels have realised as follows:—Good middling lump, 23s. to 24s. 6d.; middling, 21s. 6d.; ordinary, 17s. 6d.; very ordinary dull, 13s. 3d.; good middling dust, 8s. 6d. to 8s. 9d.; good ordinary, 7s. 9d. to 8s.; ordinary, 7s. to 7s. 6d. per cwt.

PEPPER.—No Black worth mention has been offered in public sale, and by private contract only retail purchases have been made; 125 bags Singapore White, in auction, were withdrawn at 5½d. to 5½d.; and 40 bags Penang have been placed privately at 5¼d. per lb.

RICE.—The market for landed parcels has remained dull, and only about 7,000 bags are reported sold; common to good Rangoon at 11s. 3d. to 12s. 3d.; and Nakrenzie 11s. 1½d. to 11s. 6d. Afloat, a cargo of 500 tons Bassein, and one of 850 tons Rangoon, have been taken at 11s. 1½d., Continental terms. At auction 395 bags mixed, from Zanzibar, were bought in at 12s. to 13s., but since placed at 12s. 6d.

SUGAR.—The large business which was recently done has of itself led to a pause in the demand, for the trade having supplied their pressing requirements have been buyers to only a limited extent, and as the operations of speculators appear to have ceased for the present, the market has had a very quiet aspect. Holders have not forced sales, consequently the value in general shows only nominal weakness, but a decline of 6d. per cwt. has in some instances been accepted. Cargoes afloat, which at the end of last week were still in good request, have since, with few exceptions, become difficult to realise, late rates being no longer obtainable. Of Penang the sales have been 2,764 bags, good and fine brown realising 29s. 6d. to 30s. 6d. (duty 9s. 7d.) and good middling to good yellow, 32s. 6d. to 33s. 6d. (duty 10s. 6d.) Of Manila the only sale effected was of 1,600 bags clayed (import 1863) at 31s. per cwt., 4,464 bags unclayed (import 1867) being bought in at 26s. 6d. No private transactions have taken place. The imports of raw sugar into the four chief ports of the United Kingdom to the 15th June were 257,240 tons, against 237,240 tons in 1866. The clearances for home consumption were 242,300 tons, against 211,200 tons. The stock was 183,600 tons, against 207,400 tons last year.

SPICES.—We have no business to report in East India descriptions.

SHELLS.—The sales have included 48 cases bold and medium Manila Mother-o'-Pearl at £7 to £7 5s. per cwt., and 2 tons Japan Ear at 20s. per cwt.

SOY.—Of China 100 casks were bought in at 3s. 3d. per gallon.

SAPANWOOD.—The only sale since our last report has been of 11 tons Ceylon, which realised,—oil damaged £8 10s., sea and oil damaged, £6 10s. per ton.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £5 15s. to £6; nail road, £7 10s. to £8; hoops, £8 10s. to £9; sheets, single, £9 15s. to £10; Staffordshire bars, £7 10s. to £8 10s.; rails, £6 5s. to £6 10s.

STEEL.—Swedish kegs, £15 to £15 10s.

COPPER.—Sheet and Sheathing, £83 to £89 per ton; yellow metal, 7¼d. to 7½d. per lb.

TIN.—£89 for block; £90 for common bars. Tin plates, best charcoal I.C., 30s. to 31s. 6d.

LEAD, &c.—English pig, W.B., £21 5s.; shot, patent, £23; sheet, £21; spelter, £21 to £21 2s. 6d.; zinc, English sheet, £26 10s. to £27; quicksilver, £6. 17s.

The following is from the Circular of Messrs. French and Smith:—A moderate business only has been transacted in this market the last ten days. Iron shipment is unchanged. Copper has been inactive; but, on the arrival of the West India Mail bringing news of charters for equal to 3,400 tons pure copper, the dulness has increased. No doubt, however, this news was anticipated and acted on by a few houses. Tin has been steadily in demand, and a fair business done at rather improving rates. Lead continues without animation. Tin plates also flat. Spelter rather easier.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 1st January by the P. and O. Company's mail steamers.

SPOKEN.

LOCHLEVEN CASTLE, Glasgow to Singapore, May 10, 3 N., 21 W.
LEXINGTON, Colombo to London, May 5, 1 S., 19 W.
PIETER ADOLF, London to Batavia, April 16, 23 S., 30 W.
No. 6,274, 3rd d. p. (French barque), Singapore to London, April 6.
LINDO (?), from Batavia, out 84 days, May 2, off Ascension.
INDIA PACKET, Amsterdam to Batavia, June 13.
HELENA (Prussian barque), Singapore to Trieste, Mar. 15, 14 S., 98 E.
JOHN CURRY (ship), from Foochow, April 11, 30 S., 40 E.
KANDAN (? Canaan) (Brit. ship), Manila to London, April 11, 30 S., 40 E.

FREIGHTS AND CHARTERS.

Rates of freight to the Eastern ports have a slight tendency to increase. Coal freights are well maintained at previous quotations.

Current rates of freight for vessels on the berth:—To Yokohama: 20s. to 30s. weight, 50s. meast. To Nagasaki: 50s. weight or meast. To Shanghai: 40s. weight, 45s. meast. To Amoy: 45s. weight or meast. To Foo-chow-Foo: 45s. weight or meast. To Hong Kong: 35s. weight, 40s. meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Manila: 40s. weight, 85s. meast. To Ceylon: 25s. to 30s. weight, 35s. meast.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Hong Kong: £46. For Singapore: £40. For Shanghai: £56. For Saigon: £50. For Yokohama: £52. For Batavia: £35. From Newport, Cardiff, or Swansea, per ton.—For Hong Kong, £2 2s. For Singapore: £1 18s. For Shanghai: £2 12s. 6d. For Saigon: £2 8s. For Yokohama: £2 10s. Batavia: £1 15s. Coke.

The Admiralty have invited tenders for supplying and delivering into store or on board Her Majesty's steamships and vessels at Hong Hong 7,000 tons of smokeless South Wales coals, also for the conveyance of 19 tons (weight) small arm ammunition, and 1 ton (meast.) stores from the Thames to Hong Kong, and of 19 tons (weight) small arm ammunition to Japan.

CASUALTIES.

The Ida (barque), Tatlock, from Colombo to London, with coffee, put in at Mauritius May 2, with loss of foremast and everything attached, making 9 inches water per hour, and with from 40 to 50 tons of cargo thrown overboard. She was being repaired.

The Onrust (Dutch barque), Weissenbruck, from Macao to Havana, with coolies, put in at Mauritius May 3, with loss of mainmast and other spars, and was placed in temporary quarantine.

The Julie, Guichon, from Sumatra to Pernambuco, which put in at Mauritius Dec. 19 leaky, was under repair May 6 and destined for Marseilles when ready.

The Montrose, Small, from Sourabaya to Amsterdam, which put in at Mauritius Feb. 15, leaky, &c., had disposed of the damaged part of her cargo, and was ready for sea May 18.

The Argo, Rosenberg, which sailed from Cardiff June 8, for Galle, arrived at Lisbon June 20, reported leaky in topsides.

The Virginia (Pruss. ship), from Cronstadt to the Amoor River, was abandoned in a sinking state in lat. 3 N., long. 12 (?) W., crew taken off and landed at Plymouth June 24, by the Royal Edward, from Liverpool to Bombay.

PORT OF AMOY. CHINA.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford facility for REPAIRING and REFITTING STEAM and SAILING VESSELS.

Their large Granite Dock, 286 feet on the blocks, 307 feet over all, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet. It is fitted with Caisson Gate and with a powerful Centrifugal Steam Pump, ensuring despatch in all states of the tide.

Their two smaller Granite Docks, one 223 feet, the other 160 feet on the blocks, can take vessels at average spring tides drawing 12 feet to 13 feet.

A stock kept on hand of Timber, Spars, Copper and Metal Sheathing, Paints for Iron Vessels, and other material required for Dockyard use.

The premises comprise Carpenters' Shops, Mast Sheds, Blacksmiths' Shops, superintended by experienced European Foremen; also an Engineer's Workshop, supplied with Lathes and other tools worked by Steam, in charge of a Resident European Engineer. Dry Godowns for the reception of stores of vessels requiring to discharge them.

COUGHS, ASTHMA, and INCIPIENT CONSUMPTION are EFFECTUALLY CURED by

KEATING'S COUGH LOZENGES.

FOR HALF A CENTURY this well-known remedy for pulmonary disorders has successfully stood the test of public approval, and their usefulness has been extended to every clime and country of the civilised world. They may be found alike on the gold fields of Australia, the back-woods of America, in every important place in the East or West Indies, and the Palace of Peking. During this long period they have withstood the pretensions of numerous inferior rivals, and are now the acknowledged antidote of coughs, colds, asthma, &c.

Prepared and Sold in Boxes, Tins, and Bottles of various sizes, by THOMAS KEATING, Chemist, &c., 79, St. Paul's Churchyard, London. Sold Retail by all Druggists and Patent Medicine Vendors in the World.

KEATING'S PERSIAN INSECT DESTROYING POWDER.

FLEAS, Bugs, Cockroaches, Beetles, Ants Mosquitos, Moths, &c., are instantly destroyed by this Powder, which is quite harmless to animal life.

Sold in packets 1s., tins 2s. 6d. and 4s. 6d. each. Also in bottles 1s. 2d. and with bellows 1s. 6d. and 3s. each, by THOMAS KEATING, Chemist, &c., 79, St. Paul's Church-yard, London, E.C.

HOLLOWAY'S OINTMENT and PILLS.—Limb for Life.—Not many years ago some ulcerations and diseases of the joints placed in peril the affected limb, whose loss was recommended, to spare the risk of life. Now the discovery of these noble remedies has made the cure of the worst of such maladies no longer a matter of doubt. Holloway's treatment preserves the condemned limb, and in its course of cure improves the general health and vigour of the frame. Sores, ulcers, bad legs, scrofulous discharges, swollen or gathered glands, contracted sinews, enlarged joints, rheumatic and gouty concretions, are readily remediable by the proper and persevering application of these cooling, healing, and purifying preparations, which are as powerful as they are harmless.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

DR. J. COLLIS BROWNE'S CHLORODYNE. Vice-Chancellor Sir W. Page Wood stated publicly in Court that Dr. J. Collis Browne was undoubtedly the Inventor of Chlorodyne; that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See *The Times*, July 13, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any service in Cholera was Chlorodyne.—See *Lancet*, Dec. 31, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. Extract from *Medical Times*, Jan. 12, 1866.—"Is prescribed by scores of orthodox medical practitioners. Of course it would not be thus singularly popular did it not supply a want and fill a place."

DR. J. COLLIS BROWNE'S CHLORODYNE is the best and most certain remedy in COUGHS, COLDS, ASTHMA, CONSUMPTION, NEURALGIA, RHEUMATISM, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE is a certain cure in CHOLERA, DYSENTERY, DIARRHŒA, COLICS, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE. EXTRACT *from the* GENERAL BOARD OF HEALTH, *London, as to its efficacy in Cholera*—"So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. MONTGOMERY, Esq., *late Inspector of Hospitals, Bombay*.—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other remedies had failed."

DR. J. COLLIS BROWNE'S CHLORODYNE. CAUTION.—None genuine without the words "Dr. J. Collis Browne's Chlorodyne" on the Government Stamp. Overwhelming medical testimony accompanies each bottle Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury, London The immense demand enables the proprietors to reduce the price; it is now sold in bottles, 1s. 1½d., 2s. 9d., 4s. 6d., and 11s.

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor

*** Passengers eastward of Suez securing their berths in London are entitled to the conveyance of their luggage free to Marseilles.

INDIA AND CHINA VIA ITALY.

SHORTEST SEA PASSAGE FROM EUROPE TO EGYPT

BRINDISI to ALEXANDRIA—Contract Passage, 82 hours It is frequently done in 72 hours.

THE Società Anonima Italiana di Navigazione Adriatica Orientale, under contract to carry the Direct Mails despatch as under their first-class English-built steamers CAIRO, BRINDISI, PRINCIPE DI CARIGNANO, or PRINCIPE TOMASO, between BRINDISI and ALEXANDRIA. The vessels of the Company sail as follows:—From Brindisi for Alexandria on the 7th, 14th, 22nd, and 30th of each month, at 2 P.M.; Alexandria for Brindisi, on the arrival of the mails, about the 5th, 12th, 20th, and 29th of each month. The arrivals at and departures from Alexandria are in coincidence with those of the steamers of the Peninsular and Oriental Company, with the Calcutta, China, and Bombay Mails.

Fares:—Brindisi to Alexandria, including provisions 1st class, 275f.; 2nd class, 200f.; third class, 90f., and *vice versa*.

For further particulars apply to the Company's offices at FLORENCE, via Montebello, 42; PARIS, Rue de L'Université, 108; LONDON, Messrs. PALMER, 44, Eastcheap, E.C.

JAPAN AND CHINA NEW MAIL ROUTE VIA PANAMA AND SAN FRANCISCO.

THE PACIFIC MAIL STEAM SHIP COMPANY despatch their splendid side-wheel steamers from NEW YORK on the 1st, 11th, and 21st, and from PANAMA on the 9th, 19th, and 29th of every month for SAN FRANCISCO, calling at ACAPULCO, MANZANILLO, MAZATLAN *en route* thence to YOKOHAMA, NAGASAKI SHANGHAI, and HONG KONG. Passengers from England may connect with this line at New York by any of the various steamers from Liverpool, Southampton, or Falmouth, to that port, or at Panama by the steamers of the Royal Mail Steam Packet Company leaving Southampton on the 2nd and 17th of every month. Passengers by this route are less than ten days in the tropics.

The next departures from San Francisco are:—

GREAT REPUBLIC, 5,000 tons, September 3rd.
CENTENNIAL EMPIRE, 5,000 tons, October 23rd.
COLORADO, 4,000 tons. November —.

For particulars of Freight, through passage rates, &c &c., apply to H. STARR and Co., General European Agents, 145, Cheapside London.

NEW OCEAN MAIL ROUTE to CHINA and JAPAN, via the Isthmus of Panama and San Francisco.

THE WEST INDIA AND PACIFIC STEAMSHIP COMPANY (Limited) have made special arrangements with the Panama Railway Company and the Pacific Mail Steamship Company for the conveyance of Passengers, Specie, and Cargo between EUROPE, YOKOHAMA, NAGASAKI, SHANGHAI, and HONG KONG.

The next departures will be:—

From LIVERPOOL—5th July,

Intending to connect, at San Francisco, with the steamer leaving on the 3rd September for Japan and China, arriving at Yokohama on the 22nd, Shanghai on the 27th, and Hong Kong on the 29th September. The branch steamer to Shanghai calls at Nagasaki on both trips. It is expected that the communication will be monthly after these dates.

The Pacific Mail Company's steamers on the China station are large paddle-wheel vessels, of upwards of 3,000 tons register. The greatest attention has been given to insure the comfort and convenience of passengers by the vessels of all the connecting companies on this route.

Shippers will find this route cheaper and as expeditious as any mail service to the East.

For rates of Freight and Passage apply to the agent, J. M. CURRIE, Havre and Paris; or at the Company's Offices, The Temple, Dale-street, Liverpool, and 117, Leadenhall-street, London, E.C.

ARTHUR R. FORWOOD, Managing Director.

STEAM to INDIA, via the CAPE.—The UNION STEAMSHIP COMPANY (Limited) have entered into an arrangement with the Government for the extension of the Packet Service from Mauritius to Ceylon. Passengers can proceed from Southampton on the 8th of every Month to Point de Galle, where a junction is formed with steamers proceeding to India, China, Australia, &c. Rates of freight and passage very moderate.

Apply to FALCONER and MERCER, 23, Leadenhall-street, London; or THOMAS HILL, Southampton.

JAPAN AND CHINA.—Arrangements have been made with the United States Pacific Mail Steamship Company by which GOODS for Japan and China can be shipped under through bill of lading via Panama by the ROYAL MAIL STEAM-PACKET COMPANY'S STEAMER leaving Southampton on 17th May. Freight from Southampton, £21. 7s. per ton measurement, with 10s. per ton primage.

Further particulars can be obtained on application to J. M. LLOYD, Secretary.

Royal Mail Steampacket Company, 55, Moorgate-street, London, E.C.

ORIENTAL, AUSTRALIAN, AND GENERAL STEAM AGENCY, AND GLOBE PARCEL EXPRESS.

PARCELS, PACKAGES, and MERCHANDISE forwarded, and PASSAGES engaged to all parts of the world. Baggage collected and shipped, insurances effected, &c.

CALCUTTA, MADRAS, CEYLON, and ADEN—Overland, 4th and 20th of every month.

BOMBAY and ADEN—Overland, 12th and 27th.

CHINA, JAPAN, SINGAPORE, and EASTERN SEAS—Overland, 4th and 20th.

AUSTRALIA, TASMANIA, and MAURITIUS—Overland, 20th.

NEW ZEALAND and AUSTRALIA via PANAMA, 2nd

INDIA, CHINA, and AUSTRALIA—Via Cape of Good Hope, Clipper Ships, weekly.

Prospectuses, with through rate to a thousand places free on application.

G. W. WHEATLEY and Co. (late Waghorn), 150, Leadenhall-street, E.C.; CHAPLIN'S, Regent-circus, W and 32, Regent-street, S.W.

CHINA AND JAPAN, &c.

ROBERTSON and CO. will despatch the following first-class clipper VESSELS:—

Destination.	Ships.	Class.	Dock.	To Sail.
Shanghai	Jas. Shepherd	A1 13 yr.	W.I.D.	July 1.
Ditto	Beemah	A1 11 yr.	E.I.D.	With des.
Hong Kong & Whampoa ...	Red Riding H	A1	W.I.D.	July 3.
Kanagawa	Estrn. Queen	A1 13 yr.	W.I.D.	July 10.
Amoy	Eleanor	A1 13 yr.	W.I.D.	With des.

For Freight and Passage apply at 5, Newman's-court, Cornhill, London; or York Chambers, 55, King-street, Manchester.

CHINA, AUSTRALIA, and AMERICA.—SHAW, LOWTHER, and MAXTON, will despatch the following first-class SHIPS to their respective destinations, as under:—

Destination.	Ships.	Dock	Date of Sailing.
Shanghai ...	Talbot...	E.I.D.	June 29.
Hong Kong & Whampoa ..	Gresham	Do.	July 1.
Melbourne ..	Pride of the Ocean ...	Do.	July 1.
Ditto ...	Holmsdale	Do.	Aug. 25.
Sydney	Cospatrick	Do.	July 30.
New York ...	Southampton... ...	L. D.	July 17.
Ditto ...	Arracan	Do.	July 31.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, No. 2, Royal Exchange-buildings.

JOHN C. CAMPBELL will despatch the following splendid first-class VESSELS:—

Destination.	Ships.	Tns.	Class.	Dock.	Date of Sailing.
Colombo...	Palmerston.	978	A 1 15 yrs	W.I.D	July 8
Colombo ...	Sea King ...	404	A 1 12 yrs.	L.D.	July 20
Bombay ..	Jes. Gilbert	635	3-3rds L. 11	E.I.D.	July 1
Bombay ...	Bebington...	889	AA1		July 23

No. 22, Great St. Helen's, E.C.

STEAM to JAPAN, to sail 13th July, for YOKOHAMA and NAGASAKI direct, with leave to touch at St. Vincent, the Cape, and Singapore to coal, the splendid, new, Clyde built, screw steamship OSACA, AA1, 483 tons register, horse power 90 nominal, 450 indicated, JOHN MADDISON, Commander, to load in the East India Docks. This beautiful steamer, built by Messrs. A. Stephen and Son, under special survey, is strongly recommended to shippers. All goods to be distinctly marked for which port they are intended.

For Freight or Passage apply to GELLATLY, HANKEY, SEWELL, and Co., 27, Leadenhall-street, London, E.C.; or POOL, Fold-chambers, Cross-street, Manchester.

With quick despatch.

FOR HONG KONG and WHAMPOA.—The new China clipper CHARLOTTE, A1 13 years, 590 tons register; T. H. FEARON, Commander; East India Docks. Has good accommodation for passengers.

For Freight or Passage apply to KILLICK, MARTIN, and Co., 10, George-yard, Lombard-street, E.C.

COLOMBO DIRECT, the well-known clipper ship TEVIOT, A 1 15 years, 433 tons register; JOHN WHEELAN, Commander; loading in the West India Docks. This splendid vessel has a full poop, with every accommodation for the comfort and convenience of passengers.

For passage apply to W. H. Tindall, 5, Tokenhouse-yard, and for freight or passage to F. Tallack, 23, Birchin-lane, E.C.

To Sail 3rd July.

DIRECT FOR COLOMBO, the splendid fast-sailing British-built ship, PALMERSTON, A1 15 years, 894 tons register, J. N. SEAGROVE, Commander; West India Docks. This magnificent vessel has just returned from Cochin in 95 days, and from her high class and quick passages offers the most favourable opportunity for passengers and shippers desirous of despatch.

For Freight or Passage, apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

To follow the "Palmerston."

Will meet with the usual despatch.

DIRECT FOR COLOMBO, the beautiful British-built clipper ship, SEA KING, A 1 13 years, 404 tons register, S. C. CLARKE, Commander; London Docks. This magnificent vessel, built in 1866, from her high-class and fast-sailing qualities, offers the best opportunity to shippers of fine goods.

For Freight or Passage, apply to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

To follow the "Haddington," and will sail July 1.

FOR BOMBAY Direct, the fine British-owned Clipper Ship JESSIE GILBERT, 3/3rds L. 1, 1, 635 Tons Register; JOHN STAPLEDON, Commander, East India Docks. This splendid vessel is nearly new, having just completed her first voyage, and from her fast sailing qualities is confidently recommended to shippers.

For freight or passage apply to JOHN C. CAMPBELL, 22 Great St. Helen's, E.C.; or to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C

To follow the "Jessie Gilbert," and will sail July 23.

FOR BOMBAY direct, the fine British-built iron clipper ship BEBINGTON, AA1, 880 tons register, THOMAS WARLAND, Commander, East India Docks. This splendid vessel, from her high-class and fast-sailing qualities, is confidently recommended to shippers of fine goods.

For Freight or Passage, apply to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

Printed for the Proprietors by RICHARD KINDER, Milford-lane, Strand, W.C., and published by JOHN ELLISON, at the Office of the "LONDON AND CHINA TELEGRAPH," 2, Cowper's-court, Cornhill, in the parish of St. Michael's, in the City of London.—Thursday, June 27, 1867.

The next inward mail, with Hong Kong dates to May 30, is not expected until the 16th or 18th inst. Telegrams from Shanghai to the 7th June were received via Kiachta on the 3rd inst. The telegrams of 13th June, from Hong Kong, via Galle, are now overdue. Via Calcutta, telegrams were received this morning from Hong Kong to the 18th and Shanghai 11th June. They quote a rise in Exchange to 4s. 5¼d. for bank bills and an advance in silk quotations.

List of Passengers.

PASSENGERS INWARD.

Per French mail steamer Said, arrived at Marseilles, July 6.—From Shanghai: M. Favre, M. Lehman and servant. From Hong Kong: Messrs. Ortez, Blanco, Casanueja, Pereiro, Saguez, Meyer, Ricolvins, Sutter, Remie. From Saigon: Mr. Dennis, Mdlle. Cornelie. From Batavia: Messrs. Graaf, Stenbergen, Van Buldoren, Dua, Mr. and Mrs. Van der Sayt. From Singapore: Messrs. McAllister, Nixon, Wiessner.

By last mail, to Marseilles, per P. and O. steamer Pera, arrived June 26.—From Shanghai: Mr. Wilson. From Hong Kong: Mr. Webb, Capt. Roberts, Mr. Harrison, Mr. Glover and servant, two Japanese officers and two servants, and one second-class passenger. From Singapore: Mr. Kidd. From Penang: Mr. Platt, Mr. Jones. From Ceylon: Mr. Dowden, Mr. Johnston, and two second-class passengers.

To Gibraltar: Mrs. J. D. Almeida, three children, and servant.

To Southampton: per P. and O. steamer China, arrived July 2.—From Yokohama: Lieut. A. Eaton. From Shanghai: Dr. S. Parker. From Hong Kong: Mr. and Mrs. Mercer, Mr. E. M. Baker, Mr. C. F. Barker, Mr. Lundham, Mr. G. R. Stevens. From Singapore: Mr. R. Bain. From Penang: Mrs. Sevenoaks and four children and servant. From Ceylon: Lady Chichester.

By last Bombay mail, to Marseilles: per P. and O. steamer Mooltan, arrived June 18.—From Penang: Mr. J. J. E. Brown. From Galle: Mr. Armitage, Mr. Levy, Dr. Gray, Mr. Russell.

To Southampton: per P. and O. steamer Ripon, arrived June 26.—From Ceylon: Mr. Moorhead, Mrs. Gardner, two Misses Moorhead, Mr. Hoyle. From Penang: Mr. and Mrs. Gottlieb.

PASSENGERS OUTWARD.

Per P. and O. steamer Nyanza, from Southampton, July 4.—To Hong Kong: Mrs. Budham.

From Marseilles, July 12.—To Penang: Mr. G. R. Main. To Singapore: Mr. James Greig.

Per P. and O. steamer, from Marseilles, July 20.—To Singapore via Bombay: Mr. J. M. Davidson.

Per P. and O. steamer Delta, from Southampton, July 20.—To Singapore: Mr. Armstrong, R.E. To Ceylon: Mr. Hudson.

From Galle to Shanghai: Mr. Bird.

Per P. and O. steamer, from Southampton, August 4.—To Shanghai: Mrs. Algernon Wright and child. To Singapore: Capt. Formochy. To Ceylon: Mr. Vivian.

Per P. and O. steamer, from Southampton, September 20.—To Ceylon: Mr. and Mrs. Rudd and two children, Miss Pinchand. To Singapore: Mr. and Mrs. J. McLachlan. To Hong Kong: Mr. Leopold Kalm.

From Marseilles, September 28.—To Hong Kong: Mr. E. H. Price.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Advices from this port by the present mail are to the 11th May. The English mail of March 11 arrived out on the 30th April, and the French mail of March 16 on the 9th May, the latter with London telegrams to the 3rd April. The news is meagre, having been anticipated by the *Colorado*, which brought advices to the 25th May.

The *Kai-yoo-Maroo*, the fine steam frigate built in Holland for the Japanese Government, reached Yokohama on the 30th April. The *Japan Herald* in announcing her arrival says:—"It may be well for the Shiogoon to provide himself with such means of upholding his power against the princes of Japan, but as against foreign Powers we should regret to find him so wasting resources that might be far more beneficially devoted to internal improvements. Those, however, who smile at the idea of these ships, manned by Japanese seamen, fighting similar ships manned by Europeans, must be reminded, that in all probability such antagonism will not arise, that there is every reason to hope that foreign Powers and the Government will continue on good terms; but that it is necessary for the peace of Japan that the Government be strong; and a Daimio would think twice before he ran the hazard of an encounter between the class of steamers generally purchased by them and these properly built and equipped ships of war. A few ships like the *Kai-yoo-maroo* and the *Fusiyama* in the possession of Government two years ago, might have saved a great deal of suffering in Japan by preventing the Choshiu war, and the consequent hoarding of rice, which has caused so much misery in these parts. It may cut two ways. It is probable that the concessions made by the Government in connection with commerce would not have been so numerous nor so extensive had they not had to bid against Choshiu for foreign sympathy and support; and certainly had there been no want in the country there would have been no permission to import rice; so that, in that view, it is possible that the future may more than make amends for the past."

Another troupe of Japanese performers, says the *Herald*, has left Yokohama for San Francisco. The performers are both male and female, and it is said that they are second to none of those who have preceded them, and superior to most. The greatest effort has been made to secure certain special artists whose *calibre* is acknowledged to be out of the common, and a great expense has been incurred in getting all the paraphernalia of a quality and character fitting that of the performers. They left in the schooner *Stanley*, which has been chartered for the purpose. This troupe is under engagement to Messrs. Baldwin, Gilbert, and Co., and will be known by the name of the "Great Dragon Troupe." These performers, after the magnificent theatres of Europe, will hardly care to return to the crazy edifices and the darkness made visible that they were satisfied with before, but will aspire to drawing money from their countrymen's pockets by showing them how such things are done abroad. Indeed, such is the peculiar energy of the Japanese that we should not be surprised to find them making arrangements with European athletes to perform in Osaka and Yedo.

Digitized by Google

On the 8th May a meeting was held in the Court-room of the British Consulate, to take into consideration the proposal of Mr. Pease to light the settlement with gas. The subject was briefly referred to in our last issue. The *Herald* says: "Mr. Pease stated that if 2,000 burners were subscribed for, at the price of $6 per 1,000 cubic feet, as he proposed, the profit would be considerable, and as the consumption increased the price could be lessened; but that the price of gas in San Francisco is $6.25; and it is so superior to any other light, taking all advantages and drawbacks into consideration, that they would burn nothing else there, even though its price should be double that of any other light. For lighting shops, factories, hotels, theatres, clubs, and large buildings generally, we can well credit this, but here we have but few such buildings, and have to consider mainly the use of it in our houses. At the present price of oil it is calculated that the price comes so close to that of the proposed gas that it may be considered on a par, and taking the employment of lamp coolies, breakage, and more particularly dirt and carelessness of servants into consideration, the advantage is quite on the side of gas. A prospectus is, we believe, to be issued immediately by Mr. Pease, and, as he returns to California by the *Colorado* and must take this report with him as to his success here, and as on that report will depend the probability of Yokohama being speedily lighted with gas—or the delay in accomplishing it for years—we think it useful to ask all householders to take the matter into consideration at once. In all probability, if two thousand burners are subscribed for, we shall have gas."

The following items are also from the *Japan Herald*:—"Some time since we heard that a proposition for a railroad between this and Yedo was not altogether distasteful to the Gorogio, and that a survey was about to be made for a telegraph. Whether the survey has been finished and there is anything more to come of it we do not know, but it is certain that the way is constantly becoming clearer, and before Japan has been opened to foreigners half as long as China has now been we may expect to see many of those European inventions in active use, against which the Chinese Government have hitherto set their faces most determinedly."

"The only item of general interest since our last has been the Spring Meeting of the Yokohama Race Club. A couple of pleasant days enabled crowds of both Europeans and natives to avail themselves of the enjoyment of the sport provided for them under the auspices of the Yokohama Race Club. On both days the weather was charming, and the grand stand, which is now quite complete and comfortable in every respect, was well filled, the majority of the ladies of the settlement being present on one or other, and some on both days. A variety was also produced on this occasion by the great number of Japanese gentlemen who were among the occupants of the grand stand, more particularly on the first day—but the event of greatest interest to them was naturally the race (one on each day) in which their own countrymen were the competitors on their own ponies and with all the national accoutrements. The casualties were fewer than usually occur at these sports; and on the whole the Spring Meeting may claim a place amongst the red letter days of Yokohama."

On the night of the 26th April, says the *Japan Herald*, the residents were roused from their beds by the ringing of the fire bells. A fire had broken out in a wood house belonging to the Rev. Mr. Brown, and the flames speedily spread to the residence itself, the family having but a short time to save themselves. The American Brigade brought their engine first up, followed rapidly by others; and a detachment of the French marines, 2-9th Regiment, Royal Engineers, and American sailors all lent efficient aid in saving property and preventing the flames extending to other buildings. Mr. Schoyer's house was saved only by the greatest exertion; everything movable having been taken out of it, and the walls kept deluged with water. The English Church was also in danger, but happily escaped. Among the most active workers was, as usual, Mr. William Crane; some *debris* fell upon him, and he was severe hurt in the back. Dr. Dunwoodie and Mr. Dalliston were with him in a few minutes, and had him conveyed to his residence, when it was found that he had received very severe bruises that will keep him to his bed a few days, but the report that quickly circulated that his spine was broken proved to be untrue. Universal will be the regret at the misfortune to Mr. and Mrs. Brown and their family. Mr. Brown has lost all his library and a great many valuable Japanese books, translations, &c. He succeeded in saving two translations only out of many—the gospels of St. Matthew and St. Mark.

The *Japan Times* has an article on the fire insurance question, from which we extract the following:—"The leading article of the *London and China Express* of Feb. 11th must have been read here and in China with considerable interest. It is not unlikely that our somewhat too sanguine predictions that Yokohama would immediately recover from even so great a shock, may have misled our London contemporary into the conviction that by the time the first February mail reached us 'the great fire of 1866 would have become a thing of the past.' The present depression of trade is not due entirely to the calamity which last November laid nearly half the town in ashes; the war in the Inland Sea, the scarcity of rice—partly from a short crop, partly from the cause just named—the uncertainty regarding the opening of the new ports, and the reflex of commercial disaster in other parts of the world—each and all of these causes have assisted in producing the general effect, and to none of them alone is it due that the immediate prospects of the Japan trade are singularly dull. The *London and China Express*, we are pleased to see, fully endorses an article in which we maintained that the policy of the agents, in raising rates at all, was irrational, hasty, and suicidal. We anticipated that the correction of this mistake would come from London, and are in no little measure astonished to find ourselves in the position of the subjects of Rehoboam, chastised with scorpions because we complained of being beaten with whips. The *Express* is perfectly correct in many of its remarks on the proceedings of the fire insurance offices and their agents—on the 'simple childishness' of refusing as a first-class risk a good building with wooden tenements in the same compound, while a similar house or godown in a separate enclosure, though surrounded with wooden huts in adjacent lots, would be taken; and on the injustice of increasing the previous heavy charge of 1 per cent. for first-class risks, while extra 'hazardous' ones in London are only mulcted three quarters. The concluding paragraph, too, is very forcible, but as we have used the same arguments ourselves on former occasions, we need not repeat them here. What we have to do now is, to consider whether there is not some way of escape from the crushing tyranny of the ill-advised London offices, and we are glad to know that we have not far to seek. Deliverance, in this instance—like promotion—cometh neither from the East, nor from the North, nor from the South. It comes from the West, from China—and those of our readers who care to know more details of our salvation than we give them now can learn them from the last report of the China Fire Insurance Company, published for the information of its shareholders on the 10th inst. in Shanghai. Although, when that was presented to the shareholders the directors must have been aware of the orders which had been sent, or were on their way out to local agents of the London offices in Yokohama, yet we see with satisfaction that they adopted the wise course of making no further increase in their rates, which will now stand at a reduction of 25 per cent. upon those of its rivals. The China Fire Insurance Company in Yokohama has a very brilliant future before it. To the extent of the risks it can take, it will indubitably now have the preference over the London offices, which have so increased their rates that the extortion of the China Fire, of only half as much, appears generosity by comparison. But the London offices are only waiting, says the *London and China Express*, for full information about Yokohama to return to the old rates. Would it not be as well for the China Fire Insurance Company to anticipate them? And is it not possible also that when this 'full information' reaches London, some clever actuary will see that his office can very well afford to cut out even the China Fire Company, by taking risks at half their figures, which would still leave a profit such as no London shareholder ever dreams of."

The following is from the *Japan Herald*'s Market Report:—

IMPORTS.—Since our last issue sales and deliveries have been of a most trifling nature and prices for most fancy goods may be considered nominal. For Grey Shirtings 7 lb. to 8 lb. 4 oz. there is some little inquiry at quotations. Yarn is also saleable at slightly easier rates.

SILK.—During the earlier part of the fortnight prices for medium and inferior silks receded, and since the arrival of the mail of March 28th have remained steady. Compared with the last our present quotations show a decline of from 20 to 50 dols. on the above sorts, whilst best Mybash remains without change. The settlements of the fortnight consist of about 120 piculs of Hank Silk, 70 of Oshio, 40 of Nagahama and Echizen and 20 of other sorts, say in all 250 piculs. Total settlements since the beginning of the season amount to 12,850 bales (of 80 catties), against 10,600 same time last year. Now considering that the arrivals during the past fortnight hardly amount to 175 piculs, and that the unsold stock, almost exclusively composed of the less desirable Silks, does not exceed 350 piculs (against 1,200 piculs last year same date), we are led to believe that the total export of this season is likely to be rather under than above 14,000 bales.

Digitized by Google

TEA.—Since the departure of the English mail on the 30th ultimo we have but few transactions to report in our Tea market, owing to the very small quantity of good Tea in the hands of native dealers, and foreigners are only buying for freight engaged; the amount required is very small, and we may say that the season is closed. Stocks are nominal, and consist principally of Common to Medium classes, with scarcely any Fine kinds. There have been a few transactions in barter for Piece Goods in Good Common at about our quotations. Prices are much the same as noted in our last report. A few musters of the new season's yield have been shown, but as they do not represent any parcel it is impossible to form any opinion from them as to the prospects and quality of the new crop. The accounts received from the native dealtrs are very promising, both as to quality and quantity, but we do not attach much importance to the statements. The Settlements are estimated for the fortnight at 1,100 piculs.

FREIGHTS.—To Shanghai. Per steamer; for Silk, 3.50 dols. per bale Measurement, 5.00 dols. per ton; per sailing vessel, 3.50 dols. to 4.00 measurement 40 cubic feet nominal. To Hong Kong, per sailing vessel, 4.50 dols. to 5.00 dols. Per steamer, 6.00 dols. per ton of 40 cubic feet. To London: Cotton and Tea, £3 to £3 10s. per ton; Silk, £4 to £4 10s. per ton of 50 cubic feet. To San Francisco: Light Freight, 6 dols. to 8 dols, per ton of 40 cubic feet.; per steamer, 15 dols. New York, per sailing vessel, £2. 10s. to £3; steamer, 45 dols. per 40 ft.

EXCHANGE.—Owing to the still limited demand for remittances and a fair amount of Private paper having come to this Market, Sterling rates have again advanced. After the departure of last mail, rates remained very stiff, and a considerable rise was anticipated; this was, however, checked by some sales of Private credits at 4s. 6¼d., and a fair business has been done at rates ruling from 6¾d. to 7d. In Bank sterling we hear of a little more revival in the demand, the Sugar and Rice shipments beginning to be cleared off improving the general market for imports.

NAGASAKI.

An American ship, the *Anna Kimball*, was lately chartered by a Mr. Lake, of Nagasaki, to trade for a term of several months between certain ports in Japan, some of which are not opened by treaty, but to enter which special permission may be given by the Japanese authorities. The vessel above named was shortly afterwards found by the Japanese officers lying near a place called Koo-roo-mi, flying the Japanese flag and loading rice. She was at once seized by a Japanese Government steamer and taken to Nagasaki, whence she has since sailed for Shanghai.

The following is from Messrs. Alt and Co.'s market report, dated 1st May:—

Since the date of our last report we have been placed in possession of the English mails of the 26th February and 10th March, and the French mail of the 15th February.

IMPORTS.—Were it not for the continued unsatisfactory state of our coinage, and the difficulty experienced in realising the native currency, a brisk business would now be doing. Lawns are daily inquired for at quotations, and as stocks are low prices will advance as the weather becomes warmer. Turkey Red Cambrics and Prints, these latter of large floral patterns, are also in small stock, and much wanted. Spanish Stripes: Black and Scarlet in demand. Handkerchiefs more in request. Grey Shirtings: 5½ catty goods wanted, as also is yarn of good quality. White Shirtings also still continue to be inquired for. Shanghai Cotton, in consequence of heavy importations, has receded in value, but still continues in fair demand. Camlets and Taffechellas are still in heavy stock. Metals: Nail Rod (small sizes) and Bar Iron, as also Pig, wanted. Lead also in demand at quotations. English Coal: Stocks nil.

EXPORTS.—There has been less doing in produce during the past month, owing to supplies coming more slowly forward. Tobacco and Vegetable Wax of good quality are scarce, but there is no alteration to quote in prices. Camphor and Sulphur are in fair supply, with only a limited inquiry. Galls and Rapeseed Oil are in small stock, and the latter has advanced in value since the date of our last. Tea: Buyers appear to have lost confidence of late, and are chiefly holding off in the hopes that with stocks accumulating, holders will have to accept lower rates before the new crop arrives. Transactions have consequently been only on a small scale.

EXCHANGE.—On London, 6 months' bills, 4s. 4d. to 4s. 4½d. per dollar.

FREIGHTS.—There is not any vessel loading for either London or New York. For Shanghai the rate is $3.50 to 4 per ton. For Hong Kong, $4 per ton.

CHINA.

SHANGHAI.

The P. and O. mail of 26th March arrived out on the 10th May with telegraphic advices to 16th April. Dates by this mail are down to the morning of the 20th. The following items are from the *Supreme Court Gazette* of 18th May:—

Sir Rutherford Alcock, daily expected in Shanghai, has not arrived. The most important item of local intelligence is the meeting of electors on the French Concession, which was held on the 15th.

The report shows that the symptoms of poverty which have been thought to be apparent were not a reality, but are accounted for by the fact that considerable sums were formerly raised from sources at present suppressed. The year 1864-5, for instance, shows a total receipt of 101,000 taels, but deducting the amount from gambling houses, night passes, and other sources now given up, it shows the total revenue at that time as at present to be about 62,000 taels. The total receipts during the past year have been 62,227.89 taels, and the expenditure 26,221; but notwithstanding the smallness of this sum, the old debt has been reduced by 8,386.06 taels, and is now only 7,704.37 taels, against 16,090.43 taels in the Budget of 1866-67.

The estimates for the present year are in total 93,400.41 taels, namely, nett receipts, 85,890 taels; arrears, 5,500 taels; balance in hand, 2,010.41 taels. The nett estimated receipts show an increase on 1866-67 of 23,663 taels, but as 25,000 taels is looked for from wharfage dues, there is a difference of 1,500 taels estimated in favour of coming year.

The U. S. S. S. *Ashuelot*, recently returned from Formosa, having been sent to the spot where the crew of the *Rover* were supposed to have been lost, with orders to investigate, has returned to Amoy, but reports not having been able to obtain immediate redress, the neighbourhood being entirely deserted.

On Saturday last the bi-annual sports in Shanghai were brought to a close, the interest, as evidenced by the attendance at the Grand Stand, having been maintained throughout. In the light weight Hunt Cup Hurdle Race, Bogtrotter, Chef d'Œuvre, Evasive Answer, and Golden Fleece started, Bogtrotter taking the lead and maintaining it throughout; Chef d'Œuver second, Golden Fleece third. In the heavy weights Hurdle Race Potshot came in first, Seprehaun second, and Evasive Answer third. The race was well contested throughout, and run at a good pace, the style of jumping being much admired. Some good scratch races terminated the day's sport.

An accident of a rather serious nature occurred the other day, from which it was at one time feared several lives would be lost. It appears that when the pilot from the *New York* pilot boat boarded the steamer *Carthage*, it was blowing rather fresh, and the night being dark, the boat after leaving the steamer was not heard of again till yesterday, when news was received that the crew, consisting of a European and two Chinese, had reached Ningpo. It appears that they were unable through the darkness of the night and the force of the tide to reach the schooner, and after pulling about for some time, not knowing in what direction they were being drifted, and when they were already becoming exhausted, a Ningpo junk fortunately came in sight and took them on board.

A melancholy occurrence took place on Sunday last on board the same boat. One of the sailors commenced acting in such a manner as to lead to the impression that his mind was wandering, giving utterance to expressions which showed he was under the hallucination that some one was about to murder him. He seized an axe near at hand with the object, as he stated, of defending himself against an attack; and shortly after, availing himself of an opportunity when no one was near, he jumped overboard, and after rising once or twice to the surface, still declaring that some one was seeking his life, he sank before assistance could be rendered.

On Wednesday evening the new gymnasium was graced by the presence of several ladies, who had undertaken to assist at the distribution of the prizes to the successful competitors at the late athletic sports. Mrs. Butcher and Mrs. Bayne presented the prizes. Mr. Cooper received a handsome cup for the ¼-mile flat race; Mr. Cook carried away three prizes, namely, two cups for the high and long jump respectively, and a cricket bat for throwing cricket ball. Messrs. Wade, Reid, and Hutchins were not present, but their respective prizes were given to their representatives.

The volunteers mustered yesterday at the Mainguard and proceeded under the Commandant to the Consulate grounds, where a number of spectators were assembled for the purpose of seeing the prizes distributed to the successful competitors at the late rifle meetings. Mrs. Fitz Roy distributed the prizes to the Custom-house Corps, the various members receiving them with the usual military salutes and gracefully acknowledging the compliments of being presented with them by the ladies. Mrs. Fitz Roy's delivery of the addresses was the subject of much admiration, it being clear and distinct and quite audible from the ranks. Mrs. Goodwin and Mrs. Tate also took part in the distributions, and Sir E. Hornby presented some of the cups. We regretted to see so small an attendance of the Shanghai volunteers, as compared with the Customs' Corps, a subject upon which Sir E. Hornby expressed much regret in addressing the corp during the proceedings.

A case of stabbing occurred at Hongque on the evening of the 9th inst. It appears that two Malays had a quarrel about some affair which had occurred at Singaporo, and to settle the matter they set to fighting with knives. One man received several cuts across the fingers and on the back, the other was stabbed in the head, but fortunately not seriously. They were taken to the hospital in the Shantung road, where their wounds were dressed by Dr. Sibbald.

Digitized by Google

A burglary was committed at 188, Hongque Village, about 1.15 A.M. on the 11th inst. About ten Cantonese broke in the door of the house with a large stone, forced open several boxes, and ransacked the place. They took away 10,000 cash, 21 pieces of Chinese clothing, and five pieces of Chinese calico. They were all armed with knives and carried torches. They left two stink pots behind them.

The seamen's church Hulk, *Bethel*, has been sold for the sum of taels 700. The Portuguese Theatrical Amateurs have given two very good performances at the Lyceum Theatre.

A challenge has been forwarded by the Hong Kong Rifle Association to the Shanghai rifle volunteers to fire a match between two elevens, and our Hong Kong friends are, we hear, practising with energy.

A very unexpected occurrence took place during the voyage of the brig *Argo*, which arrived in this port a day or two since from Sydney. It appears that while about ten miles distant from Anoda Island (one of the Hebrides), on the 26th March, three boats filled with savages were seen approaching, one from the starboard and two from the port side. They came alongside the vessel, which was carrying a moderate breeze, and attempted to board her, but fell astern at the sight of firearms. They then consulted together, and made another attempt to reach the vessel; but the breeze stiffening they were prevented from coming up with her, and gave up the pursuit. The savages were quite naked, and had long hair of a dark brown colour reaching below the waist, and they were all of them beyond ordinary stature. Shipmasters will do well to be upon their guard in going through these passages. The island abovementioned has hitherto been considered uninhabited, and it was thus that the boats were not discovered until they were almost under the ship's stern; and but for the breeze blowing the savages might have been on board before a musket could have been loaded.

As a first, though gentle step towards the reduction in steamer fares, which we have frequently advocated, we (*Daily News*) are glad to learn that the *Colorado* will carry passengers from Shanghai to Yokohama for $90, instead of the 100 taels which are exacted by the P. and O. Company. As the *Costa Rica* may be expected here in about six weeks, to run regularly between Shanghai, Nagasaki, and Yokohama, in connection with the mail line, we expect that the P. and O. Company will be obliged to reduce their fares twenty-five per cent., also, under penalty of being overlooked. We would gladly learn that the S. S. N. Company had followed the example of the Pacific Mail, by reducing the extravagant rates now charged on the coast and the Yangtsze.

The steamer *Maria* was sold at auction by Messrs. Lane, Crawford, and Co., for 3,175 taels; purchaser, Mr. F. Jenkins.

In a late issue we noticed the preliminary number of the *Hong Kong Punch;* we have now to acknowledge the receipt of the first number of the *Shanghai Punch*, which has appeared full-fledged, without any premonitory sign. The title page is a somewhat meagre imitation of that of the great original of Fleet-street; *Mr. Punch* himself being represented in Chinese costume with an expression of countenance more suggestive of imbecility than humour, while *Toby's* place is usurped by a horribly ferocious looking dragon. It is altogether far inferior to the specimen title page we have received of the forthcoming *Hong Kong Punch*. On the first page, *Mr. P.* of course makes his bow and chin-chins the Shanghai public over an opening address in verse. There is one full-page cartoon, and two half-page illustrations relating of course to subjects of local interest, and all very roughly executed. It is printed at the *North China Herald* office, at the price of ONE DOLLAR; and truth compels us to say, it appears decidedly dear at the price, even allowing for some improvement which will doubtless manifest itself in future numbers. With the strong tendency to retrenchment that is said—and we hope with truth—to have lately shown itself in Shanghai, it seems doubtful whether *Mr. Punch* will be able to boast of a satisfactory roll of subscribers there at the price of between four and five shillings a number.

IMPORTS.—The advices received per *Yingtszefee* from Tientsin were regarded as most unsatisfactory, the Chinese accounting for the dulness of trade there by the drought that had extended over a period of three months and injured the prospects of the crops. Prices showed no margin on the rates ruling here, which has made the natives rather anxious sellers of their previous purchases, and the business done by foreigners has been quite limited. The demand for Hankow continues steady, and we now look quite as much to that market as to Tientsin to relieve us of our stocks. The arrival of the S.S. *Agamemnon* and the *Challenger* are just announced, and several other vessels must be close at hand. In Woollens a small demand has sprung up for Long Ells and Camlets.

TEA.—The only transactions reported on this market since our last issue are a chop of Shanghai-packed tea at tls. 29, a chop of very common Fychow at tls. 20, showing no alteration on previous rates. A few musters of new Monings have been forwarded here from Hankow; they appear rather well made, but very poor in quality. Musters from Nipcasee district are expected in Hankow about the 18th inst. Prices for leaf had declined in the country, and finest teas are reported by Chinese to cost laid down in Hankow tls. 28. The *Ada* has gone up to load from Hankow direct, and has arrived safely at that port. The *Eliza Shaw* has been laid on the berth here for London.

SILK.—We hear of very few complaints amongst the Chinese about the crop, and the popular estimate is at least 45,000 bales for the season. Some foreigners, we understand, are prepared to open the market at 450 to 480 taels for No. 3 Tsatlee, but we think few will be prepared to follow them.

EXCHANGE.—The non-receipt of telegrams via Russia and the consequent continued uncertainty as to the course of affairs in Europe have caused disinclination on the part of both merchants and banks to operate pending the arrival of the mail with later telegrams, expected on the 18th inst. Some small sales of private bills have been made at 6s. 2⅛d. to 6s. 2⅜d., six months' sight.

LATEST QUOTATIONS.—Grey Shirtings, 5½ catty, tls. 2.3 to 2.3.5; do. 6½ catty, on spot, tls. 2.6.6 to 2.7.5; White do., 64 reed, tls. 2.8.5; T-Cloths, 5½ catty, tls. 3; Long Ells, HH Scarlet, tls. 7.4.; do. Assorted, tls. 7.2; do. CPH Scarlet, tls. 7.3.5; do. Assorted, tls. 7.1.5; Spanish Stripes, Elephant, tls. 0.6 to 0.9.5.; Camlets. SS, tls. 15; do. SSS, tls. 13.5 to 14; Lead, W. B., tls. 6.2.5. to 5.4; Iron, Nail Rod, tls. 2.5.5; Opium, New Malwa, tls. 550; do. Old do., tls. 560 to 565; do. New Patna, tls. 455; do. Old do., tls. 450.

EXCHANGE.—On London: Bank, 4 months' sight, 6s. 0⅛d. per tael; Credits, 4 months' sight, 6s. 1⅛d. to 1⅛d.; Bills with doct., 4 months' sight, 6s. 1⅛d. to 2d. On Paris: Credits, 4 months' sight, 7.72½ francs; Documentary, do., 7.75 francs. On Calcutta: Bank, 3 days' sight, Rs. 299 per 100 taels. On Bombay: Bank, 8 days' sight, Rs. 298 per 100 taels. On Hong Kong: Bank, 8 days' sight, 26¼ discount; Private, 15 days' sight, 27 do.

BULLION.—Gold Bars, Peking: 167½ taels per bar of 10 taels weight; Mexican Dollars: 74.60 taels. Carolus do.: 75 taels. Copper Cash: 1,360 per tael.

FREIGHTS.—To London: Tea £3 per ton.

HONG KONG.

The following items are from the *China Mail*:—

A meeting of the Legislative Council was held on the 17th inst., his Excellency presiding. Ten new ordinances were introduced and read a first time. They relate to—the definitions of words and expressions ordinarily used in different ordinances; the appropriation of $125,000 supplementary estimates for 1866; the importation and storage of gunpowder; for better securing the health of Chinese emigrants from Hong Kong; for the establishment and regulation of a naval yard police force; to amend the market ordinance; to amend the law of partnership; for resumption of the Mahomedan Cemetery; for the better collection of rates; and for checking the spread of certain contagious diseases.

The cross-action in the matter of the collision between the *Pieter* and *Helen Louise*, re-heard before the hon. Chief Justice in Admiralty yesterday, was, we understand, settled by an amicable compromise shortly after the Court closed yesterday afternoon. We believe that the owners of the *Helen Louise* have agreed to accept the sum of $1,500 as their share of the damage done to their vessel, leaving the owners of the *Pieter* to repair their vessel at their own expense. After what fell from the judge in court touching this matter, it is difficult to see what better arrangement could have been come to.

The cricket match between Hong Kong and Shanghai has had a most inglorious result for the former, whose representatives were beaten in one innings, with 36 runs to spare. The second day's score is not given by the Shanghai papers to hand by the *Suwonada*. We gave the first day's score yesterday. The match was resumed on the 8th, the two not outs, Toller and Brinkley, going to the wickets; they hit the score up to 100, when Toller hit one round to short leg which was taken by Price, a very fine catch this (7 for 106). The two next comers, Gibb and Deane, did not trouble the score (8 for 114 and 9 for 118), and the last wicket was bowled soon after (10 for 121), leaving Brinkley not out; his innings was a very carefully played one. The Hong Kong, being in a minority of 118, had the pleasure of following their innings, which was commenced by Brinkley

Digitized by Google

and Thompson to the bowling of Mollison and Turnbull. The first wicket (Brinkley's) fell without a run (1 for 0), and the next wicket went soon after (2 for twelve). The two men now in made a stand, although runs were got but slowly, the bowling being on the spot, till Thompson hit one round to leg, which was cleverly taken by Price; this was the third catch he had made in the same place (3 for 27). Bird went in, finished the over, and play ceased for the day. Play was resumed at 9.30 next day. A dinner was given by the Shanghai Club in honour of the Hong Kong "Eleven," which went off most successfully. Besides the toasts usual upon such occasions, the health of Messrs. Gibb, Livingstone, and Co., and Messrs. Jardine, Matheson, and Co. as the originators of the contests between the two ports were proposed and heartily responded to. The health of Mr. Edward Whittal, who is about to leave Shanghai, was also proposed and warmly received. After the match a game at double racquet was played. Shanghai (says the *Recorder*) was represented by Messrs. Hyslop and Fisher, and Hong Kong by Messrs. Davidson and Boddam. Shanghai won the first three games, and Hong Kong the last four.

Regarding the magnitude of the stocks of tea, which have for a lengthened time been allowed to accumulate upon the home market, the *China Mail* says :—"In a false idea with respect to the quantity of the article which it is advisable to have on hand at a given moment, is, we think, to be found the key to many of those anomalies which have characterised the trade, and there is little doubt that the great cause of the depression now existing in the home markets is the superabundant stocks on hand, the magnitude of which makes it impossible for any ordinary deliveries to keep it in healthy circulation, without which disastrous consequences must inevitably arise. This circumstance has also been much aggravated by the hurried manner in which large quantities have been purchased and shipped off from China during the early months of the season, the effect of which, arriving at home within so short a space of time, must be necessarily damaging to the tone of the market. The depression thus early established has made itself felt throughout the year, and a dragging and unprofitable business for all concerned in it has been the unfortunate but natural result. The old-fashioned idea that a minimum working stock equal to eight or nine months' requirements is wanted, would appear to be a complete fallacy, seeing that of late years the most weakly state of the market has been during the period when the figures were reduced to about this quantity. Judging from the smallness of the stock of tea in America, at times unaccompanied by any advance in prices consequent thereon, and also from the nature of the stocks of other important articles of commerce usually held in great Britain, we say unhesitatingly, that there was not the slightest necessity in the present age of regular supplies for other than the most insignificant stock on hand. In fact, the whole course of the Tea market for the past few years would go to prove the truth of this assertion. We have had examples of extreme depression ruling in the market for sugar, caused by heavy stock, equal to three months' requirements, and a reference to statistical tables of other articles would show us that the deteriorating articles of tea stand aloof from almost all others in the size of its stock. Cotton at the end of last year was equal to a six weeks' supply, but the knowledge that further quantities would arrive kept the value as it had been, and at the present day we may say that China is practically as near to England as the United States are. The greater wonder to us now is, not that prices of so deteriorating an article as tea should have lately receded, but that they were ever kept up in the face of the huge quantity in the country. The following data will show the expansion of the trade, and a little reflection upon the increased figures will suggest the altered nature of it :—

	Imported. lbs.	Delivered. lbs.
1845	51,000,000 ...	48,250,000
1850	50,500,000 ...	56,200,000
1855	83,250,000 ...	77,050,000
1860	89,000,000 ...	85,200,000
1866	138,500,000 ...	133,600,000

"The experience of the last few years would serve to convince us that under ordinary circumstances it is useless to expect that the home trade will hold any larger stock of tea than that necessary to meet their actual requirements. Occurrences of past years have demonstrated the wisdom of this course, and the business as now conducted does not necessitate their acting contrary to it. Under these circumstances we must look to the merchants only for support to the market, and whether or not they are able to give their support is a question worthy of consideration. If they are able, well and good; if they are not, it will be both interesting and important to push the inquiries still further and endeavour to discover the ultimate results of this inability to hold. The effect of the four months' usance, likewise, it will be well to calculate. It will, without doubt, in many cases compel people to realise their produce at once, and bills drawn against shipments will require to be provided for in some instances before the arrival of the ship. This in some cases may be a difficult matter, especially during a period of political uneasiness, and we must not be surprised if home people hesitate to accept bills presenting themselves at such seasons, unless they are prepared to meet them at maturity without obtaining outside assistance.

"The value of tea was in commercial phraseology "bolstered" up for a number of years by the wealth of those engaged in the business; now this wealth is reduced, the market takes its natural course, and a reasonable scale of prices is the consequence. English money maintained for years a stubborn stock of eighty up to one hundred and ten millions of pounds of an article daily deteriorating in quality and lessening in value. When merchants have learned further severe lessons and become wiser; when they have perfectly satisfied themselves that the course of the tea market is an even one, and have commenced to trade, rather than to speculate in it; then, and not until then, will the burden of holding the stock be put upon the back of the Chinaman, from whom the foreigners will be able to purchase when they desire, and at a time suiting their financial arrangements, instead of, as at the present time, condensing into two months transactions which ought properly to belong to six. The effect upon the home market of the arrival of so great a weight of tea during the early months must always be to find out the weak holders, and of course to depreciate the value of the produce held by all, whether weak or strong.

"The beneficial effects of a stock being held in China would be of a double nature. Besides lessening the shipments in the early months of the season, it would compel the native to bestow more care and attention to the manufacture of his tea than up to the present time he has considered it his interest to do. He then would not be able, as he now is, to quit his hurriedly prepared purchases and retire again into the country to swell our supply later on with just as ill cared for teas, and we should have fewer complaints from England of the vapidness and unsoundness of the shipments of late years.

"If the fact that the position of the trade within late years has been completely changed be borne in mind, and an amount of care be displayed commensurate with the importance of the alteration, we may hope for the future to escape disasters which up to the present time have bade fair to remove the trade from the hands of those who have conducted it with such melancholy results.

Mr. Ball, the Judge of the Summary Jurisdiction Court, has been appointed to act as Colonial Secretary.

The following is a return of average notes in circulation and of specie in reserve at the undermentioned banks for the weeks ending April 30 :—

	Notes.	Specie.
Oriental	.. $394,300	.. $200.000
Chartered Mercantile ..	.. 312,900	.. 250,000
Chartered of India, &c. ..	.. 153,265	.. 100,000
Hong Kong and Shanghai	.. 894,440	.. 350,000

(FROM OUR OWN CORRESPONDENT.)

May 24, 1867.

I am no longer able to record, as I have done in one or two preceding letters, that the trading community of this place and Canton are continuing to hold out in combination against the demands of the native tea dealers. The market for new season's scented teas has been opened at Canton by considerable purchases on the part of two or three houses, who, perhaps moved by the consideration that two specially chartered tea clippers were lying idle at Whampoa, have bought some eight or ten chops to date, at an average of 25 to 26 taels, much, however, to the distaste of the remaining tea-buying firms, who continue to hold off for a further reduction in prices. It is argued that, whereas at Foochow the rates have been considerably lowered, it is imprudent to open the market here at the prices mentioned above, and hence a split in the combination which it was vainly hoped would produce an impression on even Chinese obstinacy. On the other hand, it is argued that the excessively unfavourable weather of this spring will depreciate the

Digitized by Google

quality of the Canton teas not yet come forward, and that the comparatively high rates given will not turn out unjustified in the long run. A wetter spring than this has been has certainly never been experienced, and its effects on the coming season's silk crop are likely to be also unfavourable. The country-people in the adjacent province are also beginning to fear for their rice-crop, as the alluvial lands are inundated to a frightful extent.

The changes in the colonial administration are beginning to be very numerous. Last English mail took away the Hon. W. T. Mercer, who leaves Hong Kong definitively, whilst by this steamer goes the Auditor-General, the Hon. W. H. Rennie, proceeding to England on leave, and the Colonial Treasurer, Mr. Forth, is also bidding farewell to Hong Kong. The Colonial Secretary's duties are discharged by Judge Ball pending further arrangements, and it is understood that those of the Auditor-General will be entrusted to the Postmaster General, Mr. Mitchell, on his return from Japan, where he is at present arranging for the establishment of postal agencies at the various ports. The deputy postmaster, Mr. Simpson, will be placed in charge of the post-office to be established at Yokohama.

Politically, Hong Kong has been very quiet lately, and the good effect of the various measures introduced by Sir Richard MacDonnell is becoming daily more apparent in the sensible diminution or rather disappearance of crime. Six police constables recently arrived from the London force form a valuable addition to the Hong Kong constabulary, and their arrival has enabled new stations to be opened in some of the worst quarters of the Chinese town. Among a batch of new ordinances lately laid by the Governor before the Legislative Council the two most important are, one for further regulating Chinese emigration from Hong Kong, and another for amending the law of partnership and assimilating the local ordinance to the Act of Parliament passed last year, by which the principle of limited liability is extended to private firms. In respect to this change, the opinion is tolerably general that it would have been as well to wait a year or two longer in order to obtain a better idea as to the working of the Act in England before introducing it here. The Emigration Ordinance is merely an amplification of the rules established in 1855, and does not attack the root of the evil, which always afflicts with a kidnapping taint the despatch of Chinese labourers under contract from Hong Kong. Private agents are still permitted, as heretofore, to make a trade of collecting such "emigrants," and there is therefore no safeguard against a repetition of the Lobscheid scandals, whilst native crimps are equally permitted to bring "emigrants" from the mainland to Hong Kong, simply on the condition that the victims remain resident for three days on shore prior to embarkation. Experience has proved in the most conclusive manner that the employment of native crimps or "brokers," who for a certain sum per head bring in as many villagers from the mainland as they can delude or force into following them, is in reality the Macao system in a very thin disguise, and that once away from their native village the unfortunate victims yield passive obedience to every mandate of the broker who has led them away. It is difficult to see for what reason Hong Kong should be made the seat of Chinese emigration at all, as it is only by such means as the above that emigrants can be attracted here, and so long as the system is maintained at this place there is difficulty in condemning the more flagrant evils of Macao.

Admiral Keppel is about leaving this *en route* for the north of China and Japan in H.M.S. *Pearl*, his own despatch vessel, the *Salamis*, being laid up in dock at Whampoa in consequence of the serious injury she received whilst proceeding up the Sarawak river. It is a curious coincidence that the *Salamis*, with Admiral Keppel on board, should have struck the same rock on which the *Dido*, when commanded by Captain Keppel twenty years ago, was similarly injured. The repairs to the *Salamis* will occupy, it is said, fully two months. There seems to be no grounds for the supposition that Admiral Keppel has any instructions to operate against Corea, whilst the French, for their part, have also taken no steps whatever in that quarter.

STRAITS SETTLEMENTS.

SINGAPORE.

Dates hence are to the 2nd of June. The French mail of April 17 was delivered on the 21st May, and the English mail of April 26 on the 28th May.

At a meeting of the Legislative Council held on the 24th May an Act to amend the Stamp Act was read a second time, and an Act to prevent the exportation of arms, ammunition, &c., was read a first time. The Governor left for Penang on the 26th May.

The new Government (says the *Straits Times*) has set to work upon a series of local enactments, which, by their number, at least evidence a praiseworthy amount of diligence; though it may subsequently be found that we are pushing forward reform a little too hastily. Legislation is not the only field upon which the industry of the Legislative Council has displayed itself. Public works have come in for a fair share of regard, and the number of these is to be added to by the erection of a Government-house, at an estimated cost of $100,000, $42,000 having already been voted for the purchase of the land on which it is to be built. The selection of the site is a good one, in so far that it is close to town and readily accessible; though a somewhat fancy price has been paid for it, seeing that it entails the absorption and subsequent demolition of three or four existing residences. Whether or no it be that, inured to a languid Government for many years, we are startled by a sudden activity like this, the impression prevails that it would have been wiser of the new Government to have pursued a cautious policy for the first months of its existence. It is right to remark, however, that the resolution before the Council, sanctioning the expenditure upon a Government-house, was proposed by one and seconded by another of the two representative members present.

The new Tanjong Paggar Docks now appear to be in full operation, and the *Straits Times* gives a striking illustration of the great saving effected in both time and expense by vessels making use of them. Hitherto Singapore has not enjoyed a good name for promptitude in discharging and loading vessels. The custom that has prevailed here of each consignee sending special boats for his own cargo caused endless loss of time, much extra trouble, and in too many instances led to cases of pilfering by boatmen, the consequences of which have generally fallen on the unfortunate captain or shipowner. The tendency of any great evil is to correct itself, and so it has proved in this case. Singapore now possesses extensive public wharves, situated at Tanjong Paggar, easy of access and affording a sufficient depth of water alongside for vessels of the largest draught. By means of steam cranes cargo can, we believe, be discharged as quickly as at any of the London docks, and as it passes at once from the ship's side to the custody of one of the dock officers there is no possibility of a recurrence of those instances of pillage which were formerly so frequent. We have been led to these remarks by a memorandum that has been put into our hands, from which deductions bearing so strongly on the interests of shipowners are drawn that we deem it advisable to publish it in extenso.

Singapore, 4th May, 1867.

MEMO.

Newcastle, 388 tons register, from London, arrived at Singapore on 26th March, discharged in Roads, and sailed 24th April, say	28	days.
Belle of Southesk, 547 tons register, from London, arrived evening of 4th April, began discharging at Tanjong Paggar midday 5th, sailed at daylight on 14th; time discharging say ...	9	,,
Difference	19	days.
Expenses of *Newcastle*, say $1,200 per month, at $40 per diem	$760	,,
Wharfage on *Newcastle's* cargo, say 700 tons, at 25 cents.	175	,,
Difference in favour of T. Paggar	$585	,,

besides freedom from claims for demurrage of boats, pilfering in boats, and other annoyances.

[An excellent map or plan of the company's docks and wharves has been issued by their London agents, Messrs. Mactaggart, Tidman, and Co., Great St. Helen's.]

By the return of the *Rinaldo* from Klang the following outlines of her expedition have been made. The *Rinaldo* left Singapore for Malacca on the 6th May, accompanied by the colonial steamer *Pluto*, and arrived there the following day, where the Acting Lieutenant-Governor and Captain Playfair went on board, and proceeded to Klang, having previously sent on the steamer *Fair Malacca* to that port. There they found the steamer *John Bull*, under English colours, anchored at the mouth of the river, but as the Rajah Dollah requested that she might not be moved until the arrival of a gunboat named the *Coquette*, the *Rinaldo* allowed her to remain at anchorage until the *Pluto* and *Fair Malacca* had proceeded up the river and returned. The latter vessel succeeded in bringing down 1,600 slabs of tin, one-tenth

Digitized by Google

of which was taken by the Sultan of Puasa on behalf of the Sultan of Salangore, and the remainder by one of the owners of the *Fair Malacca*. This steamer scarcely took any Chinese passengers or their wives or families from Klang to Malacca, so we presume that the report which was in circulation not long ago that they were starving must have been merely a ruse for the purpose of getting the Government to afford protection to the vessel whilst she ascended the river to get the tin; for, so far as we can learn, she did not take any rice on her last trip from Malacca to Klang. The *John Bull* was lying at anchor at Malacca when the *Rinaldo* left, and the *Pluto* and *Fair Malacca* may be expected here to-morrow, when we hope to receive further particulars. We must not, however, omit to mention the fact that Rajah Maali has succeeded in taking possession of the greater part of the Klang territory, and that the only fort held by Rajah Dollah is that at the mouth of the river, so in all probability this petty warfare will soon be at an end.

PENANG.

From this port there is little news of interest. The change in the Straits Government does not seem to have been effected without causing some inconvenience here, as the following extract from the *Penang Gazette* will show:—"We are informed that the officials in the Government offices here have not been able to draw their pay for the last month in consequence of the non-receipt at this station of orders from the Government authorising the pay. This neglect, although it may not affect the higher class of Government officials, will nevertheless be severely felt by those holding subordinate positions and who are entirely dependent upon a *monthly* salary."

The *Gazette* has also the following amusing item:—"A 'snake in the grass' has been often alluded to, but it is only the other day that a snake in a clock was discovered in the church-steeple. It would appear that the church clock is a favourite spot for roving animals of the Saurian or Simian tribe. Some time ago a monkey got loose and took it into his head to have an investigation of the church-clock, turning the handles about so that the time was *nowhere*. Afterwards a small boa constrictor of about four feet long was found in the church-clock but was killed by the convicts in charge. It is presumed that that the recent pruning of the Casuarina trees in the church compound had dislodged the animals which so startled the people in charge."

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

DURANT—On the 26th June, at Dorking, the wife of Frederick Durant, of a son.

GODDARD—On the 27th June, at Victoria-road, Clapham, the wife of Mr. James Goddard, jun., of a daughter.

HEAD—On the 24th June, at Ashurst Lodge, Ashurst, Kent, the wife of Charles Head, Esq., of a son.

MARTIN—On the 23rd May, at the Hotel d'Europe, the wife of Edward Martin, Esq. (Madame Bouché), of a son, who lived but a few hours.

PIERCY—On the 17th May, at Canton, the wife of the Rev. George Piercy, of a daughter.

MARRIAGE.

SEARE—SIMMONS.—On the 18th June, at St. Matthew's, Oakley-square, by the Rev. C. Phillips, Benjamin Powell Seare, Esq., son of Benjamin Seare, Esq., of Yokohama, Japan, to Victoria, youngest daughter of W. H. Simmons, Esq., of 247, Hampstead-road.

DEATHS.

GUNDRY—On the 2nd July, at Bridport, Dorsetshire, Samuel Bowden Gundry, Esq., a magistrate for the county, in the 76th year of his age.

HOBBS—On the 6th May, on board American ship Borneo, at Singapore, Arthur H. Hobbs.

PAGLAR—On the 11th May, at Malacca, Jane Louisa, wife of Mr. L. Paglar, aged 25 years.

NEWLANDS—On the 4th May, at sea, off Anjer, Captain Alexander Newlands, of the screw steamer Philopene.

ROSS—On the 5th July, at his residence, Cathry-house, Cullen, Banffshire, William Ross, Esq., late of China.

SHEPHEARDSON—On the 16th May, at Malacca, Mr. John Shepherdson, aged 65 years.

Advices received in London on the 6th inst. from Bombay report that the shareholders of the Commercial Bank of India and the East at Bombay had fully agreed with the resolutions passed at the London meeting some months since. The London shareholders will meet again on Tuesday next, when final arrangements will be made for the resuscitation.

The P. and O. Company's steamer *Nepaul* has been sold to the Japanese, through Messrs. Alt and Co., Nagasaki.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—None.

At SHANGHAI.—From London, May —, Challenger, (Gossamer, Laurel, reported by telegram); May —, Coulnakyle; from Liverpool, Maiden Queen, (reported by telegram).

At HONG KONG.—From London, May 18, Pakwan; from Liverpool, 18, Northumbria; 24, Ajax (s.); from Portsmouth, 23 (via Singapore &c.), H.M.S. Urgent; from Cardiff, 13, J. W. A. Lorenzen; 19, Quid Holland; from Shields, 19, Alma; from New York, 22, Melrose.

At SINGAPORE.—From London, May 12, Zingra; from Portsmouth, 11, H.M.S. Urgent; from Shields, 10, Koophandel; from Liverpool, 12, Ajax (s.); from Hamburg, 13, Aracan; from Clyde, May —, Dragon (s.)

DEPARTURES.

From SHANGHAI.—For London, May 16, Crawshay Bailey.

From HONG KONG.—None.

From SINGAPORE.—For Liverpool, May 13, Matsura; 11, for Falmouth, Prinz Regent; for Bordeaux, Argonaut.

VESSELS LOADING.

At YOKOHAMA.—For London, Lord Collingwood; for New York, Glenclune, Havelock.

At SHANGHAI.—For London, Isles of the South.

At MANILA.—For London, Monarch; for Cork, Lord Raglan; for New York, Daniel Marcy.

At HONG KONG and CANTON.—For London, Belted Will, Min; for New York, Ethel.

At SINGAPORE.—For London, Mirella; for Liverpool, Advance, Patriot Queen, Twilight; for New York, Martha Rideout.

SHIPPING REPORTS.

HONG KONG.

The Everest, Captain Clarke, from Liverpool, 27th Jan., had fresh westerly gales up to 14th Feb. Crossed the Equator on 28th February. Arrived in Straits of Sunda 20th April; calms and light winds up the seas. Spoke the following vessels:—Barque Cymbeline, from London, for Japan, April 14, lat. 24.54 S., long. 104 E., 98 days out; ship Sir Lancelot, from London, for Shanghai, April 23, in Java Sea, 79 days out; ship Pak Wan, from London, for Hong Hong, April 28, off Direction Island, 78 days out.

The Melrose, from New York, reports fine weather to Line in the Atlantic, thence had light weather and calm to Cape of Good Hope; crossed the Line on Jan. 18, long. 29.30 W., and Cape of Good Hope on Feb. 27; passed Anjer on April 28, had fine weather to China sea with light S E. winds. On April 1 spoke to the Hamburg barque Matador, from Liverpool to Hong Kong, in lat. 31.47 S., long. 97.26 E. On April 18, spoke a Prussian ship, name unknown, from Cronstadt to river Amoor, in lat. 7.35 S., long. 105 E., all well on board.

The steamer *Ajax* reports having left Liverpool 9th March. Experienced moderate weather to the line, which was crossed 25th—signalled to the Cape Lighthouse 7th April, 29 days out—fine weather to Mauritius, where the epidemic was still raging with fearful severity; Strong S.Easterly trades on leaving Mauritius, and afterwards hot sultry weather to Penang, where she arrived on 15th May, 55 days out. Left Singapore on the 19th at 8 P.M. Had light S.W. winds up the China Sea and anchored outside Green Island 24th, at 8 P.M.—5 days and 5 hours from Singapore.

The Hamburg ship J. W. A. Lorenzen reports fine weather. On the 8th January crossed the Equator in lon. 26.48 W., 40 days; from Equator to the Cape of Good Hope 23 days, in long. 6 E.; made Java Head on the 22nd March, from the Cape to Java Head 50 days; passed St. Paul's on the 5th March, in lat. 28 S., long. 98 E.; 168 days out to Hong Kong. On the 28th March spoke the Sweedish barque Amazon, from Liverpool to Batavia, 120 days out, in Sunda Straits.

The British ship Northumbria crossed the Line on the 20th January, in long. 24.50, 54 days out; passed the Cape of Good Hope in lat. 36 on 2nd March, 90 days out; passed Java Head on the 27th April, 150 days out; had fine weather and light E. winds and calms all the passage to Hong Kong.

VESSELS PASSED STRAITS OF SUNDA.

LONDON, MONDAY, JUULY 8, 1867.

THE REGISTRATION OF BRITISH SUBJECTS IN CHINA.

THE depreciation of property in Shanghai, and the consequent scarcity of money amongst classes of residents who had formerly no difficulty in obtaining the needful supplies from trusting compradores or complaisant bankers, have, among other effects, brought about a very laudable desire to restrict personal expenditure and avoid all unnecessary outlay. Hence in a measure the failure of the Club, the decadence of the Volunteer movement, and the temporary gloom that has settled upon all schemes of public enjoyment. That this is merely a temporary phenomenon we are quite convinced—the reaction after a season of somewhat reckless waste. Meantime, however, we have to deal with the facts as they are, and, so far as we have already indicated the effect of the change, we have nothing to condemn. But the most recent effort made by the community to shake off an apparently unremunerative load claims some notice, since it has taken the shape of a protest against the authority of the Supreme Court, or of the Order in Council under which the Supreme Court acts. It is well known that Section 14 of the Order in Council of March, 1865, provides for the annual registration of all British subjects resident in China and Japan, who on registration are compelled to pay a fee not specified in the order, and in case of refusal are subject to a fine not exceeding ten dollars. The registration fee has been fixed at five dollars for the higher classes and one dollar for artisans. Ever since January, 1866, when this system first came into force, it has continually been held up to public execration as a hardship, an unjustifiable exercise of prerogative—a thing, in fact, to be opposed or avoided. It has formed the text of lampoons, and has furnished matter for many a leading article. There was indeed something truly ludicrous in the tenacity wherewith young Shanghai clung to its supposed right to evade the tax. Last year, however, everybody paid it, but the recurrence of the five dollar claim at the commencement of this year roused the settlement into rebellion. Discontent prevailed universally, but the greater number thought the trouble involved in disputing the claim dearly bought by the shadowy chance of immunity from the impost. A noble army of twenty-four martyrs were finally found ready to brave the threatened penalties, and they accordingly were, after much exhortation and many threats, at length prosecuted before the Supreme Court. But, alas for British pluck and endurance! the terrors of the bench proved too much for nineteen of these hitherto resolute knights, and at the close of the proceedings five only were found rallying around their flag. The rest had deserted their colours and wisely abandoned a defenceless position.

It appears strange that the defendants in this one-sided action should have adopted the course which we have indicated. They must have known, or might easily have learned, that their procedure was useless as a protest against the provisions of the Order in Council, and that upon the other hand the Supreme Court was powerless to do aught save carry out the ordinances under which it is itself constituted. It was a battle between pigmies and giants, wherein the technical right, if not the moral right, was all on the side of the giants. We cannot but consider the refusal to pay the registration fee ill-advised, both as impotent to attain the hoped-for end and likely to prejudice the effect of an appeal to the proper quarter But while condemning the action of the individual recalcitrants we would earnestly commend to the consideration of Her MAJESTY'S SECRETARY of STATE for FOREIGN AFFAIRS the necessity for some revision of the existing regulation. It is hardly fair that all above the social rank of mechanics and artisans, all the members of a community which includes "Taipans," bank-managers, mercantile assistants, store-keepers, and clerks, should, without distinction of income, be subjected to the same tax, and that one of considerable weight, at least to assistants and clerks. The claims upon a clerk's ill- supplied purse are in Shanghai absolutely legion, and although it may be said that the expenses of subscription to the various local clubs are not unavoidable, it must be recollected that a youngman finds it difficult, if not impossible, to shut himself out from the companionship of his fellows and deprive himself of all means of recreation. Recreation of the very mildest description is not to be had without paying heavily for it—pedestrianism itself is taxed; nay, even the church is, practically speaking, hardly open to a non-subscriber. *De minimis non curat lex*, but a law such as this falls with intolerable severity upon men who with microscopic means endeavour to avoid singularity on the one hand and debt upon the other. If annual registration and the annual levy of a tax upon the privilege of being a British subject are indeed necessary, let there be a sliding scale which will adapt the burdens to the backs which have to sustain them. Let the merchant prince pay a fair tax for the protection which the English flag extends to his enormous ventures, and for the immunity from native extortions which the complicated machinery of a minister, judges, and consuls secures to him. But the mercantile assistant who has nothing to lose, and who, if he conducts himself with propriety, has nothing to fear, should pay a comparatively small sum for the questionable advantages of calling himself an Englishman, rather than an American or a Frenchman. We do not, however, give in our unqualified adherence to the proposition that for any class of the community annual registration is necessary. Our contemporary of the *Friend of China* has accurately summed up the question in a single short paragraph—"We would ask what the QUEEN'S "Council drive at. Is it registration solely or is it revenue? "If registration, and registration alone, would not one entry "serve with (under fine) a notification of change of abode or "departure from the settlement? If revenue be the object, "why such a difference between 'Taipans' and subordinates?"

Our contemporary might better have asked, as we have done, "Why such a difference between clerks and artisans when many "of the latter actually earn larger incomes than the former?"

We are very far wrong in our estimate of the English community in China if its members are not ready to bear a fair proportion of the burdens of the State which protects them; but then they are entitled to know what they are paying for, and upon what principle a tax so unequal is promiscuously livied. It is the fashion to speak of the English merchants in China as contributing nothing to the public revenues in exchange for the benefits they receive from the presence of an English fleet and the vast expenditure entailed by the support of a legation and so many consular offices. The argument is specious when it is adduced in favour of schemes for lowering the strength of the China squadron, and appears convincing when uttered by a candidate for public favour during the course of an election address. True, a certain proportion of their trade—that between port and port, and between ports in China and other foreign countries—returns no revenue to the English Exchequer; their incomes are not subject to a poundage, and their wine, tea and cigars are free of duty. But as by far the largest portion of their trade passes through English custom-houses they are very important contributors to the revenue; and besides all this, their passive presence on the alien soil of China is of itself an unspeakable advantage to the political influence of the English nation. We cannot but think, therefore, that the merchants in China make a very reasonable return for the advantages they enjoy, and that the imposition of a registration fee is, so far, unnecessary to bring up the balance of their debits and credits in account with the mother-country. In order to keep faith with the Chinese it is of importance that the English authorities should from time to time ascertain the position of their nationals, and should be able to give an account of their proceedings, and check any scheme of wrong. But this would be fully attained by requiring each British subject to report himself periodically to his Consul; a regulation which might if necessary be enforced by a heavy fine, but which would cheerfully be complied with by all the respectable mem-

Digitized by Google

bers of the English community. As to those who alone could consider it a hardship, we are not careful to provide for their comforts, or to aid them in carrying out such projects as would be interfered with by the working of the plan we have in dicated.

NEW LINES OF TELEGRAPH TO INDIA AND CHINA.

OUR present system of telegraphic communication with India has gone from bad to worse, until from very weariness the public has ceased to complain of its vagaries, and seems by common consent to wait with patient indifference for deliverance to come from some hitherto unknown quarter. At last, however, a prospect of relief is afforded by three different schemes, that have started into life almost simultaneously. The first in the field is "THE ANGLO-INDIAN TELEGRAPH "COMPANY (Limited)," which, to quote its prospectus, proposes "to establish under one control and management in London, a "direct and thoroughly effective line of telegraph *via* Egypt and "Aden, to India, with extensions hereafter to Singapore, China, "Japan, and Australia." The capital of this company is to be £1,000,000, in 50,000 shares of £20 each, of which £1 is to be paid on application and £4 on allotment. As the prospectus will be found at length in our advertising columns, it is unnecessary to go into further details here, except to remark that certain advantageous concessions have already been obtained, which will enable the company to establish a direct route to Alexandria before the expiry of the present year; while the extension to Bombay will probably be completed next year, or at latest by the following summer. This will bring Bombay within about six hours of London; and will of course open the way for further extensions to China and Japan.

The other two schemes are at present scarcely matured. The first of them is announced under the title of THE INDIA, CHINA, AND COLONIAL TELEGRAPH COMPANY, and the prospectus will be issued in a few days. The proposed capital will be £700,000, and the line of communication is to be:—1st section, Falmouth to Gibraltar; 2nd, Gibraltar to Malta; 3rd, Malta to Alexandria; 4th, Suez to Aden; 5th, Aden to Point de Galle; 6th, Point de Galle to Java Head, with a branch to Singapore and China, and another, Cape Sendano to Cape Londonderry, there to form a junction with the land lines of Australia. The section now proposed is that from Alexandria to Point de Galle. It is a distinctive feature of the project that none but *submarine* cables are to be laid down, and the estimated cost is comparatively low. The last is a plan for an entirely new route *via* Prussia and Russia. A submarine cable is to be laid down across the Black Sea, and thence, by means of land lines through Persia, to form a junction with the Persian Gulf cable, which belongs to the Indian Government. The Prussian and Russian Governments have already granted concessions through their respective territories for the route, and it is intended to construct a special line of telegraph to work solely between England and India. The India Office will make the necessary arrangements in Persia, and this new Indian route will throughout be under the management of the Governments of Russia, Prussia, and England. The main contract, it is added, will probably be given to the well-known firm of Messrs. Siemens, of Berlin and St. Petersburg.

Communication between England and the Continent is also about to be improved, the SUBMARINE TELEGRAPH COMPANY having called a meeting for the 16th inst. to authorise the directors to lay down a new line of communication between England and Belgium, in accordance with the convention entered into between the company and the Belgian Government on the 6th of November, 1861, and for increasing the capital for that purpose by the further amount of £35,000.

AN article on "The New Ports in Japan," in our issue of the 15th ultimo, concluded with this paragraph: "In a recent "article on Hiogo, the *Japan Times* mentions a *low spit of* "*land*, situated at one extremity of the bay, as the probable "site of the future foreign settlement. It is to be hoped this "'low spit of land' will not be converted into a hotbed of fever "and cholera, whereof future generations of Europeans will be "the victims." Our correspondent "M.D., F.R.C.S.E." takes exception to these words, which he construes into an implied censure on the selection made, and writes to assure us that he can testify, from personal examination, to the complete fitness of the site for a foreign settlement. In the expressions above quoted, however, we by no means intended to condemn the site chosen, not being qualified by personal knowledge to judge of its merits. We merely wished to express a hope that it would not be rendered unhealthy—as any other spot might be—by that objectionable process of "filling in" so graphically described in our correspondent's former letter.

IN our issue of the 15th ultimo we noticed a report that the steam-ram *Stonewall* had been sold by the United States Government to Japan. It now appears that the Japanese mission at present in America has complained most bitterly of the way in which certain subjects of the United States swindled their Government out of a large sum of money remitted some time ago for the purchase of vessels of war. $600,000 in coin was paid, and in return a vessel worth but $200,000 was sent to Japan. The Government, to settle the difficulty as far as possible, have transferred the *Stonewall* to Japan. It has been given out that this vessel was purchased, but the United States has taken the chance of getting the $400,000 to be paid for her from the delinquent American agents, of which there is but slight probability. The *Stonewall* is being fitted out at Washington, and will be ready to sail by the middle of August.

The approaching openining of Hiogo, Osaka, Yedo, and a fourth port in Japan not at present named, has been officially notified in the *Gazette*.

Naval and Military.

The Sutlej, screw frigate, 35, 3,066 tons, 500-horse power, Capt. Trevenen P. Coode, bearing the flag of Vice-Admiral Hon. Joseph Denman, has arrived at Spithead from the Pacific, last from Rio de Janeiro, 40 days, and on anchoring exchanged the usual salutes with H.M.'s ship Victory, the Port Admiral's flagship in Portsmouth harbour. Admiral and Mrs. Denman, with the Admiral's Secretary and Flag Lieutenant, disembarked from the Sutlej in the Sprightly, steam-tender, Commander G. Allen, and landing at the Victoria pier, proceeded by train to London. Fifty-six naval invalids, brought home by the Sutlej, were transferred from her to the Victory. The Sutlej will take part in the naval review on the 17th inst.

The iron-clad Ocean finally sailed from Gibraltar for China on the 18th inst. She will call at the Cape and Singapore *en route*.

The Industry, screw storeship, Staff-Commander E. T. C. Youell, arrived at Spithead on the 5th inst., from Ascension, with stores and a few naval invalids.

Her Majesty's old line of battle ship, Orion, carrying seven guns, arrived at Woolwich from Sheerness, and was given over to Messrs. Castle and Beech, the contractors, to be broken up.

The United States screw steam sloop Macedonian, 20, from New York, is expected at Spithead. After attending the naval review, the Macedonian will go to Havre, in order that her cadets, of whom she has a considerable number, may visit the Exhibition in Paris.

CUSTOMS REPORT OF TRADE IN CHINA.

The following summary of the trade of the Treaty Ports for March, 1867, is compiled from the reports of the Commissioners of Customs, issued by the Inspector-General at Shanghai:—

SHANGHAI.—Shipping: 70 sailing vessels, total tonnage 23,076 tons, and 52 steamers, total tonnage 35,018 tons, were entered inwards; 87 sailing vessels, total tonnage 27,911 tons, and 61 steamers, total tonnage 39,988 tons, cleared outwards. Imports during March: Grey Shirtings, 345,646; White Shirtings, 36,736; Dyed Shirtings, 4,448; White Spots and Brocades, 10,491; Dyed do., 23,174; T-Cloths, 78,254; Grey Drills, 5,629; Dutch do., do. 9,120; American do. 1,766; Chintzes, 22,297; Turkey Red Cloths or Cambrics, 13,159; Dyed Damasks, 3,589; Velvets, 2,796; Velveteens, 2,288; Lawans, 1,000; Handkerchiefs, 18,747; Camlets, 8,480; Cloth, 3,263; Spanish Stripes, 6,376; Lastings, 3,168; Imitation do., 1,375; Long Ells, 10,200; Lustres, 64,774 pieces; British Coals, 1,471; Japan do., 2,660; Australian do., 5,820; American do., 128 tons; Iron, 10,395; Lead, 4,627; Tin, 2,750; Tin Plates, 940; Steel, 1,336; Quicksilver, 853 piculs; Window Glass, 500 boxes; Rice, 480; Seaweed, 12,661; Brown Sugar, 90,889; White do., 13,284; Raw Silk, 19; Black Tea, Hankow, 2,366; Kiukiang do., 299; Green Tea, Ningpo, 1,747; Kiukiang do., 1,477; Raw Cotton, 7,180; Hemp, 2,079; Liquid Indigo, 6,044; Nut Galls, 1,360; Rhubarb, 364; Wood Oil, 9,118; Black Pepper, 2,433; Sandalwood, 1,161; Sapanwwood, 3,439 piculs. Exports to Great Britain:—Raw Silk, 1,017; Refuse do., 556; Black Tea, 13,765; Green do., 7,010; Rhubarb, 152; Nut Galls, 983; Hemp, 443; Vegetable wax, 378 piculs. Total of duties collected during the month of March, 246,060 taels.

NINGPO.—Shipping: 54 vessels were entered inwards, and 54 cleared outwards during March. Imports: Malwa Opium, 331; Patna do., 75; Benares do., 14 piculs; Cottons, 26; Woollens, 12 pieces; Brown Sugar, 20,982; White do., 962; Sugar Candy, 266; Rice, 34,055; Medicines, 2,174; Tin, 2,298; Tin Plates, 84; Iron Wire, 46; Bar Iron, 926; Nail Rod do., 1,428; Steel, 344; Lead, 73 piculs. Exports: Green Tea, 1,854; Cotton, 9,811; Tobacco Leaf, 972; Medicines, 2,076 piculs. Straw Mats, 48,311; Paper Fans, 572,316 pieces. Total of duties collected during the month of March, 21,327 taels.

AMOY.—Shipping: 22 steamers, 23 sailing vessels were entered inwards, and the same number cleared. Imports: Opium, 229 chests (274 piculs); American Drills, 257; T Cloths, 304; Brocades, 1,504; Chintzes, 675; Damask, 40; White Shirtings, 3,269; Grey Shirtings, 4,750; Dyed Shirtings, 811; Turkey Reds, 1,062 pieces; Cotton Yarn, 480; Cotto-

Digitized by Google

4,352; Flour, 1,079; Peas, 2,841; Oil Cake, 24,339; Rice, 14,341 piculs. Exports: Tea, 1,096; China Ware, 1,486; Brown Sugar, 1,381; Sugar Candy, 2,133; Paper, 1,873 piculs; Hemp Bags, 10,625 pieces. Treasure: Imported, $16,410; exported, $289,941. Total of duties collected during the month of March, 28,084 taels.

CANTON.—Shipping: 92 vessels were entered inwards and 94 cleared outwards. Monetary and Commercial.

Telegrams from Shanghai to 28th May, *via* Kiachta, were received on the 28th June, announcing the opening of the tea market at Hankow at 28-32 taels. One telegram quoted 2s. 1½d. laid down in London for finest, others 1s. 10d. to 2s. 2d. for first chops. A later telegram by the same route up to 7th June, received on the 3rd instant, announced that 100,000 chests had arrived to market, and about half had been settled. Should this prove correct, it is a most unprecedentedly large quantity for the time, and if loaded off quickly will certainly have a bad influence on the market here. We presume that the high prices paid—for high they are, although about 6d. less than last year—are owing to orders from Europe competing with the standing China firms. An impression existed that owing to the failures in the China trade the business of this year would fall into the hands of a very few and the dealers here would be comparatively at their mercy as to prices. To counteract this imaginary evil credits and orders have been sent out by dealers and others not even engaged in the trade, and the result is that the market has opened fully 4d. higher than expected, according to our advices by the last few mails.

The same telegrams, *via* Kiachta, announce the settlement of about 1,600 bales silk at taels 510 for No. 3 chop. Tsatlees, which at exchange 6s. 1d.; the cost laid down in London is 27s. One telegram announced the settlement of 300 bales at a cost of 26s. 6d.

A telegram from Foochow of 26th May reported the tea market opened at 28 taels, but it is not credited.

At the meeting of the Union Bank of London on the 10th inst. a dividend of 7½ per cent. and a bonus of 5 per cent. will be declared for the half-year ended 30th June, making, with the distribution of profits in January last, 22½ per cent. for the twelve months—a rate similar to that of the previous year. It is understood that, in compliance with a wish of many of the proprietors, Mr. G. S. Nottage will be a candidate at the meeting for the vacant seat in the direction.

At the meeting of the London and Westminster Bank on the 17th inst. a dividend will be recommended of 14 per cent. for the six months ended the 30th June, being at the same rate as for the corresponding period of last year.

The London Joint-Stock Bank proposes to offer to its proprietors 8,000 unissued shares, the creation of which was authorised in 1864. The proportion will be one new share for every nine already held, and the price of the £50 share, with the £15 paid, will be £25. The payments are to be in four instalments. extending to the end of the year, and the amount of the premiums (£80,000) is to be added to the reserve fund. A special meeting to confirm this plan is to be held on the 25th inst., when a resolution will also be introduced to give power to the Board to diminish the number of directors.

At the adjourned meeting of the English shareholders in the Bank of Bombay, the report from the deputation appointed to wait upon the Secretary of State for India stated it to be the impression of the deputation that no amalgamation or resuscitation will be sanctioned by the Home Government unless the English proprietors first consent thereto. The report was adopted, and a committee appointed to watch over the interests of the English shareholders.

It is stated that the China Steamship and Labuan Coal Company have received letters announcing that the difficulty the company were under from the failure of their agents at Singapore, causing the temporary suspension of the works, had been removed by the arrival of funds sufficient to satisfy all demands; also that the managing director was about to proceed to Labuan by the company's chartered ship *Japan*, where he would remain until he had made arrangements for a largely increased production of coal, for which there is a good demand at very remunerative prices.

The biddings for bills on India took place at the Bank of England. The amounts allotted were:—To Calcutta, Rs. 11,33,600; to Madras, Rs. 2,60,000; and to Bombay, Rs. 70,000. The minimum price was fixed as before—viz., at 1s. 11d. on all the presidencies. Tenders at and above the minimum will receive in full. These results show a further diminution in the demand for means of remittance to the East, inasmuch as, of the £270,000 of bills offered, only £146,360 have been taken at the official minimum.

In consequence of the rule which prevents two partners in the same house from sitting in the Bank direction, Mr. Thomas Baring will retire, leaving Mr. Kirkman Hodgson as the representative of the united firm.

The annual meeting of the shareholders of the Comptoir d'Escompte is called for the 30th inst.

Digitized by Google

The amount of bullion by the P. and O. Company's steamer *Nyanza*, from Southampton on the 4th inst., was—In gold, to Madras, £678.

The following notices of firms have been issued :—

FINLAY, HODGSON, AND CO., AND BARING BROTHERS.

London, 1st July.

SIR,—We beg to inform you that our friends and partners, Mr. Duncan James Kay and Mr. Kirkman Finlay, having resolved on retiring from business, their interest and responsibility in the firms of Finlay; Hodgson, and Co., of London, and Thomson, Finlay, and Co., of Liverpool, ceased and determined on the 30th ult. We have also the pleasure of announcing to you that the business of both houses has been united with that of our friends and neighbours, Messrs. Baring Brothers, and Co., and will in future be carried on both here and in Liverpool under the style of that firm. We enclose the circular of Messrs. Baring Brothers and Co., and request you to note that the signatures of Finlay, Hodgson, and Co., here, and Thomson, Finlay, and Co., in Liverpool, will, from and after this date, only be used for the purposes of liquidation.—We remain, your obedient servants, FINLAY, HODGSON, and Co.

SIR,—We beg to inform you that Mr. Charles Baring Young, who has so long been connected with us, has resolved, to our great regret, upon retiring entirely from commercial business, and ceases to-day to be a partner of our firm. On the other hand, Mr. James Price, the present managing partner in our Liverpool firm, becomes a partner also in our London firm, and we have the pleasure to announce that we have formed an union with our friends and neighbours Messrs. Finlay, Hodgson and Co., whose remaining partners, Mr. Kirkman Daniel Hodgson, Mr. James Stewart Hodgson, Mr. William Moir, and Mr. Charles Lloyd Norman, become partners from this day with us, and we request you to take note of the signatures of those new members of our firm, who will be resident in London. That of Mr. Moir, who will reside in Liverpool, is attached to our circular issued from thence.—We remain, Sir, your obedient servants, BARING BROTHERS and Co.

14, St. Helen's Place, London, E.C., July 5, 1867.

We beg to inform you, that in consequence of the retirement of Mr. J. G. Fry and Mr. J. S. Rigge, the business hitherto conducted by us, as China merchants and insurance brokers, under the firm of Sanderson, Frys, Rigge, and Co., will be continued by Mr. John Silverlock and Mr. J. G. Fry, jun., who have this day entered into partnership for that purpose, under the name of Sanderson and Co.—We are, &c.

JNO. E. FRY.
J. S. RIGGE.
JOHN SILVERLOCK.

15, Leadenhall-street, 1st July, 1867.

It is with deep regret I have to inform you of the decease of my brother, Mr. S. D. Sassoon, the only member of the firm of S. D. Sassoon and Co., which sad event occurred in London on the 23rd ult. The death of Mr. S. D. Sassoon necessitates the closing of his business, therefore the executors jointly with myself will proceed to liquidate the affairs of the firm. Requesting your attention to the annexed circular, I am, yours faithfully, R. D. SASSOON.

15, Leadenhall-street, E.C., July 1, 1867.

With reference to the foregoing circular, we beg to inform you that we have this day, in conjunction with our firms of David Sassoon and Co., Bombay, and David Sassoon, Sons, and Co., of China, established ourselves at the above address as East India and China merchants, under the style of David Sassoon and Co. The management of the business here is under the direction of our Mr. Reuben David Sassoon.—We are, &c.,

DAVID SASSOON and Co.

London, 9, Mincing-lane, and Liverpool, 35, North John-street, July 1, 1867.

The co-partnership hitherto subsisting between us has been this day dissolved by mutual consent and by the effluxion of time. Our senior, Mr. James Steains, in retiring from business, desires to embrace the present opportunity of returning his grateful and warmest thanks for the general support and many favours conferred on the firm of which he has been the head for now upwards of forty-two years, and most respectfully requests a continuance of the same support and favours for his brother, Arthur Steains, and his nephews, Arthur Steains, jun., Thomas Meeking, and James Steains, jun., who will continue the business as heretofore.—We remain, &c., JEAMES STEAINS and Co., Wholesale Tea Dealers.

BOARD OF TRADE RETURNS.

The Returns of the Board of Trade for the month of May present, so far as regards the Exports, a more favourable appearance than in any previous month of this year, the value being £15,936,864 against £15,870,131 for May, 1866. The increase for the present year is thus shown to have been £66,733, or about 99 per cent. For the five months ended 31st May, however, the Export Returns show a decrease when compared with the corresponding period of last year of £6,104,317, or about 7 per cent., the value being £72,123,393 for 1867, against £78,227,710 for 1866.

The Imports, which are returned for the month and four months ended 30th April, continue to manifest considerable depreciation. Their value for the month of April, 1867, was £18,701,332, and for April, 1866, £22,455,968, showing a reduction of £3,754,636, or 17 per cent. The value of the Imports for the four months ended 30th April, 1867, is returned at £60,166,150, which is less by £8,638,745, or 12 per cent., than the value for the four months of the previous year.

The value of the Exports to China (exclusive of Hong Kong) during the four months ended 30th April has been 21 per cent. less than the value for the same period of last year. To Hong Kong the Export value shows a reduction of 38 per cent., and to Ceylon of 15 per cent.; while on the other hand the Export to Japan has increased in value 12 per cent., to Singapore 7 per cent., and to the Philippine Islands 39 per cent. The value of the Cotton Yarn exported to China and Hong Kong in the first five months of the present year is 36 per cent., and of Manufactures 41 per cent. less than for the five months of 1866.

The following is a summary of those figures relating to our Export and Import trade with China and the countries in the Far East :—

IMPORTS.

The total quantity of Raw Cotton imported during the month and five months ended 31st May, and the value to the 30th April, are thus given :—

From	1865.	1866.	1867.	
Quantity for the Month ended 31st May.				
China	63,677	—	—	cwts.
British India	290,381	581,173	252,552	„
Egypt	59,515	148,756	106,052	„
Total from all parts	611,653	1,490,636	1,551,087	„
Quantity for the Five Months ended 31st May.				
China	206,495	—	2,041	cwts.

PORT OF AMOY. CHINA.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford facility for REPAIRING and REFITTING STEAM and SAILING VESSELS.

Their large Granite Dock, 286 feet on the blocks, 307 feet over all, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet. It is fitted with Caisson Gate and with a powerful Centrifugal Steam Pump, ensuring despatch in all states of the tide.

Their two smaller Granite Docks, one 223 feet, the other 160 feet on the blocks, can take vessels at average spring tides drawing 12 feet to 13 feet.

A stock kept on hand of Timber, Spars, Copper and Metal Sheathing, Paints for Iron Vessels, and other material required for Dockyard use.

The premises comprise Carpenters' Shops, Mast Sheds, Blacksmiths' Shops, superintended by experienced European Foremen; also an Engineer's Workshop, supplied with Lathes and other tools worked by Steam, in charge of a Resident European Engineer. Dry Godowns for the reception of stores of vessels requiring to discharge them.

BASS AND ALLSOPP'S INDIA PALE ALES

GEORGE JONES, No. 8, Billiter-street

Present prices, 7s. 3d. 3d. per dozen quarts, and 4s. 9d dozen pints. Free on board, protected by his own and he Brewer's Labels and Patent Capsule.

HOLLOWAY'S OINTMENT and PILLS.—Limb for Life.—Not many years ago some ulcerations and diseases of the joints placed in peril the affected limb, whose loss was recommended, to spare the risk of life. Now the discovery of these noble remedies has made the cure of the worst of such maladies no longer a matter of doubt. Holloway's treatment preserves the condemned limb, and in its course of cure improves the general health and vigour of the frame. Sores, ulcers, bad legs, scrofulous discharges, swollen or gathered glands, contracted sinews, enlarged joints, rheumatic and gouty concretions, are readily remediable by the proper and persevering application of these cooling, healing, and purifying preparations, which are as powerful as they are harmless.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

DR. J. COLLIS BROWNE'S CHLORODYNE. Vice-Chancellor Sir W. Page Wood stated publicly in Court that Dr. J. Collis Browne was undoubtedly the Inventor of Chlorodyne; that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See *The Times*, July 13, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any rvice in Cholera was Chlorodyne.—See *Lancet*, Dec. 31, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. Extract from *Medical Times*, Jan. 12, 1866.—"Is prescribed by scores of orthodox medical practitioners. Of course it would not be thus singularly popular did it not supply a want and fill a place."

DR. J. COLLIS BROWNE'S CHLORODYNE is the best and most certain remedy in COUGHS, COLDS, ASTHMA, CONSUMPTION, NEURALGIA, RHEUMATISM, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE is a certain cure in CHOLERA, DYSENTERY, DIARRHŒA, COLICS, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE. EXTRACT *from the* GENERAL BOARD OF HEALTH, *London, as to its efficacy in Cholera*—"So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. MONTGOMERY, Esq., *late Inspector of Hospitals, Bombay*.—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other remedies had failed."

DR. J. COLLIS BROWNE'S CHLORODYNE. CAUTION.—None genuine without the words "Dr. J. Collis Browne's Chlorodyne is on the Government Stamp. Overwhelming medical testimony accompanies each bottle. Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury, London. The immense demand enables the proprietors to reduce the price; it is now sold in bottles, 1s. 1½d., 2s. 9d., 4s. 6d., and 11s.

AGENT: Hong Kong, Mr. A. S. WATSON.

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor

Brokers.—Messrs. P. CAZENOVE and Co., 52, Threadneedle street, E.C. Messrs. FOSTER and BRAITHWAITE, 27, Austinfriars, E.C.

Secretary (ad interim).—JOHN C. DEANE, Esq.

Temporary Offices.—26, OLD BROAD-STREET, LONDON, E.C.

The object of this Company is to establish, under one control and management in London, a direct and thoroughly effective line of telegraph via Egypt and Aden, to India, with extensions hereafter to Singapore, China, Japan, and Australia. The route of the proposed line (which is shown on plans, to be obtained at the offices of the Company) is the route by which all the mails, passengers, troops, and overland merchandise between this country and the East are forwarded.

The present condition of telegraphic communication with India is most unsatisfactory. Commercial messages usually occupy many days in their transmission, and arrive not only in a mutilated, and frequently unintelligible, form, but also without regard to priority of date, thereby misleading those who place any reliance upon them. From the many countries, differing in language and administration, through which the messages pass, it is impossible to obtain either explanation or redress; while the cost, distance and delays are too great to admit of corrections being obtained by repetition.

The necessity for a thorough change of the existing system has been repeatedly urged by the several Chambers of Commerce in India, and is universally felt in this country. The establishment of the direct telegraphic route to India, by way of Aden, as proposed by this Company, forms one of the most important recommendations of the recent parliamentary committee on East India communications.

Under a well organised system the average time of transmission of a message between London and Bombay ought not to exceed six hours. In order to effect this, and to secure uninterrupted communication between England, Egypt, Aden, and India, provisional arrangements have been made for the transfer to this Company, when the line between Egypt and Bombay is completed, or earlier if this Company desires, of

1. A concession from the Italian Government for the exclusive use, for 41 years, of a line of telegraph from Susa (where the French lines terminates) to Modica, in Sicily, to be worked by English clerks appointed by this company.

2. The agreement for a lease from the British Government of the existing Malta and Alexandria cable for the term of 42 years from May, 1865.

3. The agreement for a lease for 21 years (with the option of purchase) of the existing land lines of the telegraph to India Company, between Alexandria, Cairo, and Suez, together with the concessions and firmans held by that company for establishing telegraphs from Egypt to Aden and India.

Between Modica and Malta the messages will, for the present, pass by the short line of the Mediterranean Extension Telegraph Company; but the Italian Government have granted a concession which will be vested in this Company for continuing their independent line from Sicily by a submarine cable direct to Tripoli, or other point on the African coast, and it is proposed to exercise this right at an early period in order to secure a second route (available in the event of interruption on the existing lines) between Sicily and Alexandria.

The direct route from London to Suez will, it is anticipated, be in actual work during the present year, and the Company have entered into a contract with the Telegraph Construction and Maintenance Company for making and laying a thoroughly efficient line of telegraph (about 3,650 nautical miles in length) from Suez to Bombay, including station buildings, instruments, and all expenses, for the sum of £1,100,000, of which £100,000 is to be retained by this Company until the successful completion of the whole of the work, £95,000 of the contract sum is to be paid in shares of this Company, and £95,000 in debentures. The contract provides for the completion of the entire line from Suez to Bombay, in working order, to the satisfaction of this Company's engineers. The entire line is to be completed in the course of next year, or at latest in the May following.

It will be seen, therefore, that except through France and over the short line of 60 miles from Modica to Malta (which, however, is worked by English clerks) this Company will have under their own management, and worked exclusively by an English staff, the whole line of telegraph from England to Bombay, an advantage the possession of which will tend greatly to ensure a rapid and accurate transmission of messages.

It is scarcely necessary to remark upon the vast commercial as well as national importance of this undertaking. The number of messages transmitted between England and India by the present slow and uncertain route, via the Persian Gulf, with all the objections and uncertainties attending it, was last year over 30,000, with an average of 30 words per message; and the Directors of this Company are assured by India merchants and other competent judges, that with a direct and reliable route worked as now proposed the number of messages by the new line will at once be treble those now sent.

The cost of acquiring the lines from Susa to Modica, and Malta to Alexandria will be £100,000 payable in cash or shares, plus any necessary expenditure or liability incurred with the sanction of this Company.

The rent payable under the lease from the Telegraph to India Company will be £1 500 per annum, to be increased to £5,000 on completion of this Company's line to India, the higher rent being payable only whilst the submarine line is in work. The Company have the option of redeeming this rent, and of purchasing the whole property of the lessors for £50,000 in cash, or shares, at the choice of the purchasers

The return from the Company's lines when completed to Bombay is estimated upon the basis of the present charge of £2 1s. per message of 20 words from London to Bombay, as follows:—

ANNUAL RECEIPTS.

Proportion due to the lines between Susa and Alexandria in respect of traffic between England and Egypt (the actual average of the receipts on the Malta and Suez lines for the last four years)	£58,550
Proportion due to the lines between Susa and Bombay (6,307 miles) in respect of traffic between England and India—estimated at 100 messages per day each way, averaging 80 words each	446,210
Gross receipts	£504,760

ANNUAL EXPENSES.

Rent to English Government for Malta and Alexandria line ...	£15,000	
Ditto to Telegraph to India Company (maximum amount) ...	5,000	
Special reserve fund for maintenance (including outlay on Malta and Alexandria line as provided by the lease) of the whole of the Company's lines, as hereafter explained, say	125,000	
Working expenses	30,000	
		175,000
Net revenue per annum		£329,760

This revenue will yield a dividend exceeding £35 per cent. per annum upon £1,300,000, which it is anticipated will cover all the operations of the Company now proposed between England and Bombay.

As evidence of this being a reasonable estimate, there is the fact that the receipts for messages between this country and America by the Atlantic cable were, for the first six months of its working, at the rate of £291,000 per annum, and that now, at the end of nine months only, those receipts are at the rate of £430,000 per annum; and it is beyond question that the mercantile transactions between Great Britain, India, China, and Australia exceed in magnitude and value those between this country and America.

The extension of telegraphic communication throughout the East will unquestionably develop additional traffic in proportion to the facilities afforded, and the Company's lines will possess abundant capacity for earning a larger profit at greatly reduced charges.

It is proposed immediately upon the completion of the cable to Bombay to establish land wires along the line of railway from thence to Calcutta. These wires are estimated to cost not exceeding £100,000, and the additional revenue derivable therefrom is calculated at £25,000 to £30,000 per annum.

Entire identity of interest between this Company and the Telegraph Construction and Maintenance Company, both as respects the manufacture and laying of the new cable and the future working and commercial success of the whole line, is established by means of a contract which has been entered into with the latter Company for the repairing and maintaining by them of all the cables, wires, stations, and works of this Company, between Susa and Bombay, as and when the several sections are opened for traffic and transferred to this Company, for a period of ten years certain, on equitable and mutually beneficial terms. For the repayment of the expenses incurred by the contractors for vessels, cable, materials, and services of officers, engineers, and others provided by them under this agreement, they rely upon a fund to be thus formed:—25 per cent. of the revenue is to be credited each year to a reserve fund in the joint names of the two Companies, which fund, after meeting the actual cost of repairs and maintenance, is to accumulate until the clear amount thereof, after deducting all payments made or due therefrom, but including vessels, cables, stores, &c., then forming part of such fund, not exceeding £100,000 in value, shall amount to £350,000, after which the surplus from time to time existing beyond that amount is to be divided each year between the Company and the contractors, half to each. At the end of the term the whole balance of the maintenance fund will belong to this Company.

A copy of the memorandum of association is annexed to the prospectus, and copies of the articles of association and of all the concessions, agreements, and contracts can be inspected at the offices of Messrs. Bircham and Co.; and all applications for shares will be considered as made subject to the provisions of those documents.

Applications for shares, addressed to the Directors, must be made in the accompanying form, but no application will be considered without the previous payment to the bankers of the deposit of £1 per share, which will be returned in case no allotment is made. If a less number be allotted than is applied for, the surplus deposit will be appropriated towards the payment due on allotment. If the balance due on allotment is not paid within the time appointed by the allotment letter, the Directors may cancel the allotment and forfeit the deposit.

The deposits on applications for shares will be returned, without deduction, if two-thirds of the capital be not subscribed and allotted.

July, 1867.

THE SHORTEST ROUTE TO AND FROM MANILA AND THE PHILIPPINES.

NOTICE to SHIPPERS and PASSENGERS by the OVERLAND ROUTE:—

The CHINA STEAM and LABUAN COAL COMPANY (Limited), in pursuance of an agreement entered into with the Government of Manila, have arranged to despatch the steamships "MONA" and "JAPAN," or other of their first-class steamers, with the mails and passengers monthly between Singapore and Manila, and Manila and Singapore, in correspondence with the Messageries Imperiales Overland Route.

By a special permit all goods by these steamers from the 1st August, 1866, will be admitted into Manila at the reduced duty of 10½ per cent.

The Company's agents at Singapore will take charge of goods for transhipment. For further particulars apply at the Offices of the Company, Ethelburga-house, 70 and 71, Bishopsgate-street, London, E.C.

OVERLAND ROUTE.

COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., *via* EGYPT, from SOUTHAMPTON and MARSEILLES. — The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and RECEIVE CARGO and PARCELS for GIBRALTAR, MALTA, EGYPT, ADEN, CEYLON, MADRAS, CALCUTTA, the STRAITS, CHINA, and JAPAN (YOKOHAMA), by their steamers leaving Southampton on the 4th and 20th of every month. For GIBRALTAR, MALTA, EGYPT, ADEN, and BOMBAY, by those of the 12th and 27th of each month; and for KING GEORGE'S SOUND, MELBOURNE, and SYDNEY, by the steamer leaving Southampton on the 20th of every month. The steamers leave Marseilles on the 5th, 12th, 20th, and 28th of the Month.

For further particulars apply at the Company's Offices, 122, Leadenhall-street, London, E.C., or Oriental-place Southampton.

OVERLAND ROUTE VIA MARSEILLES.

SERVICES MARITIMES DES MESSAGERIES IMPERIALES.

FRENCH MAIL STEAM PACKETS

The 19th of every Month at 2 P.M. for—

MESSINA, ALEXANDRIA, ADEN, POINT DE GALLE (Ceylon), PONDICHERRY, MADRAS CALCUTTA, SINGAPORE, BATAVIA, SAIGON, HONG KONG, SHANGHAI, and JAPAN.

The 9th of every Month for—

MESSINA, ALEXANDRIA, ADEN, SEYCHELLES REUNION, MAURITIUS

For passage, freight, and information apply to B.W. and H. HORNE, 4, Moorgate-street, London; G. H. FLETCHER and Co., Liverpool; at the offices of the Services Maritimes des Messageries Imperiales in Paris, Lyons, Bordeaux, and Marseilles; or to SMITH and Co., Rotterdam.

*** Passengers eastward of Suez securing their berths in London are entitled to the conveyance of their luggage free to Marseilles.

INDIA AND CHINA VIA ITALY.

SHORTEST SEA PASSAGE FROM EUROPE TO EGYPT

BRINDISI to ALEXANDRIA—Contract Passage, 82 hours

It is frequently done in 72 hours.

THE Società Anonima Italiana di Navigazione Adriatica Orientale, under contract to carry the Direct Mails despatch as under their first-class English-built steamers CAIRO, BRINDISI, PRINCIPE DI CARIGNANO, or PRINCIPE TOMASO, between BRINDISI and ALEXANDRIA. The vessels of the Company sail as follows:—From Brindisi for Alexandria on the 7th, 14th, 22nd, and 30th of each month, at 2 P.M.; Alexandria for Brindisi, on the arrival of the mails, about the 5th, 12th, 20th, and 29th of each month. The arrivals at and departures from Alexandria are in coincidence with those of the steamers of the Peninsular and Oriental Company, with the Calcutta, China, and Bombay Mails.

Fares:—Brindisi to Alexandria, including provisions 1st class, 575f.; 2nd class, 200f.; third class, 90f., and *vice versa*.

For further particulars apply to the Company's offices at FLORENCE, via Montebello, 42; PARIS, Rue de L'Université, 108; LONDON, Messrs. PALMER, 44, Eastcheap, E.C.

JAPAN AND CHINA NEW MAIL ROUTE VIA PANAMA AND SAN FRANCISCO.

THE PACIFIC MAIL STEAM SHIP COMPANY despatch their splendid side-wheel steamers from NEW YORK on the 1st, 11th, and 21st, and from PANAMA on the 9th, 19th, and 29th of every month for SAN FRANCISCO, calling at ACAPULCO, MANZANILLO, MAZATLAN, *en route* thence to YOKOHAMA, NAGASAKI, SHANGHAI, and HONG KONG. Passengers from England may connect with this line at New York by any of the various steamers from Liverpool, Southampton, or Falmouth, to that port, or at Panama by the steamers of the Royal Mail Steam Packet Company leaving Southampton on the 2nd and 17th of every month. Passengers by this route are less than ten days in the tropics.

The next departures from San Francisco are:—

GREAT REPUBLIC, 5,000 tons, September 3rd.
CHINA, 5,000 tons, October 14th.
COLORADO, 4,000 tons, November —.

For particulars of Freight, through passage rates, &c., &c., apply to H. STARR and Co., General European Agents, 145, Cheapside, London.

STEAM to INDIA, via the CAPE.—The UNION STEAMSHIP COMPANY (Limited) have entered into an arrangement with the Government for the extension of the Packet Service from Mauritius to Ceylon. Passengers can proceed from Southampton on the 8th of every Month to Point de Galle, where a junction is formed with steamers proceeding to India, China, Australia, &c. Rates of freight and passage very moderate.

Apply to FALCONER and MERCER, 23, Leadenhall-street, London; or THOMAS HILL, Southampton.

JAPAN AND CHINA, by Mail Steamers throughout.—GOODS for YOKOMAMA, Nagasaki, Hong Kong, and Shanghai can be shipped under through bills of lading, via Panama, by the ROYAL MAIL STEAM PACKET COMPANY'S STEAMERS, leaving Southampton on 17th of July and 2nd of September, 1867.

Apply to J. M. LLOYD, Secretary.

Royal Mail Steampacket Company, 55, Moorgate-street, London, E.C.

ORIENTAL, AUSTRALIAN, AND GENERAL STEAM AGENCY, AND GLOBE PARCEL EXPRESS.

PARCELS, PACKAGES, and MERCHANDISE forwarded, and PASSAGES engaged to all parts of the world. Baggage collected and shipped, insurances effected, &c.

CALCUTTA, MADRAS, CEYLON, and ADEN—Overland, 4th and 20th of every month.

BOMBAY and ADEN—Overland, 12th and 27th.

CHINA, JAPAN, SINGAPORE, and EASTERN SEAS—Overland, 4th and 20th.

No. 22, Great St. Helen's, E.C.

STEAM to JAPAN, to sail 13th July, for YOKOHAMA and NAGASAKI direct, with leave to touch at St. Vincent the Cape, and Singapore to coal, the splendid, new, Clyde built, screw steamship OSACA, A A1, 482 tons register, horse power 90 nominal, 450 indicated, JOHN MADDISON, Commander, to load in the East India Docks. This beautiful steamer, built by Messrs. A. Stephen and Son, under special survey, is strongly recommended to shippers. All goods to be distinctly marked for which port they are intended.

For Freight or Passage apply to GELLATLY, HANKEY, SEWELL, and Co., 27, Leadenhall-street, London, E.C.; or POOL, Fold-chambers, Cross-street, Manchester.

With quick despatch.

FOR HONG KONG and WHAMPOA.—The new China clipper CHARLOTTE, A1 12 years, 590 tons register; T. H. FEARON, Commander; East India Docks. Has good accommodation for passengers.

For Freight or Passage apply to KILLICK, MARTIN, and Co., 10, George-yard, Lombard-street, E.C.

Regular line of Packet Ship.

To Sail on July 10.

FOR HONG KONG and WHAMPOA, the very fast-sailing ship GRESHAM, A1 10 years, 965 tons register; L. C. BRAYLEY, Commander; lying in the East India Docks. This ship has a poop, and excellent accommodation for passengers.

For Freight or Passage, apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

Regular Line of Packet Ship.

To sail on the 5th August.

FOR HONG KONG and WHAMPOA, the well-known clipper the TWEED, A1 15 years (owned by John Willis, Esq.), 1,745 tons register; WILLIAM STUART, Commander, lying in the East India Docks. This magnificent ship offers a favourable opportunity to shippers of fine Goods at this particular season, as she may confidently be expected to make the passage under 100 days, having proved herself to be one of the fastest ships afloat.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

To sail on July 31.

FOR SHANGHAI, the splendid new clipper-ship DURHAM, A a1, 998 tons register; CUTHBERT VAUX, Commander; lying in the East India Docks. Has superior accommodation for passengers.

For Freight or Passage, apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

FOR PENANG direct, having the bulk of her cargo engaged, the fine clipper barque HELEN'S BANK, A1 10 years, 317 tons register; JAMES M. REID, Commander—lying in the St. Katherine Docks.

For Freight or Passage apply to KILLICK, MARTIN, and Co., 10, George-yard, E.C.; or to ANDREW WRIGHT and Co., 3, Great St. Helen's, Bishopsgate-street, E.C.

Will meet with Quick Despatch.

DIRECT for POINT DE GALLE and COCHIN, the beautiful clipper-ship ANN LUCY, A1 11 years, 270 tons register; WILLIAM NOBLE, Commander a lying in the London Docks. This fine vessel offers; first-rate opportunity to Shippers of Fine Goods, and has very good accommodation for first and second class passengers.

For Freight or Passage, apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

To Sail 10th July.

DIRECT FOR COLOMBO, the splendid fast-sailing British-built ship, PALMERSTON, A1 15 years, 894 tons register, J. N. SEAGROVE, Commander; West India Docks. This magnificent vessel has just returned from Cochin in 95 days, and from her high class and quick passages offers the most favourable opportunity for passengers and shippers desirous of despatch.

For Freight or Passage, apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

To follow the "Palmerston."

Will meet with the usual despatch.

DIRECT FOR COLOMBO, the beautiful British-built clipper ship, SEA KING, A 1 12 years, 404 tons register, S. C. CLARKE, Commander; London Docks. This magnificent vessel, built in 1866, from her high-class and fast-sailing qualities, offers the best opportunity to shippers of fine goods.

For Freight or Passage, apply to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

To follow the "Haddington," and will sail July 11.

FOR BOMBAY Direct, the fine British-owned Clipper Ship JESSIE GILBERT, 3/3rds L. 1, 1, 635 Tons Register; JOHN STAPLEDON, Commander, East India Docks. This splendid vessel is nearly new, having just completed her first voyage, and from her fast sailing qualities is confidently recommended to shippers.

For freight or passage apply to JOHN C. CAMPBELL, 22 Great St. Helen's, E.C.; or to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C

To follow the "Jessie Gilbert," and will sail July 23.

FOR BOMBAY direct, the fine British-built iron clipper ship BEBINGTON, AA1, 889 tons register, THOMAS WARLAND, Commander, East India Docks. This splendid vessel, from her high-class and fast-sailing qualities, is confidently recommended to shippers of fine goods.

For Freight or Passage, apply to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

Telegrams have been received in advance of the mail bringing dates from Shanghai to the 20th, and Hong Kong the 25th June. Via Kiachta, Shanghai telegrams to June 21 were received on 18th inst., quoting exchange 6s. 4d. The P. and O. mail, with Hong Kong dates to June 13, reached Suez on the 18th inst., and is expected here on the 29th.

List of Passengers.

PASSENGERS INWARD.

By this mail, to Marseilles, per P. and O. steamer Ceylon, arrived July 18.—From Shanghai: Mr. Petrie. From Hong Hong: Don J. Cemtrano and nephew, Don Soultarrona, Mrs. P. Soultarrona, Don Pacheas, Don Leixas, servant, and child, Mr. and Mrs. Turner, and seven second-class passengers. From Singapore: Mr. and Mrs. Kinicket and three children. From Penang: Mr. Newhuys. From Galle: Mr. Vane, Mr. Bury, Dr. Kynsey, Mrs. Kynsey.

To Southampton, per P. and O. steamer expected to arrive.—List not to hand.

By last Bombay mail, to Marseilles, per P. and O. steamer Columbian, arrived July 4.—From Yokohama: Mr. L. A. Joseph. From Galle: Mr. Creasy.

PASSENGERS OUTWARD.

Per Fr. steamer Said, from Marseilles, July 19.—None.

Per P and O. steamer, from Marseilles, July 20.—To Singapore via Bombay: Mr. J. M. Davidson.

Per P. and O. steamer Delta, from Southampton, July 20.—To Singapore: Mr. Ray, R.N., Mr. Petley, R.N., Mr. Armstrong, R.E. To Ceylon: Mrs. Hudson, Mr. J. Tindal. From Galle to Shanghai: Mr. Bird.

Per P. and O. steamer, from Southampton, August 4.—To Shanghai: Mrs. Algernon Wright and child. To Hong Kong: Mr. Jones, R.N. To Singapore: Capt. Formochy. To Ceylon: Mr. Vivian.

Per P. and O. steamer, from Southampton, August 20.—To Shanghai: Mrs. Lewes.

Per P. and O. steamer, from Southampton, September 4.—To Shanghai: Mr. and Mrs. G. W. Paine and child.

From Suez to Hong Kong: the Bishop of Victoria and Mrs. Alford, Mr. E. Alford.

Per P. and O. steamer, from Southampton, September 20.—To Ceylon: Mr. and Mrs. Rudd and two children, Miss Piachand. To Singapore: Mr. and Mrs. J. McLachlan, Mr. Hervey, Mr. Austen.

From Marseilles, September 28.—To Hong Kong: Dr. C. M. Jones, Mr. E. H. Price, Mr. Leopold Kahn.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Advices from this port are to the 16th May, only four days later than those received by the French mail delivered on the 8th. No later dates from home had been received in the interval. The following summary of news is from the *Japan Times*:—

Our readers will remember that in the last number but one of the *Overland Mail* we discussed the question of the new ports, and strongly advocated the opening of Osaka as well as Hiago. The arguments we then used will probably be fresh in our readers' minds, and it is gratifying to observe that Sir Harry Parkes appears to have entertained similar views. We are not yet in possession of news from the South of a sufficiently definite character to enable us to discuss now the details of the new arrangements; in due course, when fuller information reaches us, we shall give the subject proper consideration. Meanwhile it must be evident to all that residence in Yedo and Osaka nearer than we have yet been to the seats of Government and the centres of trade must be better for foreign commerce than our present position, where we are at a distance. At a distance from our customers, with whose agents only we now do our business; at a distance from the authorities, to whom appeal or reference is often desirable, communications cannot be so efficiently made to the underlings who under the present system represent them. In Yokohama there are strong and respectable vested interests to be considered, which might be seriously injured by transfer of the trade to Yedo, leaving Yokohama to be merely its shipping port; but at the new seats of trade which are to be opened in 1868 the same objection does not exist, and it will not be difficult to make such arrangements as will combine the benefit of a harbour like Hiogo with the advantages of residence in a metropolis, instead of an outlying sea port. The question is an imperial one, and local interests, we should imagine, will not be allowed to stand in the way of general improvement and extension of trade. But it is only fair that the change should be made in Yokohama as gradually as possible, and this will probably be secured as well by diplomatic intervention as by the action of the mercantile community itself, which is so directly and vitally interested.

But at Osaka and its outport, Hiogo, we can commence at once on a proper system, and it is with much pleasure that we make the announcement to our readers, that the Japanese Government here has decided upon immediately sending down an English gentleman now in its employ, who is very well fitted to discharge the delicate and onerous task of advising its commissioners upon the numerous details which require consideration. Mr. Benjamin Seare has been for some months in charge of the bonded warehouses at this port, and his selection for this important mission to Osaka is highly complimentary to him, and indicative of the growing confidence of the native Government in the integrity and intelligence of foreigners. The work of superintending the bonded warehouses has not lately been heavy, as has been shown by the statistics which we have published from time to time, and of which the latest may be found in another column. It is gratifying to find that Mr. Seare's leisure has been so well employed, and that he has been able to convince the Japanese authorities of the importance of their availing themselves, in their commercial intercourse with us, of the skill and experience which we have, but which they necessarily cannot yet possess. The stupid jealousy and superstition which obstruct the opening of China and the development of its immense resources, by admission of foreign capital and enterprise into the interior, have no existence here; and even the natural repugnance of an unconquered race, long isolated from the rest of the world, to hold unrestrained intercourse with foreigners, is rapidly being overcome.

Another proof of this has lately been given in the appointment of Mr. Erasmus Gower, an English mining engineer of considerable experience, for a special mission to the rich mineral districts in the north. He left Yokohama for Hakodate a few days ago, in the *Bertha*, to open a great coal mine which he surveyed there last year. Petroleum, as well as most of the metals, he also found in great abundance, and in such positions as to render the working of the mines safe, cheap, and easy.

During the absence of Mr. Seare, which will probably be of about six months' duration, Mr. Henry St. John Browne will fill the post of Superintendent of Bonded Warehouses at this port. This gentleman has also, within the fortnight, received a proof of the confidence of the foreign mercantile community, in his election, by a very large majority, to the post of Secretary to the Chamber of Commerce; and filling now that of Superintendent of Bonded Warehouses as well, he will be a most useful intermediary between the Japanese Government and the resident foreign merchants, and may have it in his power to be of the greatest possible service to both; while the presence of Mr. Seare at Osaka will give us exactly what we have always thought indispensable, and at which we aimed when lately urging Sir Harry Parkes to take with him a representative of the Chamber of Commerce; for thus will now be secured to us the advantage of bringing to bear special knowledge and experience upon the many matters of detail which have to be arranged, and where a diplomatist might very easily go wrong—as was clearly proved in the case of Lord Elgin in 1858, when he made a commercial treaty and forgot the drawback clause, and in that of Mr. Alcock afterwards, when he insisted on making Kanagawa, instead of Yokohama, the place of residence for merchants. Sir Harry may have objected to take down with him a member of the Chamber, under the impression that it would be difficult for any individual merchant so completely to separate his duty to that body from his duty to his house or his own individual constituents as to avoid the charge of availing himself unduly of his opportunities. Such a reason would imply no compliment, we allow, to the merchants of this port as a class, but it would have certainly been almost impossible to avoid exciting the jealousy of many. But Mr. Seare's appointment to this delicate mission is open to no objection of the sort, while it has the additional and most weighty advantage of having been made by the Japanese Government, whose servant he is and whose interests are safe in his hands.

The selection of the other port—that on the west coast—for the opening of which provision has been made in the recent Convention, is now commencing to excite attention and discussion. In view of the very limited amount of knowledge we possess of the relative political importance of the several Daimios of Japan, of the resources of their dominions and the encouragement to our own import trade likely to be given by their subjects, it is almost impossible for foreigners at present to determine where our trade may be best extended. The Prince of Kanga, generally supposed to be the richest in Japan, his yearly revenue amounting to something like three quarters of a million, very early showed himself friendly to foreigners, and, indeed, was regarded as the leader of the party of progress. He published a pamphlet in 1863, in which he advocated liberal views, dwelling particularly on one advantage which he considered likely to spring from opening Japan generally to foreign trade—that the increased demand for labour would gradually absorb large numbers of the unemployed two-sworded men, who have always been regarded by the most enlightened Japanese statesmen as the curse of the country. He was one of the earliest to trade with foreigners, and has a good harbour,* Kanasawa, which he is anxious to open to us. On the other hand, the Prince of Echizen, who is a relative of the late Shiogoon, has a town called Mikuni, which he appears rather confident will be named as the new port, for he has built a sea wall and jetties for the improvement of his harbour, and as his province is rich in silk and tea, it may be advantageous to begin trade with him; while, for the reason of his connection with the Yedo dynasty, his request that his may be the port chosen will have a good chance of a favourable reception. Conjecture on the subject is not particularly useful, as we shall probably be definitely informed on the point within a few days. The opening of Kanga's port would, probably, best advance the cause of progress, be another step towards throwing open the country generally, and help the policy advocated by this journal of restoring the great Daimios to their legitimate position in the State; while if Mikuni, Echizen's town, be chosen, the hands of the Shiogoon, the only ally we have at present in Japan, would be materially strengthened. It is possible that Stotsbashi, the new Shiogoon, is a man of sufficient courage and force of character to be the Yoritomo of his day, and found on the ruins of the power of the other Daimios a throne guarded by foreign bayonets, and if so, would such assistance offered to his predecessor in 1862 and 1863 and then refused, be now granted in face of the friendly attitude of Satsuma, Choshiu, Chikuzen, and other princes? We hope for a more peaceful solution of the existing anomaly.

The *Japan Times* has the following apt remarks on the paper read by Dr. Macgowan before the North China Branch of the Asiatic Society, which we have printed nearly *in extenso* in another column.

"We cannot, while recording these evidences of the increasing desire of the Japanese to accept the teaching and trade of foreigners, and thus learn to develop the resources of their own country, well avoid noticing a paper read before the Royal Asiatic Society in Shanghai. This purports to give information on Japan, is the work of a gentleman who lately spent a few days here (Dr. Macgowan), and to it a very undue importance has been attached by the press in China. The *Supreme Court and Consular Gazette* and the *North China Herald* have both devoted leading articles to the subject, and both appear to have adopted Dr. Macgowan's statements as reliable. The latter journal tells us, however, that his paper, translated into a vernacular print, evoked an answer from a Japanese resident in Shanghai.

The writer (says the *Herald*) does not speak courteously of the knowledge which prompted the accusation in question against his country, and declares that if it were to become widely known in Japan the youth would, without exception, rush to arms to avenge the insult.

"The accusation referred to is the scandalous, but too-often repeated one, that the people of this country are sunk in the grossest sensuality. Making allowance for the hyperbole in the last clause of this patriot's criticism, we cannot but share the contempt expressed in the first. Dr. Macgowan's personal acquaintance with this country is derived from a flying visit of a month to Nagasaki, and another of about three weeks to this port. And naturally, therefore, his paper, which we are very sorry to see has received the mint mark of the Royal Asiatic Society, is, like Bishop Smith's "Ten Weeks in Japan," and for the same reason, absolutely valueless, or worse than valueless, because misleading. The list of steamers sold to the native princes, of which considerable parade is made, has appeared before, with the exception of the last few, in newspapers, blue-books, and merchants' circulars. As for his estimate of the population at 16,000,000, he gives no reasons for arriving at such a conclusion—most probably because it was a mere guess—while there are very good reasons for supposing that he is incorrect. Mr. Winchester's estimate of 28,000,000 is nearer the mark, between twenty-six and twenty-seven millions being the total of an official native census, which the writer has seen, and from which was excluded any calculation of the unattached *samourai* or two-sworded men. The late Mr. Vidal, of H.B.M.'s Legation, had procured this with great difficulty, and was engaged in revising his translation for the press, when his untimely death occurred. This census was of recent date, on a comprehensive and intelligible plan, and was most minutely particular—the number of people employed in any trade or occupation in each city, town, or village, along each highway in every province throughout the empire being given to the unit—and altogether presented an appearance of undoubted authenticity. So much for Dr Macgowan's estimate of the population. And when we refer to the causes he alleges for the decrease which he fancies to have taken place, we find an opportunity we are very glad to seize, for contradicting many such bookmakers who have libelled the people of Japan by their accusations of "unrestrained licentiousness." Respectable natives indignantly rebut it and complain bitterly that it is so constantly repeated in European books. They say with great justice—and we thoroughly agree with them—that it is unjust to judge of the whole people of the country from a visitor's cursory observation of the very lowest and most degraded classes, amongst whom alone foreigners are at present obliged to live. They are right; it would be as fair to judge of English statesmen from Mr. John Bright, or of Irish peasantry from the Fenians. Adultery is punishable in Japan by death, and is very rare; and respectable Japanese regard the "debauchery" to which Bishop Smith and his com-

* This Kanasawa must not be confounded with the beautiful little village about twelve miles from Yokohama, which is so favourite a resort for picnic parties.

Digitized by Google

peers allude with such unction, with quite as much abhorrence as they do themselves. The statement, so often reprinted, that nobles frequently choose their wives from the common stews, is a gross and unfounded falsehood, and every foreigner who has lived in the country for any length of time and had any opportunities of intercourse with the middle classes, will bear us out in saying that they are to the full as free from vice as English, French, or Americans. We have had somewhat too much of late of these wholesale condemnations of Japanese manners by quite uninformed magazine writers, and it is as well that the practice should be stopped. No one as yet knows enough of the country to give a correct account of the people; such certainly cannot be the work of holiday-makers to Nagasaki and Yokohama. We recommend Dr. Macgowan to keep to telegraphy, on which he is able to give information worth having, and we earnestly caution members of the Royal Asiatic Society against giving any credit to his recent paper on Japan, in which what is new is not true, and what is true is not new."

The fine vessel, *Kai Yoo Mar*, built for the Japanese Government in Holland, arrived on the 30th April. We hope to have an opportunity before next mail of inspecting her; report speaks most favourably of the ship, which is very gratifying, as the only way to encourage this Government to place such contracts in foreign hands is to give them money's worth for their money, a principle which has not always, we are sorry to say, been observed.

We have received letters from Osaka up to the 25th ult. The *Argus*, which went down with Messrs. Mitford, Satow, Ashton and the guard, arrived on the 12th. The horses of Captain Applin's mounted escort were landed on the following morning in the *Argus*' paddle-box boats, in excellent condition. The road between Hiogo and Osaka is a good one, and the distance about thirty-one miles. The country appears to be very sandy, and the soil wants the richness and depth so remarkable in this district. The scenery is described as uninteresting in the extreme, and the town of Osaka, to use the words of one of our correspondents, "woefully disappointed" everybody. The town of Osaka, writes the same, "is not worthy the name of a city. Much to be pitied are the settlers in it, if ever any one settles there. The town literally stands in a swamp, the river being nearly level with and occasionally flooding the valley. The streets are narrow and dirty, and more like those in a Chinese than a Japanese town. One street which we call Theatre-street is better and rather gay-looking, having a wealth of gaudy banners and sign boards displayed before the houses." Sir Harry Parkes, with his usual activity, had plunged at once *in medias res* and was busily engaged for two days selecting a suitable site in Osaka for the residence of foreigners.

All the necessaries of life are very much dearer in Hiogo and Osaka than in Yokohama. Six boos are asked for a duck. Curios, as might be expected, are held for very high rates. There is very great distress among the lower classes of the people, there being an enormous number of beggars at every corner. The people are fairly civil and apparently not displeased at the presence of foreigners on the whole, but it is evident that the novelty at the sight of strangers has something to do with this reception. On the day when the *Argus* arrived at Hiogo, some of the officers and passengers landed for a stroll in the country. Just at their landing place they met a large procession of coolies, apparently a little the worse for *saké*. They came up close to the boats and began jostling some of the crew and throwing sand at them. As it seemed evident that they wanted a row, it was deemed prudent to retire, but no sooner did the party turn to regain their boats than the Japanese began to pelt in good earnest. The stones flew fast and thick, and some of the men were badly cut. One of the visitors got a blow in the back and another on the temple, enough to remind him of the visit for some days afterwards.

The French Minister arrived on the 24th April, and the forts saluted him on the following morning. The Shiogoon was to return from Kioto on the day when the *Argus* left, and the conference with the foreign Ministers was expected to take place upon the following day or day after. Among the official classes, the ships and the English soldiers, and particularly the large men on tall horses, produced a profound sensation.

NAGASAKI.

Advices from this port announce the sale of the P. and O. steamer *Nepaul* to Messrs. Alt and Co. for £20,000; that two earthquakes had been felt in Nagasaki in one day; and that two Europeans, Messrs. Ryley and Brown, were arrested in Simbarra by the Japanese for intruding in a non-treaty port, but were released at the request of the British Consul. The steamer *Emperor* has also been sold to the Japanese. The American steamer *Rover* was to leave on 19th May for Yokohama, via the Inland Sea.

The annual regatta took place on the 6th May. Although much interest was taken in it, it was not so gay as on the previous occasions. The absence of H.M.'s ships *Pelorus* and *Serpent*, and of the Russian vessels, had to be regretted, and more particularly of the Russian band. However, under the circumstances, it went off as well as could be expected. The American steamer *Kanga-no-kami* was kindly placed at the disposal of the committee as a rendezvous for the spectators; and H.M.S. *Algerine* was anchored on the opposite side with the umpires on board.

CHINA.

SHANGHAI.

The P. and O. mail of 26th March arrived on the 10th May, that of 10th April on the 24th. The dates are down to the morning of the 25th. The following items are from the *North China Herald*:—

We are glad to learn that all the debentures in the Municipal Loan have been subscribed for. The debt to the Comptoir can thus be at once wiped out. Four members of the French Municipal Council having resigned, and the term of office of two others having expired under the regulations, a new election had become necessary. This took place on the 19th instant, when the following gentlemen were elected:—Messrs. Bonneville, Millot, Massais, Aymeri, Nachtrieb, and Groom.

It had been announced that the Pacific Mail Company's steamer *Colorado* would call at Woosung on the 22nd May, on her way from Hong Kong to San Francisco. This arrangement was afterwards altered, but the *Yesso* was despatched hence to meet her off the Saddles. We are glad to learn that the connection was satisfactorily effected. [This news was received via San Francisco, and given in our issue of the 27th June.]

We learn from Tientsin that Sir Rutherford Alcock left for Newchwang on the 13th May, *en route* for the various ports. Sir Rutherford has written an official essay on "Middlemen."

We have frequently alluded to the oppressive exactions levied by the Government on that very necessary article of consumption—salt. The following paper, bearing no signature, but purporting to issue from the native shopkeepers in the settlement, has lately been widely posted up:—

"It seems that Ching-ling-chuen, to whom was granted the exclusive privilege of selling salt in the English and American settlements by the Taotai and Municipal Council, has been compelling the shopkeepers to purchase more salt per month than they could use and more than they wished. Therefore the people are crying out against it, and say unless there is a stop put to it they will petition the Taotai in regard to it. They complain of the Wei-Yuen having on several occasions given judgment against some of the people who have refused to pay the sum exacted, and because he has taken part in it they think he favours the exorbitant tax. They are allowed 12 oz. and not 16 oz. to the catty, and the people are told to go to the city and buy salt."

Messrs. Francis and Co.'s Kewkiang Tea Circular of 18th May says:—"The market for the new crop leaf was opened in the Ning-chow district a week ago, and about 4,000 piculs have been purchased at prices equivalent to about 23 to 24 tls. per picul laid down here. These prices are considered high, however, and it is reported that tea-men are now holding off for lower rates. One small parcel of Moning, picked earlier than the bulk of the crop, is already to hand; this is quite an exceptional parcel, however, and affords no criterion as to the quality of the crop generally. Musters of the Ningchows will probably come to hand in five or six days, and the teas in bulk are expected to arrive in about a fortnight. It is reported that in the Moyune district the new leaf is being purchased at prices equivalent to 27 to 28 tls. laid down here. All reports concerning the quality of the crop are of a most favourable nature."

The property of the Brick and Saw Mill Company, containing about 10 acres of land, and having a water frontage of some 2,400 feet, was sold on the 20th, together with a Clayton's brick-making machine, 10-horse engine, buildings, shed, &c., &c.,

Digitized by Google

for the small sum of 2,000 tls., the purchaser being Mr. Knevitt.

A mortgage for £2,000, secured by the property known as the Elgin Arms, or Bellevue, having three years to run, interest 10 per cent., has been sold for 50,000 tls.

For houses suitable for European occupation there is a better enquiry, but premises settled do not show improvement in rentals. Chinese properties nothing to report.

The new silk season (says the *Recorder*) is now so close at hand that a few remarks upon this subject will not, we think, be out of place. After several years of failing and scanty crops we have now before us the prospect of a really abundant one. All accounts from the interior agree upon the one important point, the abundance of good leaves this season. It is a well-known fact that the failure of last year's crop did not lie only in the unsettled state of the weather, but had its real and prominent cause in the scarcity of leaves, which made it a matter of impossibility to bring up all the worms produced; and large quantities had consequently to be thrown away and destroyed. This great drawback will not have to be encountered this year, and there will be a sufficiency of leaves to feed the whole of the worms reared. Up to this moment (May 22) the weather has been as favourable as can be desired; the first crop is nearly secured, and is very highly reported upon. Inclement weather may, of course, interfere to some extent with the second and third crops, but the chances that this will be the case are quite as great. Even granted, however, that there would be a slightly diminished production on this account, the most reliable native accounts are unanimous in predicting an export of some 50,000 bales Chinas from Shanghai alone, and we think this by no means over-estimated. Add to this 6,000 bales, the estimated crop at Canton, and about 15,000 bales Japans, which will give us in round numbers some 70,000 bales to go forward during the coming season.

HONG KONG.

The French mail of 17th April arrived out on the 29th May. The dates are now down to the 30th. Telegrams had been received to 2nd May.

On Thursday, the 23rd May—before the Chief Justice in Chambers—a decision was given by his lordship in the matter of Messrs. Lyall, Still, and Co.'s application to be adjudicated bankrupts. Mr. Whittall had previously petitioned for an adjudication and made the usual formal oath of indebtedness, on behalf of himself, the other creditors and the bankrupts. The Chief Justice, while he admitted that the evidence of adjudication was complete, stated that under the peculiar circumstances of the case he would hesitate to adjudicate, except on the consent of all the principal creditors and of Mr. Lyall, the absent debtor. Mr. Pollard, Q.C., who appeared on behalf of Mr. Lyall, requested that the adjudication might be made forthwith, and stated that he submitted to the jurisdiction of the Court. Mr. Pollard appeared likewise for several of the banks and a number of the principal creditors; Mr. Whyte appeared for others of the creditors, while Mr. Caldwell appeared as attorney for several more; they, on behalf of their clients, also requested immediate adjudication, and submitted to the jurisdiction of the Court. Mr. Still having informed his lordship that the gentlemen so represented included the most important of the creditors of the estate, the Chief Justice, under the circumstances, determined to adjudicate Messrs. Lyall, Still and Co. to be bankrupts. At the same time, his lordship observed that he made the decision under the peculiar circumstances of the case, and upon the submission made on behalf of the creditors and debtors, and that it was not to be looked upon as a precedent.

We much regret to record the death of Mr. Langa, for many years H.B.M. Consular Agent at Macao. His funeral was numerously attended by the officials and respectable inhabitants of Macao.

A subject of importance to the trade of China has occupied the attention of the committee, viz., the resolution brought forward by Mr. Linstead at the general meeting held on 12th November:—

"That freight on tea and other cargoes be paid on the tonnage ascertained at time of shipment, instead of, as at present, on the tonnage measured after discharge."

This resolution has been circulated amongst the mercantile houses of Hong Kong, Canton, and the coast ports, and, with a few exceptions, has met with their approval, and the Chamber can now only recommend those firms who concur in the resolution to carry it out by taking the necessary steps when loading a vessel on the berth, and by informing the captain of the new custom introduced, in order that no difficulty may subsequently arise. It is fully expected that this will be adhered to in loading the clippers at Canton and Foochow with the new season's teas.

The following resolution was also passed unanimously:—

"That the subscription for membership of the Chamber be for firms $50, and for persons subscribing as individuals $25."

Notes and Queries, we are glad to see, has fairly made good its footing, and is already recognised as a valuable means of extending our knowledge of China and Japan. The fifth number, which has reached us by this mail, contains notes on—Ethnographical Sketches of the Hakka Chinese, Devonian Fossils in China, Classifiers of Chinese Grammar, Yellow as an Imperial Colour, Notes on the Topography of some of the Localities in Manji, or Southern China, mentioned by Marco Polo, and Chinese Poetical Romance; Queries, on—A Negro race in the Himalayas, the word "Coolie," the Censorate in China, Presentation of Boots to Outgoing Officials, Law of Perspective, Chinese in Australia, "Corea" versus "The Corea," Infanticide in China, Timour and Tamerlane, Imperial Obsequies in Japan, Lunar Eclipses, Spanish Translation of the Works of Confucius, and the Author of the Hao-chiu-chuan.

The *China Punch* has been issued, but we have not received a copy.

MEETING OF THE LEGISLATIVE COUNCIL.

A meeting of the Legislative Council was held on the 15th May. Present: His Excellency the Governor, the Chief Justice, the Attorney General, the Colonial Treasurer, Hon. H. J. Ball, the Auditor-General, Hon. James Whittall, and Hon. John Dent. The minutes of the previous meeting having been read and confirmed, the clerk read the title of the new ordinances, an abstract of which, and of the others submitted to the Council, we have given elsewhere. All the ordinances were received as read a first time.

His Excellency next introduced an ordinance for supplementary estimates for 1866, and proceeded to read from a paper which he had prepared, as follows:—

In considering the Supplementary Estimates—which the Council is now called on to vote for last year—it will be advisable to recur to the Original Estimates for that year, and to bear in mind that those estimates were framed so far back as July, 1865. The Original Estimates at that time provided for an expenditure of $913,819, and out of the money so appropriated only $811,981 were expended in 1866. Thus, if no other expenditure had taken place, there would have been a saving of $101,838. As usual, however, there has been much expenditure which the Council in July, 1865, could not have foreseen. That expenditure has amounted to $124,973—so that in lieu of a saving, there has in reality been an excess of expenditure to the extent of $23,135, and the vote of the Council is now required to make good that deficiency and provide for the difference of appropriations in the various items. To arrive more particularly at the mode in which that deficiency has arisen, I shall classify the total actual expenditure of 1866 under general heads, thus:—

Ordinary expenditure	$462,597.43
Mint	128,308.62
Public works (exclusive of Mint)	144,243.03
Payments to Imperial Post-office	107,149.93
Military contribution	93,658.54
	$936,984.55

To meet that expenditure the colony received—

Ordinary revenue	$651,436.62
Receipts on account of Imperial Post-office ...	107,149.93
Mint (Seignorage), &c., &c.	10,490.03
	$769,076.58

Hence there was a clear excess of expenditure in 1866 over the receipts of the year, to the extent of $167,878, a startling deficiency, and which would have reduced the colony at once to bankruptcy, were it not that there had been former savings and outstanding capital on which to fall back, a contingency, however, which I must impress on the Council can no longer be relied on, as the capital of the colony, excepting its unsold lands, may be regarded now as expended. That result is of course mainly attributable to the larger outlay which has taken place on the mint, whereby capital to the extent of $380,000 has now been sunk, whilst the only profit produced by the speculation, including seignorage, subsidiary coinage, &c., in 1866, was $10,490. There is, however, one point in connection with the revenue which is satisfactory—viz., that the actual ordinary revenue, apart from produce of land sales, &c., has on the whole continued steady, but the expenditure on public works, instead of being limited to $90,000, as anticipated in the financial statement of last August, reached $132,000. And my attention having recently been drawn to the very irresponsible manner in which large sums for public works are expended in this colony, I have adopted stringent measures for bringing the intended monthly expenditure of the Surveyor-General's department early under the notice of the head of the Executive. There are one or two other items on which the Council is entitled to explanation. Thus the item of $2,806 for interest on loans contracted on bills discounted in England was occasioned principally by the suspension of the Agra Bank, and the necessity which the Crown agents were under of borrowing money at the high rate then ruling in England to meet the colony's engagements, as for a time the bills of the Agra Bank held by the colony, and amounting to £17,162 8s. 10d., were not available, though I

Digitized by Google

am happy to say that the whole amount with interest has since been recovered. In like manner the smaller items of $1,658 to be voted for the military contribution was occasioned by the lower rate of exchange ruling during the past year, which of course necessitated the payment of a greater number of dollars to purchase £20,000 in bills than had been estimated. On the whole, without wishing to anticipate the more comprehensive financial statement which the Council may expect when I introduce the estimates for 1867, I think I am justified in saying that if the colony be allowed time to right itself, and if it be relieved of the heavy drain on its resources occasioned by the annual expenditure on the Mint, we may hope that with the additional sources of revenue which the Council last year provided, the statement of assets and liabilities at the close of 1867 will be much more satisfactory than it was at the termination of the last year.

His Excellency, in introducing the ordinance for regulating the importation and storage of gunpowder, observed, it had no doubt been anticipated that the disaster which occurred in the harbour some time since would lead to such a Bill, for the better safety of the town and the inhabitants. It was founded chiefly on the suggestions of the harbour master and of members of the Council, and its object was to take the storage of gunpowder out of the hands of private individuals, and constitute Government the sole storers, compensation therefore to be fixed by the Council.

In laying before the Council "an ordinance for the better securing the health of emigrants in Chinese passenger ships clearing from Hong Kong," his Excellency said that although he had been from the first convinced of the necessity for legislation the better to fix responsibility on parties undertaking to supervise emigration of Chinese passengers, the ordinance now before them was the result more immediately of instructions from the home Government.

The list of ordinances also contained the following :—A Bill to assimilate the local law of partnership with that of England, for incorporating the civil police force with that belonging to the naval yard ; for enabling the Government to resume possession of the Mahomedan cemetery ; and for the prevention of contagious diseases. The Government had no intention of introducing a Bill dealing with gambling; and in reply to a question from Mr. Whittall, the Governor said, Stone-Cutter's Island was very much where it used to be, and he should be happy to sell it to Messrs. Jardine for a godown. It was in truth very difficult to know what to do with it. Turning to the general subject of gaol management, he congratulated the Council on the sensible diminution in crime of a serious character which had been observed of late. The general health of the gaol was good, and there was seldom more than the half of one per cent. in the hospital. The Council then adjourned until Wednesday, 22nd inst., at half-past two o'clock.

The Council met again on the 22nd May, when in reply to questions put by the Hon. James Whittall, his Excellency stated that there was no truth whatever in an assertion repeatedly made some time back by the *Daily Press* that Her Majesty's Government had remitted the military contribution of the colony. That assertion had been contradicted "on authority," but the contradiction only led to a reiteration of the untruth, with insinuations that he (the Governor) was denying what he knew to be the fact. Such conduct on the part of the *Press* was wholly indefensible, but, as it had taken place under different management, and was extremely unlikely to be repeated—and, moreover, had since been contradicted—he should say nothing more on the subject.

On the second reading of the ordinance authorising the appropriation of a sum not exceeding $125,000 for the estimates of last year, the Auditor-General, in reply to Mr. Whittall, gave some explanations as to the apparent inconsistencies of the estimates. This was owing chiefly to the fact that they were bound down by certain formula in the making up of the accounts. The principal item in the deficit now made up was that of the Mint, which cost $480,000, instead of $350,000, as estimated in the budget of last year.

The Governor also explained that, in the item of "roads, streets, and bridges," a considerable outlay in reclaiming marine lots and building sea-wall had to be accounted for. He instanced the Post-office accounts, and mentioned another item, which was likewise noteworthy, viz., the large sum of $295,000 estimated to be received for police and lighting rates ; he was himself somewhat astonished at a first sight of it, but he afterwards found that it included $110,000 for stamps. The ordinance was passed without alteration.

An ordinance to regulate the importation and storage of gunpowder was the next brought forward. On clause 18, which constituted every offence against the ordinance a misdemeanor, the Chief Justice objected to the use of the word misdemeanor as language too strong. It was carrying matters a little too far to convert into crimes offences which were not criminal. A captain might contravene clause 9, by failing to exhibit a red flag ; but that surely was not a misdemeanor. He thought also that the minimum fine of $50 was too much, it might be left to the magistrate's discretion.—The Governor thought that such strictness would prevent the matter being treated lightly. —After some further conversation, the words "shall be a misdemeanor" were deleted.—The Acting Colonial Secretary : If it be tried in a summary way it is a misdemeanor all the same. I am sure of it.—Chief Justice : I don't know that. I have always been under the impression that the penalties do not constitute a misdemeanor.—Thus amended, the ordinance then passed, and the Council was adjourned until the 6th June.

STRAITS SETTLEMENTS.

SINGAPORE.

Dates hence are to the 10th June (eight days later). The outward mails of May 10 had not arrived, but London telegrams had been received *via* Calcutta to the 24th May. The following summary of news is from the *Straits Times* :—

No new measures have been brought forward during the fortnight. His Excellency the Governor and suite proceeded to Penang on the 26th May and will return by the next mail steamer. The increase of expenditure involved by the sudden proposal for the construction of a new Government-house, as well as by the list of civil salaries under the new administration, has caused some slight feeling of uneasiness to prevail ; and a rumour, probably groundless, which has lately circulated here that so large a sum as £20,000 to £25,000 was about to be appropriated to the purchase, for Government purposes, of the *Filippino*, a steamer that has arrived here for sale, has not tended to remove the feeling. A Government-house may or may not have been so necessary as to justify the immediate outlay of from £25,000 to £30,000 ; but it is impossible to conceive what benefit would be secured to the settlement by the purchare of a large sea-going steamer—handsome though she be. If any species of steamer be wanted for the special service of the Straits, it is a shallow-bottomed craft, suited to the navigation of rivers and comparatively still waters, and before even this be done it would be desirable to dispose of the two steamers already in the possession of Government. For the suppression of piracy beyond the smooth waters of the Straits, Her Majesty's steamers on the station are amply sufficient, and for the conveyance of Government officials from one station to another better accommodation will be found in the ordinary passenger boats constantly available than the the colony could afford to supply in any steamer of its own.

The following memorandum, contained in a bottle, was picked up close to Rhio a few days ago, and transmitted to the Dutch Consul for the information of those interested. It seems extraordinary that this document, which appears to have been cast overboard off the Australian coast somewhere near Freemantle should in so short a time as has elapsed between the end of February and the end of May have travelled so far, and in so strange a direction as Rhio :—

INDIAN OCEAN.

On board the British schooner *Wild Wave*, February 26, 1867, lat. 34. S., long. 100 E., 165 days out—awful passage and miserable weather —passengers all well—one lady passenger gave birth to three children yesterday afternoon. Captain John H. Smith wants to be reported—first officer dangerously ill for about a fortnight. HENRY W. BRIAR.

LATEST TELEGRAMS.

(RECEIVED JULY 15, VIA GALLE.)

HONG KONG, June 13.

The Foochow tea season has opened. Quotations are 13 taels lower than last year. Fears of a short crop are entertained in consequence of the rains.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

MCLACHLAN—On the 8th July, at No. 2, Royal-crescent, Cheltenham, the wife of James McLachlan, Esq., H.B.M.'s Consul, Batavia, of a son.

PIERCY—On the 17th May, at Canton, the wife of the Rev. George Piercy, of a daughter.

RIDDELL—On the 23rd May, at No. 5. Upper Mosque-terrace, Hong Kong, the wife of Mr. Walter Scott Riddell, of a daughter.

THOMSON—On the 29th May, at Singapore, Mrs. W. Thomson, of a daughter.

MARRIAGES.

EARL—ANTHONY.—On the 6th June, at Penang, by the Rev. J. Mackay, B.D., Percy William Earl, Esq., Assistant Commissioner of Police, to Flora, youngest daughter of A. A. Anthony, Esq., of Clove Hall, Penang.

MAGNIAC—DANIELL.—On the 11th July, at Speen Church, by the Rev. H. W. Majendie, vicar of Speen, assisted by the Rev. T. Richards, Arthur, son of the late Hollingworth Magniac, Esq., of Colworth, Bedfordshire, to Julia, daughter of M. B. Daniell, Esq., of Foley Lodge, Berkshire.

DEATHS.

ELLIS—On the 30th April, on board the Dodo, of dysentery, Joachim Ellis, a native of Copenhagen, Denmark.

HOLME—On the 26th June, at 2, Primrose-hill-road, Adelaide-road, Jane, third daughter of the late John Holme, Esq., formerly of Grendon Lodge, Atherstone, Warwickshire. Friends will please accept this intimation.

INNOCENT—On the 7th May, at Laou-Ling, Shantung, John Alfred, the infant son of the Rev. J. Innocent, aged 1 year and 3 months.

M'DERMOTT—On the 30th May, at Singapore, George Thomas Walter, youngest son of Conductor James M'Dermott, aged 2 years and 11 months.

MEDHURST—On the 17th May, Alice Evelyn, youngest daughter of Walter Medhurst, Esq., H.B.M.'s Consul, Hankow, aged 2 years and 7 months.

SELL—On the 18th May, at Ningpo, from small pox, Mr. John Robert Sell, of the China Inland Mission.

COMMERCIAL REPORT.

—o—

CHINA AND JAPAN EXPORTS.

TEA.

SHANGHAI.—The season has been closed by the settlement of a small parcel of common Shanghai-packed leaf at Tls. 14½ (=11d.), and nothing now remains in stock. Several musters of new teas are to hand from Hankow, and we expect to receive news of the arrival of the first crops by an early steamer. The quality thus far proves, as we were led to anticipate, to be below the average, the leaf being unusually thin and poor, and we fear that really fine teas will be again scarce. Opening rates are expected to be 25 per cent. below those of last season. Total settlements, with reshipments from the River Ports, from the 1st of June, 1866, to date, 327,500 chests, against 274,500 chests last year. Green Teas: Out of a stock increased to 10,000 packages by arrivals from the river, about 1,200 half-chests have been taken for shipment to England, chiefly as flooring chop for the new clippers which are shortly expected on the berth. Prices have been very low, the inquiry being very limited. The first New Teas from Foochow are expected in July, and the Pingsuey's shortly after. We hear that country rates for New Leaf have not fallen in proportion to the decline here, and it is expected that the teamen will not be ready sellers when the market reopens. The Crawshay Bailey has sailed for London with a cargo consisting chiefly of Green Teas, bringing our total export of this description to all countries for season up to twenty-four millions. The Settlements comprise 900 half-chests common Fychow and Tekhing, 20 to 27.5 tls., and 300 half-chests medium Tekhing, 32 tls., making 1200 half-chests. Total Settlements, with reshipments from the River Ports, from 1st June to date 364,100 half-chests, against 286,300 half-chests last year.

HANKOW.—Chest musters of nearly twenty chops Hip-ca-se and Oan-fa Teas had arrived, said to cost, laid down in Hankow, from 24 to 29 tls. per picul. The quality of the musters so far is not very promising, they showing generally a want of strength. A large number of buyers had arrived from Shanghai, but there seemed to be less general excitement than usual, and it was hoped opening prices would not exceed 28 or 30 tls. for crack chops for direct shipment to Russia.

KIUKIANG.—A shipment of 400 packages Green tea was the whole business to be reported. The small parcel of Black tea had been withdrawn, and the market was now clear of Old tea. One chest muster of New tea, a Ningchow, costing last year 39 tls., had arrived. Such teas would lay down this year at 22 to 25 tls., while Kiutuck, Loongkong, and Hohow teas would probably not cost more than 18 tls. Of Green teas the crop would be a large one, and the leaf was 30 per cent. cheaper than last year.

CHINKIANG.—This has ceased for the present to be a tea port, the stock of 3,000 half-chests having been shipped to Shanghai on owners' account.

CANTON.—An active business has been transacted during the past fortnight. Settlements of Country Congous show a further reduction in rates of about 3 tls. Canton-made Teas: The market has at length opened, and considerable settlements of Scented Teas have been effected at 25 to 26 tls. for Scented Capers, and 27½ to 34 tls. for Scented Orange Pekoes. The latter is almost a nominal quotation, Pekoes having attracted little or no attention. The quality of both kinds of Scenteds is about equal to last year's crop, and the Scenting is decidedly superior. New-made Congous have continued in moderate demand at about former rates.

FOOCHOW.—Congou: The first parcel came to hand on the 13th May, since when the arrivals amount to 30,000 chests. The quality, and particularly the condition, of the first arrivals were inferior. The Teas that have come down during the last three or four days show an improvement in both these respects—confirmatory of the reports from the country, that the lower classes are inferior, while the finer sorts are superior to the average of seasons. The quality has been seriously deteriorated by the growers having mixed old leaf with the Tea, before taking it to market; and this has been done most in the inferior districts. The bad condition of these same Teas has been caused by the wet weather, which has been a serious difficulty in the manufacture of all grades. Oolong: Arrivals amount to 1,200 half-chests, and of these only a few musters have been shown.

SILK.

CANTON.—Very little has been done since last report, owing to the warlike news received from Europe by telegraph. The market has been nearly cleared of old silk. The first crop is a failure, being fully 70 per cent. less than last year's; the second crop, however, is expected to be a very large one. Quotations, &c., are as follows:—Loongkong, No. 1, $500 to 505; do. No. 2, $485 to 490; Kowkong, $430 to 430; Cumchuck Lucklow, $450 to 460; Rereeled Cumchuck, $530 to 540; Punjum, $100 to 105; Tsatlee, No. 1, $515 to 520.

SHANGHAI.—The season 1866-67 closes with total settlements and exports of 28,384 bales China and 14,022 bales Japan, against 41,883 bales and 12,695 bales respectively in 1865-66, showing a decrease of 12,112 bales, and as compared with 1864-65 an increase of 3,000 bales. It is generally estimated we shall have a supply of 45,000 to 50,000 bales, if the second crop be good; if a failure, not more than 40,000 bales. It is impossible to say at what price the market will open, as there is no appearance of eagerness at present, but we incline to the belief of at least 480 taels for 3rd Tsatlees, and 430 to 440 taels for No. 1 Kahins, unless we receive discouraging tidings from Europe.

CHINA AND JAPAN IMPORTS.

SHANGHAI.—Grey Shirtings: Market very dull, tendency to lower prices. T-Cloths: Without change. White Shirtings: In fair request and command quotations. Camlets: Sales for the past fortnight about 5,000 pcs. at rates for assorted, tending in favour of buyers. Spanish Stripes: Asked for to arrive at 67c. per yard for HH. Sales about 1,000 pcs. Long Ells: Prices very steady. Sales of C P H, assorted to arrive at 7.20 per pcs. H H goods on the spot are held for extreme rates. Sales 4,000 pcs. Figured Orleans: Are a shade firmer, inferior kinds having realised 4.65 taels per pcs. Sales 7c. 8,000 pcs.

METALS.—Late arrivals have increased stocks of lead, but not added much to those of Iron, for which a good inquiry exists. For good assortments of Nail Rod 2.60 to 2.65 tls. can be obtained. Bar has somewhat

Digitized by Google

improved; suitable parcels brought 2.70 tls. Lead: L. B. offered at 5.10 tls.

COALS.—The cargo of the Elmstone, Whinfell, and John R. Worcester, have somewhat relieved the market, but caused no change in prices. Cardiff, from ship's side, 16 tls. English, ship's side, 14 tls. Anthracite, 13 to 14 tls.

CANTON.—In Cotton and Manufactures there is nothing new. Lead and Quicksilver continue in good demand at former rates.

HONG KONG.—A very uneasy feeling has prevailed since last mail left, in consequence of the alarming nature of recent advices from Europe, and purchases of Cotton Goods have only been made to a very limited extent, except in the case of T-Cloths, as noted below; Woollens, on the contrary have attracted more attention than for some weeks past. Cotton Yarn: The dulness in this article has continued, and settlements are only to be made at a reduction. Grey Shirtings: Large auction sales of mildewed goods, which took place early in the fortnight have fully supplied the immediate wants of our dealers, so that it has been almost impossible to make any clearances by private contract. A few choice parcels, however, have thus changed hands at $3.05 to $3.10 for 7 lbs., and $3.47½ to $3.59 for 8¼ lbs., and some inferior goods of the last named weight at $3.40 per piece. White Shirtings have been totally neglected. Grey T-Cloths: The demand for these continues, and upwards of 21,000 pieces have changed hands. $2.40 is now readily paid for 6 lbs. 32 in., and 7 lbs. 32 in. have advanced to $2.80 per piece. Dyed and Fancy Cottons: A small amount of settlements are reported in Dyed Brocades at $4.95 per piece; Gentian Twills, at $3.75 per piece; Chintzes, at $2.20 per piece, and Turkey Red Shirtings at $3.25 per piece. Spanish Stripes have come into some request, and have been taken to the extent of upwards of 1,000 pieces at about previous rates. Long Ells are beginning to be inquired for, but prices still rule very low. Camlets—In these only trifling settlements are reported. Inquiry is very slack. Metals: Nail Rod Iron has been active, but at rather lower rates for the ordinary makes of 1 to 6. Hoop and Bar find buyers to a fair extent, also at rather cheaper rates. Lead: 200 pigs have changed hands at $6.60 per picul. Coal: Stocks decreasing, and small supplies on the way, market consequently improving.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—None.

At SHANGHAI.—From London, May 17, Challenger; 21, City of Aberdeen; from Deal, 21, Elmstone; from Cardiff, 21, Whinfell; from Shields, 21, John R. Worcester; from London, —, Star of China, Vigil, Wild Deer; from Cardiff, Anna Dorothea (reported by telegram).

At HONG KONG.—From London, May 28; Burdwan, from Liverpool, 20, Everest; from Bordeaux, 18, Imperatrice Eugenie.

At MACAO, from Lisbon, May 18, H.F. M.S. Sada Bandeira.

At MANILA, from Liverpool, May 18, Sales; from Newcastle, 6, Vooruit; from London, Ogono; from Liverpool, Trinidad (reported by telegram.)

At SINGAPORE.—From London, June 2, Taiwan (s.); from Glasgow, 1, Filipino (s.); 7, Dragon (s.); from Cardiff, 8, Haya Maro.

At PENANG, from London, May 21, Ceylon; from Glasgow, Zambezi.

DEPARTURES.

From YOKOHAMA.—None.

From SHANGHAI.—None

From FOOCHOW.—For London, Maitland, Serica, Taeping. (Reported by telegram.)

From HONG KONG and CANTON.—For London, Belted Will. (Reported by telegram.)

From MANILA.—For Cork, May 17, Lord Raglan; for Boston, 19, Gentoo.

From SINGAPORE.—For London, June 1, Mirella; for Boston, 5, Borneo.

From PENANG.—For London, May 16, Tamerlane.

VESSELS LOADING.

At YOKOHAMA.—For London, Lord Collingwood; for New York, Havelock, Benefactress.

At HANKOW.—For London, Ada, Eliza Shaw.

At SHANGHAI.—For London, Isles of the South.

At FOOCHOW.—For London, Fiery Cross, Flying Spur, Whiteadder, Ziba, Yangtzee, Chinaman, Expected, Taitsing, Ariel, Black Prince.

At HONG KONG.—For London, Min, Wemyss Castle, Passe, Patriot, Deerfoot; for New York, Ethel.

At MANILA.—For London, Monarch; for Liverpool, Hamilla Mitchell Capriolani; for New York, Daniel Marcy, Wild Rover.

At PENANG.—For London, Ceylon, Zambezi; for Falmouth, Dr, Peterman.

FREIGHTS AND CHARTERS.

At HANKOW.—To London, rates not fixed.

At SHANGHAI.—To London, £5 per ton; one vessel only on the berth.

At FOOCHOW.—Rates not fixed.

At HONG KONG AND CANTON.—Freights are dull, with an increased supply of tonnage in harbour. The following is from the circular is from the Circular of Geo. Holmes:—Wemyss Castle, 700 tons, on the berth at Whampoa, for London, at £3 10s. per ton; Passe Partout, 304 tons, Whampoa to London, at £2 15s. per ton; Esmeralda, 360 tons, to Callao, at £3 per ton. Tonnage in harbour, exclusive of Siamese, 41, representing 18 824 tons.

At MANILA.—The settlements are confined to two vessels. The British barque Capriolani loads 600 tons dry sugar at £3, and about 200 tons hemp at £3 10s. For Liverpool: The British ship Hamilla Mitchell has been laid on at £3 for sugar, and £3 5s. for hemp. There is now no disengaged foreign vessel in port, and only one Spanish vessel of suitable size.

AT SINGAPORE.—Rates for home remain steady and firm at £3 per ton all round.

AT PENANG.—The Zambesi, 338 tons, and Ceylon, 265 tons, are loading for London. The former has a full cargo engaged at £3.5s. for Tin, Sugar, Pepper, and Tapioca, £3. 10s. for Hides, and £3. 15s. for Measurement. The Ceylon gets £3. 15s. for Tin, £3. 5s. for light freight and Sugar, and £3, 15s. fer Measurement.

VESSELS PASSED STRAITS OF SUNDA.

COMMERCIAL POSTSCRIPT.

Another meeting of the committee appointed to effect the resuscitation of the Commercial Bank has been held without arriving at a result, and it is feared that the liquidators will not be able to wait longer, as creditors are pressing for payment. A call of £10 per share appears to be inevitable.

ARRIVALS NOT IN THE TABLES.—July 12, at Deal, from Samarang, Macassar; from Sourabaya, Alida; 10, off Dungeness, from Java, Ida Elizabeth; 12, at Brouwershaven, from Banjoewangie, Earl of Chester; 13, at Flushing, from Rangoon, Sparkler; 14, at Texel, from Samarang, Kanagawa; 17, at London, from Manila, Coromandel: July 16, at Dartmouth from Singapore, Elias; June 27, at Havana from Macao, Krimpenaan de Leck; July 16, at Liverpool from Singapore, Roslin Castle; from Penang, Monteagle; 14, at Texel from Padang, Aletta Augusta; 15, at Brouwershaven from Banjoewangie, Sumatra; 5, at Zierikzee from Batavia, Catharina Maria; 18, at Deal from Singapore, Der Sud; from Colombo, British Constitution; 15, at Bremerhaven from Rangoon, Peter Gedeffroy; 19, at London from Colombo, Avon; 15, at Brouwershaven from Banjoewangie, Gebr. v. d. Beek; 19, at London from Ceylon, Palestine; at Falmouth from Akyab, Miranda; 17, at Texel from Tjilatjap, Jacob; 19, at Falmouth from Akyab, Buston Vale; from Amoy, Benger; off the Eddystone from Singapore, Hercules.

DEPARTURES.—From Rotterdam, for Batavia, Kosmopoliet; July 13, from Liverpool, for Shanghai, Devonshire; 15, from Sunderland, for Singapore, Blanche; 14, from Gravesend for Singapore, Flandre (s.); 17, from London for Japan, Osaca (s.s.); from Holland for Batavia, Cornelia Hendrika; 13, from Glasgow for Singapore, Jane Blyth; 11, from Lisbon for Galle, Argo, after repairing; 15, from Shields for Galle, Shalland; 19, from London for Cardiff and Singapore, Madagascar; 7, from Shields for Singapore, Neptunus; 13, from Lisbon for Batavia, Navigator, after repairing; from Cardiff for Hong Kong, Abbot Lawrence.

LAID ON.—At London for Shanghai, Shakspeare; for Colombo, Avon. At Liverpool for Shanghai, Leon Crespo; for Singapore, Heather Bell.

SPOKEN.—Kortenaar, Rotterdam to Batavia, June 6, 9 S., 33 W.; Eastern Province, Amsterdam to Colombo, June 6, 9 S., 33 W.; County of Argyle (not Countess of Argyle, as before reported), Glasgow to Java, 45 N., 13 W.; Marie and Elizabeth, Cardiff to Singapore, May 31, 7 N.; 26 W.; Doesborgh, Amsterdam to Maccassar, June 12, 2 N., 25 W., Grosvater, Java to the Channel, June 14, 9 N., 26 W.; Ternate, Sourabaya to Rotterdam, July 12, 48 N., 11 W.; Krimpenaan der Lek, Macao to Havana, May 18, 12 S., 11 W.; J. C. Schotel, Shields to Galle, May 31, 7 N., 25 W.; Corina, Yokohama to London, 40 N., 31 W.; Roslin Castle, Singapore to Liverpool, May 1, 36 S., 22 E.; Stadde Maaslines, Sourabaya to Amsterdam, June 8, 2 N., 24 W.; Malvern, Sunderland to Hong Kong, June 8, 2 N., 24 W.; Fontenaye, London to Japan, June 9, 4 N., 25 W.; Adolf Martinus, London to Batavia, June 1, 6 N., 25 W.

CASUALTIES.—The Tavistock, Tate, from Shields to Shanghai, arrived at Deal July 15, with crew refractory.

MISCELLANEOUS.—The Admiralty have invited tenders for the conveyance of 7 tons naval masts and 28 tons naval stores from the Thames to Trincomalee, also of 14 tons (meast.) rifled carbines to Colombo. At Mauritius, June 8, Diana Teengs, from Batavia for Rotterdam; 6, Thales (s.s.) Bramwell, and left 10th for Singapore; May 25, Douglas, Hammel from Singapore; June 3, Migrator, Romer, from Singapore.

THE VOTE FOR LABUAN.—In the House of Commons last night, on the question of a sum to complete the vote of £2,183 for Labuan, Mr. Alderman Salomons said that Labuan was a coaling station for steamers to the Pacific. Was there any prospect that the settlement would pay its own expenses?—Mr. C. Fortescue wished to know whether the Under Secretary for the Colonies could give any information respecting the progress and prospects of the coal mining districts. The island had been retained for its coal, and it was important for our trade in those seas if coal could be obtained. Hitherto, however, the progress in obtaining coal had been slow and disappointing.—Mr. Adderley was informed that the present prospects of the coal supply were much more satisfactory than they had been. It was in 1848 that the station had been accepted as a coaling station, and contracts had now been made for the supply of coal. A new Governor was going out in the autumn.—Colonel Sykes: Who is the new Governor?—An Hon. Member: "Mr. Pope Hennessy." [Mr. Salomons seems to suppose that the China Sea and the Pacific Ocean are identical. But we must not expect too much of Aldermanic geography.—ED. L. & C. T.]

LAUNCH OF A CHINA CLIPPER.—On the 18th inst. there was launched from the building yard of Messrs. Connell, and Co., Glasgow, a handsome composite clipper ship of 1,350 tons, classed A 1 at Lloyd's for 14 years. She was named the *Spindrift*, by Mrs. Findlay, wife of the owner, Mr. James Findlay, of Langlands, Kilbernie, who is also owner of the clipper *Taitsing* and others. The *Spindrift* is intended exclusively for the China trade.

LONDON, SATURDAY, JULY 20, 1867.

THE MAIL SERVICES.

A BLUE-BOOK of some forty pages has just been issued, containing copies of correspondence regarding the proposed mail contracts for India, China, and Australia. The greater portion of this correspondence took place last year, and is now of little interest, as it relates chiefly to the experimental weekly service to Bombay which was carried on for a short by the P. and O. Company, without any subsidy; the remaining portion, however, furnishes a few items of information that have hitherto been wanting. There appears at first to have been a strong inclination on the part of the Government to give the Brindisi route the preference, for a Treasury minute on the Report of the Select Committee says:—

It appears from the able report of Captain Tyler, of the Royal Engineers, to the Postmaster-General, which my Lords have perused with much interest, that if the Brindisi route were made use of instead of that *via* Marseilles, there would be a saving in the time occupied in the conveyance of the mails between this country and Alexandria of 35¼ hours previous to the construction of the Mont Cenis Summit Railway, of 39½ hours after the construction of that railway, and 42½ hours after the completion of the permanent French line from St. Michel to Susa. The great saving of time thus effected affords, in the opinion of my Lords, a conclusive reason for the adoption of the port of Brindisi, as the port of communication with Alexandria instead of Marseilles, the more so as it appears that the Italian Government are willing and anxious to make every necessary arrangement for facilitating the conveyance of the British mails through Italy.

This opinion is fully endorsed by the India-office, for in reply Lord CRANBORNE says:—

With regard to the substitution of Brindisi for Marseilles as the port of communication with Alexandria for the fast Indian mails, Lord Cranborne considers it to be of the utmost importance to reduce to the lowest practicable point the time occupied in the transmission of the mails between this country and India; and he learns with much satisfaction that the Lords of the Treasury and Her Majesty's Postmaster-General are of opinion that it will be practicable to adopt a change of route, which will conduce in a material degree to this highly desirable end.

But a subsequent letter from the Postmaster-General to the Lords of the Treasury exhibits the relative merits of the two routes in a different light. The Duke of MONTROSE says:—

As respects the contracts to be entered into by this department, I have thought it well, in order to enable your Lordships more readily to determine the question whether the Mediterranean service, in connection with the transit through France, shall in future be from Marseilles or Brindisi, to call for tenders for a service by each of those routes, though I now think it probable, owing partly to the saving in time which would be made in the Marseilles route by going direct to Alexandria instead of calling at Malta, partly to the uncertainty still attaching to the practicability of the transit through Italy of our large and heavy mails, and the danger of interruption from the circumstance that much of the Italian railway has only a single line, partly to the strong aversion which has been manifested by the French Post-office to the adoption of the Italian route (an aversion to which practical effect might be given by a notice to terminate the French postal convention), partly to the increased expense which a transit through Italy would probably entail, and in part, lastly, to the establishment of telegraphic communication with India, having rendered great speed in the packet service less important, that you will decide to continue the use of the Marseilles route.

As the subject is not further discussed, we may presume that the old route *via* Marseilles will in all likelihood be retained, at all events, for the present. The distribution of the extra expense to be incurred by the new system also forms a subject of consideration, and it seems probable that the Ceylon Government will in future be called upon to bear a portion of it, for in the minute above referred to we find the following paragraph:—

The large and important island of Ceylon has hitherto not contributed towards the loss incurred by the packet service, by which its correspondence with this country has been conveyed; my Lords are of opinion that the time has now arrived when it may fairly be called upon to contribute towards the loss in question in proportion to its correspondence; at any rate, so long as the postage on letters to and from Ceylon continues at the moderate rate of 6d. the half-ounce letter; and my Lords would be glad if the Secretary of State for the Colonies will make an intimation to this effect to the Government of that island.

The last document in the series announces that persons willing to contract may tender, not only for the whole or any single service, but for a single packet per month on any of the proposed routes; and that the last day for receiving tenders will be the 16th of September next.

The question of Brindisi *versus* Marseilles is exciting no little attention in Italy, where there exists a very natural hope that the impending decision will be favourable to the former port. A pamphlet on the subject has just been issued by Signor CARLO ARRIVABENE, in which he adverts to the attempts which have been made, and which may be expected to be made, by the French to prevent the adoption of the Italian route by Brindisi to the abandonment of that by Marseilles. He points out that in a memorandum by the French postal authorities transmitted by the French MINISTER of FOREIGN AFFAIRS to Lord COWLEY, in which it was sought to prove that the saving of time to be gained by adopting the Brindisi route would be only ten hours, the memorandum based all its calculations upon the assumption that the Italian railways were only in operation as far as Ancona. He then endeavours to prove at length that it will be eventually highly advantageous to England to send not only that light part of the Eastern mail which is now sent by Marseilles, but also that heavier portion which is now sent by Southampton, by the Italian route, showing that thus the heavy mail, forwarded by ordinary trains, need leave London only from one to two days earlier than the fast mail, instead of from seven to eight days, as is now the case, using the Southampton route. He admits, however, that for this to be feasible it would be necessary that the Governments and companies through whose States the mail would have to pass should consent to a tariff reduced from the present rates; and that for such a reduction it may be necessary to wait till a competing line across the Alps, through Belgium, the Rhine country, and Switzerland shall be opened. Signor ARRIVABENE seems to have misgivings that French influence and the natural official liking for keeping the beaten paths may avail to prevent our Government and postal authorities from availing themselves of the Italian route; an opinion which is certainly to some extent confirmed by the letter of the POSTMASTER-GENERAL above quoted.

THE VICEROY OF EGYPT AND THE P. AND O COMPANY.

A DEPUTATION from the Peninsular and Oriental Steam Navigation Company, headed by Mr. P. D. HADOW, deputy-chairman (in the unavoidable absence of Mr. ANDERSON, the chairman), and consisting of Rear-Admiral Sir W. H. HALL, K.C.B., Messrs. WEGUELIN, M.P., ALLAN, DE SALIS, THORNTON, C.B., and BAYLEY, directors; the Earl of LEVEN and MELVILLE, Mr. BETHUNE, Captain BAIN, and Mr. HOWELL, secretary, waited on the VICEROY of EGYPT, by appointment, at Dudley House, on Wednesday morning, the 10th inst., for the purpose of presenting a complimentary address on the occasion of his Highness's visit to this country. The VICEROY received the deputation in the most cordial manner, and appeared much pleased with the address, which was worded as follows:—

ALTESSE,—Nous, le president et les directeurs de la Compagnie Peninsulaire et Orientale, avons reçus avec la plus vive satisfaction la permission que votre Altesse nous a si gracieusement accordé, de vous présenter nos hommages respectueuses à l'occasion de la visite de votre Altesse á Londres.

Nous ne nous trouvions pas dans la necessité de constater á votre Altesse les relations qui lient si étroitement les interêts de la Compagnie Peninsulaire et Orientale avec le pays et le Gouvernement de l'Egypt, ces relations ayant étés si souvent reconnues de la part de votre Altesse par des actes qui temoignent le désir de les cultiver et de les rendre continuelles.

Quand a l'époque de votre avénement au pouvoir votre Altesse en répondant à l'addresse de félicitation du Corps Consulaire à declaré votre intention de dévouer à la prospérité du pays toute l'énergie et toute la persévérance dont votre Altesse es si signalement donée, nous avons sentis que ces paroles etaient pleines de bon augure pour l'entreprise dont nous sommes les Directeurs et les associés.

L'Egypte est devenu depuis de jour en jour la voie la plus favorisée du commerce entre l'Europe et les pays lointains de l'Orient, et si tous les efforts de votre Altesse n'ont pu devancer les demandes toujours croissantes que ce commerce impose à l'administration du transit les œuvres complétés et mis en progrés par votre Altesse affirment votre solicitude pour cette branche importante du Gouvernement de votre pays.

Nous osons donc espérer que votre Altesse daignera accepter nos voeux très sincères qu 'une longue vie et une parfaite santé vous soient accordées pour recueillir les bénéfices des mesures si éclairés, que sous le Gouverne-

Digitized by Google

ment de votre Altesse et de vos prédécesseurs ont transformé dans ces dernieres années l'aspect du magnifique pays de l'Egypte.

(Signed) AR. ANDERSON, Chairman.

His HIGHNESS listened very attentively to the address, and then made a reply in Turkish, which was translated by his Excellency NUBAR PACHA as follows :—

"That his Highness desired to thank the directors for the step they had taken in waiting upon him, and to acknowledge the friendly sentiments expressed in the address. That the transit was a subject which he had always looked upon as a most important branch of his administration; that he was now constructing additional railway works, which when completed would shorten the distance between Alexandria and Suez; and he also hoped would enable him to diminish the charges, which the directors might perhaps regard as rather high at present."

MR. ADDERLEY AND THE CEYLON LEAGUE.

COLONIAL affairs have never been favourite topics with the House of Commons, and those members who affect to be versed in this department of politics are not in all cases competent to discuss them. The consequence of this indifference and inertness is that the Crown, or rather the SECRETARY for the COLONIES, exercises a degree of control in colonial matters, in some of which Imperial interests are not necessarily involved, such as the Constitution never contemplated. A Parliamentary challenge on the action of the Colonial-office being so rare, a minister is left to take his own way. We have thus seen more than once a policy enforced wholly contrary to the spirit of British legislation, and such as public opinion in England, had it been fairly elicited, would never have sanctioned. As regards Ceylon, it is scarcely possible to conceive of injustice more glaring than that to which she has submitted at the hands of the colonial authorities, in being compelled to witness the idle accumulation of surplus revenue—a surplus mainly due to the arbitrary restrictions placed on the expenditure of revenue, and which has been urgently required for purposes of internal improvement. Still less would the voice of England sanction mere nominal representation of the tax-paying community in the local council when actual representation has been conceded, the spirit of the concession being neutralised by swamping the Council with official nominees, and a persistent refusal to enlarge the number of the elected members. Narrow and captious views, with a jealous antipathy to the enlargement of political privileges, would appear to be hereditary with the occupants of the Colonial Office. And the views of the SECRETARY of the COLONIES are of the first importance to those so largely affected by his decisions, for from these decisions there is found to be practically no appeal. If the SECRETARY be of retrospective tendencies—a man bound by the red-tapism of precedents—a colony, unless powerful enough to act for itself, is sure to be hampered in its progress. What, then, shall be said of a Secretary who, bringing to his office no spirit or liberality, and no enlarged or enlightened views, such as would give Ceylon at once rights of which no English community is deprived, displays such incapacity as to misapprehend, or such prejudices as to ignore their expressed wants and wishes? Twice has Ceylon petitioned the Throne in language clear and unmistakable for the removal of disabilities that press on all classes, in dealing with revenue and matters of local legislation, the removal of which was guaranteed by her original constitution; and yet, on the 4th inst., Mr. ADDERLEY, in his place in the House of Commons, referring to the League which represents the whole body of European colonists and settlers, referred to that body as formed in order "to obtain a control over the "appropriation of the revenue by which they might spend the "*public money* in improvements, and leave the English tax-"payer to pay the whole of the expense of the military defence "of Ceylon." No representation of the objects of the League, the petitions from which on the subject of colonial rights are not to be confounded with the memorial signed by certain Singalese requesting that Ceylon might be changed into a Crown colony, could possibly be more unjust. The colonists of Ceylon have been conspicuous in their readiness to assume their due share of outlay for the purposes of military defence, and Mr. ADDERLEY is well aware that the amount of their annual contribution to this end has been finally and determinately fixed by a military commission. What they demand is, in addition to efficient representation, that they shall be left unfettered in otherwise dealing with their island revenue, not being compelled to seek the sanction of the authorities at home as regards matters that simply concern their local interests. Never was application more reasonable, and Mr. ADDERLEY must have calculated on a singular state of ignorance and indifference in the House of Commons in venturing to put such a gloss on the purposes of the organisation. That organisation did not come into existence until it was made apparent that no other means existed for making the voice of Ceylon felt in this country. We challenge Mr. ADDERLEY to justify his libellous imputation on the loyalty and public spirit of Ceylon, a colony noticeable for the enlarged view she has taken of her own and the imperial interests, and we trust there will be found members of the House of Commons ready to vindicate its honour. The success of the Ceylon League is only a question of time, and the realisation of its objects, objects legitimate in every respect, will only be hastened by the studious efforts made to misrepresent them.

WE understand that the Archbishop of CANTERBURY has announced to the directors of the Church Missionary Society that he is prepared to proceed with the consecration of a bishop for North China and Japan, the consent of the Foreign-office having been obtained. The gentleman who is designated for the post is the Rev. W. A. RUSSELL, M.A., of Trinity College, Dublin, who has been for some time a missionary at Ningpo.

THE Austrian expedition to Eastern Asia, which was to have consisted of the frigate *Donau* and the corvette *Friedrich*, under the command of the late Minister of Commerce, Admiral Wullersdorff, has again been postponed. This is the more to be regretted as Austria has as yet no treaties of commerce with China and Japan, and her merchant vessels are unprotected, and only tolerated, in the Chinese seas.

WE understand that Messrs. Trubner and Co., of Paternoster-row, the London agents for the publishers of *The Treaty Ports of China and Japan*, have now received a full supply of that valuable handbook, and are prepared to supply copies at the price of £2 2s.

WE understand that Sir JOHN MILLBANKE HUSKISSON has resigned the post of Her Majesty's Minister at the Hague.

THE JAPANESE FLEET.

At the meeting of the North China branch of the Royal Asiatic Society, held at Shanghai on the 18th April, Dr. Macgowan read an interesting paper on Japan, of which the following is an abstract :—

Statistical Note on the Steam Navy of Japan, with Remarks on the Condition of that Empire.

It is well known that when the Shiogoon of Japan abandoned the policy of non-intercourse with foreign Powers, there sprung up a demand in the country for steam vessels, which foreign merchants promptly supplied. Few, however, are aware of the extent to which the general Government of the Daimios went in organising a navy of steamers and vessels of foreign rig. As accurate information on this subject serves to throw light on Japan in her present transitional condition, and as I am happily able to furnish a few statistical facts in relation to those purchases, I presume that the society will consider them record worthy. I present them also as data for forming an opinion on the political and mercantile prospects of a progressive people. This communication makes known the cost and tonnage of the vessels which the rulers of Japan have purchased since the opening of their country to foreign commerce, and the names of the States for which they are designed. For the list which is subjoined I am indebted to F. A. Groom, Esq., of the firm of Glover and Co., Nagasaki. Its accuracy, therefore, will not be questioned.

The list suggests a few prefatory remarks. It indicates a revival of a maritime and martial spirit in the nation that has been dormant for centuries. The large outlay for a steam navy which the list makes known does not, however, afford as strong evidence of progress as might at first sight be supposed. That versatility of genius which the Japanese have frequently exhibited, and notably when they took charge of and worked without foreign assistance the steamer which was presented to them by the English Government, and as was shown also by their taking unaided a steamer to and from San Francisco, has been attended by the usual accompaniment of versatility, a want of persistency, and a dilapidated navy is the result; and this, too, notwithstanding their having established at Nagasaki an expensive machine shop expressly for the repairs of steamers. The fact that three-fourths of the purchases of foreign built vessels were made by Daimios shows that the Government at Yedo is either disinclined or unable to deprive those semi-independent princes of the advantages which accrue from the possession of fleets. The vessels of the Daimios are in better condition, are turned to more useful purposes, than are those of the general Government. The most powerful, and perhaps the most progressive, of the Daimios is the Prince of Satsuma. He is the chief purchaser of foreign built vessels, and that he has other than military aims is demonstrated by the pains he is taking to develop the industrial resources of his principality and his Lewchewan dependency. He is promoting both agriculture and commerce by the introduction of cotton mills, sugar mills, and other useful machinery. His navy is employed almost wholly for commercial purposes. He gives employment to a number of foreign engineers, and anterior to the opening of Japan, he republished for the use of his sea-going subjects a work on the laws of storms, in the Chinese language, by the writer of this note. He is evidently aware of what constitutes true greatness in a State.

Digitized by Google

On comparing what I observed in Japan during a late visit with what I observed when the country was first opened, I saw numerous evidences of rapid advancement, but the saddening conviction was forced upon me that the amiable natives of that country are decreasing in numbers. As the opening of Japan proved to be her political salvation, averting Russian annexation which was impending, so perhaps her Christianisation—a probable consequence of that opening—may save her from the doom of extinction which unquestionably awaits all other Pacific islanders.

A *resume* of the subjoined list will show in a few words what has been attempted by the Japanese towards the creation of a steam navy. It will be observed that of the 83 vessels that have been sold to the Japanese by foreigners 16 were purchased by the general Government and the same number by the Prince of Satsuma; the purchasers of 12 are not known, and the balance were taken by twenty of the other Princes, one, two, or more each. The tonnage of four is not given. The aggregate of the balance is over 25,400 tons; the total price paid by the Japanese for 79 vessels is $5,770,000. With a few unimportant exceptions, these vessels were steamers; 60 of which have the English flag, 17 the American, three Prussian, and two Dutch—one is unknown. The list omits the steamer which was presented to the Shiogoon by the British Government, and the gunboat which the Government of Yedo procured at a fabulous cost through the late Minister of the United States, which proved a bad speculation as far as the Japanese are concerned, and a disastrous one as regards American prestige in that country. To the above must soon be added ironclads, monitors, and other steamers that have been ordered in Europe and America. Every addition to the armed fleet of Japan is a presage of evil, as such vessels are less likely to be employed to resist foreign aggression than in internecine strife.

Merchant Vessels sold from the Opening of the Three Ports of Yokohama, Nagasaki, and Hakodadi, July 1, 1859.

[REMARKS.—*a*. Burnt at Kagosima during the action. *b*. Sunk at Simonosaki, but afterwards raised and sold to Messrs. Russell and Co. *c*. Destroyed by the French at Simonosaki. *d*. Lost at sea shortly after purchase. *e*. Laid up at Yedo. *f*. Resold to foreigners. *g*. Resold. *h*. Payable in three years. *i*. Steamer *Shanghai* in exchange. *j*. Lost before delivery was taken. *k*. To be paid for in coals. *l*. Payable by instalments extending over seven years. *m*. Credit extending over three years. *n*. Particulars not transpired (about $125,000), to be delivered on return from Yokohama. *o*. To be delivered immediately.]

The President (Dr. Winchester) was not prepared to accept the somewhat gloomy statement which Dr. Macgowan made with respect to the numbers of the population of Japan, and was disposed to believe that his estimate was somewhat lower than the fact. Judging from the number of inhabitants known to be resident in Yedo, and also from the estimated revenue of the country in kokus, he (the President) thought the population could not number less than twenty-eight millions. With respect to the impulsiveness of the Japanese character, he concurred with Dr. Macgowan's remarks. Dr. Winchester concluded with an eloquent description of the kingdom and people, and expressed his belief that no one who remembered the beauty of the country, and the kindness, suavity, and refinement of its inhabitants, could fail to look with interest upon the future prospects of Japan, and trust that it might become the land of progress, of liberty, and of religion.

Information having been requested respecting the prospects of telegraphs in China and Japan, Dr. Macgowan remarked that with regard to Japan he found the Government of Yedo well disposed towards the enterprise, who, but for the death of the Mikado, would probably by this time have arranged for the construction of a line between Yokohama and Yedo. He believed that the time is not far distant when Japan will be connected by telegraph with the Russo-American line at the Amoor; and he thinks it not unlikely that Shanghai may by means of a cable to Japan find its readiest channel of communication with America and Europe. With regard to China, he holds that submarine telegraphy along the coast, advocated by the newspapers of Shanghai and Hong Kong, is preferable to a land line. The East India Telegraph Company, which he represents, has advised him of its having decided to order the manufacture in England of the requisite amount of cable. He proposes to connect the Woosung shore end with this settlement by an air line extending along the road constructed by foreigners from Shanghai to that point which he is confident can be done without much popular opposition. He was about to proceed to Peking to prosecute his undertaking in that capital. He is also in correspondence with the Spanish Government for extending a cable from Hong Kong to Manila.

Monetary and Commercial.

A meeting of the shareholders of the London Joint-Stock Bank was held on the 18th inst.; G. G. Nicol, Esq., in the chair. A bonus of 6s. 3d. per share was declared, which, in addition to the usual 12½ per cent. dividend, will be equivalent to £1 5s. upon each share. The total net profits amount to £92,175, so that £2,175 will remain to be carried forward. A general meeting will be held on the 25th inst., when a proposal to increase the paid-up capital from £1,080,000 to £1,200,000 by the issue of 8,000 new shares will come under consideration. The balance-sheet and directors' report are very satisfactory, and will be found in full in another column.

It is understood that the Agra Bank will be prepared on and after the 1st of next month to pay its promissory notes falling due on the 15th of October under rebate of interest at the same rate the notes carry—namely, 5 per cent.

The biddings for £270,000 in bills on India took place on the 17th at the Bank of England. The amounts allotted were —to Calcutta, £41,300; to Madras, £10,000; and to Bombay, £100,000. The *minimum* price was fixed, as before, at 1s. 11d. per rupee on all the presidencies. Tenders at the *minimum* on Calcutta and Madras will receive in full, and on Bombay about 63 per cent. All tenders above the *minimum* will receive in full. These results show no revival in the demand for means of remittance to the East.

The bar silver brought by the West India packet has been disposed of at 60½d. per oz., showing no alteration. A limited amount of Mexican dollars has been sold for China at 59¼d. per oz., an advance of ¼d.

A half-yearly meeting of proprietors of the Chartered Mercantile Bank of India, London, and China is convened for the 19th November.

At the meeting of the Union Bank of London, Mr. Northall Laurie in the chair, the report showed an available total of £221,479, including the large previous balance of £99,436, which was reserved last year to meet any contingencies that might prove to have resulted from the crisis of 1866. A sum of £60,000 being now believed sufficient for that purpose, the amount of divisible profit was £161,479, out of which a dividend at the usual rate of 15 per cent. per annum and a bonus of 5 per cent. (making, with the dividend paid in January, 22½ per cent. for the past twelve months) were declared, leaving £11,479 to be carried forward.

The report presented at the meeting of the Alliance Bank yesterday shows an available total of £19,812, including a previous balance of £2,756, and recommends a dividend of 7s. 6d. per share, or 3 per cent. per annum, and the appropriation of £1,000 to building and furniture accounts, leaving £3,966 to be carried forward. The depreciation arising from the commercial crisis has made it necessary to revise the estimated value of the securities held against previous bad debts. Finding from this that the reserve of £70,000 would be materially reduced by a realisation of them at present prices, the directors recommend "that the preliminary expenses and the balance of the building account (Lothbury premises) be first entirely written off, and that the amount then remaining be carried to the credit of the old bad debt account, which they confidently believe will then be fully covered."

The report of the General Credit and Discount Company recommends an interim dividend for the half-year at the rate of 5 per cent. per annum, and expresses confidence in the present position of the undertaking, as well as in its general prospects of carrying on a sound and profitable business.

The report of the National Bank states the profit for the half-year to have been £101,338. The usual dividend at the rate of 8 per cent. per annum and an extra dividend of 16s. per share have been declared, leaving £1,338 to be applied to reserve, which will then stand at £461,592. The directors also state that, notwithstanding the moderate rates of interest which prevail, they have been enabled to employ the resources of the bank with advantage.

At the half-yearly meeting of the general board of directors of the Thames and Mersey Marine Insurance Company (Limited) an interim dividend at the rate of 10 per cent. per annum and a bonus of 5 per cent. (in all 4s. per share) were declared, being together at the rate of 20 per cent. per annum for the half-year ended the 30th of June.

The directors of the Union Bank of Australia have resolved upon a dividend of £2 2s. 6d. per share, being 8½ per cent. for the half-year.

At the meeting of the Submarine Telegraph Company on the 17th the proposal to increase the capital from £265,000 to £300,000, by the issue of £35,000 stock bearing a preferential dividend of 7 per cent., for the purpose of laying an additional cable from Ostend, was agreed to.

MANCHESTER MARKETS.

Mr. Sam Mendell's report states:—The depression in this market has become more decided since the 9th instant; prices are all lower, with sales on a very limited scale, and the general tendency is still in favour of buyers, but more especially is this the case with qualities of Yarns and Goods adapted for the markets of India. Quotations are:—Grey Shirtings: 7 lbs., 8s. 6d. to 9s. 3d.; 8¼ lbs., 11s. 3d.; Cotton Yarn: Nos. 16-24, 1s. 2½d. to 1s 3d.; Nos. 28-32, 1s. 3d. to 1s. 4d.; Maddapollams, 3s. 10½d.; Long Cloths, 10s. 3d.; T-Cloths, 6s. 9d.; White Spot Shirtings, 12s. 3d.; Damasks, 21s. 6d.

ARTICLES OF IMPORT.

TEA.—Since the 10th instant the tea market has continued extremely flat, and the amount of business transacted has been very small. At the public sales that commenced on the 16th, medium descriptions of Congou went rather lower. Foochow Congous: Dust and siftings are without alteration. Fair leafy, of old import, sold at the auctions at 1s. per lb.; and privately these have ranged at 1s. to 1s. 0½d. for new import, occasionally the price being in favour of the buyer. Superior grades have sold at 1s. 2d. to 1s. 3d. per lb., but in very small quantities, the demand over 1s. 1d. being as restricted as before. Fine and finest are not inquired for. Black Leaf Congous: Dust, "with all faults," sold at the auctions at 5d. per lb. In common, sales have been made at 11½d. per lb., but there is little offering under 1s. per lb., still it is difficult to sell at this price, except they possess fair quality; over 1s. 1d. the demand is trifling; some breaks of medium to fine were sold at 1s. 4d. to 1s. 9d., which were easier prices. Privately there is hardly any demand whatever for these grades. Tayshan Congous do not show any alteration. Scented Orange Pekoes: Some breaks of fine sold in the sale at 1s. 5½d. to 1s. 6½d. per lb. Scented Capers, ex Sea Bird, sold readily, although the late extreme rates were not obtainable. Green Teas: In country kinds there is not any alteration worthy of note. Canton kinds have sold at full rates.

SILK.—There is no change to report in this article. The market continues dull, with an almost total absence of business.

COTTON.—The market has been extremely dull and inactive, and the sales have been trifling at a reduction of ¼d. per lb. for all descriptions. The total sales have been 1,400 bales on the spot and 1,200 to arrive. No China has been offered since our report of the 10th inst.

COFFEE.—The Colonial market has remained very steady during the week, and of the limited supply of Plantation Ceylon, the good qualities have found ready buyers at stiff rates. Native continues out of demand, and beyond a few bags real good ordinary at 62s. little has been sold. The following are the particulars of the public auctions:—Of Ceylon, 740 casks, 440 barrels and bags Plantation, mostly sold, fine ordinary to low middling, 68s. to 77s. 6d., middling to good middling 78s. 6d. to 83s., and 534 bags Native were withdrawn. Of Manila, 1,045 bags pale were bought in at 64s. The stock of Ceylon on the 6th inst. was 8,210 tons against 4,100 in 1866, and of all descriptions 13,960 tons against 14,880 in 1866.

COIR YARN.—The only offer at auction has been 40 tons Ceylon, part of which sold at £28 to £34 10s. per ton.

CINNAMON.—Higher prices have been obtainable for Ceylon, 44 bales having been sold as follows:—First sorts, 2s. 3d. to 2s. 4d.; seconds, 2s. 1d. to 2s. 3d.; thirds, 1s. 9d. to 1s. 11d. per lb.

CLOVES.—Two cases Penang realised 11¾d. per lb.

CUTCH.—Small lots of fine Pegu have been reported sold at 40s. per cwt., but the demand is limited, and 185 bags Singapore were all bought in at 25s. per cwt.

DRUGS.—Beans: 11 cases ordinary to good medium Tonquin realised 8d. to 1s. 2½d. Camphor: Steady, and the offers at auction consisting of 50 tubs Japan and 130 cases China realised £6 17s. 6d., landing weights. Cantharides: For 2 cases China at the sales 2s. 3d. only was offered, and they were eventually bought in at 4s. Cardamoms: 43 cases Ceylon were bought in; fair at 3s., ordinary at 2s. 6d. per lb. Rhubarb: For China descriptions a decline of 6d. to 9d. for the better, and 3d. to 6d. for the lower qualities has taken place, and of 190 cases offered 68 sold as follows:—Fair mixed, 4s. to 4s. 3d.; good medium, 3s. 6d. to 3s. 7d.; medium, 2s. 5d. to 2s. 10d.; ordinary, 1s. 7d. to 1s. 9d.; wormy, 1s. 5d. to 1s. 7d. per lb.

EBONY.—Of Ceylon, 259 logs (48 tons) were bought in at £5 15s. to £9 per ton.

GUMS.—Benjamin: At auction, 37 cases Siam realised for middling bold, mixed, blocky, and slightly barky, £24 15s. to £25 5s., and for rather dark small almond in block drossy £11 to £13, and 5 cases rather dull Sumatra seconds, £8 12s. 6d. to £8 15s. per cwt. Damar: 16 cases good partly bold Batavian realised 76s. to 78s. 6d. per cwt.

HORNS.—Of Ceylon Deer 1,924 Horns (23 cwt.) sold at 72s. per cwt.

MANILA HEMP.—No private business is reported, and at auction 384 bales were offered and withdrawn.

PEPPER.—At public sale 1,704 bags Black Singapore were withdrawn; of 1,506 bags Penang only 200 bags of the sound portion sold at 2 15-16d., and the sea-damaged (700 bags) at 2¾d. to 2⅞d. Privately, very little has been done; 85 bags Singapore White at auction were bought in at 5¼d., but the greater part since sold thereat.

RICE.—There is still a good inquiry for floating cargoes, of which five have been sold; one of 350 tons Rangoon at 11s. 9d., and one of 740 tons Larong Arracan at 10s. 9d. ex ship, both arrived off Coast; one of 1,600 tons Nakrenzie, May sailing, at 10s. 7½d. for the United Kingdom; 1,560 tons for the Continent at 10s. 6d.; one of 1,600 tons Rangoon at 11s. 1¼d. and another of 700 tons, March sailing, at 11s. 6d. for the Continent. Landed parcels are offered at easier rates, and only about 6,000 bags soft grain have been taken, Nakrenzie at 11s., Rangoon 11s. 9d. to 12s. 3d.

SUGAR.—A quiet tone has continued to pervade the market for this article, and as most holders have shown unabated firmness, transactions have been of light amount. Cargoes afloat have been in less general request, and except for Muscovade descriptions the late currency has been barely obtainable. No sales of East India description have taken place. The imports of raw sugar into the four chief ports of the United Kingdom to the 6th of July were 287,400 tons, against 279,600 tons in 1866. The clearances for home consumption were 277,800 tons, against 239,900 tons. **The stock was 178,100 tons, against 220,700 tons last year.**

Digitized by Google

SAPANWOOD.—The sales have included 20 tons Manila at £9 17s. 6d. to £10, and 20 tons Ceylon at £10 5s. to £10 15s. per ton.

TORTOISESHELL.—Of Singapore 2 cases (543 lbs.) were bought in at 9s. No Manila has been offered.

FREIGHTS AND CHARTERS.

Since our last issue a few vessels have been taken up to load on the berth for the Eastern ports, and rates of freight remain firm. Coal freights from the northern outports remain unaltered.

Current rates of freight for vessels on the berth:—To Yokohama: 20s. to 30s. weight, 50s. meast. To Nagasaki: 50s. weight or meast. To Shanghai: 40s. weight, 45s. meast. To Amoy: 45s. weight or meast. To Foo-chow-Foo: 45s. weight or meast. To Hong Kong: 35s. weight, 40s. meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Manila: 40s. weight, 85s. meast. To Ceylon: 25s. to 30s. weight, 35s. meast.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Hong Kong: £46. For Singapore: £40. For Shanghai: £56. For Saigon: £50. For Yokohama: £50. For Batavia: £27. From Newport, Cardiff, or Swansea, per ton.—For Hong Kong, £2 2s. For Singapore: £1 18s. For Shanghai: £2 12s. 6d. For Saigon: £2 8s. For Yokohama: £2 10s.

The Admiralty have invited tenders for the conveyance of 10 tons (meast.), medical stores from the Thames to Colombo, and of 50 tons navy provisions, &c., to Hong Kong.

CASUALTIES.

The Argo (Russian Ship), Rosenberg, from Cardiff to Galle, which put in at Lisbon June 20, leaky in her topsides, has been ordered to discharge sufficient cargo to bring the leak, which is reported to be forward, above water.

A telegram received from Galle dated June 21 states that the Prussian brig Tamerlane, from Penang to London, has been totally lost at Sumaca, crew saved, tin probably recovered.

The France, from Toulon to Saigon, with a general cargo, was totally destroyed by fire June 25 in the Gulf of Denia, part of the crew landed by the Swedish barque Theodore Dill.

The M. Lopez, Morales, from Cadiz to Manilla, which put in at Rio Janeiro May 13, required repairs, and will probably have to sell part of her cargo to defray expenses.

The Island Queen, Dickson, from Cardiff for Shanghai, arrived at Simon's Bay, May 26, with loss of foremast, bulwarks, &c., having experienced a hurricane from N. to S., May 6, in lat. 34 S., lon. 17 W.

The Johanna Emelie, Teubert, sailed from Batavia for the United Kingdom 18th Nov., and has not since been heard of.

MISCELLANEOUS.

AT CALLAO.—May 27, America, Ferreiros, sailed for Macao.

Digitized by Google

PORT OF AMOY.
CHINA.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford facility for REPAIRING and REFITTING STEAM and SAILING VESSELS.

Their large Granite Dock, 286 feet on the blocks, 307 feet over all, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet. It is fitted with Caisson Gate and with a powerful entrifugal Steam Pump, ensuring despatch in all states of the tide.

Their two smaller Granite Docks, one 223 feet, the other 160 feet on the blocks, can take vessels at average spring tides drawing 12 feet to 13 feet.

A stock kept on hand of Timber, Spars, Copper and Metal Sheathing, Paints for Iron Vessels, and other material required for Dockyard use.

The premises comprise Carpenters' Shops, Mast Sheds, Blacksmiths' Shops, superintended by experienced European Foremen; also an Engineer's Workshop, supplied with Lathes and other tools worked by Steam, in charge of a Resident European Engineer. Dry Godowns for the reception of stores of vessels requiring to discharge them.

BASS AND ALLSOPP'S INDIA PALE ALES.

GEORGE JONES, No. 8, Billiter-street.

Present prices, 7s. 3d. 8d. per dozen quarts, and 4s. 9d dozen pints. Free on board, protected by his own and the Brewer's Labels and Patent Capsule.

HOLLOWAY'S PILLS.—The truest philosophical spirit of inquiry led to the discovery of this priceless medicine, and the most unselfish labour and expense have been incurred in bringing so great a boon to the knowledge and within the reach of the afflicted throughout the world. Every invalid who can read will understand the plain directions, in his own language, which are folded round the Pills, which should be taken in the doses and at the times distinctly specified therein, while great attention should be paid to diet and many minor matters.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

DR. J. COLLIS BROWNE'S CHLORODYNE. Vice-Chancellor Sir W. Page Wood stated publicly in Court that Dr. J. Collis Browne was undoubtedly the Inventor of Chlorodyne; that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn o.—See *The Times*, July 13, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any ervice in Cholera was Chlorodyne.—See *Lancet*, Dec. 31, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. Extract from *Medical Times*, Jan. 12, 1866.—"Is prescribed by scores of orthodox medical practitioners. Of course it would not be thus singularly popular did it not supply a want and fill a place."

DR. J. COLLIS BROWNE'S CHLORODYNE is the best and most certain remedy in COUGHS, COLDS, ASTHMA, CONSUMPTION, NEURALGIA, RHEUMATISM, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE. is a certain cure in CHOLERA, DYSENTERY, DIARRHŒA, COLICS, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE. EXTRACT *from the* GENERAL BOARD OF HEALTH, *London, as to its efficacy in Cholera*—"So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. MONTGOMERY, Esq., *late Inspector of Hospitals, Bombay*.—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other remedies had failed."

DR. J. COLLIS BROWNE'S CHLORODYNE. CAUTION.—None genuine without the words "Dr. J. Collis Browne's Chlorodyne" on the Government Stamp. Overwhelming medical testimony accompanies each bottle. Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury, London. The immense demand enables the proprietors to reduce the price; it is now sold in bottles, 1s. 1½d., 2s. 9d., 4s. 6d., and 11s.

AGENT: Hong Kong, Mr. A. S. WATSON.

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor

SIXTIETH REPORT OF THE
LONDON JOINT-STOCK BANK.

At a GENERAL MEETING of the SHAREHOLDERS, held at the Banking House of the Company, in Princes-street, Mansion House, on THURSDAY, July 18, 1867, GEO. GARDEN NICOL, Esq., Chairman, JOHN KNOWLES, Esq., Deputy-Chairman, the following REPORT was presented:—

The annexed accounts which the Directors have the satisfaction of presenting to the meeting will inform the shareholders that during the six months ending the 30th ultimo the bank has made a net profit of £92,175 18s. 4d., of which the sum of £90,000 is appropriated to the payment of the usual dividend, at the rate of 12½ per centum per annum, with a bonus of 6s. 3d. per share, together with £1 5s. per share, leaving an unappropriated balance of £2,175 18s. 4d. to be carried forward to profit and loss new account.

The guarantee fund, with its accrued interest, now amounts to £337,839 4s. 8d.

The Meeting will be made an Extraordinary General Meeting for the election of a director to fill the vacancy at the board created by the lamented death of George Tayler, Esq.

The board has resolved—subject to confirmation at a special general meeting of shareholders—to complete the addition made to the capital of the bank in 1864 by the issue of 8,000 shares, the remaining portion of the 20,000 shares authorised to be issued, and of which 12,000 were allotted in August, 1864. These shares it is intended shall be offered in the first instance to the shareholders, in the proportion of one new share to every nine shares of which on the 25th day of July they may be the registered holders, at £25 per share, being £15 per share the amount paid up on the existing shares of the company, and £10 per share premium; the sum to be received as premium to be added to the guarantee fund. On the completion of this issue the capital of the bank will be increased to 80,000 shares of £50 each, paid up to the extent of £15 per share, thus raising the paid-up capital to £1,200,000.

A special General Meeting has been convened for Thursday the 25th of July, when a resolution will be proposed to authorise the issue of 8,000 new shares, and the directors will avail themselves of the occasion of this meeting to propose to the shareholders certain alterations in Clauses 7, 9, and 52, of the deed of settlement of the Company, which the board deem for the interest of the bank should be sanctioned.

The Directors, recognising the propriety of granting pensions for long and faithful services rendered by the officers of the bank, have established rules and regulations for granting a retiring allowance to the staff of the bank and from the uniform interest taken by the shareholders in the welfare of those devoting themselves faithfully to promote the prosperity of the bank, the directors feel confident that the course they have adopted will meet with the hearty concurrence of all shareholders.

The dividend and bonus, free from income tax, will be payable on and after Friday, the 26th inst.

The preceding report having been read to the meeting by the Secretary, a dividend for the half-year ending the 30th June last, after the rate of £12½ per centum per annum, and a further division of 6s. 3d. per share, out of the net profits of the half-year ending as above, were declared by the Chairman.

Resolved unanimously:

"That the report now read be received, adopted, and printed for the use of the shareholders."

The Chairman then declared the meeting to be an extraordinary general meeting for the purpose of electing a Director in the room of the late George Tayler, Esq., and stated that the only candidate was W. R. Ormsby Gore, Esq., M.P. The question having been put to the meeting, W. R. Ormsby Gore, Esq., M.P., was declared duly elected a Director of the Bank.

Resolved unanimously:

"That the thanks of the meeting be presented to the directors for the able manner in which the affairs of the Bank have been conducted during the past half-year."

Resolved unanimously:

"That the thanks of the meeting be given to Mr. J. W. Nutter, the general manager, country manager, the managers of the branches, and other officers, for their attention to the business of the Bank."

(Signed) GEO. GARDEN NICOL, Chairman.

Extracted from the minutes,

ALFRED SCRIVENER, Secretary.

The capital of the bank is £3,600,000, in 72,000 shares of £50 each. The sum of £15 has been paid on each share, and the present paid-up capital of the bank is £1,080,000.

The guarantee fund amounts to £337,839.

Current accounts are kept agreeably to the custom of London bankers.

Parties keeping current accounts with the bank can transfer to a deposit account any portion of their balance upon which interest at the current rate of the day will be allowed.

Sums of £10 and upwards are received on deposit at interest from parties not customers, either at seven days' notice or for fixed periods, as may be agreed upon.

The Agency of Joint-Stock Banks, Private Bankers, and Foreign Banks undertaken.

Investments in, and sales of, all descriptions of British and Foreign Securities, bullion, specie, &c., effected.

Circular Notes are issued free of charge for the use of travellers, payable in the principal towns on the continent of Europe and in the chief commercial cities of the world. Letters of credit are also granted on the same places. They may be obtained at the Head Office, in Princes-street, Mansion-house, or at the branches.

Dividends on English and Foreign Funds, or Railway and other Shares and Debentures, received without charge to customers.

*** Passengers eastward of Suez securing their berths in London are entitled to the conveyance of their luggage free to Marseilles.

INDIA AND CHINA VIA ITALY.

SHORTEST SEA PASSAGE FROM EUROPE TO EGYPT

BRINDISI to ALEXANDRIA—Contract Passage, 82 hours

It is frequently done in 72 hours.

THE Società Anonima Italiana di Navigazione Adriatica Orientale, under contract to carry the Direct Mails despatch as under their first-class English-built steamers CAIRO, BRINDISI, PRINCIPE DI CARIGNANO, or PRINCIPE TOMASO, between BRINDISI and ALEXANDRIA. The vessels of the Company sail as follows:—From Brindisi for Alexandria on the 7th, 14th, 22nd, and 30th of each month, at 2 P.M.; Alexandria for Brindisi, on the arrival of the mails, about the 5th, 12th, 20th, and 29th of each month. The arrivals at and departures from Alexandria are in coincidence with those of the steamers of the Peninsular and Oriental Company, with the Calcutta, China, and Bombay Mails.

Fares:—Brindisi to Alexandria, including provisions 1st class, 275f.; 2nd class, 200f.; third class, 90f., and *vice versa*.

For further particulars apply to the Company's offices at FLORENCE, via Montebello, 42; PARIS, Rue de L'Universite, 108; LONDON, Messrs. PALMER, 44, Eastcheap, E.C.

JAPAN AND CHINA NEW MAIL ROUTE VIA PANAMA AND SAN FRANCISCO.

THE PACIFIC MAIL STEAM SHIP COMPANY despatch their splendid side-wheel steamers from NEW YORK on the 1st, 11th, and 21st, and from PANAMA on the 9th, 19th, and 29th of every month for SAN FRANCISCO, calling at ACAPULCO, MANZANILLO, MAZATLAN, *en route* thence to YOKOHAMA, NAGASAKI, SHANGHAI, and HONG KONG. Passengers from England may connect with this line at New York by any of the various steamers from Liverpool, Southampton, or Falmouth, to that port, or at Panama by the steamers of the Royal Mail Steam Packet Company leaving Southampton on the 2nd and 17th of every month. Passengers by this route are less than ten days in the tropics.

The next departures from San Francisco are:—

GREAT REPUBLIC, 5,000 tons, September 3rd.
CHINA*, 5,000 tons, October 14th.
COLORADO, 4,000 tons, November —.

For particulars of Freight, through passage rates, &c., &c., apply to H. STARR and Co., General European Agents, 145, Cheapside, London.

* Name changed from "Celestial Empire."

NEW OCEAN MAIL ROUTE to CHINA and JAPAN, via the Isthmus of Panama and San Francisco.

THE WEST INDIA AND PACIFIC STEAMSHIP COMPANY (Limited) have made special arrangements with the Panama Railway Company and the Pacific Mail Steamship Company for the conveyance of Passengers, Specie, and Cargo between EUROPE, YOKOHAMA, NAGASAKI, SHANGHAI, and HONG KONG.

The next departure will be from Liverpool on the 20th August, intending to connect, at San Francisco, with the steamer leaving on the 14th October for Japan and China. The branch steamer to Shanghai calls at Nagasaki on both trips. It is expected that the communication will be monthly after these dates.

The Pacific Mail Company's steamers on the China station are large paddle-wheel vessels, of upwards of 3,000 tons register. The greatest attention has been given to insure the comfort and convenience of passengers by the vessels of all the connecting companies on this route.

Shippers will find this route cheaper and as expeditious as any mail service to the East.

For rates of Freight and Passage apply to the agents, J. M. CURRIE, Havre and Paris; or at the Company's Offices, The Temple, Dale-street, Liverpool, and 117, Leadenhall-street, London, E.C.

ARTHUR B. FORWOOD, Managing Director.

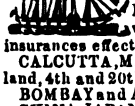
STEAM to INDIA, via the CAPE.—The UNION STEAMSHIP COMPANY (Limited) have entered into an arrangement with the Government for the extension of the Packet Service from Mauritius to Ceylon. Passengers can proceed from Southampton on the 8th of every Month to Point de Galle, where a junction is formed with steamers proceeding to India, China, Australia, &c. Rates of freight and passage very moderate.

Apply to FALCONER and MERCER, 23, Leadenhall-street, London; or THOMAS HILL, Southampton.

JAPAN AND CHINA, by Mail Steamers throughout.—GOODS for YOKOMAMA, Nagasaki, Hong Kong, and Shanghai can be shipped under through bills of lading, via Panama, by the ROYAL MAIL STEAM PACKET COMPANY'S STEAMERS, leaving Southampton on the 2nd of September, 1867.

Apply to J. M. LLOYD, Secretary.
Royal Mail Steampacket Company, 55, Moorgate-street, London, E.C.

ORIENTAL, AUSTRALIAN, AND GENERAL STEAM AGENCY, AND GLOBE PARCEL EXPRESS.



PARCELS, PACKAGES, and MERCHANDISE forwarded, and PASSAGES engaged to all parts of the world. Baggage collected and shipped, insurances effected, &c.

Advices from this port now extend to the 29th May. The outward mail of March 26 was delivered on the 17th May, conveying also London telegrams to April 13. The following items are from the *Japan Herald*:—

H.M.S. *Basalisk* has arrived with H.E. Sir H. Parkes and suite. When our last summary left, the foreign Ministers had just been paying their official visit to the Shiogoon at Osaka, and were dispersing—the French Minister having gone from Osaka to Nagasaki in H.I.M.S. *Guerriere*; the Dutch Minister arriving in Yokohama the day before the English mail steamer's departure; the American Minister making his arrangements to leave Osaka in a few days, which he has since done, the U.S.S. *Shenandoah* bringing H.E. and his suite back on the 22nd May; and the British Minister, as yet undecided whether he should return by sea or overland—the probability being then in favour of the latter. The projected overland trip, however, finally resolved itself into a jaunt across country from Osaka, on the shores of the Inland Sea, to Tsurunga, a port on the west coast, said to be that which is to be opened to foreigners on the 1st January, 1868. The result of the visits of the Ministers have yet to be worked out. More immediately they are, that Hiogo, Osaka, Yedo, and a port on the west coast of the island of Niphon, are all to be opened to foreign trade on next New-year's day.

Some little apprehension had been caused in consequence of a private telegram *via* Galle which stated that war was imminent between France and Prussia, and the P.M.S.S. *Colorado* is stated to have brought a later telegram to the effect that "war is declared." There were few, however, who believed in the genuineness of this news.

By the enterprise of Californian citizens we are in expectation of seeing gasworks established in Yokohama early in next year. The agent sent over here was desirous, in the first instance, that a portion of the stock might be taken in the settlement; but as few seemed to care to lock up money just now, he was content to receive their names as subscribers for the gas itself; and having secured promises for considerably over 2,000 burners, he is pretty certain that his principals will carry out the scheme.

A Japanese gentleman from the province of Etchizen, Sasaki Gouruk, left in the *Colorado*, accompanied by an interpreter, for the purpose of studying science in San Francisco, particularly as connected with mining and machinery.

Up to this season it has been the wont of foreigners to have their residences within the boundaries of the foreign settlement; those who desired a jaunt into the country making use of the tea-houses (native hotels) while absent. But this season, encouraged by the healthier state of feeling apparent in the Government, some foreigners have rented Japanese tenements at a distance from town, that they might enjoy change and quiet. Amongst these was Mr. Gibson, who secured a Japanese house at Nigishi, quite close on the sea shore, and situate at the corner of the road laid out by Government for the use of foreigners. On Saturday evening, the 26th May, Mr. Gibson was seated at dinner with Mrs. Gibson, their little boy, and a friend, when a report of a gun or pistol was heard,

Digitized by Google

and a bullet came in at the paper window, striking a cruet-stand directly in front of Mrs. Gibson. Mr. Gibson and his friend immediately rushed out, and believed they saw the culprit, a Japanese, making off, but he eluded them and got away. Information was immediately given to the authorities in town; but although a corporal's guard was sent down to make search in the neighbourhood, and give protection against further assault, not the slightest clue has been gained as to the culprit.

On the 16th May rumours were current that Stotsbashi was about to visit Yokohama on the following day, and many supposed it was to be the Shiogoon himself. It turned out however that it was the Prince who was reported as having succeeded to the Shiogoonate on the rumoured assassination of Stotsbashi. It appears that he now occupies the position of heir apparent as the present Shiogoon did to the former; and probably the name Stotsbashi (one bridge) may thus be one accorded to his rank. The constant change of names among the upper Japanese is very puzzling, and doubtless the Shiogoon who has hitherto been known to us as Stotsbashi has now another suited to his advanced rank. The Prince hitherto known to us as Owari-sama has, at all events, assumed the name of Stotsbashi, and it was he who visited the settlement. He is of course of the Gosankai families—the three from whom the Shiogoons are selected—or he could not hold the position he does. The Japanese in speaking of him called him the Shiogoon's brother, but the relationship is not so close by blood. He visited the stores of Messrs. Kirby and Co., McKechnie and Co., and some others; he also visited the Club, and expressed a wish to see some of the private residences, but we are not aware whether he actually did so. He seemed to take a great interest in all he saw, and in various ways showed his pleasure. He is short in stature, and has a very agreeable face, although the smallpox has left decided proofs of the severity with which it had attacked him. The only thing remarkable about his costume was the handle of his sword, which was one of the handsomest we have ever seen.

The newspaper in Japanese, edited by the Rev. Mr. Bailey, although appearing very irregularly, having only now arrived at its third number, appears to be taking well with Japanese readers. Of No. 1 no less than 1,500 copies have been already circulated, and a fifth edition is asked for and being printed. In like manner of No. 2, although 1,600 have been taken, a third edition is being struck off—the demand still continuing. Of the present number, the first edition will be 2,000 copies. A Yokohama and Yedo bookseller has sent copies to Osaka and Kioto, and is making arrangements to supply the provinces of some of the Daimios. No. 3 consists of 32 pages; and is full of interesting matter. One of the earliest paragraphs is a very important piece of information to Japanese merchants. It is a caution to all, that breaches of contract can now be exposed to all their countrymen. There is then the general news from various countries in Europe and the United States (the latter referring principally to the reception of the Japanese commissioners in San Francisco), the Sandwich Islands, and China. Then comes local news, in which allusion is made to the gas project—reference to grievances of which foreigners complain; the proceedings at Osaka, and the official notification as to new ports; the arrival of the steamer *Kai-yuo-mar* from Holland for the Japanese Government, changes in Consulates, Dr. Hepburn's Dictionary, ships in port, &c. There is also an account of the Pyramids of Egypt, prepared by the editor at the request of a Japanese who saw mention made of the pyramids in the account of the Overland route in the last number of the *Bankoku Shinbunshi*. These take up about one-half of the paper. The other half is taken up with various short articles—market intelligence, amusing scraps, and finally with advertisements. With such a variety, it is not wonderful that the demand for the paper is so fast increasing. It has the advantage possessed by the home papers, in being published in the language of the people, and therefore standing a fair chance of being eagerly sought by myriads as it gradually becomes known, and we do look upon it as one of the most certain means of giving correct information amongst the people, and thus affording strong hope of the more speedy dispersion of prejudice, and the foundation of a better feeling than has yet been displayed towards foreigners.

A work of infinite labour has just been completed by Dr. Hepburn, American medical missionary, who has been engaged for years unceasingly upon it, with assistance of a learned Japanese. His dictionary with the Japanese words in Roman, in Japanese, and in Chinese characters will be most valuable to every student; and we have no hesitation in saying it is far in advance of anything of the kind that has yet been attempted. America may well be proud of the position she takes through the energy of her sons. The best Japanese grammar, by the Rev. Mr. Brown, the most—indeed the only—comprehensive dictionary by Dr. Hepburn, and all the other enterprises we have either to-day or on previous occasions alluded to, fairly entitle her to rank amongst the foremost of the substantial developers of civilisation in Japan.

The following we quote from the *Japan Times Overland Mail*:—

We hear of a combination against him of some of the more important princes, who maintain their right to open their own ports, and, it is stated, intend to make separate overtures to foreigners on the subject unless admitted by the Shiogoon to a fair share of the trade. But of this and other important questions connected with the opening of the new ports we shall probably be better able to speak authoritatively next mail.

The *Colorado* has come and gone since we wrote last. She arrived from Hong Kong on the 23rd and left for San Francisco on the 25th, carrying a considerable cargo and fair number of passengers. Another of the younger scions of the Orleans family, Monsieur le Duc de Penthievre, eldest son of the Prince de Joinville, was among them. He is in the Portuguese navy, and is on his way to Lisbon to join his ship, after a year's leave spent in visiting Australia, Java, China and Japan.

Mr. R. Eusden, formerly attached to the British Legation as Japanese Secretary, arrived from Shanghai by the *Singapore* on his way to Hakodate, where, we hear, he will assume the duties of Acting Consul.

In commercial circles the time has been a quiet one, disturbed only by the occurrence of a bankrupcy, that of Messrs. A. M'cKechnie and Co., fancy goods merchants, which, so far as appears at present, seems likely to be a disastrous one to all concerned. The silk and tea markets are both exceedingly slack, as might be expected at this time of the year. Of our chief staple there is very little on the market, most of the stock is of an inferior description, but for the very few bales of really good silk, of which there is a small quantity, holders are remarkably firm. Little is doing in the tea market, buyers waiting the arrival of samples of the new crop. It is reported that a lot of new teas, bought at top prices, went by the *Colorado*. Accounts from the country of grain, rice, silk and tea are all favourable, and the weather is all that could be wished.

The following is a copy of a notification recently issued by H.E., the British Minister conveying to the public the terms on which the three Japanese Ministers proposed to arrange for the reception of foreigners at these ports; and Sir Harry Parkes' letter acquiescing in the arrangments, and acknowledging the liberal and courteous manner in which they had carried through the negotiations.

"The undersigned, Her Britannic Majesty's Envoy Extraordinary and Minister Plenipotentiary in Japan hereby publishes, for the general information of Her Majesty's subjects, the subjoined correspondence between himself and the Japanese Government relative to the formation of foreign settlements at Hiogo and Osaka.

"HARRY S. PARKES.

"Her Britannic Majesty's Envoy Extraordinary and Minister Plenipotentiary in Japan."

Osaka, May 17, 1867.

Sir,—The enclosed are rules which we propose to make for the establishment of foreign settlements at the port of Hiogo and at Osaka, and we shall be obliged by your informing us whether they meet with your approval.—We have, &c.

(Signed) ITAKURA IGA-NO-KAMI.
INABA MINO-NO-KAMI.
OGASAWARA IKI-NO-KAMI.

May 16, 1867.

ARRANGEMENTS FOR THE ESTABLISHMENT OF FOREIGN SETTLEMENTS AT THE PORT OF HIOGO AND AT OSAKA.

1.—The Japanese Government will form at Hiogo a settlement for foreigners of all nations having treaties with Japan on the ground situated between the town of Kobé and the Ikuta River. The Japanese Government will raise that portion of the ground coloured red on the annexed plan, and will give it such an incline towards the sea as is necessary for the thorough drainage of the site. They will also construct an embankment faced with stone on the sea front of the said site of not less than four hundred ken in length, and will provide such roads and drains as may hereafter be determined on.

2.—As soon as all the ground thus prepared in accordance with the preceding article for the use of the foreigners above named is occupied and more space is required, the settlement may be extended towards the hills at the back as far as may be found necessary, and Japanese owning ground

Digitized by Google

or buildings in the town of Kobé will then be at liberty to lease the same to foreigners if they wish to do so.

3.—The Japanese Government will set aside the site shown in the annexed plan and coloured red, within which foreigners may, in the terms of the treaties, hire houses and reside at Osaka. But no Japanese shall be compelled to rent any buildings to foreigners within the said site against his will, and as the Japanese Government are willing that foreigners of those nations having treaties with Japan should enjoy at Osaka the same facilities for leasing ground and building houses as are secured to them by treaty at the ports, the Japanese Government are prepared to lease to foreigners for building purposes that portion of land on the same plan which is coloured blue. The Japanese Government will raise the ground now under cultivation on the west face of the latter to the level of the other portion of the ground within it, and will embank it with stone. The necessary roads and drains will be provided, and the trees will be carefully preserved.

4.—The above-mentioned site for building purposes shall be extended in a southerly direction as far as may be found necessary, whenever it shall have been occupied by the foreigners above-named, and more space is required for their use.

5.—The Japanese Government will prepare the said sites at Hiogo and Osaka in the manner above-stated, in time for the occupation of foreigners on the 1st of January next.

6.—The Japanese Government will be reimbursed, the cost of preparing the said sites for the use of the foreigners above-named by the sale of the leases of the ground. The land will be divided into lots, and prices placed upon the different lots, which will vary with the eligibility of the situation, but will amount in the aggregate to the total outlay incurred by the Japanese Government. This outlay will form the basis for calculating the upset prices at which the lots will be offered to foreigners at auction. The foreigners of all nations having treaties with Japan may bid at these auctions, and each bidder may obtain as much land as he requires. The money realised above the upset prices will be retained by the Japanese Government as compensation for deprivation of interest on capital, and for the risk that may be incurred of not recovering their outlay.

7.—All the ground leased to foreigners at Osaka and Hiogo will be subject to the payment of an annual rent calculated at a rate that will be considered sufficient to meet the expenses of keeping in repair the roads and drains, the cleansing and lighting of and maintaining order in the settlements, and the ordinary land-tax payable at the present date to the Japanese Government.

8.—The Japanese Government will not grant or dispose of any of the ground set aside by the preceding articles, for the establishment of foreign settlements at Hiogo and Osaka, to any foreign Government, company, or individual for building or other purposes, except at public auction, in the manner laid down in the preceding articles. The foreign Consuls will not be provided with separate grants of land by the Japanese Government, either within or without the foreign settlement.

9.—In determining the upset price of all the land to be thus leased to foreigners at Hiogo and Osaka, the amount of annual rent, the number and size of the streets, lots and drains, the quantity of ground to be put up to auction at one time, the conditions and date of sale, and the formation of the cemeteries hereinafter mentioned, the Japanese Government will consult the foreign representatives.

10.—Insurable warehouses, in which the goods of foreigners may be stored in bond, will be provided by the Japanese Government both at Hiogo and Osaka, in the same manner as is stipulated in the the Convention of Yedo. At the former place the space coloured blue on the annexed plan will be reserved by the Japanese Government for this and other official purposes, and the dock now commenced will be removed.

11.—The Japanese Government will form a cemetery for the use of all nations at Hiogo, on the hill in the rear of the foreign settlement, and another at Osaka at Zuikenzan. The Japanese Government will lay out the cemeteries, and surround them with fences; the expenses of maintaining and repairing the cemeteries will be borne by the foreign communities.

12.—The Japanese Government will select, at Yedo, in concert with the foreign representatives, a port on the west coast at which a foreign settlement may be formed, as well as the place within which houses may be rented by foreigners at Yedo. These will be made in accordance with the Treaty and Convention above mentioned, and on the basis of the present arrangements.

OSAKA, May 17th, 1867.

The undersigned, Her Britannic Majesty's Envoy Extraordinary and Minister Plenipotentiary, has received from the Japanese Ministers for Foreign Affairs their note dated the 16th instant, enclosing a copy of the arrangements which they have made for the establishment of foreigners at Hiogo and Osaka on the 1st of January next; and he hereby begs to inform their Excellencies that he considers these arrangements equitable and approves of them on the part of his Government.

The undersigned takes the opportunity of expressing to their Excellencies the high sense which he entertains of the desire manifested on this occasion by the Shiogoon's Government to carry out the treaties with Foreign Powers in a liberal manner, as well as of the friendly spirit which their Excellencies have evinced in conducting the negotiations which have resulted in the above arrangements.

The undersigned, &c.

(Signed) HARRY S. PARKES.

NAGASAKI.

There has been some stir about the seizure and bringing in of the American barque *Anna Kimball*. It appears that she was chartered by a British firm to load rice at Kouroumi for Osaka, or some other port in the Inland Sea to be named on her reaching Nagasaki. Instead, however, of getting the necessary license through the Consul and Customs to do the lading, she went to Kouroumi and filled up first, a feat for which she would have been seized so soon as the authorities heard of it had she not run over to Shanghai, whence, after a little time, she again sailed for this, and anchored outside, in the hope, it is supposed, of finding everything arranged. But nothing had been done, and so, when the Japanese authorities applied to the American, there could be no reasonable objection to letting the *Wyoming* go out to seize her; and seized she was accordingly. The result will be, probably, confiscation of the rice (the Prince of Kouroumi's) and fines of a thousand dollars each on ship and captain—the latter for not coming into port when first requested.

The steamer *Viola* has been bought from the Japanese by Messrs. Glover and Co., and it is expected she will go across to China for repairs. Messrs. Nicholson and Boyd have the contract for repairing the steamer *Argus*.

The anniversary of the Queen's birthday was celebrated in a worthy manner by H.B.M.'s Consul. A ball was given at the Consulate in the evening, which, notwithstanding the unpropitious state of the weather, was attended by all the élite of Nagasaki. The fine band of the *Guerriere* animated the dancing, which was kept up till a late hour in the morning. The illumination—the night being dark—looked very brilliant, and had a wonderful effect when viewed from the shipping in harbour. H.I.M.S. *Guerriere*, with his Excellency the French Minister on board, arrived a few days ago from Osaka. Admiral Roze did us the honour of firing a royal salute, which compliment Commander Domville, of H.M. gunboat *Algerine*, could only reply to by "manning yards." H.M.S. *Pelorus* had not yet returned from the Inland Sea. Admiral Bell, who had only just arrived in the U.S.S. *Hartford*, paid the same compliment to the British Queen, as did Captain Eschar, of the Dutch man-of-war *Watergeus*.

From Nagasaki we also have the following item of news: On Sunday afternoon, the 4th May, a young Japanese officer, who had been three years in European employ, and intended proceeding to Yokohama in the *Kagosima*, had been on shore to see some friends before leaving. While walking along the street he accidentally jostled against a foreigner employed by Messrs. Alt and Co., who struck him over the head with a stick. He immediately retaliated by drawing his short sword, and stabbing him in the breast and back. He was immediately arrested and delivered over to the Japanese authorities. The prisoner admits having been under the influence of saki. When the *Kagosima* left on the 5th the wounded man was not expected to live.

CHINA.

TIENTSIN.

A correspondent at Tientsin, writing under date of the 24th May, says:—Two nights ago the sky was much overcast, and every one expected rain was at hand; but after a very slight shower the clouds cleared up and the wind got round to the north, bringing dust. It would appear this year that we are never to get rain. The whole of the north of China in the interior is suffering much from drought, and the mandarins in every district are every few days visiting the temples to pray for rain. At Tientsin the food of the people has risen considerably in price; and grain is being imported as fast as possible from the Leaoutung promontory. Besides what has come in junks, one foreign vessel has just arrived bringing a cargo of millet. Owing to the want of water in the canals from here to the interior, laden junks cannot transport their cargoes. The stoppage in the transport of imports on the water routes has caused the Shan-se traders to cease buying, and at present there has literally nothing been done by them in imports. Some Tientsin and Peking dealers have been buying to a very small extent a few imports, but the business done almost amounts to nothing in comparison with what would be done if the Shan-se men were operating. Rates quoted in the circulars may be considered under these circumstances almost nominal for British and American manufactures. In the opium market, however, there is some life, and sales of Malwa were made yesterday evening at an improvement upon the last quotations from this side, but at a fall on the rates of the previous days, some holders having given way in order to realise. There is a very fair demand for Malwa but no inquiry for Patna. The Tsze chuh-lin anchorage is crowded with sailing vessels, which have lately arrived from the south of China and Japan with southern Chinese and Japanese produce. As there are scarcely any exports offering, nearly all these vessels must leave for Newchwang and Chefoo in ballast.

Digitized by Google

SHANGHAI.

The outward French mail of 17th April arrived on 4th June, with telegrams to the 3rd May. Dates are now down to the 7th June.

Sir Rutherford Alcock had invited, previous to his departure for the Yang-tze ports, a committee of merchants for the purpose of suggesting alterations in the tariff, &c. A circular of the Chamber of Commerce announces that the following merchants had formed into a committee, and they invited the co-operation of other merchants:—Messrs. F. B. Johnson, G. Tyson, W. J. Bryans, A. Turing, E. F. Duncanson, W. Probst, E. Iveson, J. Hogg, W. Lemann, J. MacDouall, R. J. Fearon, M. S. Gubbay, W. H. Carter, A. A. Hayes, E. Borntraeger.

We hear that Sir Rutherford Alcock has had communication with the Taotai, relative to the ill-usage of the municipal policeman, and that the latter promised a strict investigation into the circumstances. The treaty Consuls, have, we learn, asked compensation for him equivalent to one year's pay. Several changes are, we learn, likely to occur shortly in the Consular staff at this port. Mr. Markham is spoken of as likely to assume charge of the Chinkiang Consulate, and Mr. Alabaster that of Chefoo; while Mr. Forrest assumes the post of Vice-Consul at Shanghai. We learn that a memorial to Sir Rutherford Alcock is in course of preparation, begging him to exert his influence with the Chinese authorities to secure the establishment of a river police. An application has, we are informed, been made to the Taotai, to allow the importation of articles destined for the new church, and for the Masonic Hall, duty free.

A meeting of shareholders in the Race-course has been d at which a dividend of 38 taels per share was declared. A sum of 3,497 taels, it appears, is due from the Recreation Fund for land sold them for the cricket and base ball grounds, and measures are to be taken for obtaining the immediate payment of the amount. A lease has been concluded with the Race Club, under which the latter agrees to pay 700 taels per annum.

A meeting of Treaty Consuls has been held, to discuss the proposed new rules on which the Mixed Court is to be conducted on the arrival of the Tung-chi, who is to be appointed to its separate jurisdiction.

Some shares in the Shanghai Dock Company have, we learn, been sold for 130 and 140 taels. The barquantine *Ta-lee* has been sold for 7,800 taels.

News has been received from Nanking of an important victory gained by Li-hung-chang over the Nienfei in Hoopeh, which is expected to lead to the surrender of one of their principal Wangs.

We hear, says the *Friend of China*, that Mr. Consular Assistant Beattie has resigned the British service at Newchwang, and so has Mr. C. Treasure Jones at Amoy.

The Customs' returns of imports into Shanghai, during April, show an increase in Grey Shirting from 186,449 pieces to 204,092; but a falling off in White Shirtings from 39,384 to 25,650. T-Cloths have risen from 3,990 to 43,013. American Drills stand at 46,010 pieces against *nil*. Camlets have fallen from 15,139 pieces to 5,180; Long Ells from 11,260 to 7,400. But Lustres have sprung from 14,968 to 43,793. Only 4,349 piculs of iron, and 1,042 peculs of lead have been imported, against 10,360 and 15,203 piculs respectively.

In the Bankruptcy Court Mr. James Dow appeared personally and prayed that his appearance might be accepted as an adequate surrender, he having been in England and unable to appear before this court when his partners surrendered. The application was granted.

In the American Court Henry Roundy surrendered, and the first meeting of creditors was held. There were present Mr. McDoual (Oriental Bank), Mr. McLean (Hong Kong and Shanghai Bank), Mr. Mouatt (for Mr. H. Wignall), and Mr. Endicott, who appeared for Mr. C. D. Nye, Messrs. A. Heard and Co., Captain Patridge, Captain Hutchinson, and Captain West. The insolvent did not appear, being unable to do so on account of illness. Mr. Endicott was appointed receiver. Several of the creditors objected to the amounts in the schedule, and we therefore defer publishing the assets and liabilities till the amounts are agreed to.

The case McLarty *v.* Macfarlane, recently tried before H.M.'s Supreme Court, though it involved only a very petty amount, brought to light an apparent laxity on the part of H.M.'s Nagasaki Consulate which will no doubt become the subject of further inquiry. The plaintiff took service, on the 19th December last, as second engineer of the *Island Queen*, signing articles for three months; the articles, however, containing a subsidiary clause that, in the event of the vessel being sold, he was to be given a passage to Shanghai from the port of sale, and to receive wages only up to the time of his arrival. The *Island Queen* went to Nagasaki, and lay there for some time, during which negotiations were entered into that appeared so likely to end in her sale, that on the 10th February the captain desired the officers and crew to attend at the Consulate, for the purpose of receiving their discharge. McLarty attended with the rest, but, unlike them, demurred to the legality of the discharge—inasmuch as the vessel had not been sold—and refused to accept it. Mr. Russell Robertson, H.M.'s Vice-Consul, endeavoured to overcome his objection, but according to plaintiff's distinct oath, and the captain's own admission, ineffectually. He steadily refused to accept the $55 tendered him, as other than part payment of his claim, and eventually left Nagasaki without receiving it, as the captain would not hand it over to him on these terms. After arriving in Shanghai he waited, apparently, till the 19th March, and then asked Captain Macfarlane, as owner of the steamer, for the balance of wages due under his three months' agreement, which expired on that day. Captain Macfarlane declined payment, and hence the present action. The action itself, however, as we remarked before, is comparatively unimportant. Its interest lies in the following extraordinary endorsement on the ship's articles, by H.M.'s Vice-Consul at Nagasaki:—

"I hereby certify that the within named John McPhie, chief officer, H. McLarty, second engineer, &c., &c., have been duly discharged by mutual consent, wages paid up to 15th instant, and a passage provided to Shanghai."

The whole evidence went to prove that the plaintiff had refused his discharge, and declined to accept the wages tendered him. An explanation, therefore, will probably be sought from the Vice-Consul of the reasons which induced him to say the discharge had taken place "by mutual consent," and that his wages had been paid. So long as the steamer was not sold, the clause rendering the agreement terminable in such an event had clearly not become operative. H.M.'s Vice-Consul seems, therefore, in the unpleasant position of having lent his influence to accomplish an illegal measure, instead of pointing out to Captain Shaw how illegal the action was, how immediate, at the time, the prospect of sale appeared. The sale had not been effected, and has not been to the present day. The negotiations fell through, and the *Island Queen* has returned to Shanghai, where she is again advertised to tow vessels in search of tea freight to Hankow. One principal object of the clause in the Merchant Seamen's Act requiring Consuls to examine into the grounds of seamen's discharge is their protection. Judgment was given by the Court for the plaintiff.

An address has been presented by the merchants at Kiu-Kiang on the desirability of obtaining permission to open up the Poyang Lake to trade, and to the running of steamers to ply between Kiu-Kiang and the principal places of trade on the lake as far up as Jaou Chow, distant 450 li, or say 150 miles, from Kew-keang.

The Municipal debt to the Comptoir d'Escompte has been paid. We are glad to learn that steps are being taken to resuscitate the Shanghai Club, on a new and better basis. The Taotai has deputed an officer to examine into the Woosung road difficulty, and has promised to pay tls. 500 towards the repair of bridges.

HANKOW.

The *Hankow Times* of May 25th states:—The market for the new season's teas was opened on the 23rd by the purchase of three chops Oopack (not the finest), at Tls. 31.50 to 32, and on the following day another chop was settled by the same buyer at Tls. 32.25 per picul. This range of prices is much higher than was generally anticipated, and excited considerable surprise, not only among foreigners, but also among the Chinese, who in their most sanguine moments never seriously expected more than Tls. 30 for even the crack chops. It is generally reported that these purchases have been made in execution of an order for the Russian market. It is satisfactory to notice that intending buyers for England decline to follow such a reckless example, and we feel assured they will be well repaid for their patience. Musters representing nearly 70,000 chests have already been put on the market, so that there is no scarcity of tea, and holders will

Digitized by Google

soon be glad to accept prices more in keeping with the present state of the London market, and such as will warrant the hope of a fair and legitimate profit being obtained by shippers.

The case of F. Carnie, on behalf the Commercial Bank Corporation (in liquidation) *versus* Ballance and Hallam, was heard on the 8th May, at the Hankow Consulate, before W. H. Medhurst, Esq. The petition of F. Carnie, the above-named plaintiff, shows as follows:—1. That on the 5th March, 1866, Messrs. Ballance and Hallam received on their promissory note, endorsed by Messrs. Preston, Breuell, and Co., of Shanghai, the sum of Shanghai Tls. 60,000, from the Shanghai Agency of the Commercial Bank Corporation, &c., for a period of four months fixed. 2. That after the due date of above promissory note, Tls. 51,000 have only been received as yet on account of the above-mentioned amount of Tls. 60,000—viz., on July 18th, Tls. 20,000; July 26th, Tls. 10,000; August 7th, Tls. 10,000; September 19th, Tls. 6,000; and November 8th, Tls. 5,000. The plaintiff therefore prays that the defendants be made to pay the balance—viz., Tls. 9,000 of their promissory note, with all interest and charges to date. The answer of Ballance and Hallam to the petition of the plaintiff was as follows:—That no notice of dishonour of the promissory note for Tls. 60,000 having been given by the plaintiff to the defendants at due date of the said promissory note, the defendants are relieved from all responsibility in respect of the same; and, secondly, that the fact of giving time to Messrs. Preston, Breuell, and Co., without any notice of dishonour having been given to the defendants, and the fact of Messrs. Preston, Breuell, and Co. paying interest on unpaid balances from time to time, proves that the bank virtually received a fresh promise to pay at some future date from Preston, Breuell, and Co., and therefore the defendants are absolved from further responsibility on said note.

Mr. Carnie gave evidence as follows:—In November last the Shanghai agency forwarded me the promissory note A., requesting me to collect the balance due from the defendants with interest at the rate of 12 per cent. from due date; and in the event of their not complying with the demand, to place the matter in the hands of the Consul. On receipt of that letter I wrote to the defendants requesting payment of the balance on the note. Their answer was that they could not pay it, or something to that effect. I have not got the copy. (Answer produced by defendants.) I thereupon sent the note to the Consulate to be protested, and requested the Consul to take proceedings against the defendants. I now produce the note of protest. I can produce a document showing the note to have been presented to Preston, Breuell, and Co. on the 28th November, 1866, and duly protested before H.B.M.'s Consul at Shanghai. (Document produced.) I am not in a position to say whether the note at maturity was duly honoured. I cannot say whether Preston, Breuell, and Co. were applied to for payment at due date. I do not consider that it is always necessary to give notice of dishonour to the makers of a note. I could not say whether the balance on the note was ever passed to the account of Preston, Breuell, and Co., with the bank. I have no copy of Preston and Breuell's account current with the bank to show that such was not the case. I could not say whether interest on unpaid balances was ever paid by Preston, Breuell, and Co., or passed to their account. I do not think it could have been or I should not have been called on to collect interest. I could not say whether the bank had any understanding with Preston, Breuell, and Co. that they should not be pressed for immediate payment of the note. It is very probable that the bank had some such understanding, otherwise the note would not have been allowed to remain over so long unpaid.

On the part of the defendants evidence was given that the note was not protested until the 28th November, whereas it ought to have been presented for payment and protested at due date. We received no official notice of the dishonour of the note at due date. I produce a letter which I wrote to the manager of the bank at Shanghai with reference to this note (letter, Ballance and Hallam, dated 19th July, 1866, produced). To that letter we have never received any official reply, in fact, no material reply at all. After hearing the above evidence, the Court gave the following decision:—That the plea raised by the defendants as to the note's not having been duly presented or protested at due date, can have no force as against the fact that the defendants not only were parties to certain payments on account since the due date of the note, but actually requested the acceptors to make arrangements to let the note remain over for a short period, and recorded no protest against their own eventual liability. Even granting what the defendants plead further—namely, that the bank virtually made fresh engagements with the acceptors for payments on account—this does not free the defendants from liability, inasmuch as they made no effort, although aware that the note had not been fully met, to protest against their responsibility on the note being allowed to run on, and inasmuch as they never attempted to recover their note, although debited by the acceptors with the full amount in their account current. The Court are therefore of opinion that the defendants are liable for the amount of the balance claimed on the note, tls. 9,000, but without interest. Costs to be divided.

Messrs. Francis and Co.'s Kiukiang Tea Circular of June 1st states:—The Ningchow teas have not yet commenced to arrive, and a muster of one parcel only has been shown on the market. The purchase of the leaf in the Ningchow district is proceeding very slowly; prices have fluctuated during the fortnight, and by last accounts were nominally at the equivalent of about Tls. 23 here, but buyers were holding off for lower rates.

FOOCHOW.

A very interesting letter on the subject of tea will be found in another column. We take the following from the *Foochow Advertiser*:—

The tea market has been opened in the districts of Yang-how and Sui-kau at rates varying from 12 to 13 taels cheaper than last year; the estimated lay down cost at Foochow will be 25 to 30 taels. The quality of the new tea is reported to be much superior to last year's. Some fears are entertained that the present crop of tea will be injured owing to the long-continued and incessant rains. As tea is so sensitive to damp, it is quite possible that boxes on arrival in England will be found below proper condition, but otherwise, as there has been time to pluck and dry the tea before the wet weather really set in, there ought to be no reason why the tea should not be as good as usual. The Chinese are quite anxious about the approaching opening of the market; they fear that prices will be too low, and, whether feignedly or not, they anticipate a bad year for them. Very likely they feel that foreigners are not about to give them the former high prices for tea; that the lessons which have been so hard to learn have not been thrown away. One particular source of disquietude to the Chinese is the absence of the clippers at this time of the year. They had got the idea that because a clipper was in, she must of necessity be despatched without delay; now they see the clippers still conspicuous by their absence from our port, and they reason therefore that the foreigner is in no hurry, that he has got plenty of time to spare, and does not want to purchase tea at present.

It was reported on Sunday morning, May 25, that the tea-market had been opened, which report in the course of the day became contradicted. On Monday morning, however, there was no longer room left to doubt that the market had opened. The report of Sunday morning stated that the tea-market had opened at 25 to 29 taels: the actual fact is that it has been opened at a slightly higher rate, 26 to 30 taels.

The same journal, under date June 1, says:—

The *Maitland*, the *Serica*, and the *Taeping* had left; so far then we shall have a race this year between these three clippers—but what has become of the *Ariel?* We fear her chance of starting fair for the ocean race this season is gone. We regret this, as she would have added so much more to its interest. Freight is low for first clippers, being only £4 per ton without the additional 10s. per ton to the first home arrival. Notwithstanding this, we hope the ships will manifest their sailing qualities after the old style, nor abate aught of their former competition. The news by last mail being of nothing but rumours of war, we should naturally have supposed that in the face of such a gloomy array of intelligence purchasers of tea would pause, still there was no such manifestation; and only yesterday, after 60,000 chests of tea had been settled and when 3,000 more were all that remained on the market, was any slackness visible. Buyers ceased to buy by force of necessity; because there was not enough for them to buy. Yesterday the market was stiff from the small quantity (3,000 chests) of tea available and prices were tending upwards. The Chinese allege the present sudden and apparently causeless floodings of the river (for the rains have ceased) to be the reason why teas are so scarce—the joss water as they call it preventing teas coming down. This may be part of the truth, though certainly it is not nor can be the whole. We suspect that the Chinese are under

Digitized by Google

good leadership, and if we should hear that they have been endeavouring to force their own prices on the foreigner by keeping the stocks in market low, we should not be surprised.

A correspondent of the Shanghai *Recorder*, May 29, says :—"The following fact may be interesting to the tea trade. The market this season was opened by the purchase of a 'Chong Hing' at taels 32, similar in quality and make to the same chop bought last year at taels 36. The tea at taels 32 will lay down at 2/1½; and a portion of the chop bought last year at taels 36 was advised as sold at 1/11½, by the 18th April mail. Has the latter lost 2d. a pound in value by being kept for a year?"

It is expected ere long that thirty mechanics and engineers with a medical man will arrive at Foochow to commence operations in connection with the Government Dockyard there. In addition to the Europeans there will be a thousand soldiers established at the Dockyard, and the whole, Europeans and Chinese, high and low, will be under the orders of a former governor of one of the two Kiang.

CANTON.

The following letter of miscellaneous news is dated from Canton, by which it seems that something like the old fire and spirit of the place are returning :—

The preliminary step in the way of building on the old factory site has been taken by the erection of the wall being commenced, which is to encircle the space. In addition to two spacious premises there are to be godowns for each firm, which accounts for the large space that will be taken up, judging from the one side of the wall now going up, beginning from where used to be the gate of old China-street, and terminating at what used to be the entrance to Chow Chow hong. The ground is to be raised three feet from the present level, and the wall is to be about seven feet high.

The British flag is not the only piece of bunting which renders the buildings on Shamien conspicuous. The Portuguese flag is already flying, and the Danish flagstaff is in course of erection. Canton generally seems to be progressing, and before very long it is possible that she will again rise in rank amongst the Treaty Ports.

The U.S. steamer *Ashuelot* turned up here on the morning of Wednesday last, and is lying in the stream. She has not been reported in Hong Kong, consequently she must have shaped her course direct to this place from the scene of the *Rover's* wreck, whither she was last reported to have proceeded.

The little steamer *Feewan*, it is stated, has been purchased by the owner of the *Spark*, and is undergoing extensive alterations, by which it is expected she will be considerably improved and become a worthy successor to the *Spark* on the Macao route. The history of the doings of the last-named vessel on the Pearl river, in the days when *taipans* even of high standing did not scruple to dodge the lynx-eyed Customs' officer, would afford ample materials for a series of interesting lectures. As the alpha and omega of the *bonn fide* American river steamers, the *Spark* has proved herself to be the luckiest craft on the Pearl river, and indeed well deserves to be kept in a framework of glass as a memento of her past valuable services, of which her owner has every reason to be proud. The *Feewan* has assumed the name of *Spec* with the change of ownership.

It appears that the bonus to the pushing skipper for landing the first cargo of new teas in London, and the eagerness evinced by *taipans* to be first in the market, have not been quite done away with, judging from the fact of the clippers from Whampoa being despatched in such hot haste as to necessitate the tea stores being kept at work day and night. The *Min* was, moreover, towed down by the *Jeejeebhoy* as far as Lintin, in order that she might not be many days behind the *Belted Will* and *Deerfoot* from the starting point. And our market for new teas seems to have also undergone a marked change, if that commercial authority, *The China Trade Report*, can be depended upon ; according to which, "25 to 26 taels were, as a rule, this season opening rates for Scented Capers ;" but under the head of "Sales Reported" it is recorded that this description of tea has found purchasers at "30 to 34 taels." If it is not for the eagerness as to who will be first with new teas, how could the market have been so influenced as to establish an advance of 5 to 8 taels on the reported opening prices, and why should the aid of steam be likewise availed of?

The wall which is to encircle the American bund on the old factory site has been carried forward eastward, from its last reported terminus to as far as the creek dubbed as the "Never-failing Source of Abomination." From this extension of the wall the space to be taken up becomes clear, which the old residents will at once understand when it is stated from Jardine's to King's hong, comprising a square of 500 by 350 feet, to be divided into four lots to build upon with a garden frontage or promenade. The premises of the two firms who have already contracted for building, will occupy one of the lots, consequently the remaining three will perhaps be open to the highest bidder. The matsheds and shanties have all been taken down, and the masons are now going ahead with their work.

HONG KONG.

From this port we have advices to the 13th of June. The outward mail of April 26 was delivered on the 4th of June.

The case of Leibert and Mendel, of Manchester, against the owners of the *Min*, for delivery of goods to the order of the the Chartered Bank and the Comptoir d'Escompte, originally consigned to Lyall, Still, and Co., bankrupts, was tried in the Supreme Court, before Judge Smale and occupied three days. The Jurors were as follows :—Messrs. D. Welsh, A. Sassoon, A. Coxon, H. Burrows, A. M'G. Heaton, C. T. Smith, and A. Eimbeke. For the plaintiffs there appeared Mr. Pollard, Q.C., instructed by Mr. Caldwell. The Attorney-General and Mr. Whyte, instructed by Mr. Hazeland, appeared on behalf of the defendants, and of the firms who had stopped the goods in question in the Hong Kong harbour.

Mr. Pollard in conclusion, said there was an absolute delivery of the goods in London by the delivery of the bills of lading, and a cessation of transit. The Attorney-General had said that if Lyall, Still and Co. were insolvent there was *mala fides*, and that if the banks knew it, the defendents were entitled to a verdict. He quoted a case in which a man who knew of the insolvency asked security on that ground, and was upheld. There were the vendors' carriers and the vendees' carriers, which explained the transmission links mentioned by his learned friend ; and it was very certain that Liebert and Mendel never intended to have control over the goods after they went into the hands of Lyall and Still, of London. And, in conclusion, the learned counsel demanded a verdict for the plaintiffs, because the defendants had not paid for the freight, insurance, and the three half crowns upon the goods. There was not a case in the books where the stopper did not pay those expenses. His case was one throughout consistent, while the current of authorities went with him. He gave little heed to what had been said of flourishes of trumpets ; those who won were entitled to flourish, and he thought the defendants ought to be glad to be able to retire at all. The Chief Justice then summed up for the jury, leaning rather to the side of the defendants, the unpaid vendors of the goods. But the jury, after an absence of only ten minutes, brought in a verdict for the plaintiffs.

The energy now imported into the magistracy, under Messrs Goodlake and Smith, says the *China Mail*, is remarkable, and, as affecting the officers of the Court, sometimes rather amusing. Instead of the quiet, half-asleep half-awake sort of jogtrot formerly the rule of the day (and also of part of the evening), there are now frantic rushings here and flurried runnings there, with the perspiration coursing down the cheeks of those thus affected. True, this does not last long ; but it is hot work while it does last, especially in weather like the present. Both the present magistrates appear to work in concert, much more smoothly than the two gentlemen who occupied the bench a month or two since. An hour or two of duty in the early part of the day and the business of the Court is, as a rule, at an end. This is chiefly owing to the plan adopted of both magistrates sitting together every day, instead of one sitting every alternate day, as formerly.

There are some curious reports in circulation relative to the attitude of Russia with regard to the foreign Customs in China which it is just as well that the public should have cleared up. It has been stated by well informed persons that the Chinese Government, acting in concert with Mr. Hart, the Chief Superintendent of Customs, intended last year to establish a Custom-house, under foreign inspection, at Chang-Kia-Kow, or one of the northern frontier towns through which the bulk of the Russian export and import trade passes between that empire and China. The subject was seriously discussed at Peking, as being very desirable to apply the same means for collecting revenue from the Russian trade that are now employed for levying duties on other foreign nations, and also to collect by such means more correct statistics of the Russian trade than are now known to the public. It was confidently expected that the opening of the Russian frontier foreign

Digitized by Google

Custom-house would have taken place this spring, but, for some reason which has not yet transpired, the establishment of the useful institution has been adjourned *sine die.*

The accounts by this mail from Hong Kong relative to the Mint are more encouraging. A considerable quantity of ichibous have been received for coining, and the bankers and merchants are again sending in silver for conversion into dollars, which are at a premium. A quarter of a million of 5-cent pieces are in process, and altogether there is enough on order to nearly pay the expenses of the establishment, which will no doubt be kept open for a further trial.

The Italian ship *Teresa*, Captain Sebastian Rollo, was the scene of an extensive robbery of jewellery, &c., on Saturday last. A cook and steward, who were employed on board, and seem to have enjoyed the confidence of both the captain and his wife, are supposed to have been the thieves. The cook is now in custody charged with the offence; but the steward (who is believed to have been the man who actually committed the robbery) has disappeared to parts unknown. About $500 worth of gold pieces, nearly $100 in silver and notes, two valuable bracelets, one necklace, a costly crucifix, a gold breast-pin, and a gold ring, are included in the extensive annexation carried into effect by the steward referred to. The property, all told, amounts in value to $2,000; and the fact of its disappearance is only another proof of the mistaken notions entertained of the Chinese character, and the costliness of the experience of its true nature. A shopkeeper of West Point is supposed to have been in league with the two servants on board the ship; and all three are suspected of having shared in the proceeds. Some $700 or more of the property has been recovered, and the manner of its recovery was most remarkable. On Sunday morning last the cook was arrested on suspicion of having been one of the men who chased and threatened the sweetmeat hawker who gave evidence in the Tank Lane murder case. His arrest on this ground was found to have been a mistake, and he was just on the point of being released, when a 'cute sergeant suggested that the prisoner should be searched. On his person were found the necklace, a bracelet, 20 ducats, and $16, which altogether amounted to over $700, and is supposed to have been the third allotted to him for his share in the outturn of the robbery. Both the articles and the possessor were identified; and the case stands over now pending the arrest of the other delinquent, but it is very doubtful if his capture be possible.

H.M.'s surveying vessel *Sylvia*, which arrived at Hong Kong on 27th May, left Plymouth 26th November, calling at Madeira and St. Vincent, arriving on 4th January at Rio de Janeiro, leaving on the 11th, and arriving at the Cape of Good Hope 4th February. H.M.S. *Valorous* was in Simon's Bay. The *Sylvia* left the Cape on the 17th, and on the 24th February, in lat. 39 deg. 47 min. S., lon. 35 deg. 10 min. E., she stopped to sound on one of the Vigias, shown on the chart of the Indian Ocean, called the Hudson Rock, supposed to be ten feet above water, and obtained 1,950 fathoms, fine sand. Arrived at Trincomalee, Ceylon, on the 1st April. Left for the Andaman Islands for the purpose of determining the positions of several prominent points and islands, and also to visit the lighthouse erected on Table Island of the Great Coco's Group. Crossing to Martaban, a line of soundings down the coast of Malay to the Straits of Malacca was obtained, as also a line from Saigon to Hong Kong for telegraphic purposes. She left Singapore on the 14th May, arrived at Saigon on the 18th, and this port on the 27th. The *Sylvia* has come out for the express purpose of surveying the coast of the Korea and Japan.

The local occurrence of most general interest during the last fortnight is the robbery of the powder magazine, under very peculiar circumstances, which subjected the whole city to the danger of destruction.

The Sikhs who are to replace a portion of our police force arrived in the *Clan Alpine*. We find the following particulars relating to their engagement in the *Friend of India*:—"On 29th April Mr. Creagh, Assistant District Superintendent of Police, left Lahore *en route* to Hong Kong, taking 120 Punjabis to serve as policemen there. The men are to receive Rs. 10 a month until they reach Calcutta. On landing at Hong Kong they will be divided into three classes, drawing Rs. 20, 25, and 30 a month; these will form the rank and file, and over them there will be the usual proportion of native officers. The men are engaged to serve for five years, after which they are entitled to a free passage to Calcutta, or may re-enlist for five years more, when they become eligible to a pension equivalent to one-fourth of their pay besides. The *Indian Opinion* remarks that the experiment is an exceedingly interesting one at the present time, when the subject of Sikhs for the protection of our colonies is so widely agitated." They are a fine body of men. They have commenced active duty, and appear able to perform it effectively. A large number of the Hindoo police have been discharged. In connection with this me may mention that Mr. Creagh has been appointed assistant superintendent of the Hong Kong police.

M. Pio Marques has been appointed temporarily as British Consular agent in Macao.

The following notification has been issued:—

Mr. W. R. Dalziel being about to proceed to England, Mr. William Macaulay will act as the company's superintendent at this Port from the present date till further notice.

THOS. SUTHERLAND,
for the Managing Directors,
Peninsular and Oriental Steam Navigation Company.
Hong Kong, June 8, 1867.

JAVA.

BATAVIA.

Dates hence are to the 15th of June.

On the morning of the 10th of June the centre of Java, from shore to shore, and over a length of some hundred and fifty miles, was shaken by a severe earthquake, the full force of which seems to have fallen upon the town of Djoekjoe, where many buildings have fallen in, and none escaped serious injury. At many other places, also, ranging from Samarang to Cheribon, the same disasters have occurred, while some hundred lives have been lost, of which twelve to fourteen are Europeans.

Some five years ago a Mr. W. Major, a merchant at Passaroeang, in Java, died in the Red Sea, on his way home to England, and amongst other gifts he left a splendid house, with spacious outhouses and grounds, valued at 40,000f., along with other property valued at 100,000f., at the disposal of the Java Government, provided they complied with the testator's conditions of turning his property into a Native Hospital at Passaroeang, as well as maintaining the same in an efficient condition, failing which, the whole property was then to revert to the Batavian Parapattan Orphan Asylum. The Government has taken five years to decide the question, and concluded the other day by declining the noble gift. Now the directors of the Asylum step forward, and finding the property seriously deteriorated in value during these five years, threaten to come upon the Government for the difference, as a penalty for inaction, and very possibly justice will support them.

The Mecklenburg brig *Diederich Pentzien*, Captain Johannsen, which left Singapore for Melbourne on the 24th of May, with a full cargo of Straits produce, struck on a rock in Carimatta Passage, and became a total wreck. The crew were saved in boats, and have arrived in Batavia.

STRAITS SETTLEMENTS.

SINGAPORE.

The London mail of the 10th May arrived out at daylight on the morning of the 10th June, by the P. and O. steamer *Ottawa*, the transit having been accomplished in the remarkably short time of 30 days and some hours. Telegrams by this opportunity extended to the 29th May. The French steamer *Labourdonnais* arrived with the Marseilles mail of the 17th May on the 20th June, with telegrams to the 7th June. Dates are to the 21st June.

The fortnight (says the *Straits Times*) has not been distinguished by any events of political significance. The absence of his Excellency the Governor and the recess of the Legislative Council having afforded a measure of breathing time to succeed the somewhat over-strained exertions of the new Government. So far as general activity is concerned, the colonial system is in strong contrast to that of India, under which the Settlements have been reared, and with a little modification, which time and experience will doubtless teach how to apply, there can be no doubt that many of those benefits in view of which the transfer of the Government to the colonies was urged forward, will be realised. At the same time, there prevails a general opinion that any sudden alterations should be avoided, and that, both in respect to the antecedents of the place and to the novelty of the position, at least for some time to come, matters should be allowed to proceed pretty much in the accustomed course.

On the 19th June his Excellency the Governor returned from Penang, and there was a meeting of the Legislative

Digitized by Google

Council, when, in addition to the consideration of some measures of local improvement, the question of the purchase of a new steamer for colonial service in the Straits was brought forward, and we are glad to learn that no such extravagant notions are entertained by Government on the subject as were originally represented. It will be for the Legislative Council to say whether or no a steamer be required at all for special service in the Straits—a question which ought to be very deliberately weighed—and if so, what is the class of boat that would be best suited for the purpose. At all events it is satisfactory to find that no arrangement is to be entered into precipitately in the matter. A somewhat unfortunate *contretemps* has taken place between one of the new officials, acting as Commissioner of the Small Cause Court, and a much respected member of the bar of the Supreme Court, leading to the commitment to gaol of the latter, due greatly, it is to be feared, to a want of experience of the Acting Commissioner.

The British barque *Othello*, from Manila bound to Sydney, with a cargo of sugar and hemp, was picked up at sea on the 27th May, by the British barque *Zoe*, and brought to this port in charge of the chief officer and part of the crew of that vessel. The *Othello* was abandoned on a sunken reef in the China Sea on the 21st May.

PENANG.

From this port we have dates to the 24th June. The following items are from the *Penang Gazette*:—

His Excellency the Governor has returned to Singapore after a stay here of about twenty-two days. The usual salute was fired. Col. A. E. H. Anson, R.A., arrived here on the 8th June and assumed office as the Lieut.-Governor of this place on the Monday following. From some oversight the customary salute was not fired on that occasion, but the mistake was repaired the next day when thirteen guns were fired from the fort, and the oaths of allegiance and of office were administered by the Acting Chief Justice in the Court House.

In a late issue we gave an account of a proposed floating dock. Since then from one or two causes, it is thought preferable to have a graving dock instead, and accordingly Mr. Lyon has been lately occupied in looking out for a suitable place for its erection, and he has pitched upon the site of an old mud dock in the river Prye, a short distance from its mouth, in which years ago several vessels had been repaired. It is now thought that it will form an admirable situation for a graving dock, especially as about half the work is already done, and there being besides about five fathoms of water close by. It will be 300 feet in length, and 54 feet broad at the gates, and calculated to repair a vessel of 2,000 tons. The estimated cost without the ground is $25,000; the cost of the ground should be very small, as it is only mud with some mangrove trees, at present of no use. It ought to prove a profitable speculation, as during the year there are often a good number of vessels which undergo repair here, and, besides, the knowledge of there being a repairing dock in Penang would attract many more. We recommend this to the attention of all interested in shipping.

A still better project of Mr. Lyon's and one which would be exceedingly useful here is a small steam passage boat for the province. According to his estimate, the cost will be $3,000; the dimensions are, length 56 feet 6 inches, beam 10 feet, draught of water 3 feet 3 inches, and consumes only 1½ ton of coal. She will carry 65 passengers each trip, and would be available besides for occasionally towing vessels into and out of berth. It seems a very feasible undertaking, and we wish it success.

LATEST TELEGRAMS.

At Manila	6	ditto	4s. 4d.	4s. 5d.

At Shanghai, bills on India, Rs. 301 per 100 taels. At Hong Kong, Rs. 219½ per $100. Bar Silver at Shanghai, tls. 111.8.0; at Hong Kong, 11 per cent. premium. Mexican dollars at Shanghai, tls. 75 1-5 per 100; and exchange on Hong Kong, 27¼ discount. Hong Kong and Shanghai Bank shares, 1 to 2 dis.; Gas Company, par; Hong Kong and Whampoa Dock, 20 to 30 per cent., prem.; Union Dock Company, 25 per cent. dis.; China Traders' Insurance, 1½ per cent. premium.

The following is from Sharp and Co.'s Circular:—

Gold.—The small supply of Gold, and large demand for remittance has caused a further rise of 1½ per cent. in the value. The imports, chiefly in transit, amount to $300,000 worth; the exports to $560,000, including the shipments per Carnatic on the 30th ult., and excluding those to leave to-morrow.

Silver.—Receipts have been $750,000, say one-half in Silver Boos. $1,240,000 have been sent away South. No Bar Silver now remains on the market.

Dollar Currency.—Total amount inwards $330,000, outwards $2,750,000, all of which latter sum, except about 5 lakhs, has been sent to Foochow and the North against tea purchases. Ferdinand Dollars are again current at par. Hong Kong coinage are worth a small premium.

Exchange has fluctuated more than usual during the fortnight. For India opening at a slight advance on the last mail's closing rates. Pending the result of the Commissariat drawings, the sterling rate also advanced, but has since again receded to quotations.

Discount and Mortgages.—Only first class bills are discountable at a moderate figure; the difficulty of obtaining money, even on good securities, except at extreme rates, is being seriously felt, and calls for some amelioration.

Shares.—All descriptions of shares have been very quiet, the market being rather in favour of buyers.

COMMERCIAL REPORT.

CHINA IMPORTS.

HONG KONG.—There has been rather more doing in Grey Shirtings, but at a slight decline for weights up to 8.8lb. Above that values show a marked decline. White Shirtings are quite neglected. Stocks are large and dealers unwilling to purchase. T-cloths continue in some request at about former prices. English Drills are lower, and holders of American goods have had to make further concessions to effect sales. Grey Shirtings, 7lb., $2.95 to 3; sales, 5,000 pieces; 8lb. $3.30 to 3.35; 8.4lb., $3.40 to 3.42½: sales, 15,500 pieces; 8.8lb. $3.47 to 3.50; 9lb. $3.80 to 3.85; 9½lb. $4 to 4.05; 9¾lb. $4.40 to 4.50: sales, 1,000 pieces; 9¾lb. $4.65 to 4.70; 10lb. $4.90 to 5: sales, 800 pieces. White Shirtings: 54 to 60 reed, $2 70 to 3; 64 to 66 do., $3.30 to 3.50; 68 to 72 do., $3.70 to 4.50: sales, 300 pieces. English Drills: 40-yards, $4.80 to 4.90; 30 yards, $3.20 to 3.30: sales, 300 pieces. American Drill, 40-yards, $5.50 to 5.60 per piece; sales, 1,500 pieces;

Digitized by Google

30-yards, $4 to 4.10. American Sheetings: 12½ lb., $4.40 to 4.60; 14 lbs., $5 to 5.20 per piece. T-Cloths: 6 to 6.2 lb., $2 35 to 2.40; sales, 10,500 pieces; 6.5 to 6.8 lb., $2.50 to 2.60; sales, 1,000 pieces; 7 lb., $2.80; sales, 5,000 pieces; 7.2 lb., $3; 8 lb., $3.40 to 3.50; sales, 3,700 pieces; 8.4 lb., $3 50 to 3.75; 9 to 10 lb., $3.75 to 4.10. Brocades: White, $3.70 to 3.80; assorted, $4.70 to 4.80. Spotted Shirtings: White, $3.50 to 3.60; assorted, $4.40 to 4.50; sales, 500 pieces. Turkey Red Shirtings: $3.25 to 3.75. Chintzes: $2.20 to 2.45. Shipments to the North have reduced stocks of Long Ells and Spanish Stripes, both of which are dearer. Other descriptions are unchanged, but Lastings and Camlets are weak. Long Ells: H Scarlet, $9.50 to 9.60 per piece; sales, 340 pieces; H assorted, $8.70 to 8.90; sales, 480 pieces; H H Scarlet, $9.60 to $9.80; H H assorted, $8 90 to 9 10, Spanish Stripes: Scarlet, 88 to 95 cents. per yard; sales, 54 pieces; assorted, 85 cents to $1. Blankets: 10 lb., $5.50 to 6.25 per pair; 7 lb., $3 80 to 4. Lastings, $17 to 18 per piece; sales, 100 pieces. Camlets: $17 to 23.75; sales, 75 pieces; Dutch, $26 to 30 per piece. *Metals.*—Iron of all kinds is very firm. Lead dearer. Tin has been quitted to some extent on lower terms. Tin Plates unchanged. Quicksilver dull. Iron: Nail-rod, $3.40 to 3.50; sales, 2,520 piculs; square, round, and flat bar, $3.10 to 3.20; sales, 350 piculs; hoop, $3.60 to 3.80; wire, $7.50 to 8.25; sales, 130 piculs. Steel: $4.50 to 5.50 per tub. Lead: $6.50 to 6.80; sales, 410 piculs; W.B., $7.20 to 7.40. Tin: Malacca, $20.50 to 22; sales, 2,300 piculs; Straits, $18 to 19; sales, 180 piculs. Tin Plates: $6.50 to 7.50; sales, 950 boxes. Quicksilver: $65; sales, 50 flasks. Spelter: $8.60 to 7. *Coal.*—Stocks light, and very firmly held. English, $15.50; Welsh, $16.50; Sydney, $12, from ship's side; anthracite, $14.75 to 15—sales.

SHANGHAI.—The telegrams brought by the French mail have allayed the fears of war, and a hopeful tone pervades the market; both dollars and exchange have slightly advanced. Without having any great change to note, it may be said that dealers evince rather more disposition to buy Grey Shirtings, for which there is some demand for local consumption, Ningpo, and the river ports. At Tientsin business is suspended by the drought, the canals and creeks being too low to admit the navigation being carried on. The present dulness may partly be accounted for by its being the periodical or half-yearly settling amongst the Chinese. In a few days demand may increase. There has been some inquiry for goods for Japan. Grey Shirtings: 8 lb. 4 oz. may be quoted firm at Tls. 2.45 for common chops, and at Tls. 2.57 for best eagles. T-Cloths: Without change, best cloths in 7 lbs. Tls. 2.40 to 2.45. White Shirtings: Nothing done and quotations are quite nominal. Camlets: Are still lower; sales of fairly assorted S.S. having been made at Tls. 13.30 per pce. Spanish Stripes: Are without change; a small inquiry exists for scarlet at good rates. Long Ells are quiet, and there are now more sellers than buyers; prices show no change. Figured Orleans: Very few transactions reported, and prices tending in favour of buyers. Lastings: Assorted are dull of sale. Black have been placed at Tls. 14.50 per pce. Metals: The arrivals noted in issue of 1st June having increased Stocks, dealers have fairly supplied themselves, and the market is quiet, but with a good current demand at quotations. Coals: The cargo of the Dorothea is the only one on the market. A small cargo of Sydney has been sold at the extreme rate of Tls. 12.50, but this was an exceptional transaction. Stocks very light. Cardiff, from ships' side, Tls. 16, N. Wales 15, English 14 to 15, Anthracite 12.50 to 13 nominal.

YOKOHAMA.—Money is still very scarce with our customers, and whatever dollars they get for the small lots of Silk sold, are chiefly required for fulfilment of their contracts for Rice and Sugar. Deliveries of these necessaries of life have constituted the main business of the fortnight. We remark with much pleasure a growing improvement in the behaviour of the Japanese respecting their contracts. They have, in many instances, shown very good faith, taking delivery of China Rice by no means up to muster, at a fair reduction on contract price, instead of throwing up their bargains altogether, and making fresh and more advantageous arrangements, as they might easily do. In Grey Shirtings a good inquiry exists and stocks are considerably reduced. Sales are made to arrive at better prices than can be got for goods on the spot. The inquiry for Yarn continues and stocks are almost exhausted. Woollens are dull; an inquiry has sprung up for Alpacas. Metals are not much asked for, with the exception of Hoop Iron and Tin plates, and prices are unremunerative. The impression is gaining ground that the opening of the new ports will not materially affect the Yokohama market.

CHINA EXPORTS.

TEA

YOKOHAMA.—The season closes with an unsold stock of about 2,200 piculs, chiefly of inferior and unsaleable character. About 40 piculs of new crop from the Shimosa district is on the market and fresh arrivals are daily expected. Dealers are very firm in their demands, but no settlement has yet taken place to enable us to establish a quotatation. A very small parcel, for which a fancy price was given, went by the Colorado. Business is quite at a standstill, the only purchases made during the fortnight having been to close up shipments per Lord Collinwood to London and Colorado to San Francisco. They amounted only to about 800 piculs.

CANTON.—The business transacted in teas during the fortnight has been small compared to that reported on the 28th ultimo. The principal settlements have been in Scented Orange Pekoes at a decline of 3½ to 4 taels upon previous quotations. One chop of Country Congou has found a buyer at 2½ taels. Stock is now 9 chops or 4,020 packages. In Canton Congous a settlement of 500 packages is reported at taels 24½ to 25½. Canton Gunpowders and Young Hysons sales amount to 1,000 boxes each at taels 22 to 28½ for the former, and taels 23 to 26 for the latter. The offer of 38½ taels proportion for the three chops Country Greens has not been accepted, and the stock remains the same, say three chops, without any inquiry. Settlements have been—Country Congous, 1 chop at 21½ taels; Scented Orange Pekoe, 13,000 boxes at taels 24 to 32; Scented Caper, 7,000 boxes at taels 24 to 31; Canton-district Congous, 500 boxes at taels 24½ to 25½; Gunpowders, 1,000 boxes at taels 22 to 28½; Young Hysons, 1,000 boxes at taels 23 to 26.

FOOCHOW.—Messrs. Fussell and Co.'s circular says:—We have now to advise the opening of our market most prematurely (and at prices considerably above what the teamen were prepared to accept) on the 26th ultimo by the purchase by one firm of about 10,000 chests Congou from Yung-How and Soey-Kut districts at Tls. 28.8 to 32.8 ship off price. It is a matter of much regret that foreigners should have again proved themselves so eager to commence operations, as the stock of Congou on the 26th May only amounted to 40,000 chests, and a very large quantity came to hand within the next two days, and we confidently assert that the teamen were fully prepared to accept at least 2 taels per picul less than the prices which were paid them for opening the market. A large business has been transacted since the opening and prices have steadily hardened, and we now have to report an average rise onall grades of Congou of about 3 taels per picul. Our opinion of the quality of the crop is that medium, fine and finest congous are fully equal to those of last year (the latter grades being by no means in full supply), commoner grades are decidedly inferior, more particularly those from the Sar-Yune and Yung-How districts, containing a very large proportion of old leaf. This fault, however, is apparent throughout the whole crop. The teas generally are well fired, and we think will improve on the voyage home, instead of deteriorating as they did last season. Prices as compared with last year show an average reduc- of about 6 to 7 taels per picul. Oolongs have arrived in fair quantity, and prove to be well made and fresh, but deficient in strength; prices compared with last season show a reduction of about 4 to 5 taels per picul. Scented tea are very well made but deficient both in strength and scent. Prices 2 taels lower than last year. Souchongs and Flowery Pekoes: No musters yet to hand.

SHANGHAI.—There has as yet been no business in *Black Teas.* Two chops only of new tea are on offer, for which the holders (native) cannot obtain the equivalent of Hankow rates. Beyond these, the teas received have been in transit. The crop, as far as we have yet seen, appears to be below the average in quality, the bulk of the samples exhibiting a marked absence of strength. The Ningchows shortly expected from Kiukiang are better spoken of; the finest teas from that port have not yet been shown. It is generally expected that on the arrival of teas from Hankow in quantity, a decline on this market will have to be submitted to. Re-shipments, 700 chests. Stock, 1,500 chests. Total settlements, with re-shipments from the river ports, from 1st June, 1866, to 31st May, 1867, 332,000 chests, against 275,000 chests last year In *Green Teas* two small chops of old tea have been settled at about former rates. Prices are said to be lower in the country, finest Moyunes having been bought to lay down here at 35 taels, being about 6 taels cheaper than last year. The yield is expected to be more plentiful this season owing to all the districts being now entirely freed from local disturbances. The settlements comprise, 530 half-chests common Fychow, at 21.5 taels; 530 half-chests medium Pingsuey, at 29.5 taels; total, 1,600 half-chests. Reshipments, 1,100 half-chests. Stock, 7,000 half-chests, against 1,000 half-chests at same date last year. Total settlements, with reshipments from the river ports, from 1st June to 31st May, 1867, 365,200 half-chests, against 287,500 half-chests last year.
